## Introduction to User Topics

The *User's Guide* helps you learn about and efficiently use PolicyTech.

To get started, please read the following introductory topics:

[The Publishing Process](#)

[Roles and Permissions](#)

[Logging In to PolicyTech](#)

[Changing Personal Preferences](#)

[Resetting a Forgotten Password](#)

[Working with My Tasks](#)

## The Publishing Process

All documents and questionnaires created in PolicyTech must go through the publishing process before they can be assigned to users (assignees). There are seven possible stages or statuses in the publishing process: Draft, Collaboration, Review, Approval, Pending, Approved, and Archived.

The process starts when a document or questionnaire owner writes the original draft of the content item (document or questionnaire). If desired, the owner can collaborate with other writers to complete the first draft. The owner then submits the content item to Review, where each reviewer can accept, revise, or decline it. If all reviewers accept the content item, it is automatically moved to the Approval status. If revised or declined by one or more reviewers, the content item is placed back in Draft status, and a task email is sent to the owner to review the revised or declined content item, make the necessary changes, and then resubmit it for review. (The content item goes back to Draft status only after all reviewers have accepted, revised, or declined it.) This part of the

process can be repeated as many times as necessary to create an acceptable content item.

Once all reviewers approve a subsequent draft, the content item is moved automatically to Approval status. Approvers have the same options as reviewers for dealing with the content item (accept, revise, and decline). If all approvers accept it, the content item is automatically published. If one or more approvers revise or decline the content item, it again goes back to Draft status where the owner can again make needed changes and resubmit the content item to Review or directly to Approval.

The only time a content item is not immediately published upon approval is if the owner designates a publication date sometime in the future. In that case, the content item is moved to Pending status until that date arrives, and then the content item is published.

As soon as a content item is published, task notifications to read the document or complete the questionnaire are sent to all assignees.

If an approved content item is a new version of an existing one, the previous version is automatically archived when the new version is published.

---

## Roles and Permissions

The things you can do in PolicyTech are determined by the roles and system permissions assigned to you by the administrator, as shown in the following tables.

**Note:** Mentions of questionnaires in the following tables are referring to stand-alone questionnaires, not questionnaires embedded in documents.

### Roles

Role	Description
Document Owner, Questionnaire Owner	<p>A document or questionnaire owner has the following responsibilities for each owned document or questionnaire:</p> <ul style="list-style-type: none"><li>■ Create the document or questionnaire</li><li>■ Assign writers, proxy authors, reviewers, approvers, and users (assignees) to read/complete the document/questionnaire</li><li>■ Assign sites, departments, and categories</li><li>■ Write the document or questionnaire content or assign another user to write it</li><li>■ Manage the document or questionnaire through the review and approval process (if enabled), making</li></ul>

	<p>revisions as necessary</p> <ul style="list-style-type: none"> <li>■ As the document or questionnaire is periodically reviewed, create new versions and make necessary updates</li> </ul> <p>When necessary, a document or questionnaire owner can also do the following with an owned document or questionnaire:</p> <ul style="list-style-type: none"> <li>■ Submit the draft document or questionnaire directly to approval if no required reviewers are assigned</li> <li>■ Set the document or questionnaire as approved if assigned the <b>Approves Own Content</b> role</li> <li>■ Modify the assignees of published documents or started questionnaires</li> <li>■ Archive the document or questionnaire</li> </ul>
Campaign Owner	<p>A campaign owner has the following responsibilities for each owned campaign:</p> <ul style="list-style-type: none"> <li>■ Create the campaign</li> <li>■ Assign sites, departments, and categories</li> <li>■ Add and arrange the campaign content or assign another user to write it</li> <li>■ Set the campaign as approved (start it or move it to Pending status until the set start date)</li> <li>■ As the campaign is periodically reviewed, create new versions and make necessary updates</li> </ul> <p>When necessary, a campaign owner can also do the following with an owned campaign:</p> <ul style="list-style-type: none"> <li>■ Modify the assignees of started campaigns</li> <li>■ Archive the campaign</li> </ul>
Approves Own Content	<p>This role applies only to users assigned the <b>Document Owner</b> or <b>Questionnaire Owner</b> role. With the <b>Approves Own Content</b> role assigned, an owner can approve his or her own documents or questionnaires without having to go through the review and approval process.</p> <p><b>Note:</b> If a document's or questionnaire's template contains required reviewers or approvers, the owner is not allowed to approve the document/questionnaire, even with the</p>

<b>Approves Own Content</b> role assigned.	
Writer	A document or questionnaire owner can assign any user with the Writer role to write or collaborate in writing a document or questionnaire. A writer cannot, however, access or change any of the properties (assignments, roles, permissions, and so on). A writer can edit an assigned document or questionnaire for as long as it is in the <b>Draft</b> status.
Reviewer	A document or questionnaire owner can assign any user with the Reviewer role to review documents or questionnaires. A reviewer can accept an assigned document or questionnaire as is, revise it, or decline it. Those assigned the <b>Reviewer</b> role are typically subject matter experts and managers.
Approver	A document or questionnaire owner can assign any user with the Approver role to approve documents or questionnaires. An approver can accept an assigned document or questionnaire as is, revise it, or decline it. Because an approver may be legally responsible for a document's or questionnaire's contents, those assigned the Approver role are typically managers or company executives.
View Pending	A user assigned the <b>View Pending</b> role can see content items that are approved but not yet published because of a pending publication date. Access is limited to content items the user would be able to see once they are published.
Assignee	A user given the <b>Assignee</b> role can see all documents and questionnaires they're assigned to plus all published documents whose security is set to <b>All Users</b> .
Archived Content	<p>A user assigned the <b>Archived Content</b> role can see content items stored in the <b>Archive</b>. Access is limited to content items the user would be able to see if they were in <b>Published</b> status.</p> <p><b>Important:</b> Users assigned this role can also see all contents of the archived documents' <b>Overview</b> tab, including the <b>Properties</b>, <b>Version History</b>, task status, and <b>Security</b> pages.</p>
Template	A user assigned the <b>Template</b> role can view, create, and edit document, questionnaire, and campaign templates, but cannot archive them.
Proxy Author	The following list describes what a user assigned the <b>Proxy Author</b> role can and cannot do:

- Can create documents and questionnaires for assigned document and questionnaire owners only
- Can access and edit all draft documents and questionnaires for assigned owners regardless of whether those items were created by the proxy author or the owner
- Cannot submit a document or questionnaire for review or approval but can request that the owner do so
- Can view assigned owners' documents and questionnaires through the review and approval process
- Can revise assigned owner's documents in Review and or Approval status, which will cause them to be sent back to Draft status after all assigned reviewers or approvers have taken action (accepted, revised, or declined)

## System Permissions

System Permission	Description
Category Owner	A user assigned this permission can immediately access and edit both unassigned categories assigned subcategories.
Administrator for All Sites (Global permissions)	<p>When assigned this permission, a user can do the following:</p> <p><b>Preferences:</b> Access and edit all preferences (<b>Company Setup, User Setup, Content Setup, and System / IT Settings</b>), including designating other users as global or site administrators.</p> <p><b>Reports:</b> Generate and view management and administrative reports and access other reporting options.</p> <p><b>Content:</b></p> <ul style="list-style-type: none"> <li>■ Do everything a document, questionnaire, or campaign owner can do, except be assigned as a content item's owner.</li> <li>■ Set a document or questionnaire as approved, skipping all assigned writers, reviewers, and approvers.</li> <li>■ Edit a document in its current state without sending it back to draft or creating a new version. (The document owner and assigned approvers receive notification that the document has been edited.)</li> <li>■ Skip the next review date anytime (designate as "No Revision Necessary"), even before the review warning</li> </ul>

	period.
Administrator for a Single Site	<p>Except for the exceptions listed below, an administrator for a single site can do everything on that site that an administrator for all sites (global administrator) can do.</p> <ul style="list-style-type: none"> <li>■ A site administrator cannot access the following preferences: <b>General Properties</b> in <b>Company Setup</b>; <b>Default Properties</b> in <b>Content Setup</b>; all <b>System / IT Settings</b> preferences.</li> <li>■ Because a global administrator can assign a category or template to multiple sites, changes a site administrator makes to an existing category or template affects it at all assigned sites. A site administrator cannot assign new categories or templates to other existing sites, but can choose to have the new category automatically assigned to new sites as they are created.</li> <li>■ When assigning system permissions to users, a site administrator can only assign them for his or her assigned site.</li> </ul>
Company / User	<p>If assigned this permission for all sites, a user can access and edit all the <b>Company Setup</b> and <b>User Setup</b> preferences that a global administrator can access and edit, with the following exceptions: <b>General Settings</b> and <b>Email Manager</b> under <b>Company Setup</b>; <b>Bulk Permissions Editor</b> and <b>Custom Attributes</b> under <b>User Setup</b>.</p> <p>A user assigned this permission for a single site is limited to the <b>Company Setup</b> and <b>User Setup</b> preferences a site administrator can access and edit, with the same exceptions listed above.</p>
System / IT	A user assigned this permission can access and edit all of the <b>System / IT Settings</b> for all sites.
Report Manager	When assigned this permission, a user can access all reports that an administrator can access.
Access Site	By default, a user only has access to the site assigned to that user. A user assigned the <b>Access Site</b> permission for a particular site can access the documents assigned to that site and act within that site in any currently assigned role.
View Content All Departments	This permission applies only if the administrator has restricted users to seeing only the documents assigned to their departments. (By default, a user given the Assignee role can view all unrestricted, published documents assigned to any department.) When assigned this permission, a user can see

unrestricted documents in all departments, as if the department restriction were not in place.

**Note:** Because users cannot use **Browse** to find questionnaires or campaigns, the **View Content All Departments** permission applies only to documents.

Manager	<p>A user assigned the Manager permission can do the following:</p> <ul style="list-style-type: none"><li>■ Add or change a user, with control over a limited set of settings (department manager only)</li><li>■ Run management reports on managed users</li><li>■ Receive escalation notifications for managed users' overdue tasks</li><li>■ Change assignees for content items (documents, questionnaires, and campaigns) assigned to the department (department manager only)</li></ul>
---------	--

---

## Logging in to PolicyTech

PolicyTech runs in your Internet browser, so, to log into PolicyTech, you must have its web address.

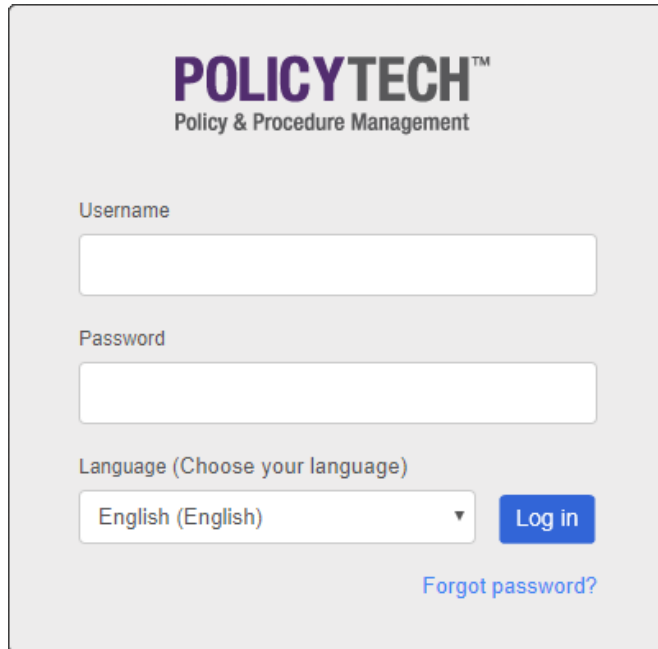

When PolicyTech was installed, at least one of your organization's users was designated as an administrator. The administrator has responsibilities and permissions to set up PolicyTech users and preferences and will know the web address for accessing PolicyTech.

**Note:** Your information technology (IT) professional or system administrator may have set up a different way to access PolicyTech, such as a link from within your organization's web portal. In any case, the PolicyTech administrator should be able to help you get to the PolicyTech login window.

1. Contact your PolicyTech administrator to get the following:
  - PolicyTech web address or link
  - Your PolicyTech user name and password
2. Open your Internet browser, and then do one of the following:
  - In the browser's address box, type the PolicyTech web address, and then press Enter.
  - Go to the page containing the PolicyTech link, and then click the link.
3. In the login window, type your user name and password, and then click **Log in**.

**Notes:**

- If a PolicyTech language module has been installed, you will also have the option of selecting a language for the user interface text.
- If you see the NAVEX Global logo instead of the PolicyTech logo, that means that your organization has two or more NAVEX Global products and that the **Single Sign-on** feature is in use. After signing in, you will need to access PolicyTech from the Gateway. See your administrator if you have questions.

**POLICYTECH™**  
Policy & Procedure Management

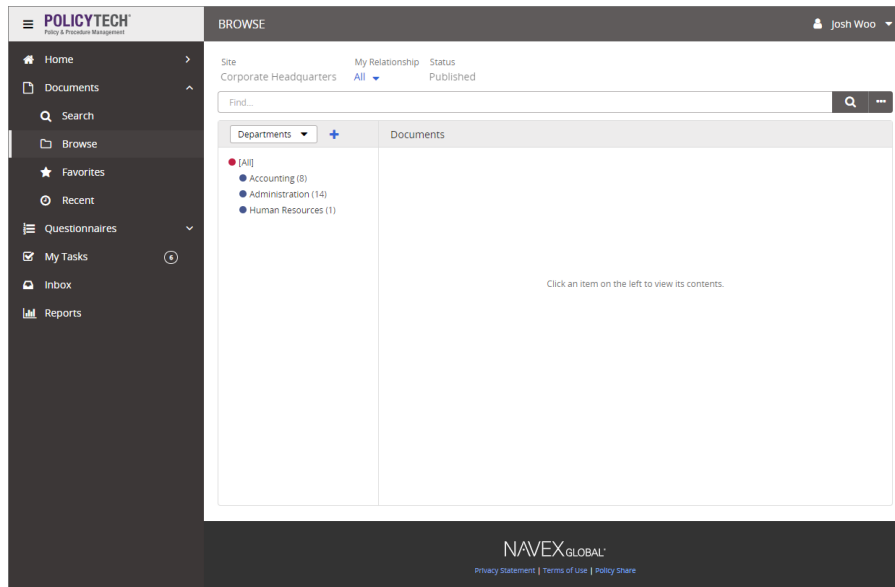

Username

Password

Language (Choose your language)

[Forgot password?](#)

You should now see the default PolicyTech window your administrator has selected for your site (location), which may or may not look like the one below.

## Some Things to Do in PolicyTech

Once you've successfully logged in, go to one of the following sections, depending on what you want to do next:

[Changing Personal Preferences](#) (for all users)

[Searching for a Content Item](#) or [Browsing for a Content Item](#) (for all users)

[Reading a Required Document](#) (for all users)

[Completing a Questionnaire](#) (for all users)

[Completing a Campaign](#) (for all users)

[Creating Documents](#) (for document owners and proxy authors)

[Creating Questionnaires](#) (for questionnaire owners and proxy authors)

[Creating Campaigns](#) (for campaign owners)

[Reviewing and Approving a Document or Questionnaire](#) (for reviewers and approvers)

---

## Resetting a Forgotten Password

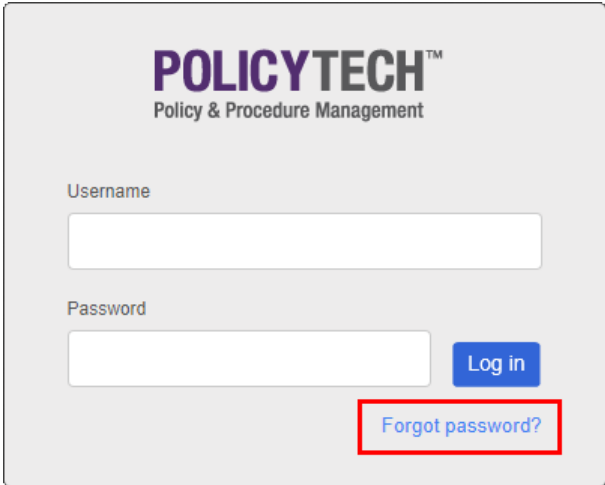

If you have forgotten your password, you may be able to have PolicyTech send you a link to reset it.

**Important:** The following must be true before you can reset your password:

- The administrator has set you up to receive PolicyTech emails.
- PolicyTech is not currently using a network service called Active Directory® to keep the user list in PolicyTech synchronized with the network user list.

If you don't receive an email after following the steps below, contact your administrator, who can reset your password.

1. In the login window, click **Forgot Password?**

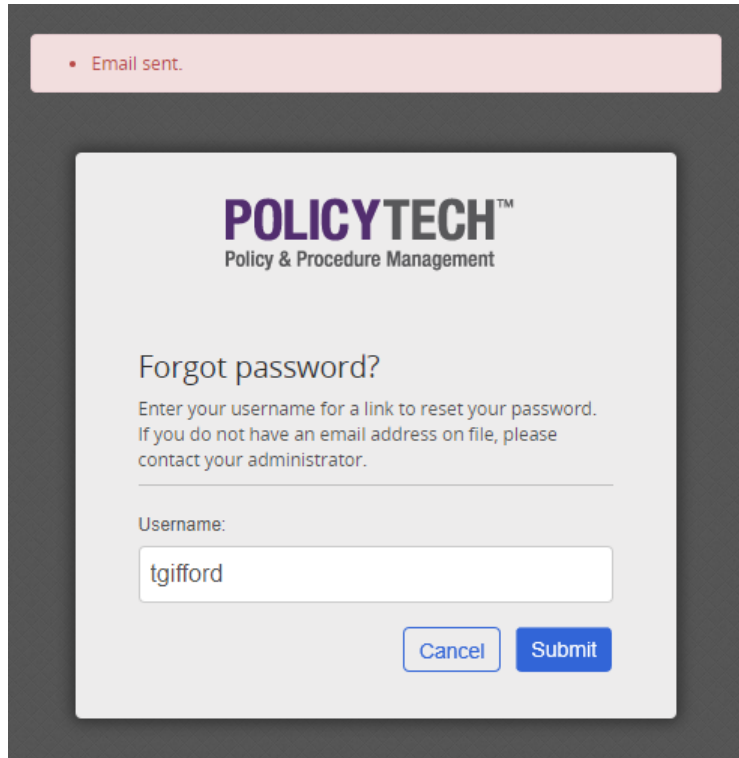

2. In the **Username** box, type the user name you normally use to log in, and then click **Submit**.

**Note:** If you've forgotten your user name, you will need to contact your administrator for help.

3. You should now see the message "Email sent." Close the **Forgot Password?** window.

**Note:** If you see the message "User not found in records" or "User does not have an email address," contact your administrator.

• Email sent.

## Changing Your Profile Settings

Use **My Profile** to change what is displayed by default when you log in to PolicyTech, to change what notification emails you receive, and to change your password.

1. In the upper right corner, click your user name, and then click **My Profile**.

2. Make desired changes (see "Profile Setting Descriptions" below).

A screenshot of the "My Profile" settings page. The page has three tabs: "My Profile" (selected), "Email Subscriptions", and "Change Password". The settings are organized into three sections: "BASIC SETTINGS", "DEFAULT DISPLAY OPTIONS", and "SEARCH/BROWSE OPTIONS".  
Under "BASIC SETTINGS":  
- "Default Login Site" is set to "Corporate Headquarters".  
Under "DEFAULT DISPLAY OPTIONS":  
- "Default View" is set to "Site Default (Documents - Browse)".  
Under "SEARCH/BROWSE OPTIONS":  
- "Language" is set to "English (English)".  
- "Filter by Language" is set to "Site Default (No)".  
- "Default Relationship View" is set to "Site Default (All Documents - Selected Status)".  
- "Default Search/Find Field" is set to "Site Default (Title)".  
- "Default Browse Arrangement" is set to "Site Default (Departments)".  
- "Limit find to selected item in arrangement" is set to "Site Default (No)".  
A blue "Save" button is located at the bottom right of the settings area.

3. Click **Save**.

## Profile Setting Descriptions

Most of the initial **My Profile** settings are determined by the system settings of the site you're assigned to.

The settings are organized into the following tabs:

[My Profile](#)

[Email Subscriptions](#)

[Change Password](#)

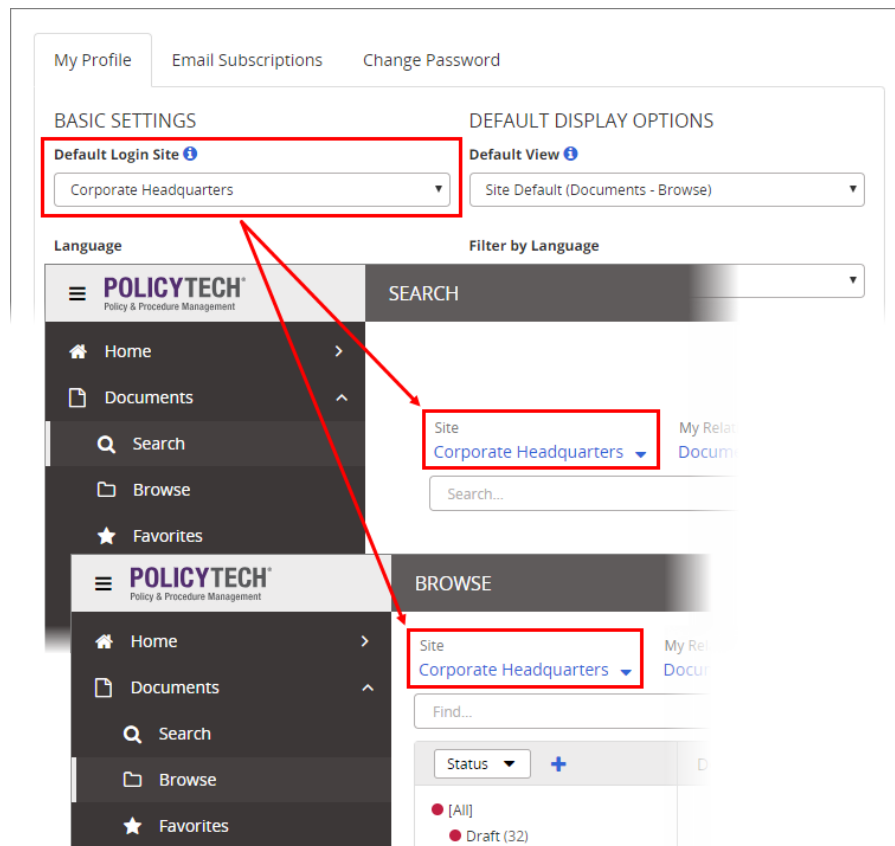

**Important:** Be sure to click **Save** after changing a setting.

## My Profile: My Profile Tab

Use the **My Profile** tab to set your default login, language, display, search, and browse options.

### Default Login Site

If PolicyTech is set up with multiple sites, use **Default Login Site** to specify which site will be selected by default when you select the **Search** or **Browse** view.

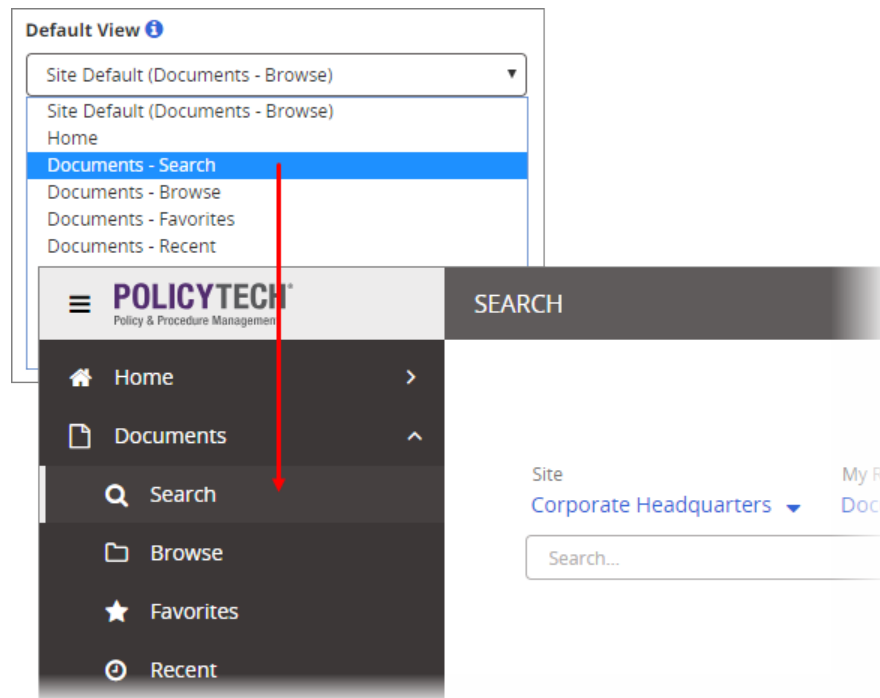

## Language

**Note:** This setting applies only if more than one user interface language has been installed.

Specify which language to show by default for the user interface text.

## Default View

Select which PolicyTech view will be displayed when you first log in. For view descriptions, see [Selecting a View](#).

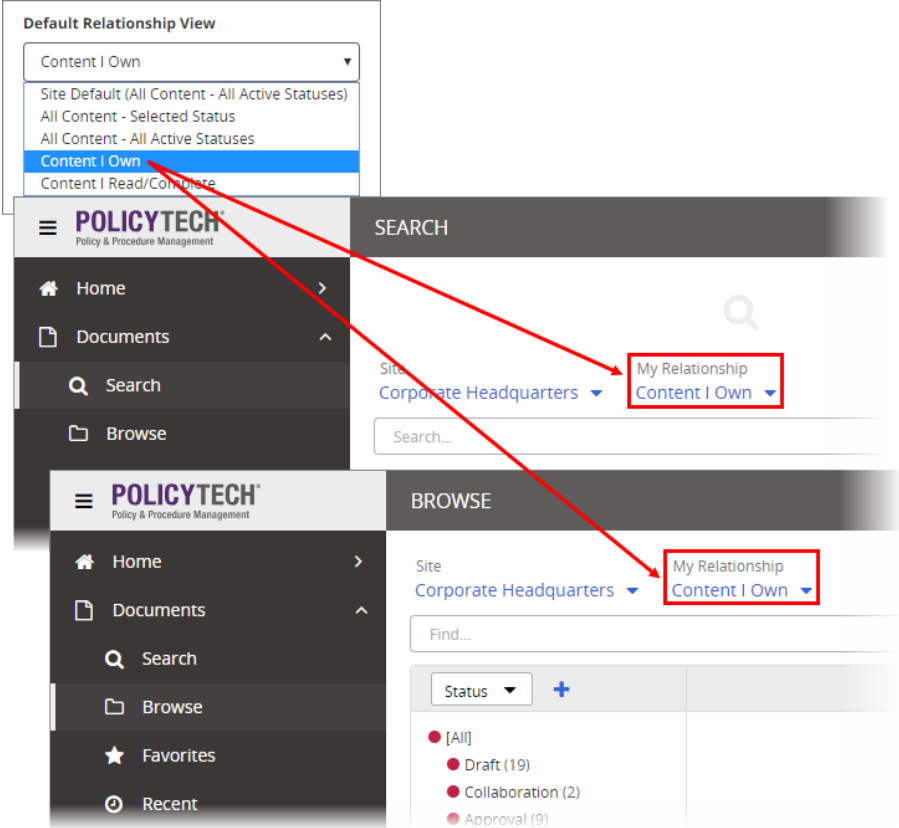

## Filter by Language

**Note:** This setting applies only if more than one user interface language has been installed.

Select **Yes** to hide all documents that are not in the currently selected language (see next option), or select **No** to show all documents regardless of their assigned languages.

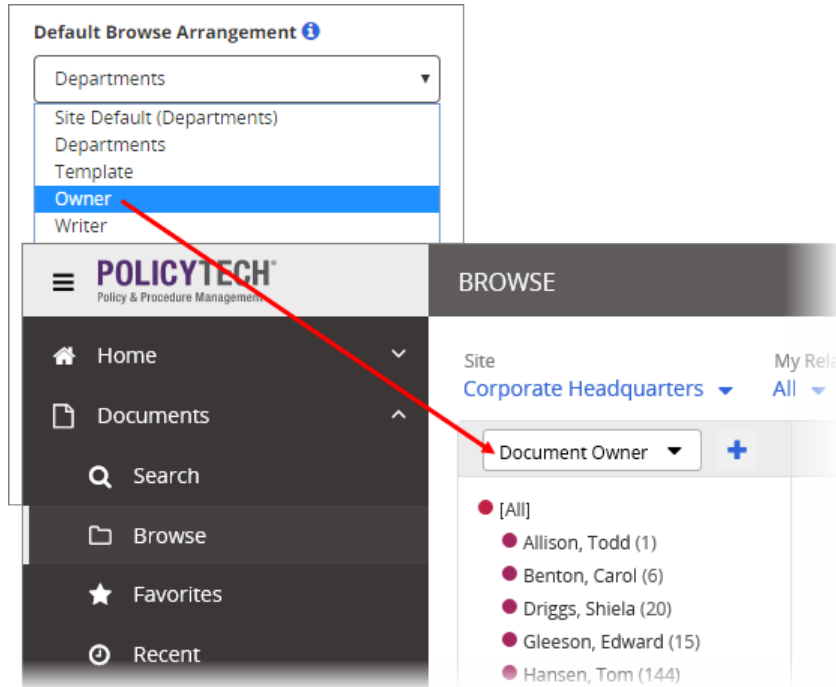

## Default Relationship View

Select how documents in **Search** and **Browse** results will be filtered in relation to your document assignments and document status.

**Default Browse Arrangement**

Select how documents will be arranged the first time the **Browse** view is displayed after logging in.

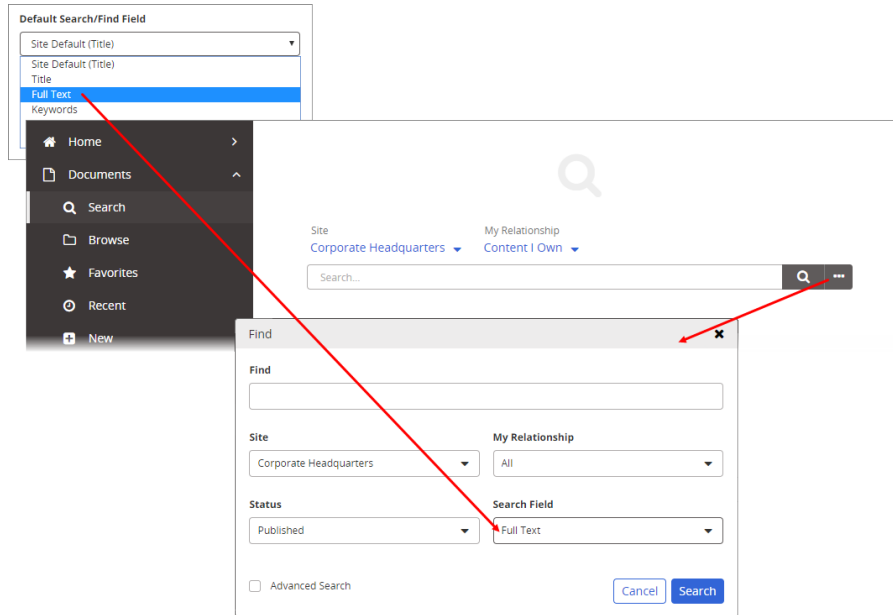

### Default Search/Find Field

Select the field (type of document data) that will be selected by default whenever you access **Search**.

#### Notes:

- If this option is set to **All of the above** and you can't change it, your administrator has locked the setting for searching all fields.
- The **Full Text** option applies only to **Search** and **Find** in the **Documents** area. If you select **Full Text**, then **Search** and **Find** in the **Questionnaires** and **Campaigns** areas will default to **Title**.

### Limit find to selected item in arrangement

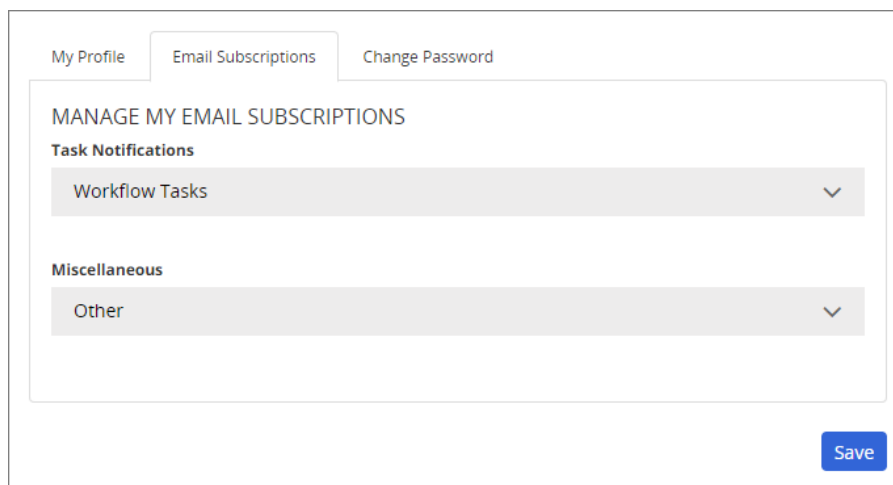

Select **Yes** to have the **Limit find to selected item in arrangement** option selected by default in **Browse** (see [Browsing for a Content Item](#) for details on this option).

### My Profile: Email Subscriptions Tab

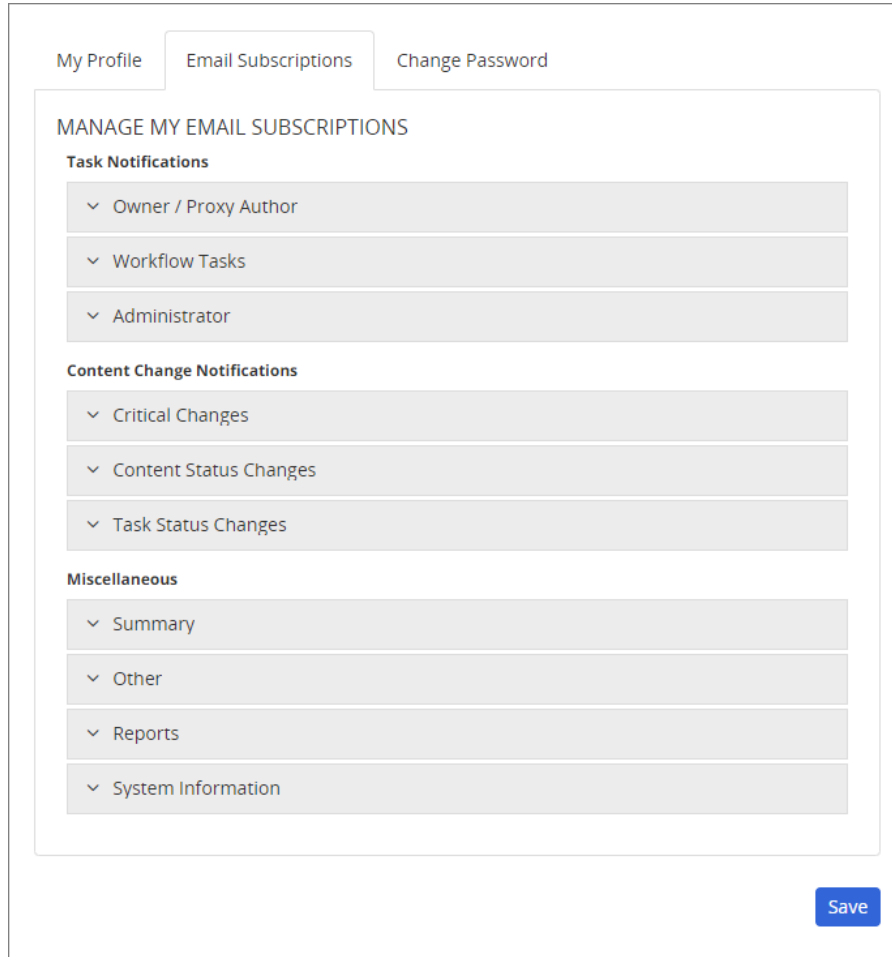

**Important:** You will see the **Email Subscriptions** tab only if these settings have been enabled by your administrator.

1. Click the **Email Subscriptions** tab.

The number of email categories and individual emails listed depends on your assigned roles and permissions. For example, the screenshot below shows the email categories listed for a user with only the Assignee role.

This screenshot shows the email categories for an administrator.

The screenshot displays a user profile settings page with three tabs: 'My Profile', 'Email Subscriptions', and 'Change Password'. The 'Email Subscriptions' tab is active, showing a section titled 'MANAGE MY EMAIL SUBSCRIPTIONS'. This section is organized into three categories: 'Task Notifications', 'Content Change Notifications', and 'Miscellaneous'. Each category contains a list of email categories, each with a dropdown arrow. A 'Save' button is located at the bottom right of the settings area.

My Profile   Email Subscriptions   Change Password

**MANAGE MY EMAIL SUBSCRIPTIONS**

**Task Notifications**

- Owner / Proxy Author
- Workflow Tasks
- Administrator

**Content Change Notifications**

- Critical Changes
- Content Status Changes
- Task Status Changes

**Miscellaneous**

- Summary
- Other
- Reports
- System Information

Save

2. Click an email category to show its notification emails.

My Profile   Email Subscriptions   Change Password

MANAGE MY EMAIL SUBSCRIPTIONS

**Task Notifications**

Workflow Tasks ^

Read/Complete Task Notification   System Default (Enabled) v

Read/Complete Task Suspended   System Default (Enabled) v

**Miscellaneous**

Other v

Save

3. (Optional) Click an email name to view its description.
4. In the email's drop-down menu, click **Disabled** or **Enabled**.

### My Profile: Change Password Tab

**Important:** The **Change Password** tab appears only if your administrator has set up PolicyTech to allow the resetting of passwords. If you don't see the **Change Password** tab and you need your password changed, contact your administrator, who can reset it for you.

1. Click the **Change Password** tab.

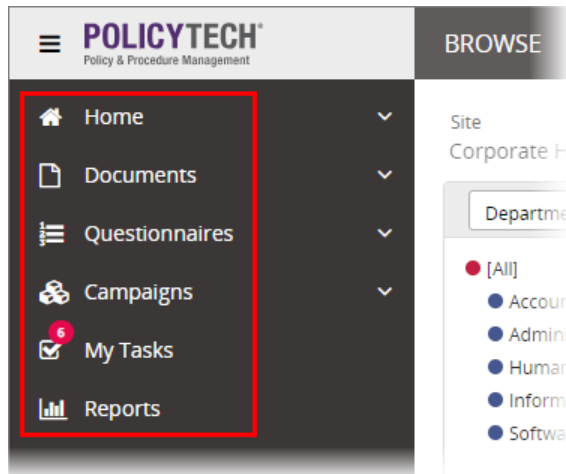

The screenshot shows a user profile settings page with three tabs: 'My Profile', 'Email Subscriptions', and 'Change Password'. The 'Change Password' tab is active. The form is titled 'CHANGE PASSWORD' and contains three input fields: 'Current Password', 'New Password', and 'Confirm Password'. Below the 'Confirm Password' field is a blue link labeled 'View password requirements'. At the bottom right of the form is a blue 'Save' button.

2. Type your current password.
3. (Optional) Click **View password requirements** to see what the password must contain, and then click **OK**.
4. Type a new password, and then type it again to confirm.
5. Click **Save**.

## Selecting a View

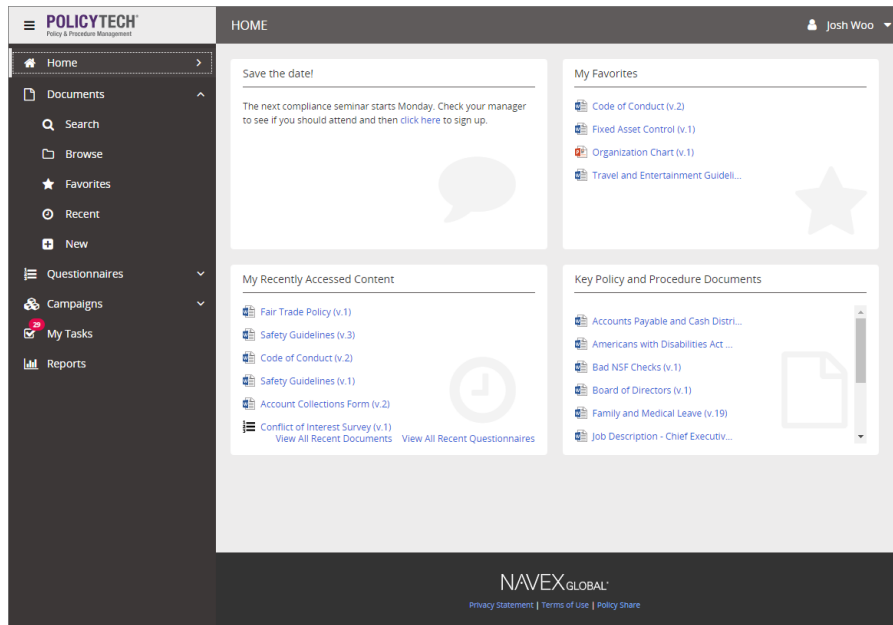

The PolicyTech application contains several views for accessing PolicyTech features.

**Note:** The view displayed when you first log in is determined by a system setting. You can choose your own default view in **My Profile** (see [Changing Your Profile Settings](#)).

## Home

If you see the **Home** option, click it to view a dashboard that can contain a variety of at-a-glance information, including a message from the administrator and compact views of useful information and quick access lists of key documents.

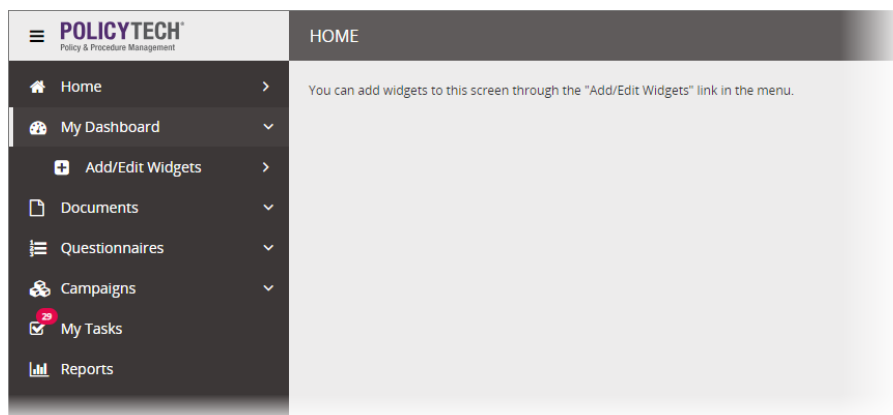

### Notes:

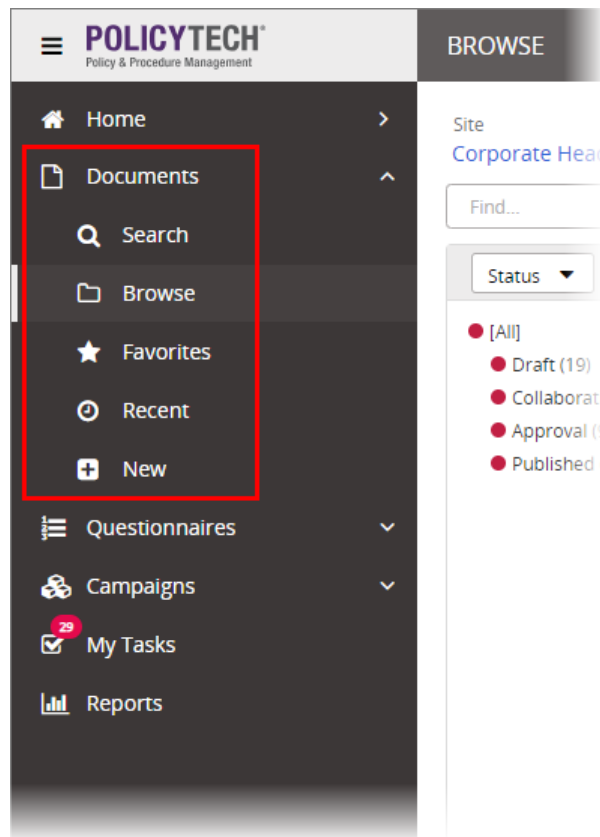

- The **Home** dashboard is an optional feature that may not be currently enabled.
- Your administrator can customize the **Home** dashboard to fit your organization's needs, so it will most likely contain different views than those shown above.

## My Dashboard

If personal dashboards have been enabled, you will see the **My Dashboard** option that lets you choose from among several compact views called widgets to create your own dashboard. See [Setting Up a Personal Dashboard](#) for details.

## Documents

If the **Documents Module** has been enabled, use one of the following views to find and list documents you have access to:

**Search:** See [Searching for a Content Item](#).

**Browse:** See [Browsing for a Content Item](#).

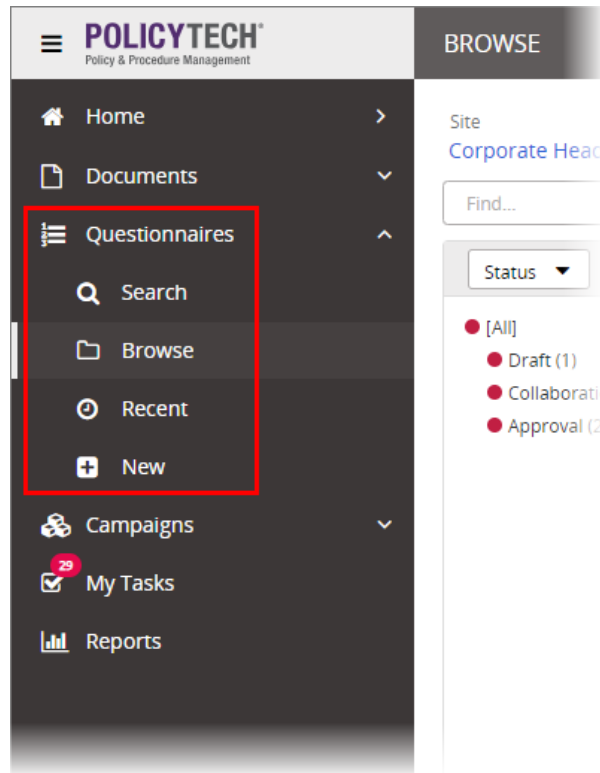

**Favorites:** See [Adding and Viewing Favorite Documents](#).

**Recent:** Lists documents you've recently opened.

**New:** See [Creating a Document \(Overview\)](#)

**Note:** The **New** option is available only to the following: document owners, proxy authors, administrators.

## Questionnaires

If the **Questionnaire Module** has been enabled and you are a questionnaire owner, proxy author, or administrator, use one of the following views to find and list questionnaires you have access to:

**Search:** See [Searching for a Content Item](#).

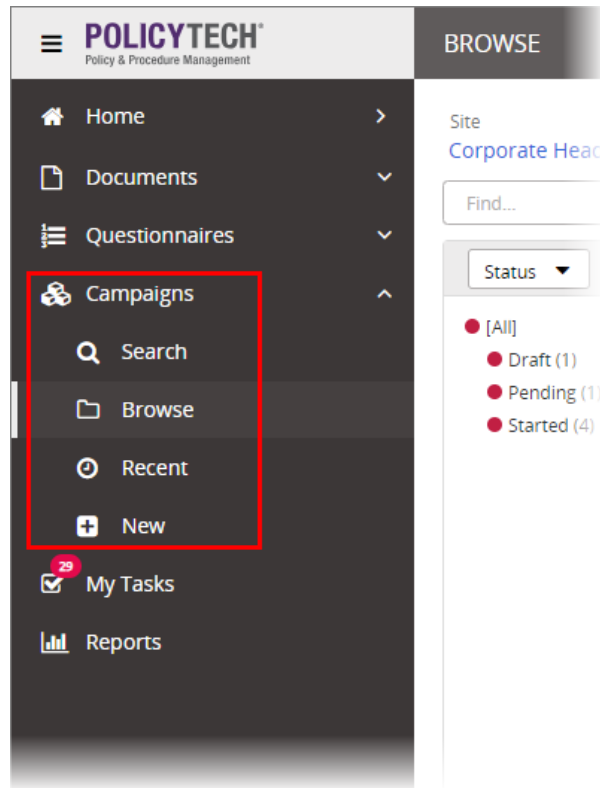

**Browse:** See [Browsing for a Content Item](#).

**Recent:** Lists questionnaires you've recently opened.

**New:** See [Creating a Questionnaire \(Overview\)](#)

---

## Campaigns

If the **Campaign Module** has been enabled and you are a campaign owner or administrator, use one of the following views to find and list questionnaires you have access to:

**Search:** See [Searching for a Content Item](#).

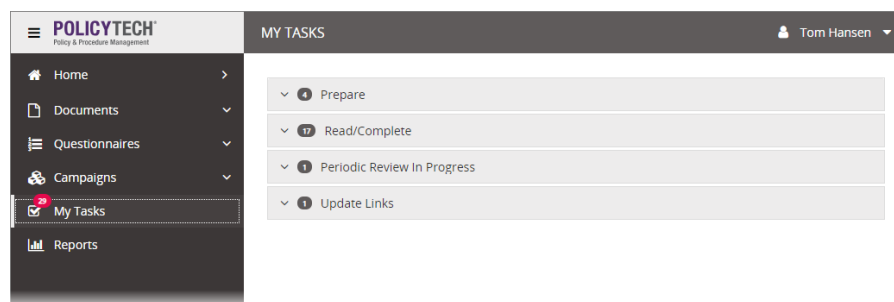

**Browse:** See [Browsing for a Content Item](#).

**Recent:** Lists campaigns you've recently opened.

**New:** See [Creating a Campaign \(Overview\)](#)

## My Tasks

This view lists the tasks you've been assigned but haven't completed yet. See [Working with My Tasks](#).

---

## Reports

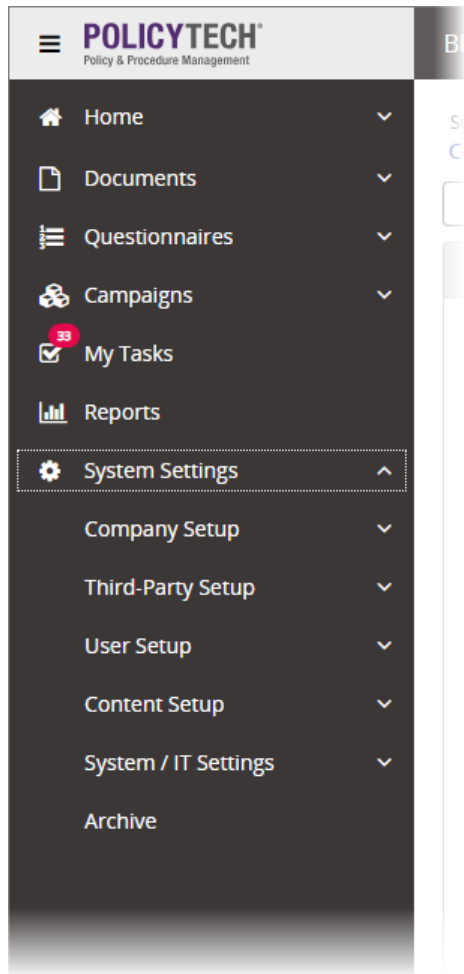

This view lists all the reports you have access to. See the [Reports Supplement](#).

---

## System Settings

You will see this option only if you've been assigned the Administrator permission or certain other permissions. See the "Working with System Settings" section of the [Administrator's Guide](#).

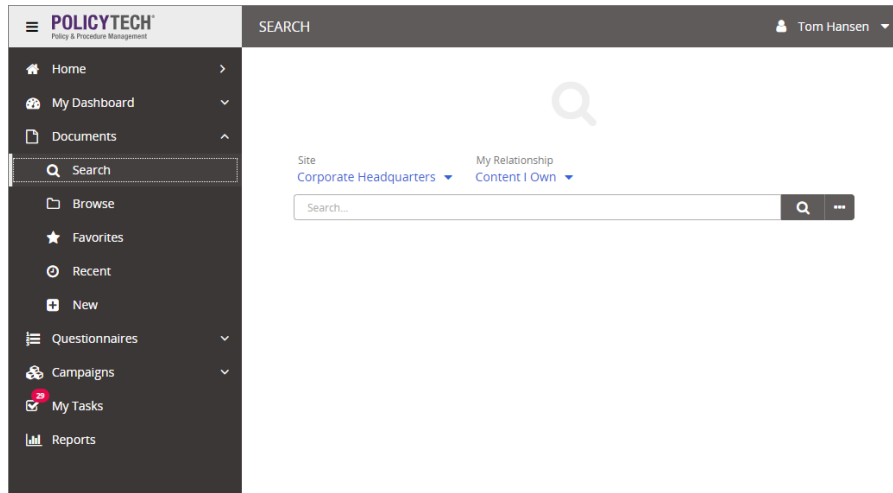

## Searching for a Content Item

You can search for a text string in a content item's (document's, questionnaire's, or campaign's) title, or within its contents, keywords, or reference number.

### Notes:

- What content items you have access to depends on their security level, what roles and permissions you've been assigned, and your current content item task assignments. See [Content Item Access Table](#) for details.
- You can change the default search settings using **My Profile** (see [Changing Your Profile Settings](#)).

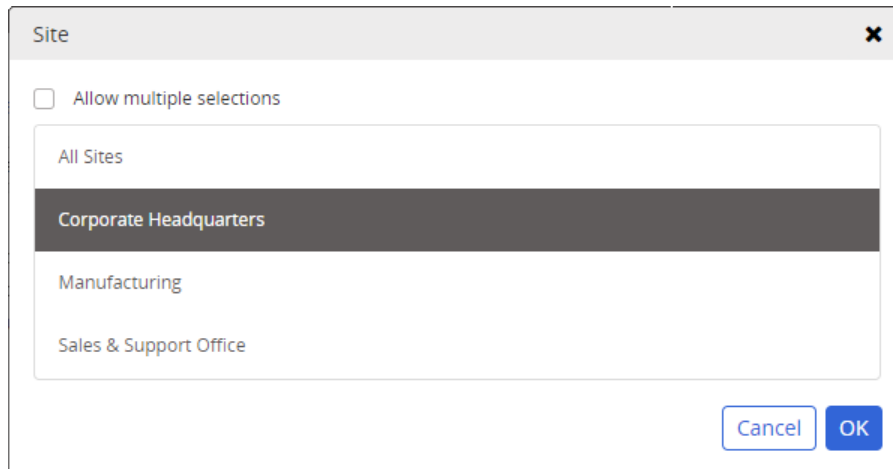

1. Click **Documents**, **Questionnaires**, or **Campaigns**, and then click **Search**.

2. If you have access to multiple sites, select the site or sites you believe the content item could be in.
  - a. Click the current site selection and then do one of the following:
    - Click a different site.
    - Click **All Sites** to search all sites you have access to.
    - Select **Allow multiple selections**, and then select two or more sites.

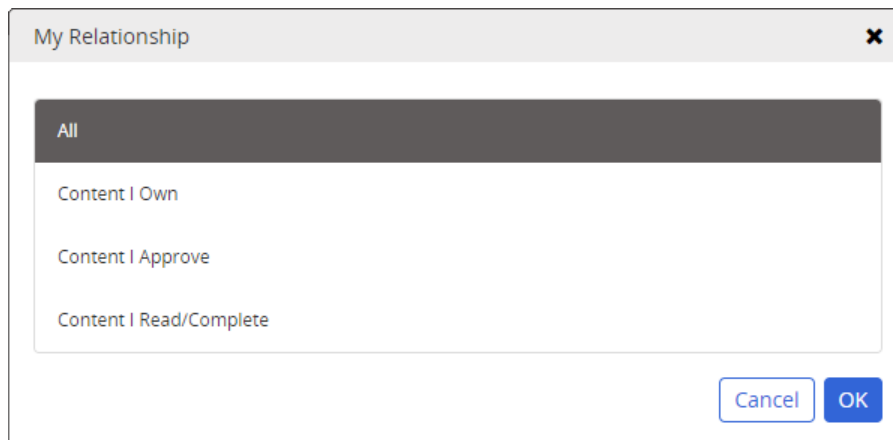

**Note:** Because you must have at least one site selected when **Allow multiple selections** is active, your primary site may be selected by default. You must select another site before you can clear the primary site selection.

b. Click **OK**.

3. (Optional) The **My Relationship** option lets you narrow the search to only those documents or questionnaires you've been assigned to in some way, such as those you've been assigned to read or complete. Click an option, and then click **OK**.

**Note:** The following are all possible **My Relationship** options:

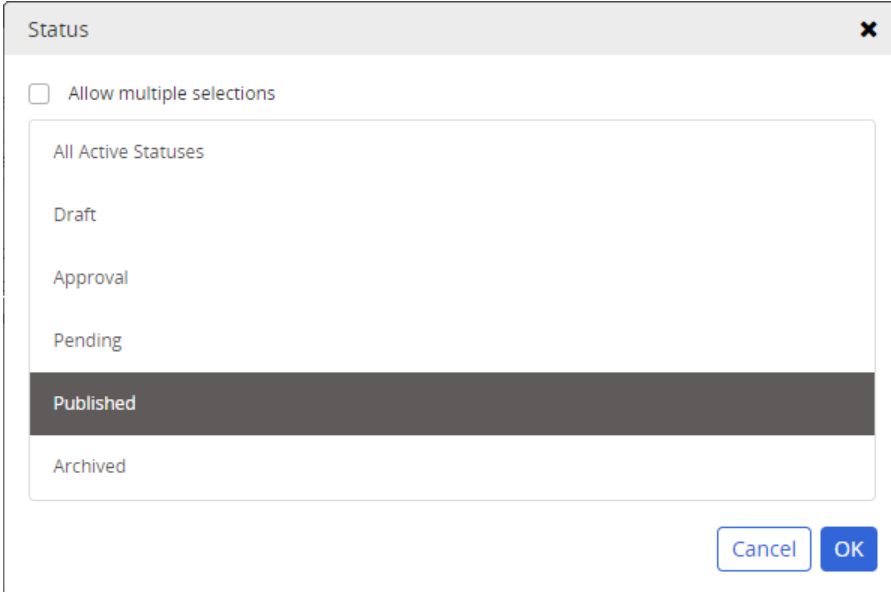

- Content I Read/Complete
- Content I Own
- Content I Proxy
- Content I Write
- Content I Review
- Content I Approve

The options available to you depend on what roles you've been assigned. You should at least see the **Content I Read/Complete** option.

4. Select the status or statuses you believe the content item could be in.

**Note:** The **Status** option is hidden if you select any **My Relationship** option other than **All**.

- a. Click the current status selection, and then do one of the following:
  - Click a different status.
  - Click **All Active Statuses**.
  - Select **Allow multiple selections**, and then select two or more statuses.

The screenshot shows a 'Status' dialog box. At the top left is the title 'Status' and a close button (X). Below the title is a checkbox labeled 'Allow multiple selections' which is currently unchecked. Underneath the checkbox is a list of status options: 'All Active Statuses', 'Draft', 'Approval', 'Pending', 'Published', and 'Archived'. The 'Published' option is highlighted with a dark grey background, indicating it is the current selection. At the bottom right of the dialog are two buttons: 'Cancel' and 'OK'.

**Notes:**

- The available status options depend on what roles and permissions you've been assigned. For example, you will see the **Approval** option only if you've been assigned the **Approver** role or **Administrator** permission.
- Because you must have at least one status selected when **Allow multiple selections** is active, **Published** (in **Documents**) or **Started** (in **Questionnaires** and **Campaigns**) is selected by default. You must select another status before you can clear the **Published** or **Started** selection.

- b. Click **OK**.
5. Click inside the **Search** box, and then type some text. See [Search Text Options](#) for detailed instructions.

Site: Corporate Headquarters ▾ My Relationship: All ▾ Status: Published ▾

cash

6. (Optional) To change other search settings, click **...**, and then do any of the following:

Find

Find: cash

Site: Corporate Headquarters ▾ My Relationship: All ▾

Status: Published ▾ Search Field: Title ▾

Advanced Search

Cancel Search

- The **Find** (Search), **Site**, **My Relationship**, and **Status** options are the same as those in the main **Search** pane. You can change any of these, if necessary.
- To change what content item property is searched, for **Search Field** selection, select **Title**, **Full Text** (see "Notes" below), **Keywords**, **Reference #**, or **All of the above**, and then click **OK**.

#### Notes:

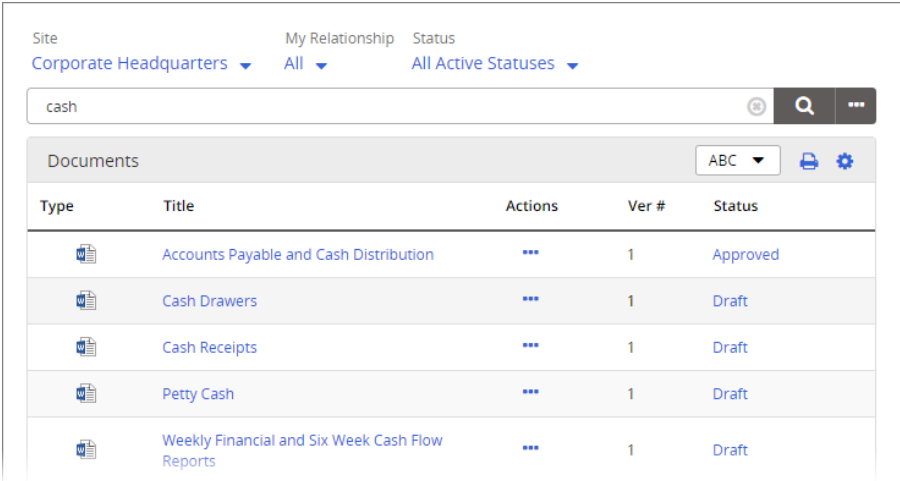

- If the **Search Field** setting is **All Search Fields**, an administrator has selected a system setting that forces the searching of all fields, in which case you cannot choose a different setting.
- **Full Text** is only available in **Search** within the **Documents** area and applies only to Word, Excel, PowerPoint and text-based PDF documents.
- An owner can add keywords when creating a content item, but is not required to. Keywords are words or phrases the owner thinks users might search for when trying to find a particular content item.
- The default **My Relationship** and **Search Field** settings are initially

set by an administrator, but you can change these defaults in **My Profile** (see [Changing Your Profile Settings](#)).

- To specify more search criteria when searching for documents, such as a date range, select **Advanced Search**, and then see [Advanced Search](#) for detailed instructions.

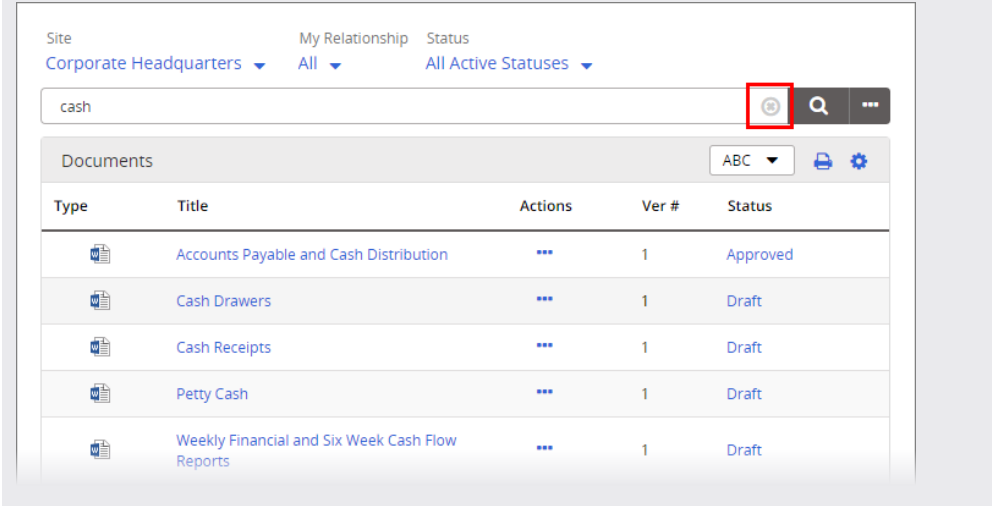

7. Click .

The search returns a list of all documents or questionnaires, if any, that match the search text in the selected areas of the document or questionnaire and in the selected site, relationship, and status.

If the search returns a long list, several features are available to help you reorganize or narrow the list to make a document or questionnaire easier to find. See [Working with the Content Item Grid](#).

**Note:** To clear the current search and start over, click  in the **Search** box.

8. To open one of the listed items, click its title. The content item opens in a separate browser window.

**Note:** To open the content item and go directly to its **Overview** tab, click the link in the **Status** column.

What you can do with the open content item depends on your assigned role. Go to a topic below that corresponds with your role.

**Document Owner or Proxy Author:**

[Creating a Document](#)

[Working with Documents or Questionnaires in Review and Approval](#)

[Doing a Periodic Review and Creating a New Version](#)

[Working with My Tasks](#)

**Questionnaire Owner or Proxy Author:**

[Creating a Questionnaire](#)

[Working with Documents or Questionnaires in Review and Approval](#)

[Doing a Periodic Review and Creating a New Version](#)

[Working with My Tasks](#)

**Campaign Owner:**

[Creating a Campaign](#)

[Doing a Periodic Review and Creating a New Version](#)

[Working with My Tasks](#)

**Writer:**

[Writing a Document](#)

[Adding Questions and Answers to a Questionnaire](#)

[Working with My Tasks](#)

**Reviewer or Approver:**

[Reviewing and Approving a Document or Questionnaire](#)

[Working with My Tasks](#)

**Assignee:**

[Reading a Required Document](#)

[Completing a Questionnaire](#)

[Completing a Campaign](#)

[Working with My Tasks](#)

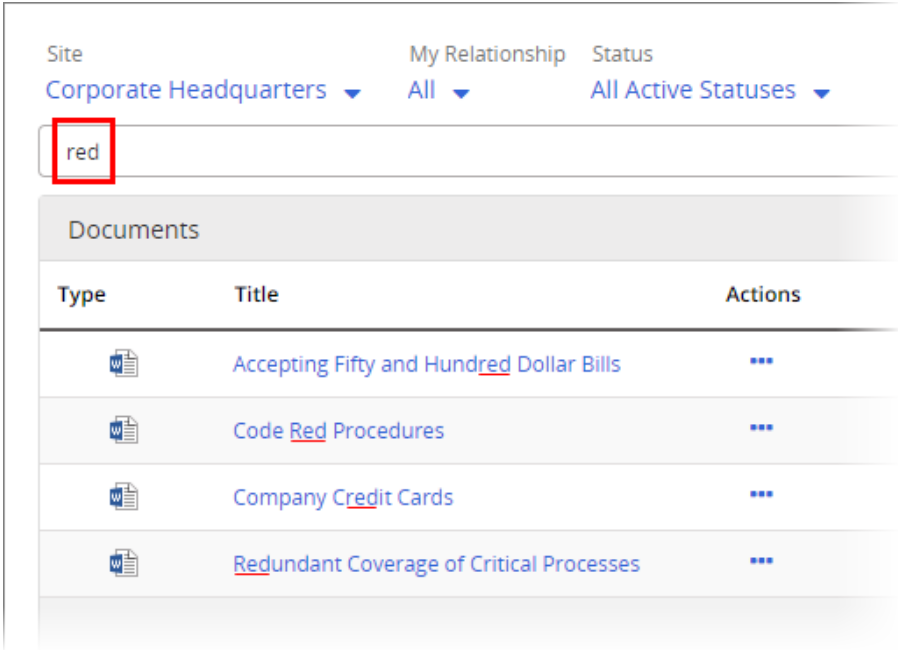

## Search Text Options

Use any of the following options to create a search string. If you find that these options are not enough to perform the type of search needed, see [Advanced Search](#).

**Type a single word.** The search will return a list of all content items that contain that word (or string of characters) anywhere within titles, contents, keywords, or reference numbers (whichever you select for **Search Field**).

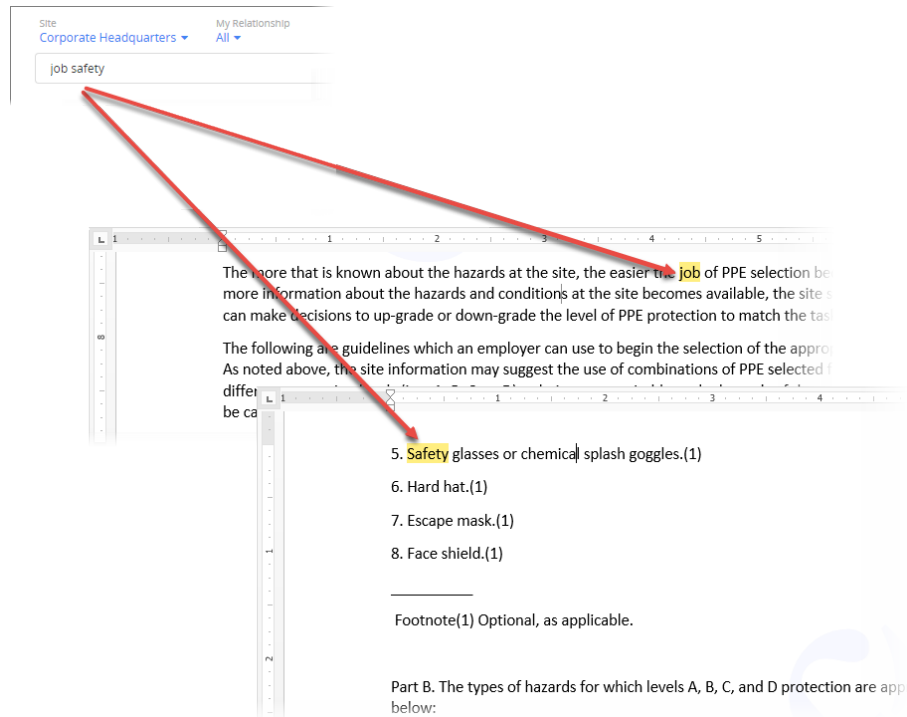

**Note:** The **Search** feature is not case sensitive. In other words, the search text **policy**, **Policy**, and **POLICY** would all return the same results regardless of the individual characters' case in the search text or the text being searched.

For example, if you typed *red* as the search text and chose to search by title, the search would return documents or questionnaires with any of the following words in the title: *Red*, *Credit*, *Redundant*, *Hundred*.

**Type multiple words, with each word separated from the next by a space.** The search will return a list of all documents or questionnaires that contain all of the words you typed that are anywhere within the selected areas.

For example, if you typed **job safety** as the search text and chose to search document content (full text), the search would return documents containing at least one instance of each word anywhere in the document content, even if the word **job** is found on page 2 and the word **safety** is found on page 7.

**Note:** Including a space between search text words is a shortcut for the AND operator. In other words, **job safety** and **job AND safety** would return the same results.

**Type multiple words, with each word separated from the next by OR in all uppercase letters.** The search will return a list of all content items that contain at least one of the words you typed that are anywhere within the selected areas.

**Note:** You can use the vertical bar character ( | ) in place of OR. Include a space before and after the character.

For example, if you typed **job OR safety** as the search text and chose to search keywords, the search would return both of the following documents: a document with **job** but not **safety** as an assigned keyword; a document with **safety** but not **job** as an assigned keyword.

Site: Corporate Headquarters | My Relationship: All

Search: job OR safety

Job Description - Accountant v.1

Properties | Version History | Writer Status | Reviewer Status | Approver Status

<b>Business Title</b>	NAVEX Global
<b>Title</b>	Job Description - Accountant
<b>Date Created</b>	10/21/2010

<b>Affected Department(s)</b>	Corporate Headquarters: Administration
<b>Keywords</b>	safety, hazardous

IIIRI

Type one or more words with each preceded by NOT in all uppercase letters. The search will return a list of all content items that do not contain the words in the search text anywhere within the selected areas.

**Note:** You can use the dash or minus character ( - ) in place of NOT. Include a space before and after the character.

The NOT operator can be especially useful when combined with another word you want to find. For example, if you typed **account NOT accountant** as the search text and chose to search document titles, the search would find documents with the words **Account**, **Accounts**, and **Accounting** in the title but not documents with **Accountant** or **Accountants** in the title.

**Type one or more words enclosed in quotation marks.** The search will return a list of all content items that contain the exact text within the quotation marks anywhere within the selected areas.

For example, if you typed **"job safety"** as the search text and chose to search document titles, the search would find the following document title: **Job Safety Regulations**; but the search would not find the following document title: **Safety on the Job**.

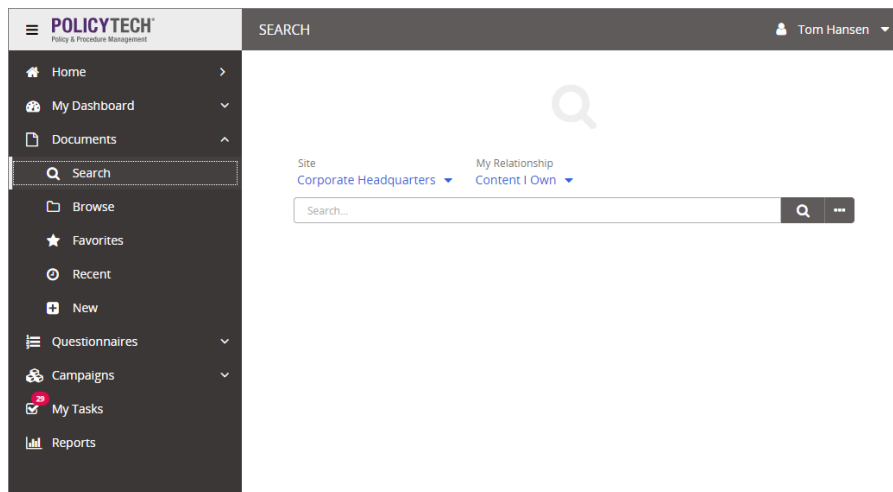

**Note:** You can use the AND, OR, and NOT operators between quotation-mark-enclosed text strings.

## Advanced Search

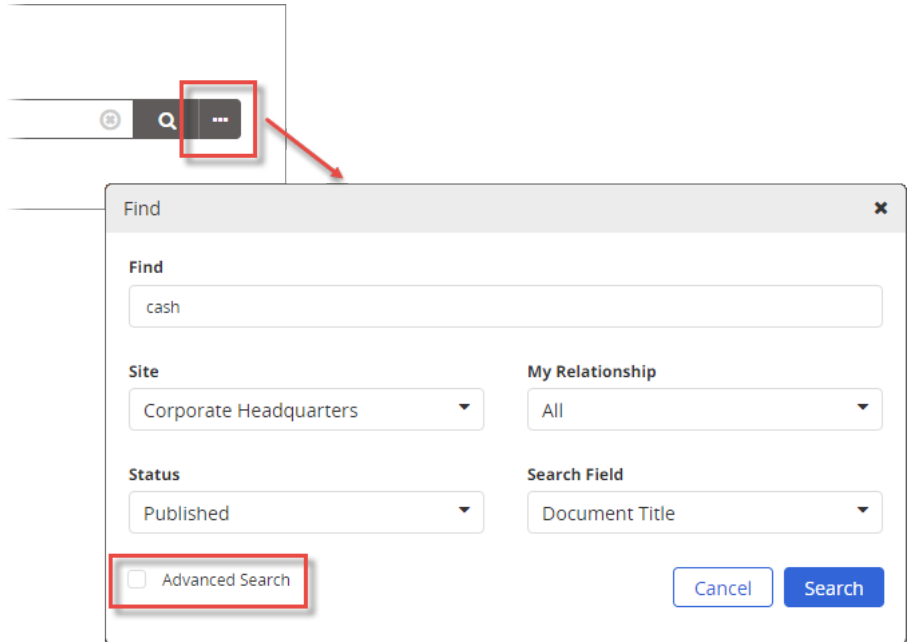

**Important:** **Advanced Search** is only available when searching for documents.

**Advanced Search** provides more options for narrowing a search and, depending on the options chosen, includes snippets from document contents in the search results.

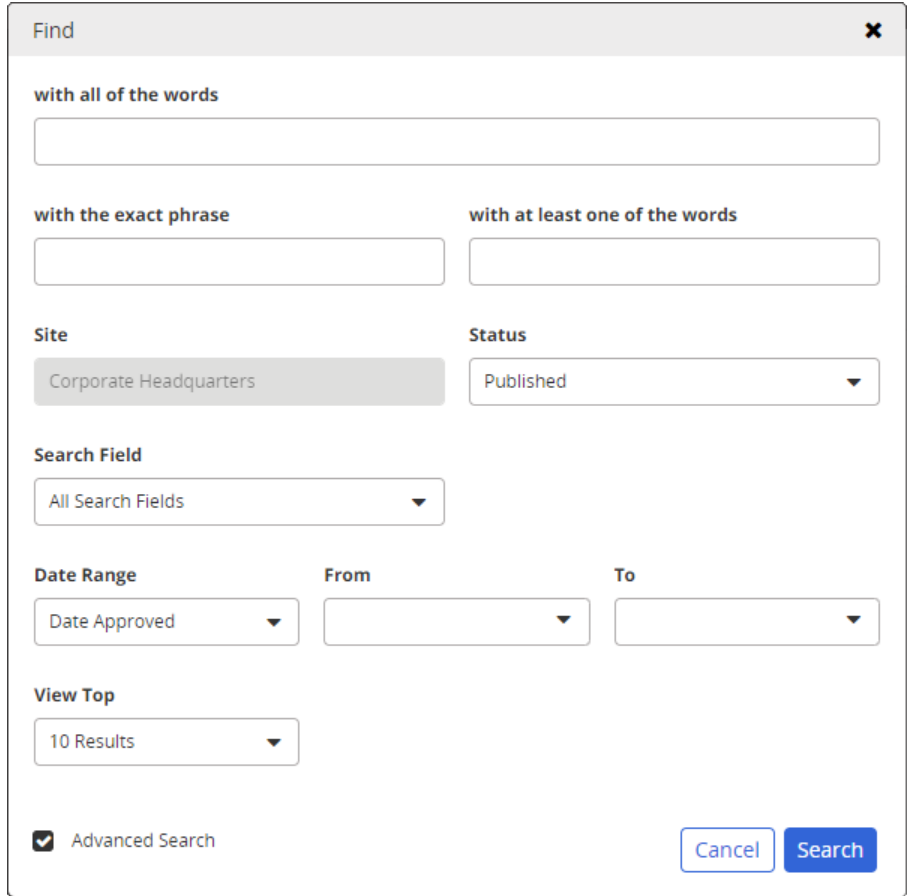

1. Click **Documents**, and then click **Search**.

2. Click **---**, and then select **Advanced Search**.

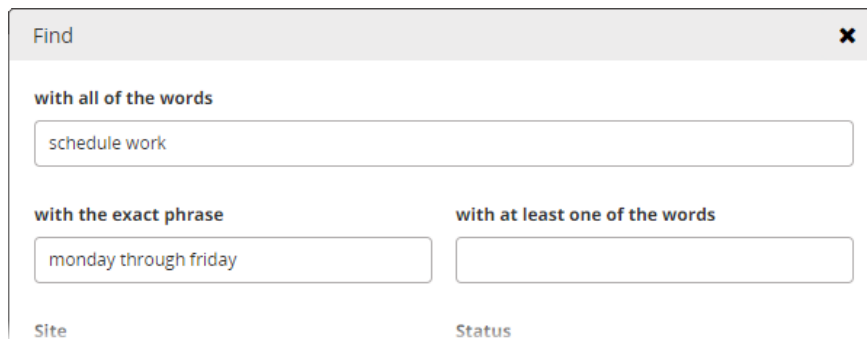

The **Advanced Search** form is displayed.

3. In one or more of the first three boxes, type search text.

**Note:** Advanced searches are not case-sensitive.

If you type text in more than one box, then all of the text must be found within the selected document areas in order for a document to be found. In the **Advanced Search** form below, for example, for a document to be found by this search, its title and contents combined must contain both of the words "schedule" and "work" plus the exact phrase "monday through friday."

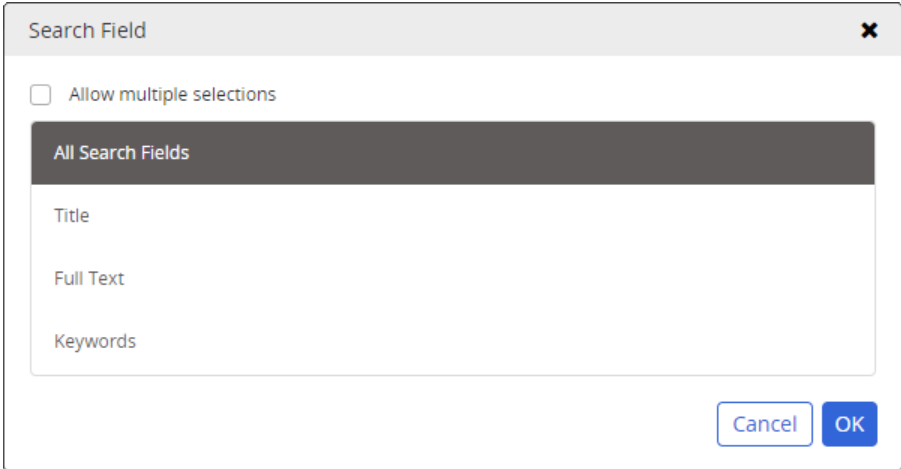

The screenshot shows a search interface titled "Find" with a close button (X) in the top right corner. It features three search criteria sections:

- with all of the words:** A text input field containing "schedule work".
- with the exact phrase:** A text input field containing "monday through friday".
- with at least one of the words:** An empty text input field.

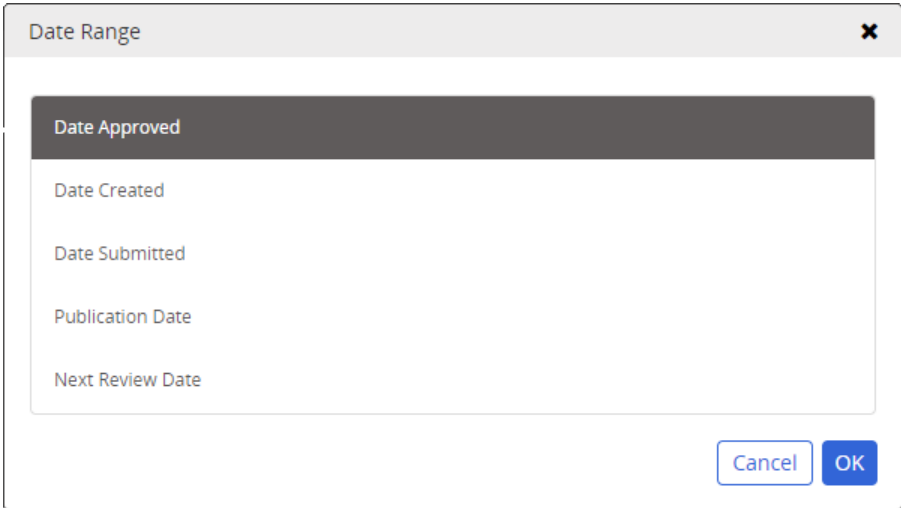

At the bottom of the form, there are two labels: "Site" on the left and "Status" on the right, which correspond to selection options in the next step.

4. Make selections for **Site**, **My Relationship**, and **Status** as you would for a basic search (see [Searching for a Content Item](#) for details).
5. For **Search Field**, do one of the following:
  - Select a single field (**Title**, **Full Text**, or **Keywords**).
  - Select **All Search Fields**.
  - Select **Allow multiple selections**, and then select two or more fields.

**Note:** If the **Search Field** setting is **All Search Fields**, an administrator has selected a system setting that forces the searching of all fields, in which case you cannot choose a different setting.

4. (Optional) For **Date Range**, select a document-related date type, and then click **OK**.

Also select **From** and **To** dates.

5. (Optional) Click the current **View Top** selection, click how many of the most relevant matching documents you want listed, and then click **OK**.

6. Click **Search**.

The matching documents, if any, are displayed. If, for **Search Field**, you selected **All Search Fields** or **Full Text**, then snippets of document contents containing matching search text are also displayed in the results.

## 42 - Searching for a Content Item

7. To open a document, click its title.

## Browsing for a Content Item

You can find a content item (document, questionnaire, or campaign) by browsing through lists of titles arranged by various criteria.

**Note:** What content items you have access to depends on their security level, what roles and permissions you've been assigned, and your current content item task assignments. See [Content Item Access Table](#) for details.

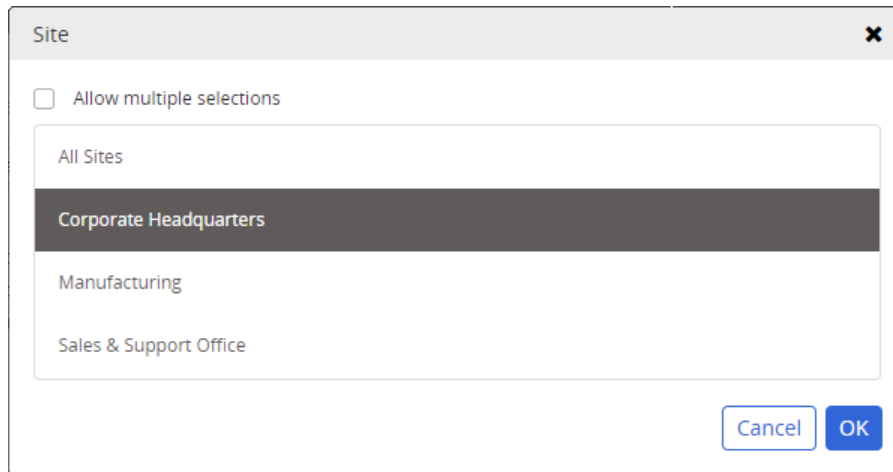

1. Click **Documents**, **Questionnaires**, or **Campaigns**, and then click **Browse**.

**Important:** If you're **Browse** page is small, such as when using a mobile device or when using the **PolicyTech Tools** pane in a Word document to insert a link to an existing document, click  to the right of the **Find** box to access the **Site**, **My Relationship**, and **Status** options described in steps 2 through 4 below.

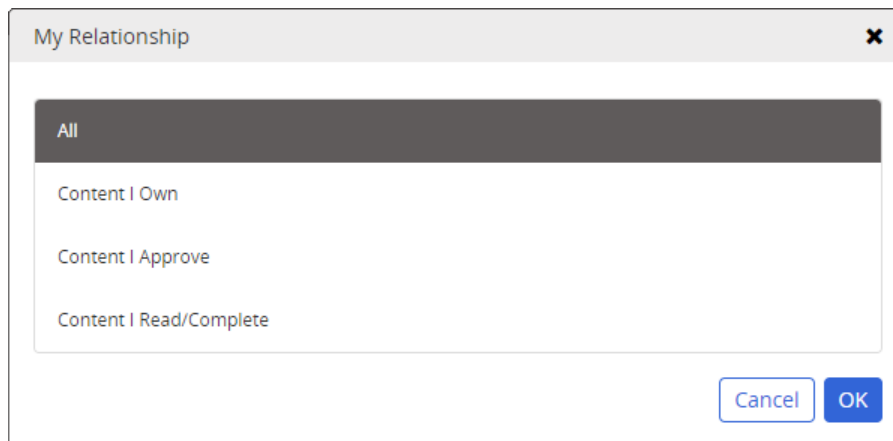

2. If you have access to multiple sites, select the site or sites in which you believe the content item could be.
  - a. Click the current site selection and then do one of the following:
    - Click a different site.
    - Click **All Sites** to search all sites you have access to.
    - Select **Allow multiple selections**, and then select two or more sites.

**Note:** Because you must have at least one site selected when **Allow multiple selections** is active, your primary site may be selected by default. You must select another site before you can clear the primary site selection.

b. Click **OK**.

3. The **My Relationship** option lets you narrow the list to only those content items you've been assigned to in some way, such as those you've been assigned to read or complete. Click an option, and then click **OK**.

**Note:** The following are all possible **My Relationship** options:

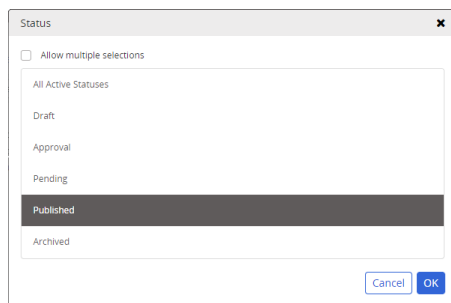

- Content I Read/Complete
- Content I Own
- Content I Proxy
- Content I Write
- Content I Review
- Content I Approve

The options available to you depend on what roles you've been assigned. You should at least see the **Content I Read/Complete** option.

4. (Conditional) If you selected **All** in the previous step, select the status or statuses you believe the content item could be in.

**Note:** The **Status** option is hidden if you select any **My Relationship** option other than **All**.

- a. Click the current status selection, and then do one of the following:
  - Click a different status.
  - Click **All Active Statuses**.
  - Select **Allow multiple selections**, and then select two or more statuses.

**Notes:**

- The available status options depend on what roles and permissions you've been assigned. For example, you will see the **Approval** option only if you've been assigned the Approver role or administrator permission.
- Because you must have at least one status selected when **Allow multiple selections** is active, **Published** (in **Documents**) or **Started** (in **Questionnaires** and **Campaigns**) is selected by default. You must select another status before you can clear the **Published** or **Started** selection.

- b. Click **OK**.

5. You can arrange (filter) the list by any of several criteria, including assigned departments, templates, owners, and categories.

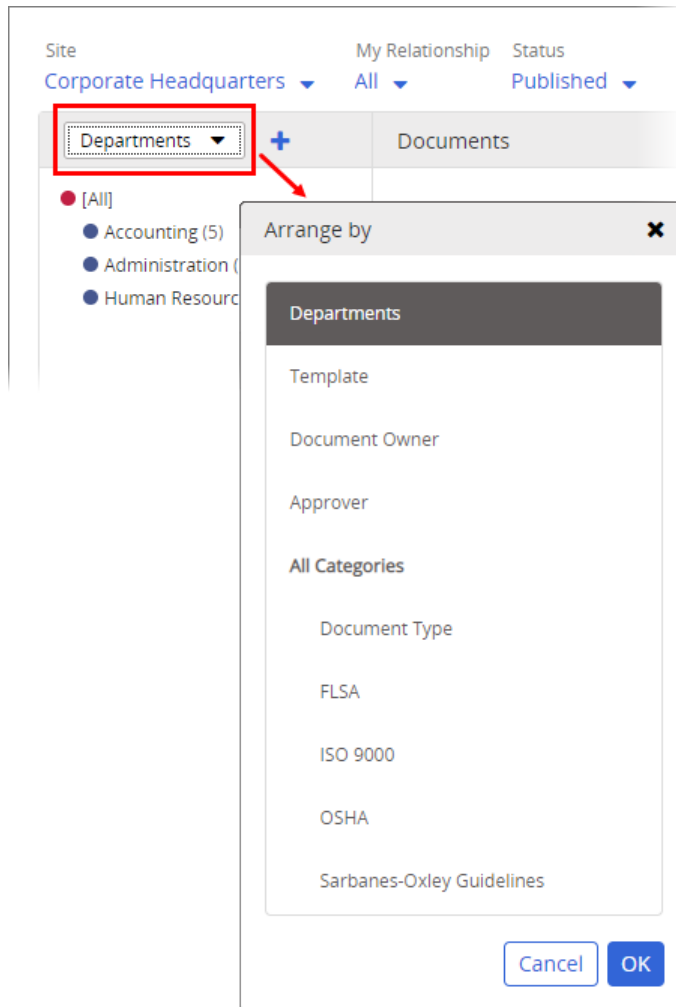

In the header of the panel to the left of the **Documents**, **Questionnaires**, or **Campaigns** grid, click ▼ to the right of the current selection, click an option, and then click **OK**.

**Notes:**

- To create a complex arrangement based on multiple criteria, see [Using Custom "Arrange By"](#).
- When creating a category, an administrator has the option of hiding

that category in the **Arrange by** list. If hidden categories exist and you have been assigned any role in addition to the **Assignee** role, you will see the **Show Hidden Categories** option below the **Arrange by** list.

6. For additional ways to refine and arrange browsing results, see [Working with the Content Item Grid](#).
7. To open one of the listed items, click its title. The content item opens in a separate browser window.

**Note:** To open the content item and go directly to its **Overview** tab, click the link in the **Status** column.

What you can do with the open content item depends on your assigned role. Go to a topic below that corresponds with your role.

## Content Item Access Table

The first table below shows who can access documents and questionnaires in the each workflow status and with each of the three main security levels.

The second table below shows who can access campaigns in each workflow status. (Campaigns have a preset security level of **All Users**, which cannot be changed, and can only contain documents and questionnaires assigned the **All Users** security level.)

### Access to Documents and Questionnaires

Workflow Status	Description	Roles with Access		
		Security Level: All Users	Security Level: Restricted - High	Security Level: Restricted - Severe
Draft	Contains documents and questionnaires not yet submitted for review or approval and those that, after completion of the review or approval process, have been revised or declined by one or more assigned reviewers or approvers.	Administrators and any document/questionnaire owner, proxy author, writer, reviewer, and approver, whether or not assigned to the document or questionnaire	Administrators and only the assigned document/questionnaire owner, proxy authors, writers, reviewers, and approvers	Administrators and only the assigned document/questionnaire owner and proxy authors with active tasks
Collaboration	Contains	Administrators	Administrators	Administrators

	documents and questionnaires submitted to assigned writers but not yet finishes by all assigned writers.	and any document/questionnaire owner, proxy author, writer, reviewer, and approver, whether or not assigned to the document or questionnaire	and only the assigned document/questionnaire owner, proxy authors, writers, reviewers, and approvers	and only the assigned document/questionnaire owner, proxy authors, and writers with active tasks
Review	Contains documents and questionnaires submitted for review but not yet reviewed by all assigned reviewers.	Administrators and any document/questionnaire owner, proxy author, writer, reviewer, and approver, whether or not assigned to the document or questionnaire	Administrators and only the assigned document/questionnaire owner, proxy authors, writers, reviewers, and approvers	Administrators and only the assigned document/questionnaire owner, proxy authors, and reviewers with active tasks
Approval	Contains documents and questionnaires accepted by all reviewers or submitted directly to approval but that have not yet been acted on by all assigned approvers.	Administrators and any document/questionnaire owner, proxy author, writer, reviewer, and approver, whether or not assigned to the document or questionnaire	Administrators and only the assigned document/questionnaire owner, proxy authors, writers, reviewers, and approvers	Administrators and only the assigned document/questionnaire owner, proxy authors, and approvers with active tasks
Pending	Contains approved documents and	Administrators and any document/questionnaire owner,	Administrators and only the assigned document/questionnaire	Administrators and only the assigned document/questionnaire

	questionnaires that have not yet reached their designated publication/start dates—the dates when they will move into the Published/Started status.	proxy author, writer, reviewer, and approver, whether or not assigned to the document or questionnaire, and sometimes assignees*	questionnaire owner, proxy authors, writers, reviewers, approvers, and sometimes assignees*	questionnaire owner, proxy authors, and sometimes assignees* with active tasks
Published/Started	Contains documents and questionnaires accepted by all assigned reviewers (if any) and approvers and that have been published upon approval or on their designated publication/start date.	Administrators and any document/questionnaire owner, proxy author, writer, reviewer, approver, or assignee, whether or not assigned to the document or questionnaire	Administrators and only the assigned document/questionnaire owner, proxy authors, writers, reviewers, approvers, and assignees	Administrators and only the assigned document/questionnaire owner, proxy authors, and assignees with active tasks
Archived	Contains previous versions of documents and questionnaires, documents replaced by new	Administrators and any user assigned the Archived Content role	Administrators and any user assigned both the Archived Content role and the Document/Questionnaire Owner, Proxy Author, Writer,	Administrators and any user who is both assigned the Archived Content role and is assigned as the document/questionnaire owner

documents, and manually archived documents and questionnaires.	Reviewer, or Approver role	or proxy author for the current document or questionnaire
--	----------------------------	---

\*Assignees can access a document or questionnaire in Pending status if the **Require completion before publication** option is currently selected in the Properties Wizard.

## Access to Campaigns

Workflow Status	Description	Roles with Access
Draft	Contains campaigns not yet set as approved.	Administrators and any campaign owner, whether or not assigned to the campaign
Pending	Contains approved campaigns that have not yet reached their designated start dates—the dates when they will move into the Started status.	Administrators and any campaign owner, whether or not assigned to the campaign
Started	Contains campaigns set as approved and that have been published upon approval or on their designated start date.	Administrators and any campaign owner, whether or not assigned to the campaign
Archived	Contains previous versions of campaigns and manually archived campaigns.	Administrators and any user assigned the Archived Content role

---

## Working with the Content Item Grid

By default, **Search** and **Browse** show content items (documents, questionnaires, or campaigns) in a grid (or table) consisting of rows and columns. Use any of the features below to customize the grid to your needs or export it as an Excel spreadsheet.

[Customizing the Grid Layout](#)

[Custom "Arrange By"](#)

[Applying Filters to a Content Item Grid](#)

[Switching to the List View in the Content Item Grid](#)

[Exporting a Content Item Grid](#)

[Printing a Document Grid](#)

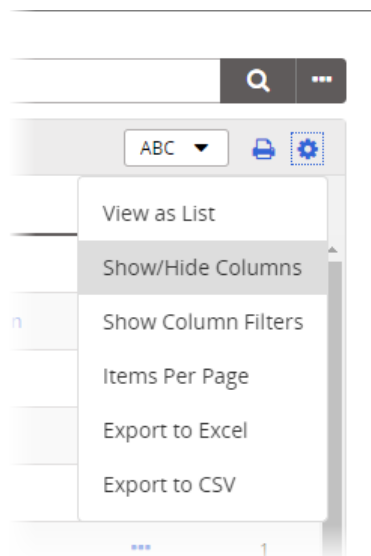

---

## Customizing the Grid Layout

You can add or remove columns from the grid, rearrange and resize columns, and change which column the grid is sorted by. You can also specify how many items (rows) to show per page.

## Adding or Removing Columns

1. In a **Documents**, **Questionnaires**, or **Campaigns** grid, click , and then click **Show/Hide Columns**.

2. Do any of the following:

- Select or click to clear a check box to show or hide that column.
- Select **Lock Title Column** to keep the **Title** column always visible on the left of the grid as you scroll from left to right.

**Note:** **Lock Title Column** locks both the **Title** and **Type** columns (if **Type** is currently displayed) and moves them to the far left of the grid. With **Lock Title Column** active, you can switch which of these columns is displayed first, but you can't move either of them out of the first two column positions.

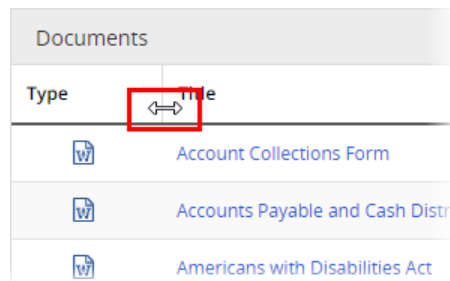

- Click **Reset Column Layout**.

**Note:** This only resets which columns are displayed. It does not affect the current column positions or sizes.

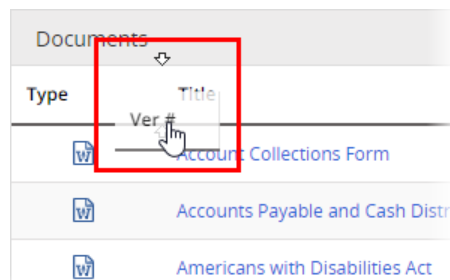

3. Click **Done**.

## Arranging Columns and Changing Sort Order

**Adjust a column's width:** Hover the pointer over the line between two column headers until the pointer changes to a two-headed arrow, and then click and drag the column separator.

**Move a column:** Click and drag a column header over a column separator to display the placement arrows, and then drop the header.

**Select a column to sort by:** Click a column header to sort the documents or questionnaires by that item. An up or down arrow appears in the current sort column.

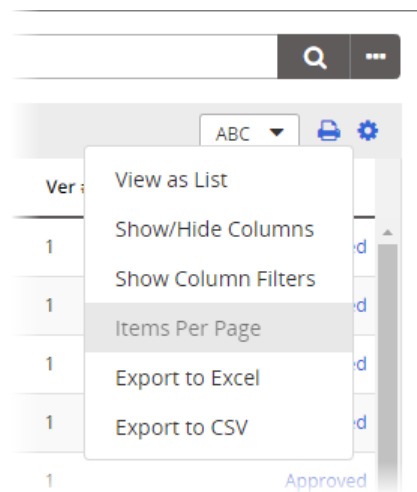

Documents		AB
Type	Title	Action
	Account Collections Form	...
	Accounts Payable and Cash Distribution	...
	Americans with Disabilities Act	...

**Change the sort order:** Click the header of the current sort column to reverse the sort order from ascending to descending, or vice versa.

## Changing the Number of Items Displayed per Page

1. In a **Documents**, **Questionnaires**, or **Campaigns** grid, click , and then click **Items Per Page**.

2. Click an option.

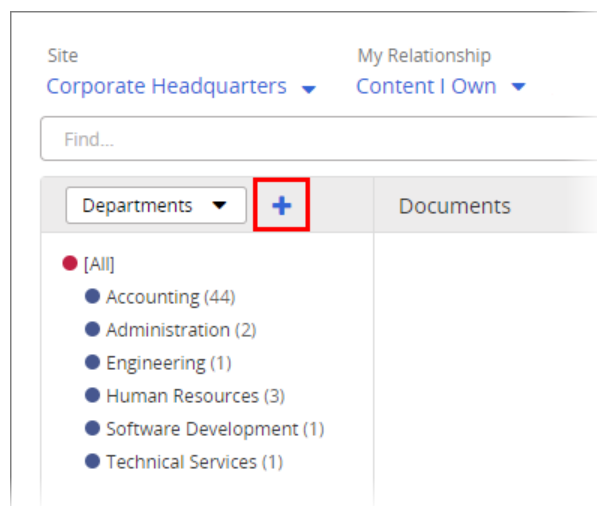

## Using Custom "Arrange By"

The **Arrange By** feature lets you arrange content items (documents, questionnaires, or campaigns) based on a single property, such as the assigned department, template, owner, or category.

Use **Custom Arrange By** to arrange a content item list by up to four levels of properties, as shown in the example below.

1. Click **Documents**, **Questionnaires**, or **Campaigns**, and then click **Browse**.
2. Next to the current **Arrange By** selection, click **+**.

3. For **Arrange by**, select a property.

Custom Arrange By

**Arrange by**  
Departments ▼

**Then by**  
None ▼

**Then by**  
None ▼

**Then by**  
None ▼

**Name**

4. (Optional) Select one or more **Then by** options.
5. Type a name, and then click **Save**.
6. (Conditional) If you've been assigned the administrator role for all sites (global permissions), you can share your custom arrangement by selecting **Make this arrangement available to all users**. It will then appear as an option in the **Arrange By** list for all users on all sites. The custom arrangement will also be available in other tools, such as the content item selector for reports and in **Bulk Edit**, as well as in the **Default Browse Arrangement** settings in **System Settings** and in **My Profile**.

Custom Arrange By

**Arrange by**

**Then by**  
Document Owner ▼

**Then by**  
None ▼

**Then by**  
None ▼

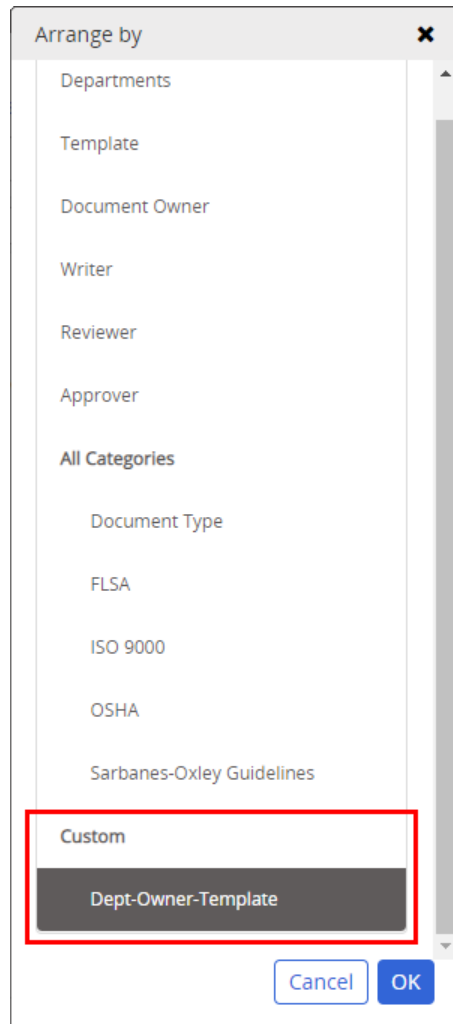

**Name**  
Dept > Owner

Make this arrangement available to all users ⓘ

Cancel Save

7. Click **Save**.

The custom arrangement is immediately applied and is added to the **Arrange by** list under the **Custom** heading for future use.

### Editing or Deleting a Custom Arrangement

1. Click **Documents**, **Questionnaires**, or **Campaigns**, and then click **Browse**.
2. For **Arrange by** list, select the custom arrangement you want to edit or delete.
3. To the right of the **Arrange by** selection, click .

4. Do one of the following:

- Make changes to the custom sort, and then click **Save**.
- Click **Delete**.

Custom Arrange By

**Delete** **Cancel** **Save**

## Applying Filters to a Content Item Grid

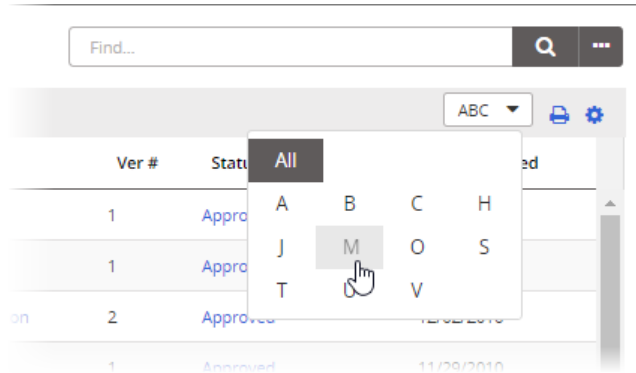

To narrow which content items (documents, questionnaires, or campaigns) are listed in a grid, you can apply an alphanumeric title filter or a column content filter.

### Alphanumeric Title Filter

Use this filter to limit listed content items to those whose titles start with a specific letter, a specific punctuation mark or special character, or with a number.

In a content item grid, click **ABC** ▾, and then click an available letter or character, or click **#** to list documents whose titles start with a number.

**Note:** A letter or a punctuation or special character is available only if there is at least one content item whose title starts with that letter or character. The **#** is available only if there is at least one content item whose title starts with a number character (0 through 9).

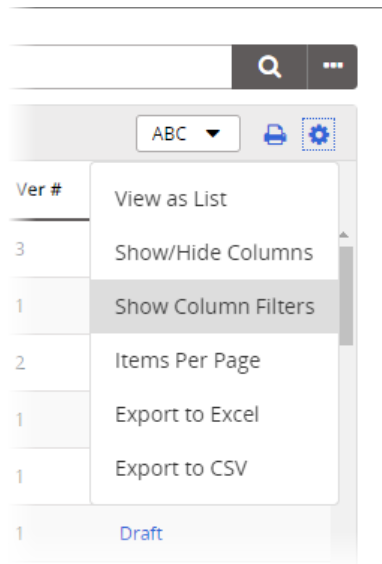

To clear the alphabetic filter, click **ABC**, and then click **All**.

## Column Content Filter

You can use a column content filter to narrow the list of content items to only those whose information within a column (title, version, status, etc.) matches the filter criterion for the text you type. Simple filter criteria include the following: **Begins with**, **Contains**, **Doesn't contain**, **Ends with**, **Equals**, **Doesn't equal**. You can apply a simple filter to only one column at a time.

1. In a content item grid, click , and then click **Show Column Filters**.

2. Click inside a column's filter box, and then type the text to filter by. The list is immediately limited to those content items matching the filter text and criterion.

- (Optional) To use a filter criterion other than **Begins with** (the default), to the right of the filter box click , and then click an option.

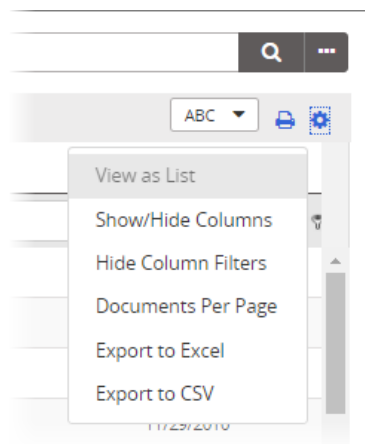

- (Optional) Repeat steps 2 and 3 in a different column to further filter the list.

## Switching to the List View in the Content Item Grid

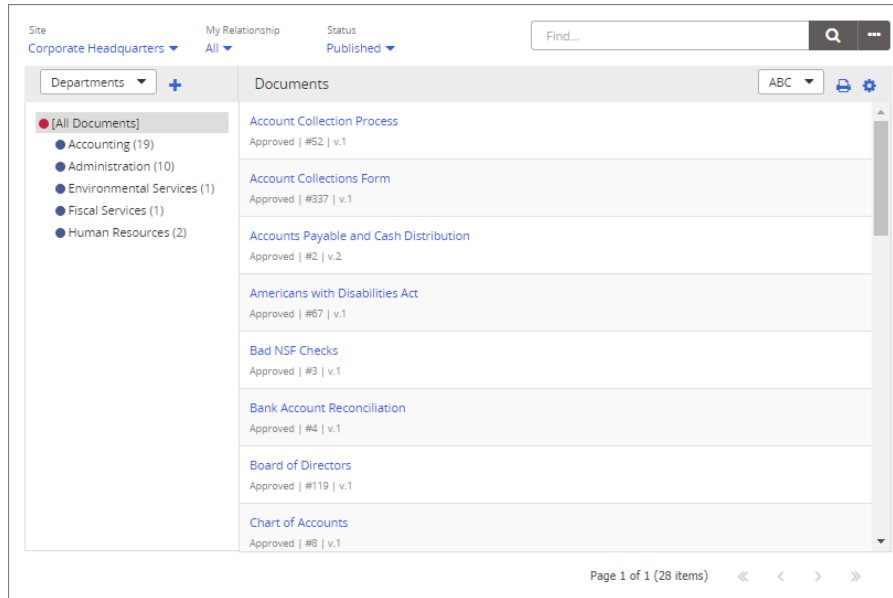

When using **Search** or **Browse**, you can change how found or "browsed to" content items are displayed.

To change from the standard grid view (rows and columns) to a simple list view (just rows), click , and then click **View as List**.

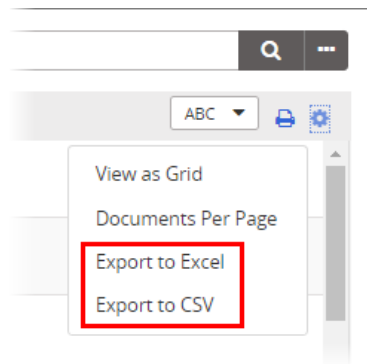

In the list view, each row includes only the content item title, status, reference number, and version number.

### Exporting a Content Item Grid

1. To export the currently displayed content item (document, questionnaire, or campaign) grid, click , and then click **Export to Excel** or **Export to CSV** (comma-separated value file).

2. Follow the prompts to open or save the file.

### Printing a Document Grid

You can print or save to disk a list of the documents displayed in the main **Browse** or **Search** grid, such as all the published documents from the accounting department.

**Note:** Printing of the grid is not available for questionnaires and campaigns.

1. Use **Search** or **Browse** to display a list of the documents you want included in the printed list (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).

**Note:** Information about all of the listed documents is printed, even if the list spans multiple pages.

2. (Optional) The following details are always included for each content item in the printed list:
  - Reference number
  - Title with version number
  - Owner
  - Site and department
  - Security level
  - Review interval in months

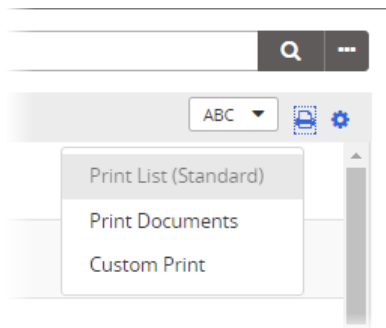

You can also include any of the following dates:

- Date created
- Date submitted
- Last reviewed date
- Date approved
- Publication date

To add one or more dates to the printed document list, click , click **Show/Hide Columns**, and select one or more of the date columns listed above, and then click **OK**.

**Note:** These are the only column selections that affect the content of the printed list.

3. Click , and then click **Print List (Standard)**.

The list opens in a separate browser window where you can view, print, and save the list to disk in several different formats.

The screenshot shows a web browser window with the following content:

## Adding and Viewing Favorite Documents

You can mark a document to add it to your **Favorites** view.

**Note:** **Favorites** is not available in **Questionnaires** or **Campaigns**.

### Adding a Favorite

You can add a favorite in an open document or in a document list.

#### In an Open Document

In the header, click the star after the document title.

#### In a Document List

In the **Actions** column of a document in a list, click **...**, and then click **Add to Favorites**.

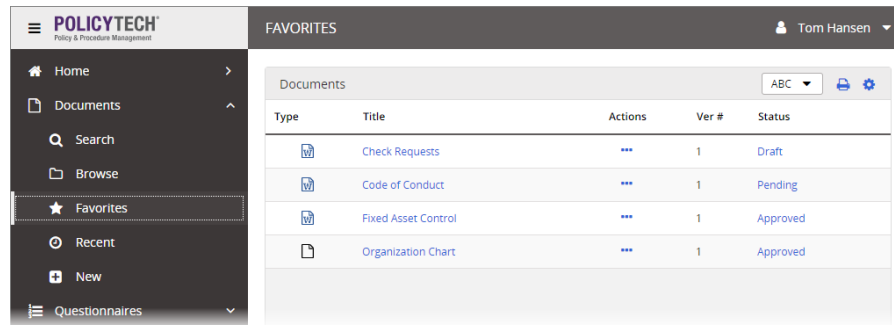

### Viewing Your Favorites List

Click **Documents**, and then click **Favorites**.

## 66 - Adding and Viewing Favorite Documents

---

The screenshot displays the PolicyTech interface. On the left is a dark sidebar with navigation options: Home, Documents, Search, Browse, Favorites (highlighted), Recent, New, and Questionnaires. The main content area is titled 'FAVORITES' and shows a user profile 'Tom Hansen'. Below this is a 'Documents' section with a table listing favorite documents.

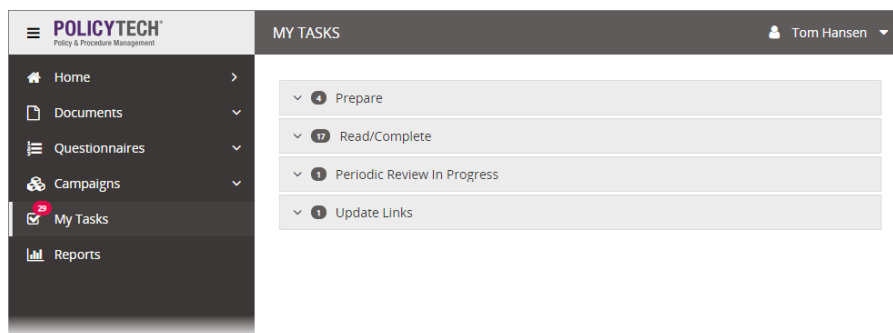

Type	Title	Actions	Ver #	Status
	Check Requests	...	1	Draft
	Code of Conduct	...	1	Pending
	Fixed Asset Control	...	1	Approved
	Organization Chart	...	1	Approved

## Working with My Tasks

If PolicyTech is set up to use your organization's email system, PolicyTech sends you a notification email each time you receive a new task (see [Working with Notification Emails](#) for details). Each task is also added to your **My Tasks** page under the appropriate task type. The types of tasks you can receive depend on the roles and system permissions you've been given.

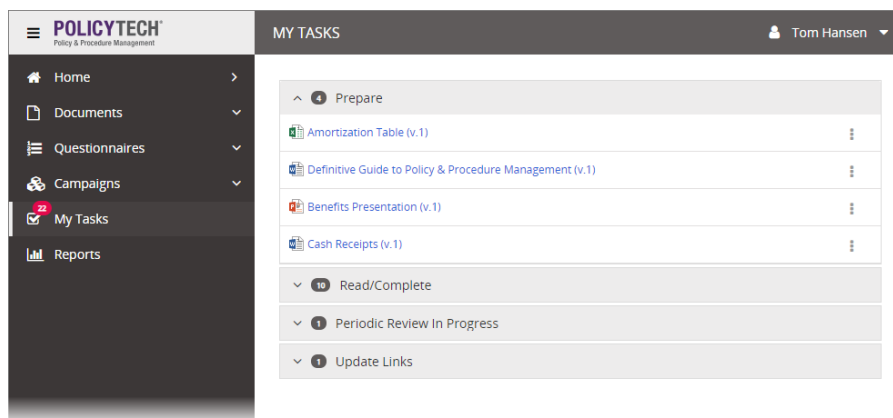

**Note:** If PolicyTech or your user profile is not set up for you to receive email notifications, you will see an **Inbox** option below **My Tasks**. Click **Inbox** to view and manage your task and other notifications (see [Using the Messages Inbox](#) for details).

1. Click **My Tasks**. The image below is an example of what a **My Tasks** page could look like for a user assigned the Document Owner, Reviewer, and Assignee roles.

2. Click a heading to display its task list.

**Note:** If there is only one task type, its task list is automatically displayed (expanded).

**Note:** When assigning writers, reviewers, approvers, and assignees to a content item, assigning a due date, a warning period, and a date when a task becomes critical is optional. If one or more of these dates have been assigned, you may see one of the following icons:

Icon	Meaning
	Today's date is within the designated warning period before the due date.
	The due date has passed.
	The designated critical date has passed.

- To open a content item, click its title.
- Perform your task, and then take the appropriate action to indicate that you've completed the task. See the Help topic links in the next section's table for additional instructions.

## Task List with Help Topic Links

The table below shows some tasks users with each role or system permission might receive and links to topics that explain how to perform those tasks.

Role or Permission	"My Tasks" Section Heading	Help Topic Link
Assignee	<b>Read / Complete</b>	<a href="#">Reading a Required Document</a> <a href="#">Completing a Questionnaire</a> <a href="#">Completing a Campaign</a>
Writer	<b>Collaborate</b>	<a href="#">Collaborating on (Helping to Write) Content (for assigned writers)</a>
Reviewer	<b>Review</b>	<a href="#">Reviewing a Document or Questionnaire</a>
Approver	<b>Approve</b>	<a href="#">Approving a Document or Questionnaire</a>
Document owner	<b>Prepare</b>	<a href="#">Submitting a Document or Questionnaire for Review</a>

Role or Permission	"My Tasks" Section Heading	Help Topic Link
Document owner, proxy author	<b>Periodic Review Required</b>	<a href="#">Doing a Periodic Review and Creating a New Version</a>
Document owner, proxy author	<b>Update Links</b>	<a href="#">Updating Document Links</a>
Administrator	<b>Reassign Documents</b>	"Reassigning Owners' Content" in the <a href="#">Administrator's Guide</a>

## Using the PolicyTech Inbox

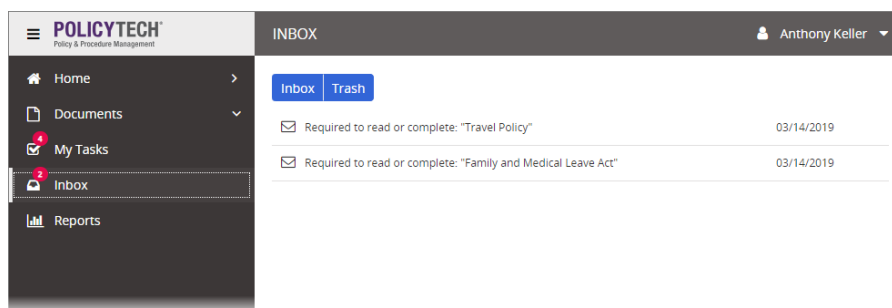

If one or both of the following are true, your task and informational notifications will be posted to the PolicyTech Inbox instead of being sent to you via your organization's email system.

- An administrator has not configured PolicyTech to use your organization's email system.
- Your user definition (set up and managed by the administrator) does not include a valid email address.

**Note:** Because an email address is required for any user assigned the Administrator system permission, the Inbox will never be available for an administrator if PolicyTech is configured to use your organization's email system.

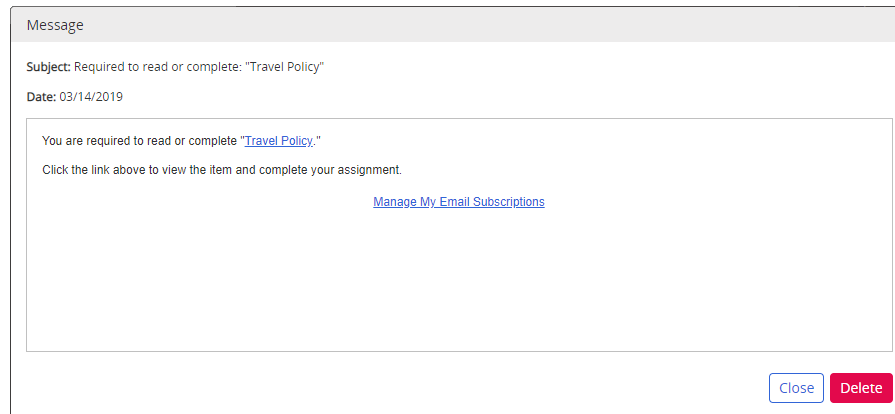

1. Click **Inbox**.

**Note:** If you don't see the **Inbox** option in the left panel, then you are set up to receive notifications via your organization's email system. If you're not receiving notifications, contact your administrator for help.

2. To read a message, click it.

3. If the message is a task notification, to open the content item, click its title, and then perform the task (see [Task List with Help Topic Links](#) in the "Working with My Tasks" topic).
4. Click **Close** or **Delete**.

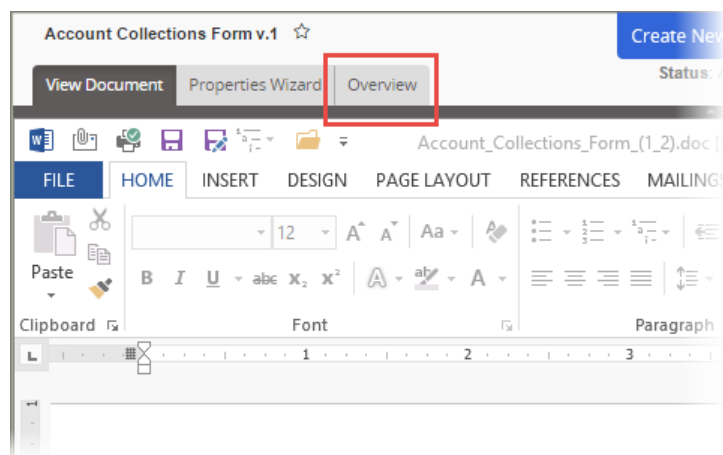

## Working with the Overview

The Overview provides quick views of a content item's properties, history, assigned task status, links, and security settings.

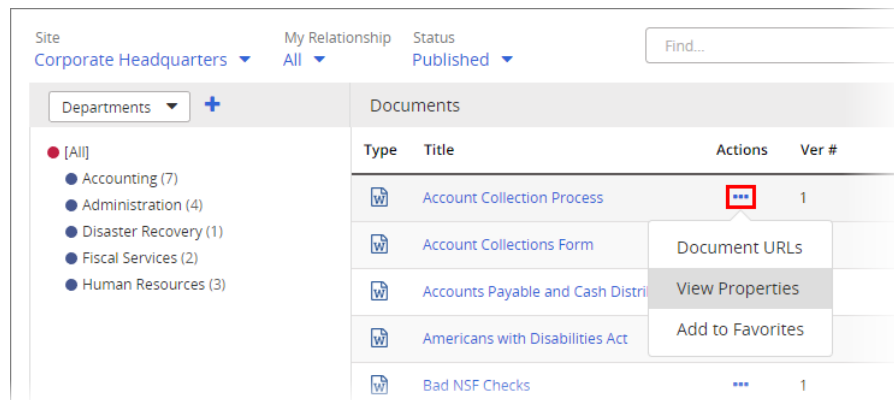

**Important:** If you don't see the **Overview** tab in a content item (document, questionnaire, or campaign), then your PolicyTech system is set up to hide the **Overview** for users with only the Assignee role assigned.

To access an overview, do any of the follow:

- Open the content item, and then click **Overview**.

- In a **Documents** or **Questionnaires** grid after using **Search** or **Browse**, click **...** in an item's **Actions** column, and then click **View Properties**.

- In a **Documents**, **Questionnaires**, or **Campaigns** grid after using **Search** or **Browse**, click the link in an items **Status** column.

Type	Title	Actions	Ver #	Status
	Account Collection Process	...	1	Approved
	Account Collections Form	...	1	Approved
	Accounts Payable and Cash Distribution	...	1	Approved
	Americans with Disabilities Act	...	1	Approved

The **Overview** opens with the **Properties** page selected. Notice the links to other overview pages (**Version History**, **Approver Status**, etc.).

**Note:** If you click the link in the **Status** column of the **Documents**, **Questionnaires**, or **Campaigns** grid, you may be taken to the corresponding status page instead of the **Properties** page.

## About the Properties Page of the Overview

The **Properties** page shows most of the settings from the **Properties Wizard**, the dates of workflow milestones, and the content item URL.

**Note:** You can copy and paste the provided URL in a document's content to link between PolicyTech documents. In the rare case where you have multiple PolicyTech systems and need to link to documents in one PolicyTech system from documents in another PolicyTech system, you can contact Customer Support to have the **Cross-System URL** feature enabled. When enabled, this feature displays a specially formatted URL that a user can copy and paste into a document in another PolicyTech system to link back to the current document.

All of the **Properties** page information is for the document or questionnaire in its current state. You can also view the properties on the date when the item was approved. In the example below, the user would click **View overview on approved date**. There may be differences between the two **Properties** pages, because administrators and the owner can change properties within the approved item. An administrator can also change PolicyTech preferences that may affect properties.

## About the Version History Page of the Overview

The **Version History** page can contain two areas: the **Current Revision History** and the **Approved Document History**. You will see the **Current Revision History** if a version of the document or questionnaire is being created or revised and is in the Draft, Collaboration, Review, or Approval status. The **Approved Revision History** appears if one or more versions of the item have been approved.

### Notes:

- See [Snapshot Triggers](#) for details on when a new snapshot (stored copy) of a Word or Excel document is taken.
- By default, snapshots of the draft versions are deleted when the document is approved. There is an add-on module available that

enables the keeping of all draft snapshots after approval. Talk to your administrator if you feel you need this functionality.

The screenshot displays the 'Version History' page for 'Account Collections Form v.2'. The document status is 'Approved - Published'. The page is divided into two main sections: 'Current Revision History' and 'Approved Content History'.

**Current Revision History**

Version	Date Updated	Changes Summary	Compare Versions	Superseded Documents	Status

1.0	11/04/2010	<a href="#">View</a>	<a href="#">Compare</a>	-None-	08/01/2011	1	Major Version

In the **Version History** page, you can do any of the following:

- Click **Change Summary Report** to go to that report. (For help with setting up and generating the report, see the "Report: Change Summary" section in the [Reports Supplement](#).)
- Click **Change Log** to view details of the item's workflow, including each writing (collaboration), review, and approval cycle.

**Note:** The **Change Log** option is available only if the item has been through multiple writing (collaboration), review, or approval cycles.

Date	Action	Resulting Step	User	Description
▼ Cycle: 0				
▲ Cycle: 1				
11/7/2018	Submit for Review	Review	Johnson, Douglas	
11/7/2018	Send to Draft	Draft	Johnson, Douglas	<a href="#">View Reviewer Results</a>
▲ Cycle: 2				
11/7/2018	Submit for Review	Review	Johnson, Douglas

In the **Description** column click **View Writer Results**, **View Reviewer Results**, or **View Approver Results** to see the actions taken by each assigned writer, reviewer, or approver, along with comments, if any.

Date	Action	Resulting Step	User	Description
Accepted 09/15/2016 12:03 PM			Benton, Carol	No comments were made
Accepted 09/15/2016 12:04 PM			Breen, Darren	No comments were made
Revised 09/15/2016 12:03 PM			Driggs, Shiela	Made some changes to paragraph 2 on page 5.

✓ OK

- Click **View this version (Content & Properties)** to open the item. What you see will be the same as if you opened the document or questionnaire directly from a **Documents**, **Questionnaires**, or **Campaigns** grid for the item's current status (Draft, Collaboration, Review, etc.).
- Click a version number to see an uneditable view of that version.
- Click **View** in the **Changes Summary** column to display the change summaries (if any) entered by the owner when submitting the item for review or approval or setting is as approved. Changes to inserted fields are also displayed.
- Click **Compare**, and then click the version number you want to compare to the currently open version. A PDF version of the item opens with changes marked up.
- Click a number (except 0) in the **Completed By** column to see who has read/completed that version.
- Click **All** in the **Completed By** column to see all users who have read/completed that version, including revisions.

## Snapshot Triggers

A snapshot is a stored copy of a document in a specific state. Whenever a Microsoft® Word, Excel®, or PowerPoint® document goes through a significant change (see table below), PolicyTech makes a copy of the document as it exists immediately before that change takes place.

There are two types of snapshots—document (content) and properties. The table below lists all changes that trigger a snapshot, along with the types of snapshots taken. Snapshot types followed by an asterisk (\*) are deleted once the document is approved.

Snapshot Trigger	Snapshot Type
The document owner submits a draft document to one of the following statuses: Collaboration, Review, Approval.	Document*
All assigned writers finish writing the document, which sends the document from Collaboration back to Draft.	Document*
A reviewer or approver revises or declines a document, which sends it back to Draft.	Document*
All assigned approvers accept the document, which moves it to Pending or Published status.	Document and properties
An administrator sets an unapproved document as approved.	Document and properties
An administrator edits an unapproved document in its current state and then takes an action that moves the document to a different state. For example, after editing a document in review, an administrator submits the document to Approval or sets the document as approved.	Document and properties
An administrator edits in its current state an approved document's content.	Document
An administrator edits in its current state an approved document's properties.	Properties
A document owner or administrator archives a document.	Properties

\* *The snapshot is deleted once the document is approved.*

## Editing a Change Summary

A change summary is created whenever a draft content item (document, questionnaire, or campaign) is submitted to Review or submitted directly to Approval (skipping the Review status). As an assigned owner or proxy author,

you can make changes to a content item's change summary while that item is in any status except archived.

**Important:** You can only access the editing feature on major versions greater than 1.0 (such as 2.0 or 3.0). It is not available for version 1.0 and when viewing minor version change summaries (1.1, 1.2, 1.3, etc.).

1. Open a content item in any status except archived.
2. Click the **Overview** tab, and then click **Version History**.
3. In the **Changes Summary** column, for a major version (with a .0 extension), click **View**.

**Note:** The version history may list archived versions, whose change summaries cannot be edited.

The screenshot displays the 'Version History' section for 'Safety Guidelines v.2'. At the top, there are tabs for 'View Document', 'Properties Wizard', 'Overview', and 'View Questionnaire'. The 'Overview' tab is selected. Below the tabs, there are links for 'Properties', 'Version History', 'Writer Status', 'Reviewer Status', 'Approver Status', 'Assignee Status', 'Links', 'Security', and 'Discussions (0)'. The main content area is divided into two sections: 'Current Revision History' and 'Approved Content History'.

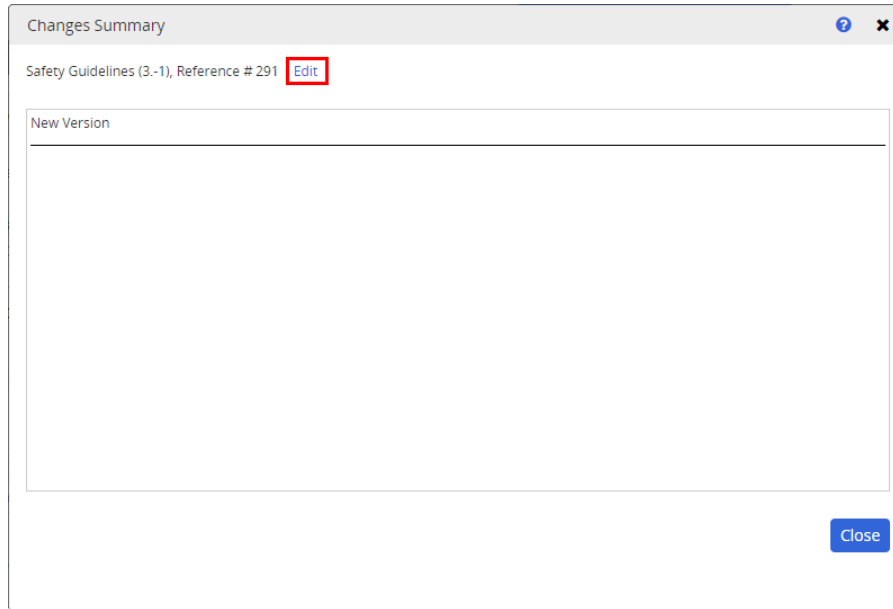

**Current Revision History:**

	Date Updated	Changes Summary	Compare Versions	Superseded Documents	Status
<b>Version 3 - View Document &amp; Properties</b>					
	3.0 - Draft: 0	11/05/2018	<a href="#">View</a>	<a href="#">Compare</a>	-None- Current: Draft

**Approved Content History:**

	Date Updated	Changes Summary	Compare Versions	Superseded Documents	Date Archived	Completed By	Event
<b>Version 2 - You are viewing this version of the document.</b>							
All							
	2.1	11/05/2018	<a href="#">View</a>	<a href="#">Compare</a>	-None-	Published	2 System Snapshot
	2.0	11/05/2018	<a href="#">View</a>	<a href="#">Compare</a>	-None-	11/05/2018	0 Major Version
<b>Version 1 - View Document &amp; Properties</b>							
	1.tmp	10/16/2018	-None-	<a href="#">Compare</a>	-None-	11/05/2018	0
	1.2	10/16/2018	<a href="#">View</a>	<a href="#">Compare</a>	-None-	11/05/2018	0 System Snapshot
	Restored	10/15/2018	<a href="#">View</a>	<a href="#">Compare</a>	-None-	10/16/2018	0 Johnson, Douglas (Chief Executive Officer)
	1.1	06/24/2016	<a href="#">View</a>	<a href="#">Compare</a>	-None-	06/24/2016	0 System Snapshot
	1.0	06/24/2016	<a href="#">View</a>	<a href="#">Compare</a>	-None-	06/24/2016	0 Major Version

4. Click **Edit**.

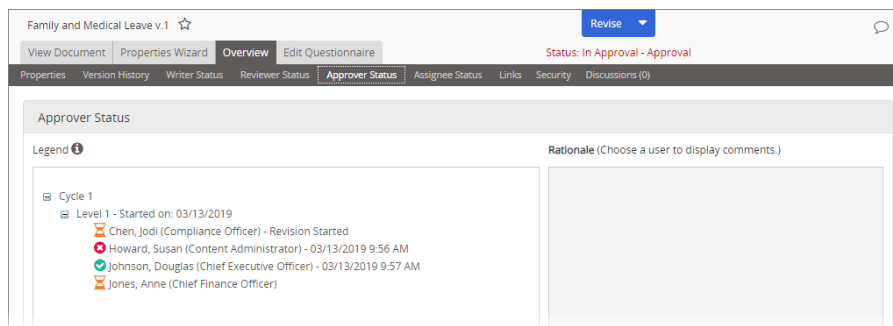

5. Make changes, click **Save**, and then close the content item.

**Notes:**

- To return to the existing change summary without saving changes, click **View** or **Close**.
- You cannot save an empty change summary.

## About the Writer, Reviewer, and Approver Status Pages of the Overview

Use these pages to check the status of users assigned to write, review, and approve the document or questionnaire. Each page lists the assigned users with a status icon before each name. If a user finished an action (writing, reviewing, or approving) and typed comments when doing so, you can see them by clicking that user's name.

## Icon Descriptions

-  The assigned writer has finished writing the document/questionnaire, or the assigned reviewer or approver has accepted the document/questionnaire as it is.
-  The assigned reviewer or approver has either revised or declined the document/questionnaire.
-  The assigned writer, reviewer, or approver has been notified of the task that needs to be completed, but has not completed it yet. For example, you would see this icon for an approver in the **Approver Status** page if the document/questionnaire is currently in the Approval workflow status and the user has not finished reviewing it.
-  The assigned writer, reviewer, or approver did not complete the assigned task before the document/questionnaire was moved to another workflow status. For example, while a document/questionnaire is in Collaboration status, the document owner clicks **Submit for Review** before one of the writers clicks **Finished Writing**. The document/questionnaire is moved to Review status, and the **Skipped** icon appears before the writer's name in the **Writer Status** page.
-  The assigned writer, reviewer, or approver has not yet received the task assignment. For example, you are looking at an approver in the **Approver Status** page while the document/questionnaire is still in Review.
-  The assigned writer, reviewer, or approver received a task assignment but was subsequently unassigned before completing the task. For example, while a document is in Approval and all approvers have received their task notifications, the document owner edits the document's/questionnaire's **Properties Wizard** and removes one of the assigned approvers. That user is now marked as unassigned.
-  Because the assigned writer, reviewer, or approver is on leave of absence, this user's task status is excluded.

---

## About the Assignee Status Page of the Overview

This page shows the status of assignee (reading/completion) tasks.

Code of Conduct v.1 ☆ Mark as Read Create New Version

View Document Properties Wizard Overview Status: Approved - Published

Page 1 of 1 (12 Items) [1] >

\* = Completed by proxy

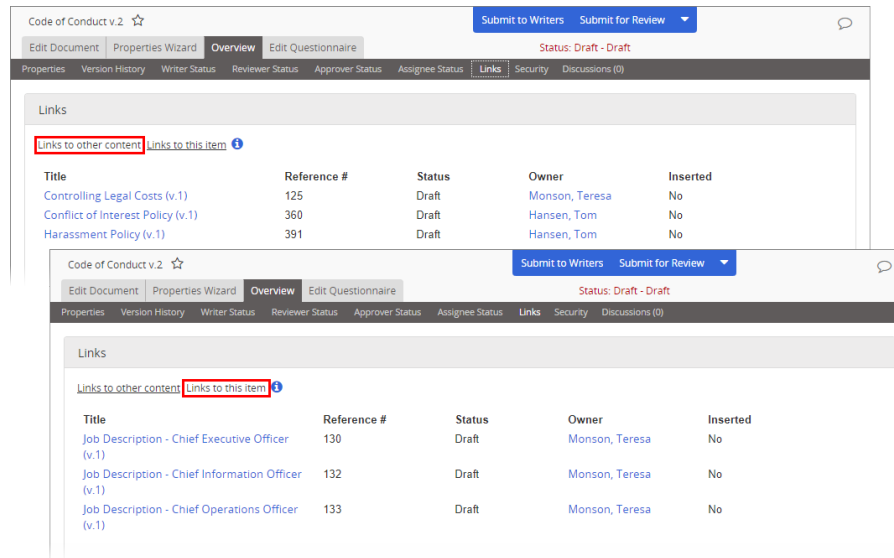

## Icon Descriptions

- The assignee has marked the document as read or completed the questionnaire or campaign.
- The assignee has received notification that the content item is ready to read/complete, but the user has not finished the task.
- The assignee did not mark the document as read or complete the questionnaire or campaign before a new version or revision of the content item was made.
- The assignee has not yet received notification to read/complete the content item.
- The assignee was once assigned to read/complete the content item, but has since been unassigned.
- Because the assignee is on leave of absence, this user's task status is excluded.

## About the Links Page of the Overview

**Note:** The **Links** page applies only to documents and is not available in the **Overview** for questionnaires or campaigns.

The **Links** page shows links both out of and into the current document and shows whether a link has been inserted into the document.

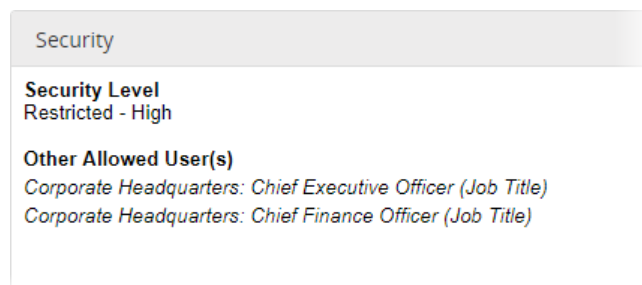

In the **Links** page, do any of the following:

- Click **Links to other content** to display documents the current document is linked to.
- Click **Links to this item** to display other documents that link to the current document.
- Click the title of a listed document to open it.
- Click a document owner's name to display that user's site, department, job title, and email address.

## About the Security Page of the Overview

The **Security** page shows the document's or questionnaire's security settings from the **Properties Wizard**, plus any additional users given permission to view the document/questionnaire.

## Printing Documents

The options you have for printing documents depends on the roles and system permissions you've been assigned.

All users with at least the Assignee role have access to the **Print List (Standard)** option. See [Printing a Document Grid](#).

If you've been assigned the Administrator or Report Manager permission, you'll also have access to the **Print Documents** and **Custom Print** options for printing document contents if PolicyTech's current configuration allows document printing. See [Using Print Documents](#) and [Using Custom Print](#) for details.

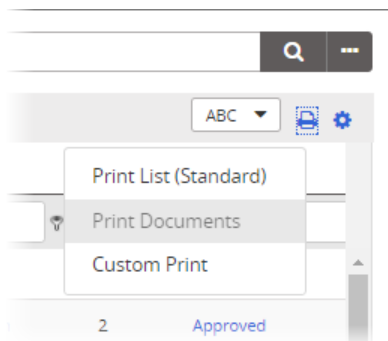

## Using Print Documents

### Important:

- You will see this print option only if the following are true:
  - You've been assigned the Administrator or Report Manager permission.
  - You are in a **Documents** list. Print options are not available for questionnaires or campaigns.
  - PolicyTech's current configuration supports document printing.
- This print option applies only to Word and Excel documents.

**Note:** If you have access to document reports and PolicyTech's current configuration supports document printing, you can also use the **Print Multiple Documents** report to select and print documents (see "Print Multiple Documents" in the [Reports Supplement](#)).

1. Use **Search** or **Browse** find the documents you want to print (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click , and then click **Print Documents**.

3. Select what you want printed (see [Print Documents Options](#) for details).

Print Options

Use the tools below to select which attributes will be printed/exported.

Print Documents (Paging Options)

Properties (More)

Document

Attachments (Microsoft Word & Excel only)

Page 1 of 3 Records 1 - 5

Cancel Print Documents

4. Click **Print Documents**.

**Important:** PolicyTech opens and prints each selected document one after the other. This may take several minutes if many documents are selected. Do not attempt to work with any open document until the printing process has completely finished.

5. The last thing to be printed is the table of contents page, at which time you'll see the message displayed below.

.policytech.com says

Printing Complete.

Click OK if you would like to customize the Table of Contents and then print it again.

OK Cancel

To use the default table of contents that has already been printed, click **Cancel**, which closes the table of contents.

To edit the default table of contents page, click **OK**, and then make changes as you would with any other Word document within PolicyTech. When finished, print the modified table of contents from within Word.

---

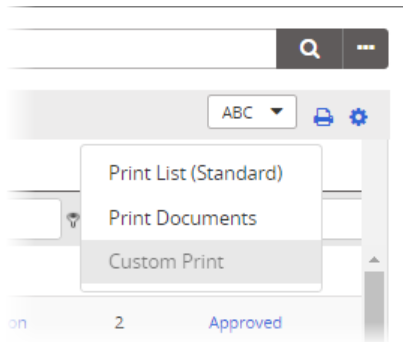

## Using Custom Print

### Important:

- You will see this print option only if the following are true:
  - You've been assigned the Administrator or Report Manager permission.
  - You are in a **Documents** list. Print options are not available for questionnaires or campaigns.
  - PolicyTech's current configuration supports document printing.
- This print option applies only to Word and Excel documents.

The **Custom Print** feature uses a different method of selecting documents (not the document list) and offers more options for what to print.

1. With a **Search** or **Browse** document grid displayed, click , and then click **Custom Print**.

2. Select the documents you want to print (see the "Selecting Documents" section in the [Reports Supplement](#)).

**Important:** By default, only documents assigned the **All Users** (default) security level are displayed in the **Available Documents** box. To display and have the option to select documents assigned the **Restricted - High** or **Restricted - Severe** security level, click **Show Restricted Documents**. Restricted document titles are displayed in red font.

**Print Options**

Use the selection tools below to build a list of content you would like to see in this report.

**Content Type:** Documents

**Status:** All Statuses  Show Restricted Content

**Site:** Corporate Headquarters

**Select By:** Title

**Title:** Type here to search by title.

**Available:** Select an item by typing a Title/Reference Number above or changing the Select By criteria.

**Selected:**

Shift+Click selects a span of checkboxes.

3. Do one of the following:

- To start the automated printing of the selected documents, click **Print Documents**.
- To change one or more report settings, click **Next**, and then continue with the next step.

**Print Options**

Use the options below to determine the detailed results of this report. Use the Content Arrangement section to select the content

Print Documents ([Paging Options](#))

Properties ([More](#))

Document

Attachments (Microsoft Word & Excel only)

Print Display Table

Standard

Microsoft Excel Raw

**ARRANGEMENT**

Selected: 4

Title	Ver #	Status
Computer and Internet Security	1	Approved
Facilities Access Policy	1	Approved
Protecting Intellectual Assets	1	Approved
Recognizing & Preventing Phishing Attacks	1	Approved

4. Select one of the following outputs for the selected documents:

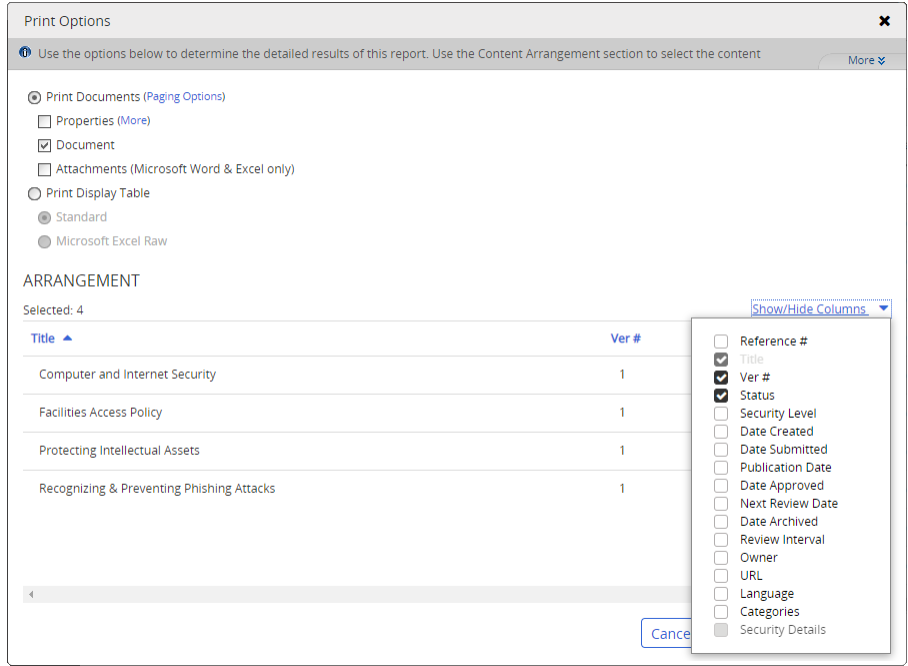

- **Print Documents:** Automatically opens and prints all selected documents. To change what is printed by default, see below. If you select this option, skip step 5.
  - **Print Display Table:** A display table is what is currently displayed in the **Document Arrangement** area, which you can modify (see the next step below). After selecting this option, select **Standard** to create a report containing the document list, or select **Microsoft Excel Raw** to export the list to an Excel (.xls) file.
5. The **Arrangement** area controls what document information is included in the printed output and the document sort order. Do any of the following:

**Important:** Making changes in the **Arrangement** area directly affects what is printed or exported with the **Print Display Table** options.

- By default, the following information is included about each document listed in the **Arrangement** area:
  - Reference number
  - Title
  - Version number
  - Status
  - Date Created
  - Date Submitted
  - Publication Date
  - Date Approved
  - Next Review Date

To change which columns of information are displayed in the document list, click **Show/Hide Columns**, and then select what you want added and deselect what you want removed.

**Important:** Changing what is displayed in the **Document Arrangement** list does not affect output when **Print Documents** is selected, but it does affect the output for **Print Display Table**. With **Print Display Table** and **Standard** selected, deselecting the following columns hides them in the **Document Arrangement** list, but it does not remove them from the standard display table: **Reference #, Ver #, Review Interval, Document Owner, URL, Categories**; however, all of the date column selections do affect the contents of the standard display table. With **Print Display Table** and **Microsoft Excel Raw** selected, all column changes you make directly affect what is included in the exported display table file.

**Note:** The **Security Details** option functions differently than the other **Show/Hide Columns** options. First, it is only selectable if **Microsoft Excel Raw** is selected. Second, it causes two columns to be added to the display table: **Allowed Access Type** and **Allowed Access**. These two columns will contain information only for documents that have the **Restricted - High** or **Restricted - Severe** security level assigned, and only if one or more other allowed users are selected (for details on security levels, see [Step 7: Security](#)). The **Allowed Access Type** column shows how other allowed users were selected (by department, by job title, or by assignees), and the **Allowed Access** column shows the departments, job titles, and assignees that were selected. Notice in the example below that a separate row is included for each of a document's **Allowed Access** entities that were selected.

Screenshot...

	A	B	C	D	E	F
1	Title	Ver #	Status	Allowed Access Type	Allowed Access	
2	Account Collections Form	1	Draft	Department	Corporate Headquarters: Accounting	
3	Account Collections Form	1	Draft	Multi-Site (Global) Department Group	Customer Satisfaction Group	
4	Account Collections Form	1	Draft	Reader Group	Corporate Headquarters: Managers	
5	Account Collections Form	1	Draft	Reader	Aguiar, Janice (Accounts Payable Clerk)	
6	Accounts Payable and Cash Distribution	1	Draft			
7	Bad NSF Checks	1	Draft			
8	Invoice Billings	1	Draft			
9	Job Description - Accountant	1	Draft			
10	Performance Evaluation - Accounting Manager	1	Draft			
11	Year End Closing	1	Draft			
12						

By default, the document sort order in the report is ascending by title. To change what the documents are sorted by, click a different column header. Click the same column header again to reverse the sort order.

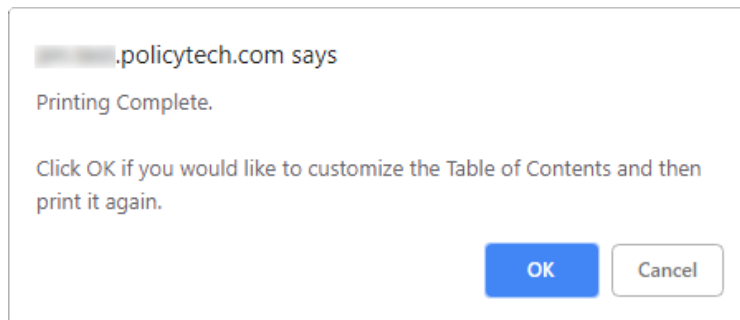

**Note:** Changes to the document sort column and sort order directly affect both **Print Display Table** outputs.

6. Do one of the following, depending on what output you've selected:

- **Print Documents:** To start the automated printing of the selected documents, click the **Print Documents** button.

**Important:** PolicyTech opens and prints each selected document one after the other. This may take several minutes if many documents are selected. Do not attempt to work with any open document until the printing process has completely finished.

The last thing to be printed is the table of contents page, at which time you'll see the message displayed below.

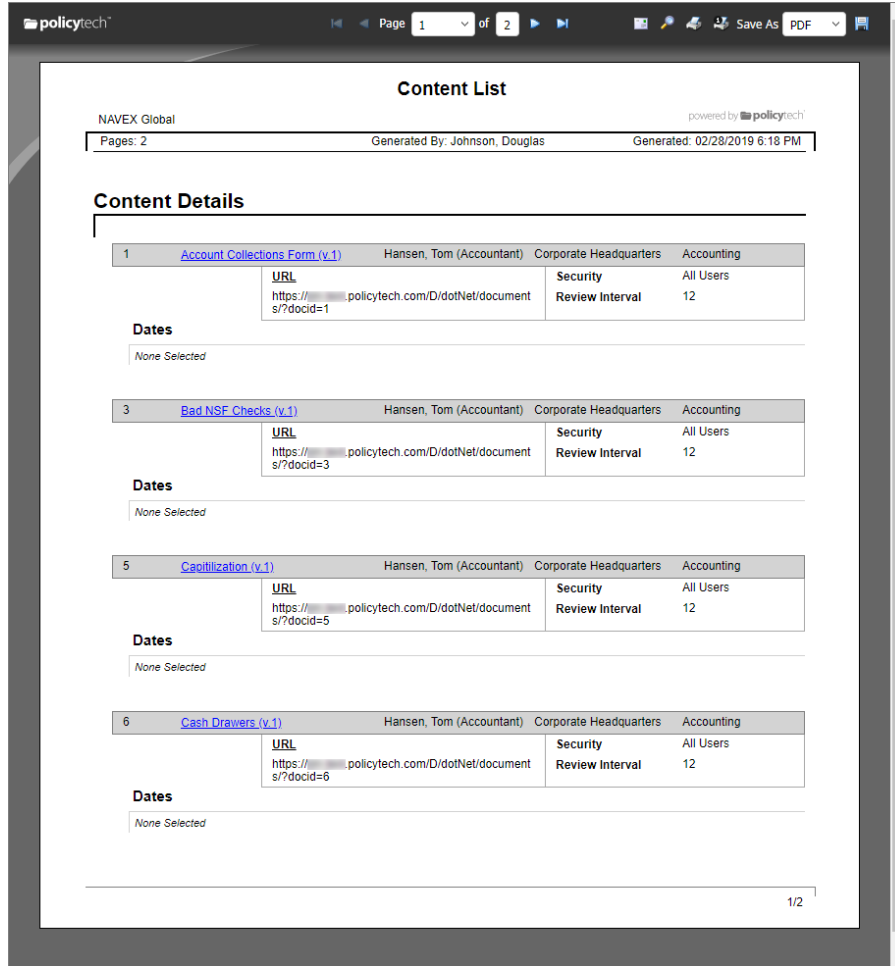

To use the default table of contents that has already been printed, click **Cancel**, which closes the table of contents.

To edit the default table of contents page, click **OK**, and then make changes as you would with any other Word document within PolicyTech. When finished, print the modified table of contents from within Word.

- **Print Display Table:** Click **View Report**.

If **Standard** is currently selected, the report opens in a separate browser window.

If **Microsoft Excel Raw** is selected, follow the prompts to open or save the display table file.

	A	B	C	D	E	F

### Print Documents Options

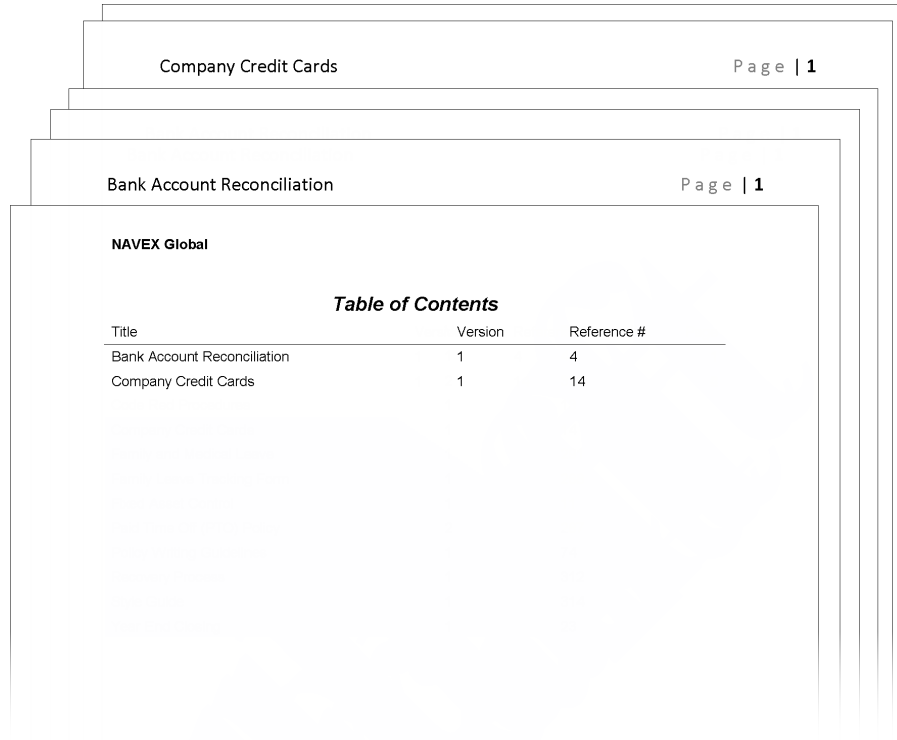

Use the following options to customize what is printed with the selected documents.

### Paging Options

When you print multiple documents, PolicyTech adds a table of contents page listing each document printed. The paging options control pagination of the printed material and whether page numbers are displayed in the table of contents.

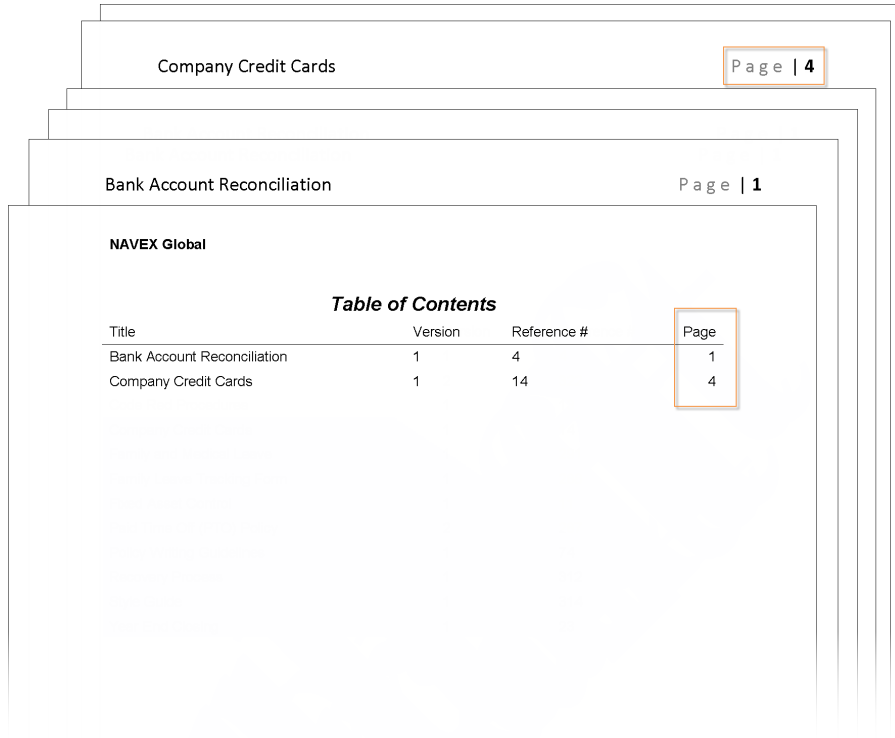

Click **Paging Options** and then click one of the following:

- **Keep Original Paging:** Uses whatever automatic page numbering has been inserted into the documents, restarting pagination for each successive document. Page numbers are not included on the table of contents page, or on properties cover pages, if that option is selected.

- **Continuous Paging:** Starts pagination with the first document in the list and continues with that pagination (does not start over) in each successive document and any attached Word or Excel documents. Page numbers are added to properties cover pages, if included, and for each document listed in the table of contents.

**Note:** If any of the selected documents contain automatic page numbering with a format similar to "Page 1 of 5," the current page number will be updated to be continuous throughout the print batch, but the "of" number will not. For example, you could see something like "Page 7 of 5."

### Properties

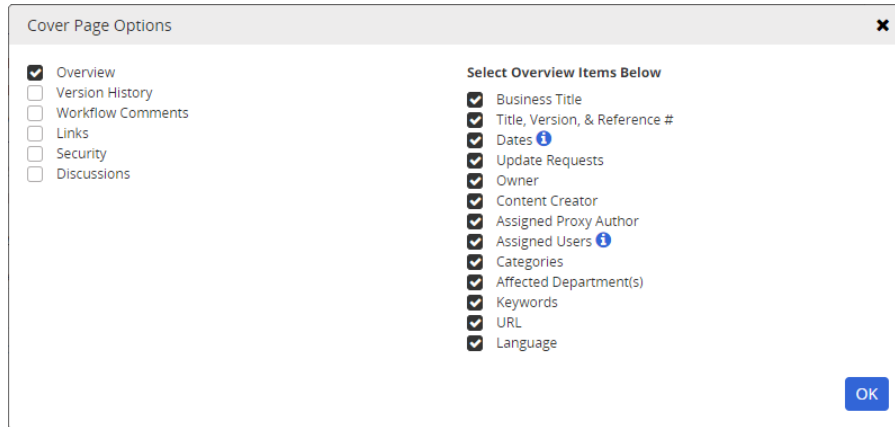

Select **Properties** if you want a cover page with properties added for each document.

<b>Business Title</b>					
NAVEX Global					
<b>Title</b>	<b>Version</b>	<b>Reference #</b>

To change which properties are included on each cover page, click **More**, and then, in the **Select Overview Items Below** area, click to clear the check boxes of the properties you don't want included. Click **OK**.

To include more information than just properties on the cover page, click **More**, select additional items from the menu on the left, and then click **OK**.

### Attachments

If one or more of the selected documents has attached Word or Excel files, select **Attachments** to have those documents printed as well.

**Important:** Only Word and Excel attachments will be printed. Any other attachment file types will be skipped.

## Viewing a Document's or Questionnaire's URL

Each content item (document, questionnaire, and campaign) in PolicyTech has a unique URL (web address) that can be used to access that item directly. You can add the URL to a link in a document or enter it on the address line of a browser.

Depending on the current PolicyTech configuration and the item's state, a single content item may have multiple URLs associated with it.

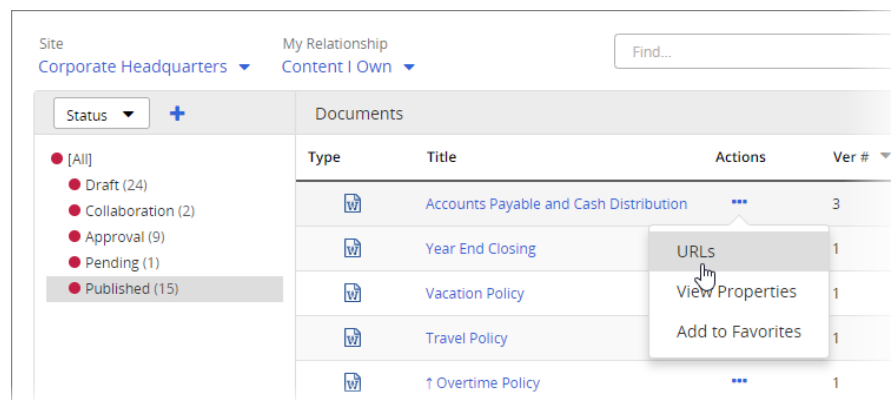

You can view all of a content item's URLs in one of two ways:

- Open a content item's **Overview** and go to the URL section (see [Working with the Overview](#) for details).
- Access a URL list from a document or questionnaire grid (read on for details on using this method).

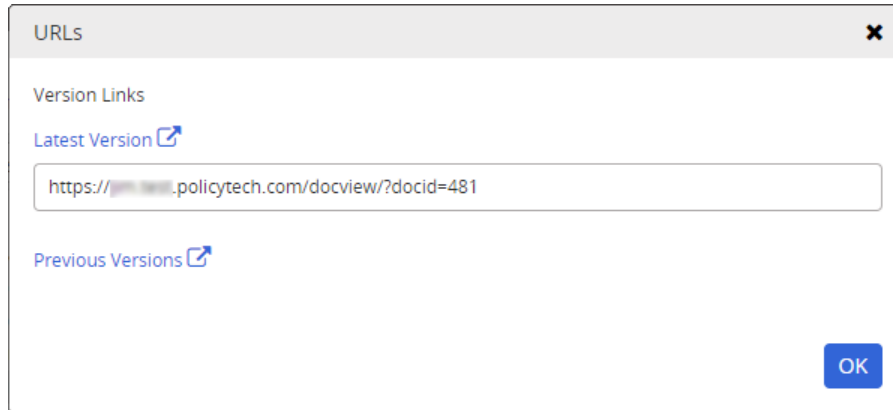

## Viewing URLs for the Current Version of a Document or Questionnaire

**Important:** These instructions apply only to published documents and started questionnaires. They do not apply to documents or questionnaires in other statuses, nor do they apply to campaigns in any status.

1. Use **Search** or **Browse** to find a published document or started questionnaire in the Published status (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. In the **Actions** column for the document/questionnaire whose URLs you want to view, click **...**, and then click **URLs**.

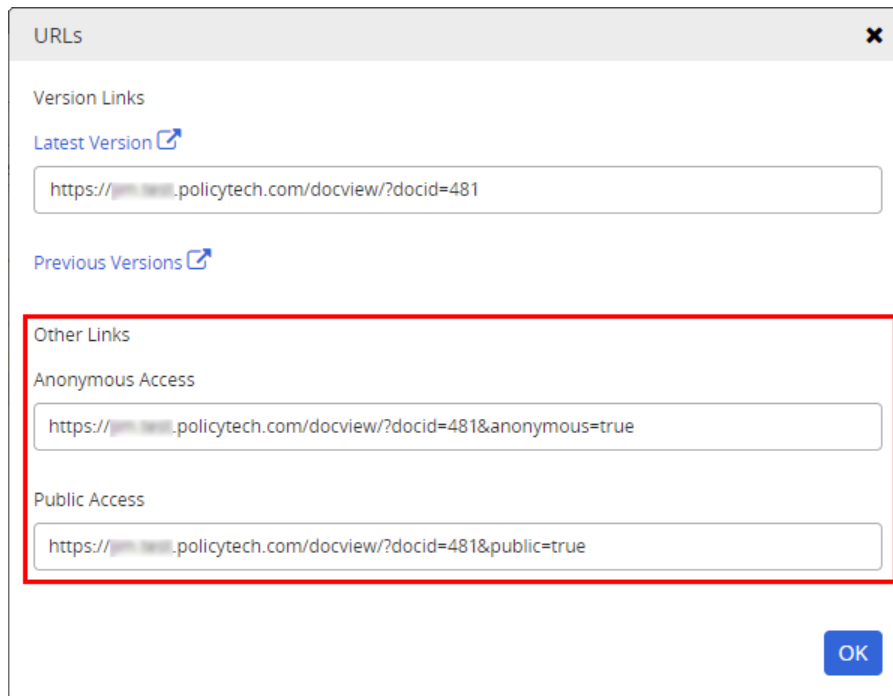

You should see dialog box similar to the one below, which shows the URL for the latest version.

If there are any other URLs associated with this version, they will appear under **Other Links**.

**Note:** Additional URLs are available only if their corresponding features have been enabled (see [URL Types](#) below).

---

## Viewing a URL for a Previous Version

**Note:** Only those with permission to view archived content will be able to access previous versions.

1. Perform steps 1 and 2 in the section above and then click **Previous Versions** to open the document and view its **Version History** page.

2. Click the desired version to open it.

The URL is in the browser's address box.

---

## URL Types

The table below lists the different URL types and details of when these URLs are available for which items.

URL Type	Available When...	Applies To...
Version	...any content item version is published	...all versions of all published content items
Anonymous Access	...anonymous access has been enabled for a site (see "Adding a Site" in the <a href="#">Administrator's Guide</a> for more information about anonymous login)	...all published documents on the enabled site
Public Access	...the Public Viewer Module has been enabled (see "Public Viewer" in the <a href="#">Administrator's Guide</a> for more information about the public viewer)	...all published documents that have been explicitly granted the Public security level

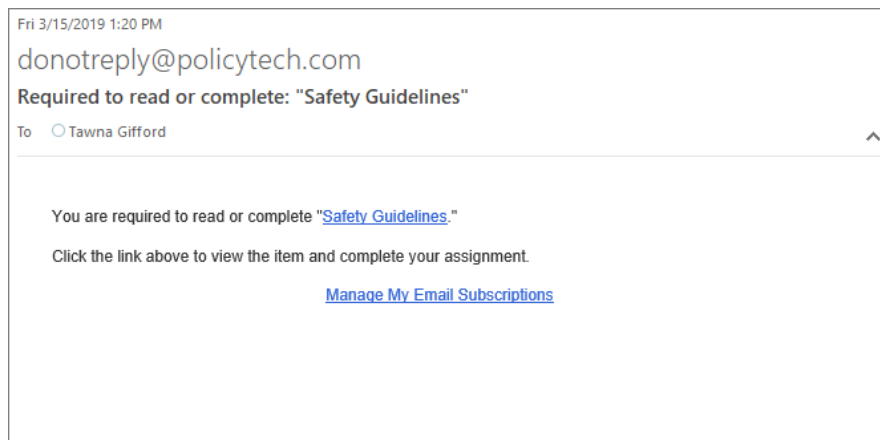

## Reading a Required Document

You can read any document that is listed in a **Published** document list.

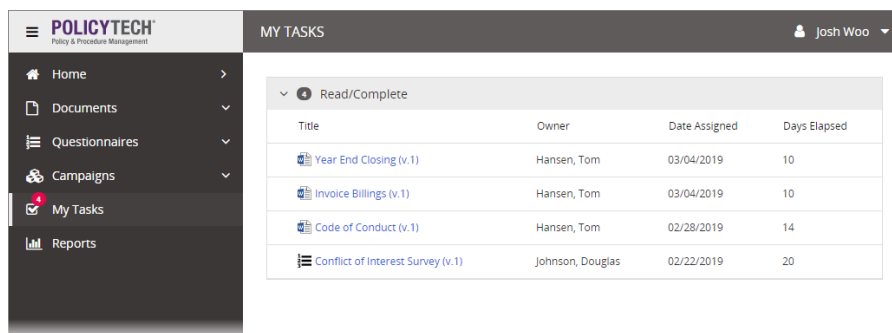

**Note:** You may not be required to read all the documents you have access to. While some of the documents in the **Published** list are available because you've been assigned to read them, other documents may be available because the documents' owners set those documents' security level to **All Users**. This means that all users can see these documents whether the users have been assigned to read them or not.

If you are required to read a document, you will receive a task assignment. The task assignment notification will come in the form of an email (if you are set up to receive emails from PolicyTech) and will be added to your **My Tasks** list in PolicyTech.

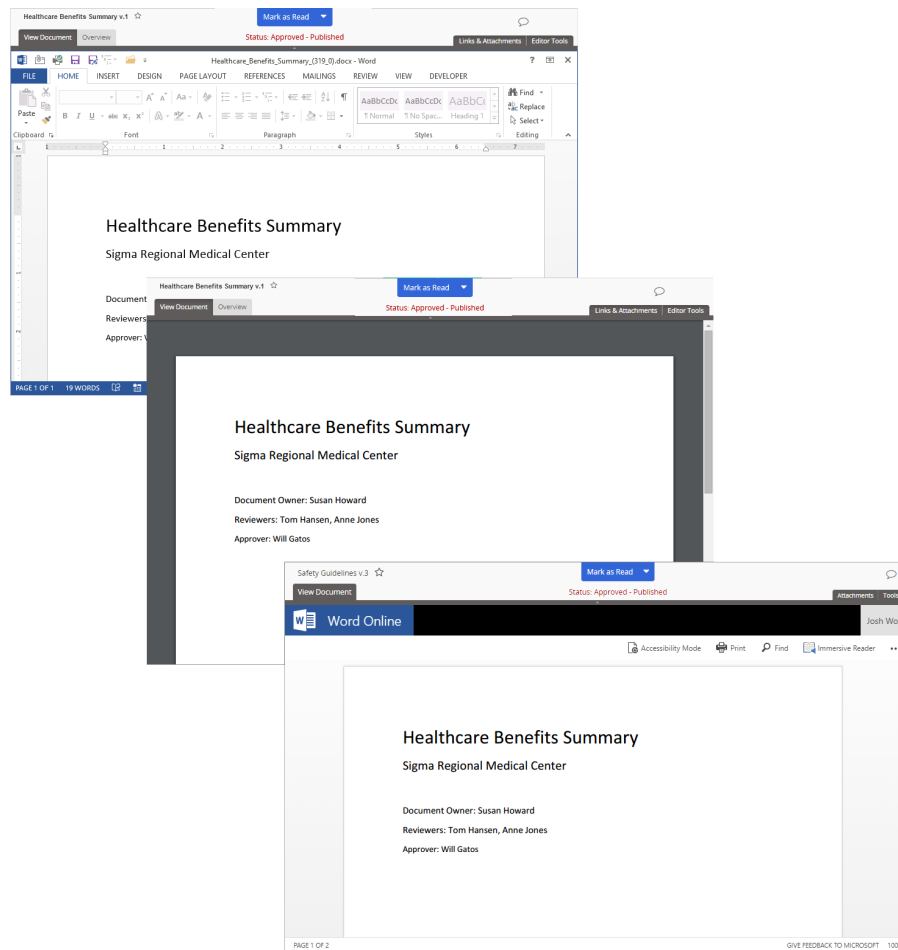

- To open a document you are required to read, do one of the following:
  - Open the task notification email, and then click the document link.

- Click **My Tasks**, click the **Read / Complete** heading, and then click the document title.

If you see a window similar to the one of those shown below, with the document contents displayed in the **View Document** tab, move on to step 2.

If you see a window like the one below, follow the instructions in [Downloading a Document to Read It](#), and then resume with the next step in these instructions.

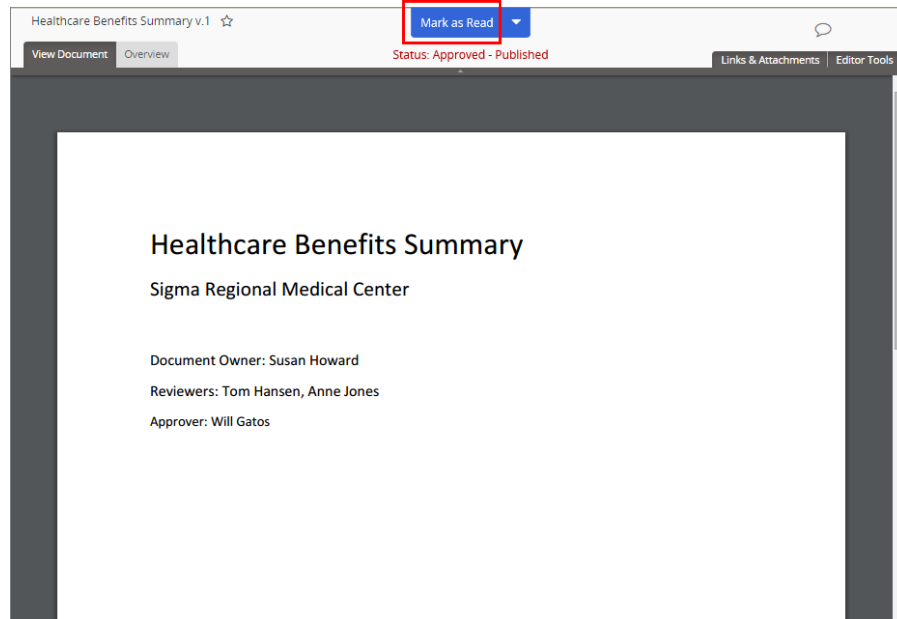

2. Thoroughly read the document.
3. Check for and review the following: attachments, notes, discussions, change summary (see [Reviewing Supplementary Materials](#) for details).

**Note:** If you need to communicate with the owner or this document, click , and then click **Send Message to Owner**. Fill out the form, and then click **Save**.

4. Click **Mark as Read** at the top of the document window.

**Note:** If you don't see the **Mark as Read** button, then you are not required to read this document. However, you can still mark it as read by clicking , and then clicking **Mark as Read (Optional)**.

You will see one of the following windows, depending on whether the document has an accompanying questionnaire and whether enhanced validation has been activated.

**Mark as Read** [Close]

There is a questionnaire attached to this document.

To mark this document as read, you must successfully pass the questionnaire.

[Cancel] [Take Questionnaire]

**Mark as Read** [Close]

By marking this document as read, you are stating that you have read and understood the complete document. If you do not understand, click Cancel and contact your supervisor.

[Cancel] [Mark as Read]

**Mark as Read** [Close]

There is a questionnaire attached to this document.

To mark this document as read, you must successfully pass the questionnaire.

**SIGN HERE**

**Username**

**Password**

[Cancel] [Take Questionnaire]

**Mark as Read** [Close]

By marking this document as read, you are stating that you have read and understood the complete document. If you do not understand, click Cancel and contact your supervisor.

**Username**

**Password**

[Cancel] [Mark as Read]

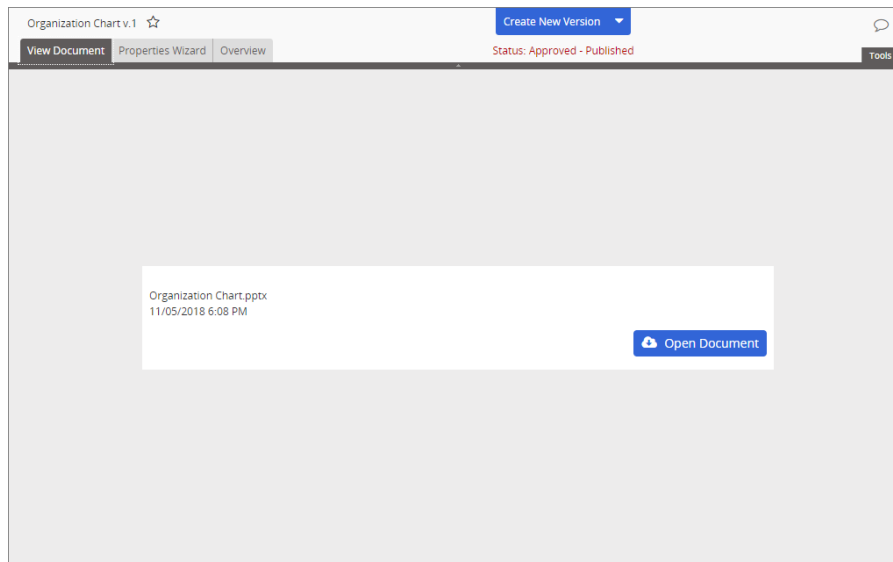

5. Follow the instructions below for the window you see:

- 1 Read the message, and then click **Mark as Read** to confirm the action.
- 2 Click **Take Questionnaire**, and then go to [Completing a Document Questionnaire](#).
- 3 Type your user name and password, and then click **Mark as Read**.
- 4 Type your user name and password, click **Take Questionnaire**, and then go to [Completing a Document Questionnaire](#).

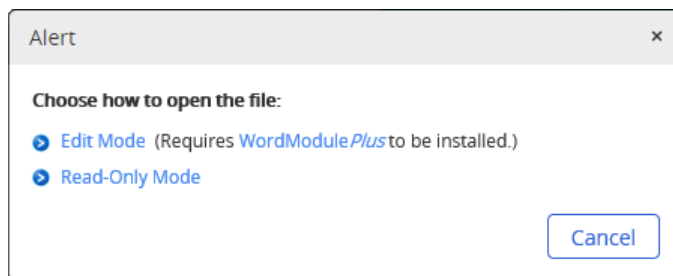

---

## Downloading a Document to Open It

When opening a document, you may see a window like the one below instead of the document contents.

1. Click **Open Document**.
2. Do one of the following depending on what you see:
  - If you see a window like the one below, do one of the following:

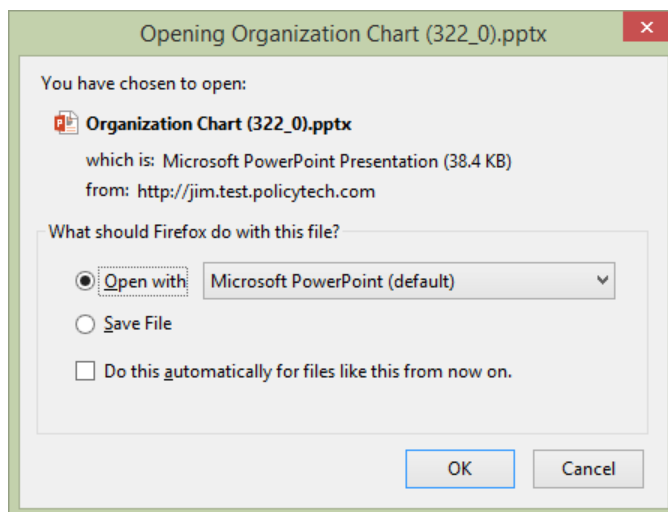

- If you've been assigned to read the document, click **Read-Only Mode**, and then click **Open**. The document opens in a separate window in whatever is currently the Windows default application for the document file type.
- If you've been assigned to review or approve the document, you'll need to install *WordModulePlus* to enable document revision (see [Installing WordModulePlus](#)).
- If you're using Internet Explorer and are prompted to open or save the document, click **Open**. The document opens in a separate window in whatever is currently the Windows default application for the document file type.

- If you're using Chrome, the file is immediately downloaded and shown in the window's footer. Click the downloaded file to open it in a separate window in whatever is currently the Windows default application for the document file type.

- If you're using Firefox and are prompted to open or save the file, click **Open with**, select an application, and then click **OK** to open the document in a separate window.

**Notes:**

- Your Windows operating system controls which program is used to open a specific type of file.
- You must have the default program installed on your computer in order to open the document. If you can't open the document, contact your administrator for help.

## Completing a Document Questionnaire

If the current document includes a questionnaire, you will see one of the following prompts when you click **Mark as Read**. You must successfully complete the questionnaire before you can finish marking the document as read.

**Note:** These instructions apply only to questionnaires that are added to documents. For stand-alone questionnaires, see [Completing a Questionnaire](#).

The image displays two screenshots of a 'Mark as Read' dialog box. Both screenshots show the following text: 'There is a questionnaire attached to this document.' and 'To mark this document as read, you must successfully pass the questionnaire.' At the bottom of each dialog are 'Cancel' and 'Take Questionnaire' buttons. The top screenshot includes a 'SIGN HERE' section with 'Username' and 'Password' labels and corresponding input fields.

1. Click **Take Questionnaire**, or, if you see the **Sign Here** area, type your user name and password, and then click **Take Questionnaire**.
2. Read each question carefully and select or type the best answer.

Take Questionnaire

Minimum passing score: 100%

Objective 1: Understand the company's leave policies.

1. The Company's family and medical leave policy is based on:

- Federal Family and Medical Leave Act
- State Laws
- Local Laws
- All of the above

2. An employee can take unpaid medical leave during a 12-month period of up to:

- 12 weeks
- 24 weeks
- 30 weeks

Cancel Submit Answers

3. When you have answered all of the questions, click **Submit Answers**, and then click **Mark as Read**, or, if you see the **Sign Here** area, type your password, and then click **Mark as Read**.

Mark as Read

By marking this document as read, you are stating that you have read and understood the complete document. If you do not understand, click Cancel and contact your supervisor.

Mark as Read

By marking this document as read, you are stating that you have read and understood the complete document. If you do not understand, click Cancel and contact your supervisor.

Cancel Mark as Read

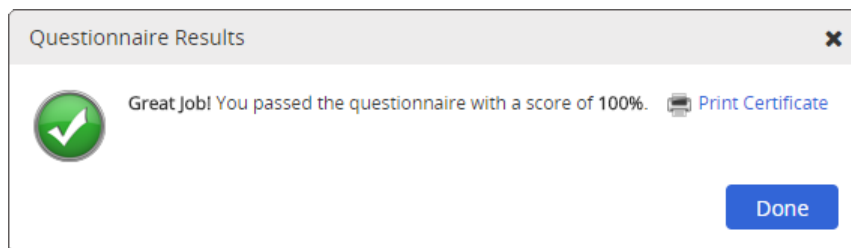

4. (Conditional) If the questionnaire creator associated a task with one or more of the answers you selected, you will see the following alert. Click **OK**

to clear the alert. You can find the new task in the **Questionnaire Response Task** area in the **My Tasks** list (see [Working with My Tasks](#)).

5. Do one of the following, depending on your score:

- If you passed, click **Done**.

**Important:** If the questionnaire creator opted to let you print out a certificate showing that you passed the questionnaire, click **Print Certificate** in the **Questionnaire Results** prompt.

- If you did not pass the questionnaire, click **Retake Questionnaire** if you want to try again immediately, or click **Close Questionnaire** if you want to review the document again before retaking the questionnaire.

## Reviewing Supplementary Materials

The following types of information may be available to review in a document or questionnaire in addition to the document/questionnaire content.

- **Attachments (in documents only):** A document owner can attach any number of PolicyTech documents, external files, and web addresses to a document.

- **Links (in documents only):** These can be links to other PolicyTech documents and to websites.
- **Notes:** A document owner has the option of writing notes to document and questionnaire assignees.
- **Discussions:** Those involved with creating, reviewing, approving and reading/completing documents/questionnaires can start discussions with others assignees.
- **Changes Summary:** A document owner has the option of describing changes in the document or questionnaire when submitting it for review or approval.
- **Change Log:** The change log lists details of each writing (collaboration), review, and approval cycle.

You can access attachments, links, the changes summary, and the change log (if available) using the **Please Review** icon highlighted in the screenshot below.

This and other ways to access supplementary materials are described in the topics below.

[Reviewing Attachments and Links](#)

[Reviewing Notes](#)

[Reviewing Discussions](#)

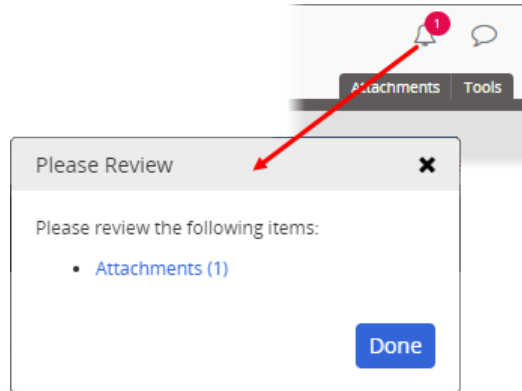

[Reviewing the Changes Summary](#)

[Reviewing the Change Log](#)

## Reviewing Attachments and Links

**Note:** The **Attachments** feature is only available in documents.

1. Do either of the following:
  - Click the **Please Review** icon, and then click **Attachments**.

- Click the **Attachments** tab.

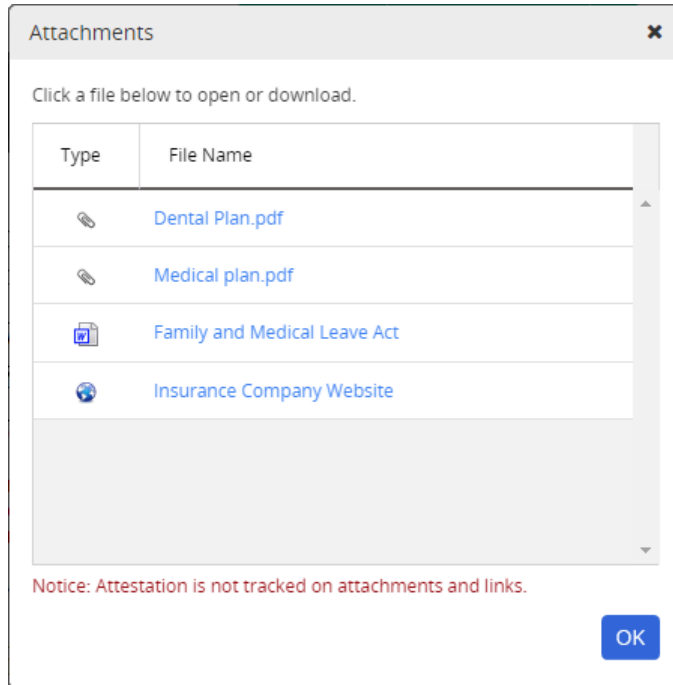

2. The **Attachments** window below contains two attached files (with 📎 in the **Type** column), a link to another document in PolicyTech (with 📄 in the **Type** column), and a link to a website (with 🌐 in the **Type** column).

**Note:** If you are the owner of this document, have been assigned to it as a proxy author, or are an administrator, you'll see the **Show Private** option in the upper right corner. Click to see attachments (if any) that were marked as private when added to the document.

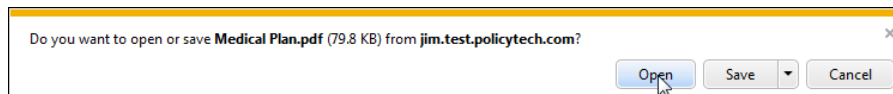

Do any of the following:

- Click an attachment file name, and then click **Open** when you see a Microsoft® Windows® prompt similar to the one below. When you're finished reviewing the attachment, close it.

#### Notes:

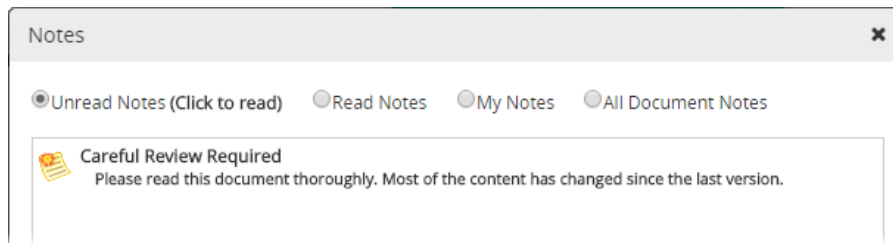

- Your prompt may look different, depending on the version of Windows you have, but you should still see options to open or save the document.
  - Windows controls which program is used to open a specific type of file.
  - You must have the default program installed on your computer in order to open the file.
3. Back in the **Attachments** window, click **OK**.

## Reviewing Notes

1. Click the **Notes** (page) icon.

2. Click a note to open it.

3. Click **Close** twice.

## Reviewing Discussions

1. Do any of the following:
  - Click the **Discussions** icon.

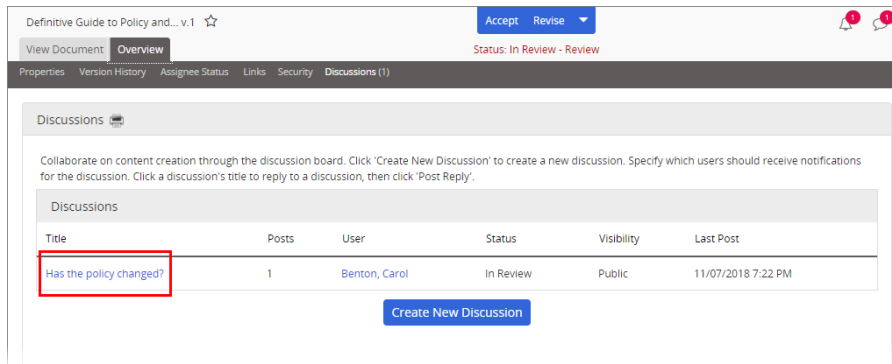

- Click the **Overview** tab, and then click **Discussions**.

**Note:** Depending on how PolicyTech is set up, you may not have access to the **Overview** tab.

- Click a discussion title to open it.

- (Optional) To respond to the discussion, click **Post Reply**, type a reply, and then click **Save**.

**Note:** The reply will go to all current discussion participants. If you want to include others in the discussion, click **Participants** (if available) before clicking **Post Reply**, and then select other users. Be aware that only those users with access to this document or questionnaire can view the discussion.

**A**

Yes, the information in the document is correct. You may take a maximum of 12 weeks within a 12-month period.

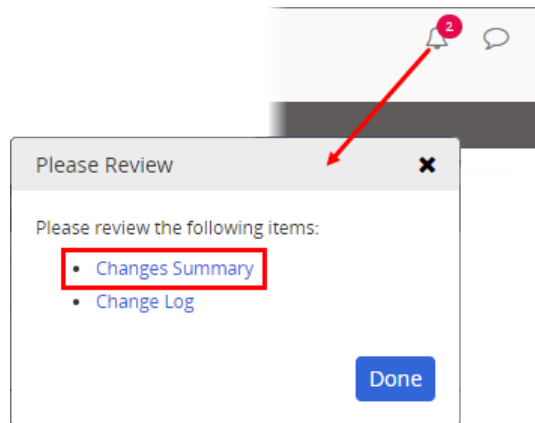

4. Click **Close**.

## Reviewing the Changes Summary

1. Do one of the following:

- Click the **Please Review** icon, and then click **Changes Summary**.

**Note:** The **Changes Summary** option is available only if the document owner opted to describe changes when submitting the document or questionnaire to review or approval.

- Click the **Overview** tab, click **Version History**, and then, in the **Changes Summary** column for the latest version, click **View**.

**Note:** Depending on how PolicyTech is set up, you may not have access to the **Overview** tab.

## Completing a Questionnaire

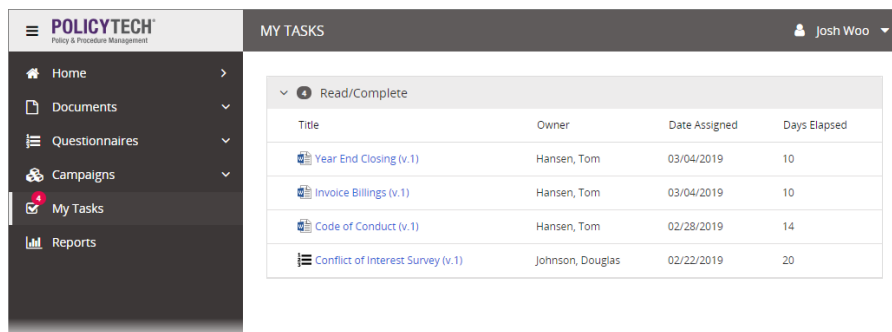

If you are assigned to complete a questionnaire, you will receive a task assignment. The task assignment notification will come in the form of an email (if you are set up to receive emails from PolicyTech) and will be added to your **My Tasks** list in PolicyTech.

**Note:** If you need to complete a questionnaire that is included with a document, , see [Completing a Document Questionnaire](#).

1. To open a questionnaire you've been assigned to complete, do one of the following:
  - Open the task notification email, and then click the questionnaire link.

- Click **My Tasks**, click the **Read / Complete** heading, and then click the questionnaire title.

2. Answer the questions.

Conflict of Interest Survey v.1 Options ▾

Complete Questionnaire Overview Status: Approved - Published

Answer the following questions and then submit your responses.

**Section 1: General Questions**

1. Please list your employer(s) or others for whom you have provided goods or services within the past three (3) months. (List only those who contribute 25% or more of your total yearly income.)

2. Are you or have you been, within the past twelve (12) months, a member of the Board of Directors, an officer, or principal of any corporation, company, association, institution, or other business?

Yes

No

3. Other than incidental ownership, do you, or does any member of your immediate family, have a direct or indirect ownership or other financial interest in any corporation, company, institution, or other business? ("Incidental ownership" means less than 10% ownership of the voting stock or other voting rights.)

Yes

No

[Submit Answers](#)

3. Click **Submit Answers**, and then click **Submit Answers** again to confirm.
4. If the questionnaire creator opted to let you print out a certificate showing that you completed the questionnaire, click **Print Certificate** in the **Questionnaire Results** window
5. Do one of the following, depending on the type of questionnaire:
  - If the questionnaire is a survey, you should now see a prompt similar to the one below.

Conflict of Interest Questionn... v.2 Options ▾

Thank you for submitting your responses. [Print Certificate](#)

[Done](#)

If the questionnaire creator opted to enable a certificate of completion, click **Print Certificate** to open it in a separate browser window, click , and then follow the prompts. When done, close the certificate to return to the survey results.

Click **Done** to close the questionnaire.

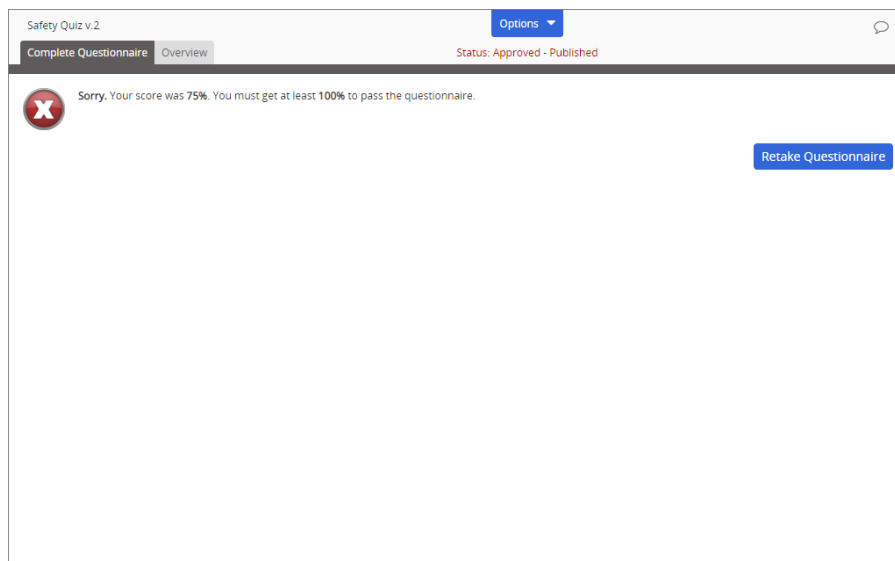

- If the questionnaire is a scored quiz, and you have a passing score, you should now see a prompt similar to the one below.

If the questionnaire creator opted to enable a certificate of completion, click **Print Certificate** to open it in a separate browser window, click , and then follow the prompts. When done, close the certificate to return to the survey results.

Click **Done** to close the questionnaire.

- If the questionnaire is a scored quiz, and you do not have a passing score, you should now see a prompt similar to the one below.

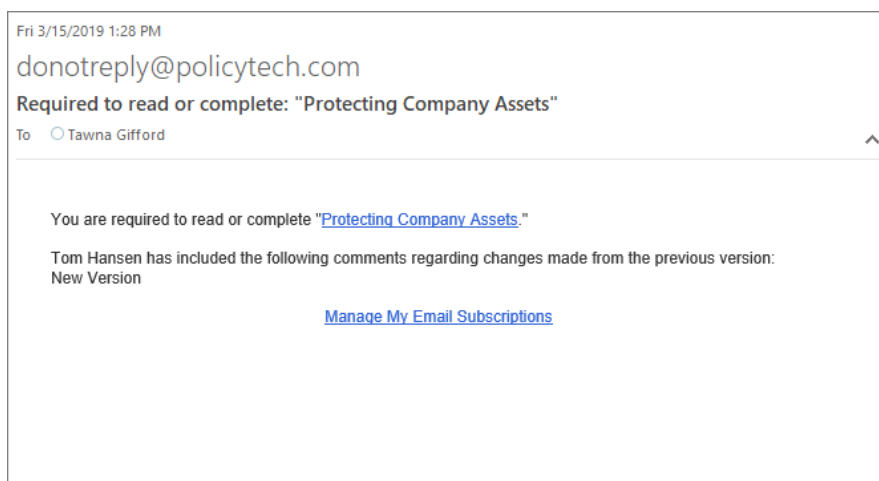

Click **Retake Questionnaire**, and then repeat the steps above until you have a passing score.

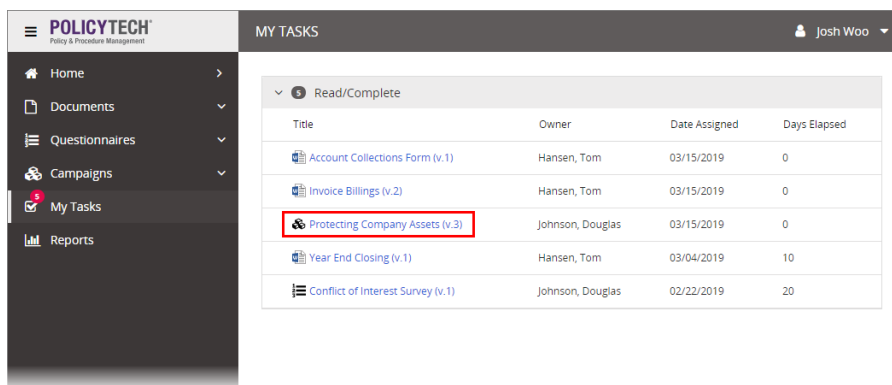

## Completing a Campaign

A campaign contains a list of documents and/or questionnaires that you must individually read or complete in the order given. If you are assigned to complete a campaign, you will receive a task assignment. The task assignment notification will come in the form of an email (if you are set up to receive emails from PolicyTech) and will be added to your **My Tasks** list in PolicyTech.

- To open a campaign you've been assigned to complete, do one of the following:
  - Open the task notification email, and then click the questionnaire link.

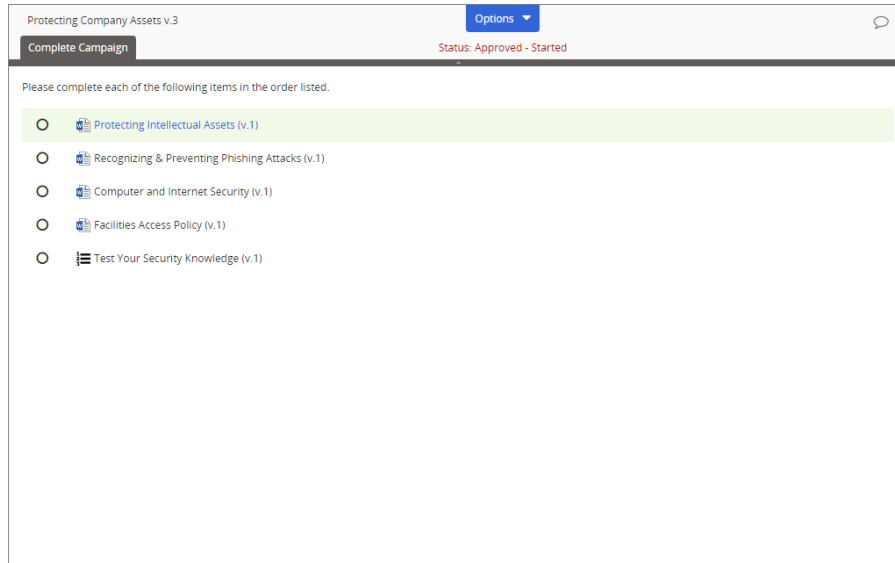

- Click **My Tasks**, click the **Read / Complete** heading, and then click the campaign title.

- Click the first active title in the list.

**Note:** If the campaign includes a document or questionnaire that you recently completed outside the campaign, that item may be marked as complete, in

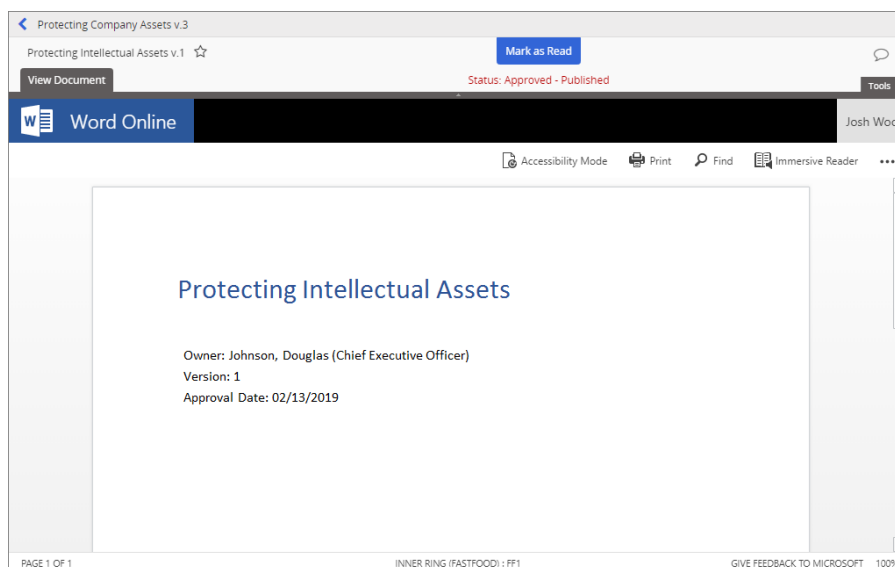

which case it will be automatically skipped as you progress through the campaign list. However, the campaign owner has the option of requiring that previously completed content be completed again while the campaign is active.

3. The content item slides in, replacing the campaign list. Do one of the following:

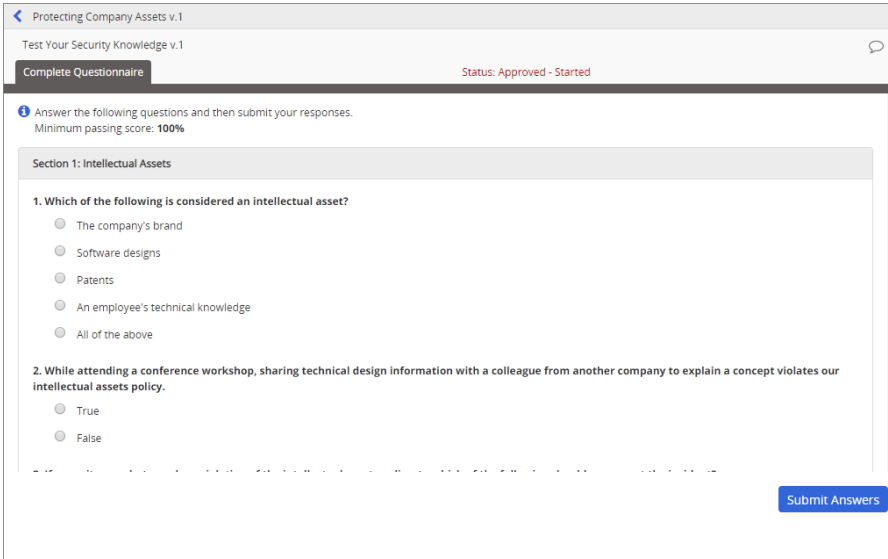

- Read the document and mark it as read (see [Reading a Required Document](#), starting with step 2, for detailed instructions).

**Note:** To return to the campaign list without marking the document as read, click  in the upper left corner.

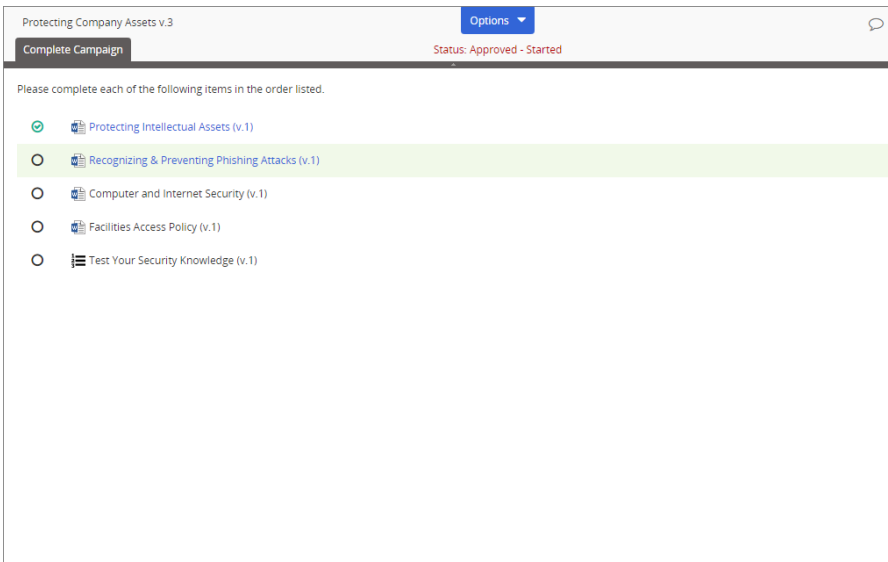

- Complete the questionnaire and submit your answers (see [Completing a Questionnaire](#), starting with step 2, for detailed instructions). When you have successfully completed the questionnaire, click **Done**.

**Note:** To return to the campaign list without completing this questionnaire, click  in the upper left corner.

After marking a document as read or completing a questionnaire, you are returned to the campaign list with that item marked as complete.

4. Continue through remaining campaign items in the same manner.
5. After completing the last the item in the list, your campaign task is complete and you can close the campaign window.

The screenshot shows a web interface for a security campaign. At the top, the title is "Protecting Company Assets v.1" with an "Options" dropdown menu to its right. Below the title bar, there is a "View Campaign" button and a status indicator "Status: Approved - Started". The main content area contains a list of five items, each with a green checkmark icon and a document icon:

- Protecting Intellectual Assets (v.1)
- Recognizing & Preventing Phishing Attacks (v.1)
- Computer and Internet Security (v.1)
- Facilities Access Policy (v.1)
- Test Your Security Knowledge (v.1)

Below the list, a light blue banner displays the message "Campaign completed.".

---

## Creating and Working with Documents (for Document Owners and Proxy Authors)

Users assigned the Document Owner or Proxy Author role perform the following tasks:

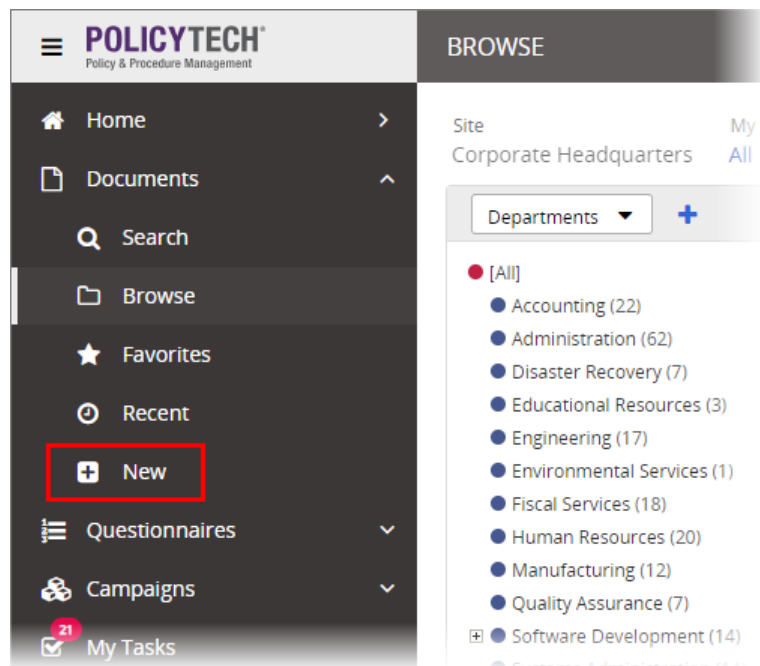

- Creating documents (defining properties, adjusting settings, and assigning users to write, review, approve, and read the documents)
- Managing documents through the review and approval process
- Maintaining approved documents

---

### Creating a Document (Overview)

The following steps provide an overview of the document creation process, along with references to more detailed instructions.

1. Click **Documents**. If you've been assigned the document owner or proxy author role, you'll see the **New** option, as shown below.

2. Click **New**, and then click one of the following:

- **Word Document**
- **HTML Document**
- **Excel Spreadsheet**

- **PowerPoint Presentation**
- **Upload a File**

**Note:** The document type options you see depend on what templates have been created in your PolicyTech system. If you need to create a document of a type not currently available, contact your administrator, who may be able to create a template for that type.

Your screen should now look similar to the one below. These settings constitute the first step of the **Properties Wizard**, which guides you through all of the available document properties.

The screenshot shows the 'Properties Wizard' interface. The title bar indicates 'Untitled'. The main window has a sidebar on the left with 'Settings' and a main content area. The main content area has a 'Title' field with an 'Advanced Settings' link. Below that is a 'Document Owner' dropdown menu showing 'Hansen, Tom (Accounting Manager)' with an 'Owner Instructions' link. The 'Template' dropdown menu shows '-- Choose a template --' with a 'Preview' button. The 'Version Number' field contains '1'. The 'Publication Date' and 'End Date (Optional)' fields are empty. At the bottom right, there are three buttons: 'Save', 'Edit Document', and 'Next Step'.

3. To work your way through the **Properties Wizard** steps, see [Assigning Document Properties](#).

**Important:** You must at least type a title, choose a template, and then click **Save** or **Next Step** before you can see the remaining **Properties Wizard** steps and edit the document.

4. Click **Edit Document**, and then add, format, and edit the content (see [Adding Content to a Word Document](#), [Adding Content to an Excel Document](#), [Adding Content to a PowerPoint Document](#), [Adding Content to an HTML Document](#), or [Adding Content to a Document with an Upload File Template](#)).
5. (Optional) Add links and attachments as supplementary and reference materials (see [Attaching Files and Adding Reference Links](#)).
6. (Optional) Create a questionnaire that assignees must pass in order to mark the document as read (see [Creating a Document Questionnaire](#)).

7. (Optional) Start a discussion about the document (see [Working with Discussions](#)).
  8. (Optional) Select the document this new document will replace (see [Designating a Document to Be Replaced](#)).
  9. Submit the document to writers, for review, or for approval (see [Submitting a Document or Questionnaire to Writers, Reviewers, or Approvers](#)).
  10. Manage the document through the review and approval process (see [Working with Documents or Questionnaires in Review and Approval](#)).
- 

## Assigning Document Properties

The **Properties Wizard** breaks up property assignment for a document into the following steps:

### Notes:

- Depending on how the currently assigned template was set up, you may have fewer steps available than the ones listed below. Typically, you will see at least the Settings, Categories, and Security steps. Some or all of the other steps may be removed from the template.
  - You will most likely not need to perform all available steps for every document you create.
- 
- **Settings:** Set critical properties (**Title, Document Owner, Template**) and other basic and advanced properties. See [Adjusting Basic Document Settings](#).
  - **Categories:** Assign sites, departments, and categories. See [Assigning Sites, Departments, and Categories to a Document](#).
  - **Writers:** Assign writers who will collaborate on creating content. See [Assigning Writers to a Document](#).
  - **Reviewers:** Assign users as reviewers. See [Assigning Reviewers to a Document](#).
  - **Approvers:** Assign users as approvers. See [Assigning Approvers to a Document](#).
  - **Assignees:** Assign those required to read the document when it is published. See [Designating Assignees for a Document](#).
  - **Security:** Set a security level. See [Adjusting Security Settings for a Document](#).

## Adjusting Basic Document Settings

When you create a new document, you see a screen similar to the one below with only the first step—**Settings**—of the **Properties Wizard** displayed.

**Note:** If the **Settings** step is not currently displayed, open the document and click the **Properties Wizard** tab.

1. Type a title.
2. Do one of the following to select an owner:
  - If you have been assigned the Document Owner role, your user name is automatically selected. Move on to step 3.
  - If you have been assigned as proxy author for a single document owner, that user's name is automatically selected. Move on to step 4.
  - If you have been assigned as proxy author for more than one document owner, or if you are an administrator, select an owner.
3. (Optional) To create a task and add it to the document owner's **My Tasks** list, click **Owner Instructions**, select **Create task for owner**, write the task instructions, and then click **Close**.

This option can be especially useful if you are creating or editing the document as a proxy author or administrator and need the owner to do something regarding this document, such as preparing it and then submitting it for review.

4. Your administrator can create any number of templates with specific settings and task assignments in the **Properties Wizard**. The template creator may also have included content, such as headers, footers, and section headings.

Do one of the following:

- If **Template** options are available, select one.
- If you see a template name but no option for selecting a different template, the only available template has been automatically selected.

**Notes:**

- Click **Preview** to open the selected template in a separate browser tab or window. Click the **View Document** tab to see any preset content or click the **Overview** tab to see the template's default properties.
- The template list includes all templates from all sites you have access to.
- If you select a template for a document type that is different than the type you selected from the **New Document** menu, the document will be changed to that type when you click **Save**.
- If you have questions about which template to use, contact your administrator.

5. (Optional) The default version number for a new document is 1. One instance where you might want to change the version number is if you are uploading a document with a later version from outside the PolicyTech system.

**Note:** You cannot change the version number after the document is approved.

6. (Optional) Depending on how your administrator has set up PolicyTech, you may need to enter a reference number.
  - If you see **To be generated on next step** after **Reference #**, move on to the next step.
  - If you see a blank box after **Reference #**, type a number. The number can contain numbers, letters, and all other standard characters except <, |, and ^.

**Important:** A document's reference number must be unique throughout the PolicyTech system. If you are not sure what numbering scheme your organization is using, contact your administrator.

7. (Optional) By default, a new document is published as soon as it is approved. For **Publication Date**, select **Wait to publish until the following date**, click , and then select a date.

By default, reading task notifications are sent to assignees as soon as the document is published. Select **Require completion before publication** if you want the notification sent as soon as the document is approved, even if it will be published later. Assignees can then access the document during the interval between approval and publication (in the Pending status).

**Notes:**

- A document approved after the specified publication date will be published immediately upon approval.
- Users who mark the document as read before the publication date will not be required to complete their assigned tasks again after the document is published.

8. (Optional) For **End Date**, specify the date you want all assignee tasks for this document to expire. On that date, all incomplete tasks will be canceled, removing them from assignees' **My Tasks** lists. Also, if any assignee groups, departments, or job titles are selected, new users added to one of these entities after the task end date will not receive tasks.

9. Click **Save**.

**Important:** You must save the document at this point before you can access **Advanced Settings** and the other **Properties Wizard** steps or start editing the document.

You should now see all **Properties Wizard** steps included in the template, as shown below.

**Note:** The **Properties Wizard** page for your document may have more or fewer steps, depending on how the currently selected template was set up.

## Advanced Settings: Settings Step for a Document

Which settings and setting values you see and when you first access **Advanced Settings** for a new document is determined by the assigned template. All of the possible settings are listed below. Refer to those that apply.

[Assigned Proxy Author](#)

[Archive Date](#)

[Review Interval](#)

[Warning Period](#)

[Keywords](#)

[Notification Settings for Owners & Proxies](#)

[Enhanced Validation](#)

[Original Creation Date](#)

[External Review Date](#)

[Language](#)

[Editing Document](#)

### Assigned Proxy Author

This setting applies only if a proxy author has been assigned for the owner selected in **Basic Settings**.

If you see **No Available Proxy Authors**, you cannot change this setting. (Contact your PolicyTech administrator if you need a proxy author assigned to an owner.)

(Optional) If one or more proxy authors are available, select one.

- Unassigned - Choose an Assignable Proxy Author -	▼
- Unassigned - Choose an Assignable Proxy Author -	
Gifford, Tawna (Accounts Receivable Clerk)	

### Archive Date

If you know there will be no new versions of this content item created and that it will no longer be relevant at some point in the future, you can specify the date when you want the approved item automatically moved to the **Archive**.

**Notes:**

- Only administrators and users assigned the **Archived Content** role can access archived content.
- If the archive date passes before a content item is approved, it will be archived immediately upon approval.

**Review Interval**

When a review interval is set, the content item will come due for review after the specified interval has passed. The owner receives an email and a PolicyTech task as the review date approaches (see the next setting section—"Warning Period"—for details). The default review interval setting is whatever the template creator selected.

1. To change the default setting, do one of the following:

- Click **Every [number] months from [selected event or specified date]**, and then type a number of months. For **from**, select one of the following:
  - **approve/last reviewed date**: Sets the review date the number of specified months after version 1 of the content item is approved and after the previous review date for all subsequent versions.
  - **specified date**: Sets the review date the number of specified months after the specified date. After clicking **specified date**, click , and then select a date.

At this point, the **Force next review on [date]** option appears. By default, PolicyTech uses **Smart Scheduling** to determine the next review date when a content item is approved. If it is approved within the warning period for the currently selected review interval, **Smart Scheduling** equates the approval to a completed review and postpones the next review for another review interval. Select **Force next review on [date]** to override this behavior and retain the original next review due date.

- Click **No Review Date** only if you do not want a reminder and a task sent to the owner, who will then need to use some other means to track when the content item needs reviewing.

2. Click anywhere outside the **Review Interval** menu to close it.

### Warning Period

Use this setting to change when the owner receives notification that the next review due date is approaching.

**Note:** This setting is available only when a review interval has been set.

1. For **Warning Period**, do one of the following:

- Click **Warn [n] months before Review Interval**, and then type a number in the box.

- Click **Use Default Warning of [n] month(s) before Review Interval**.

**Note:** The default warning period is set by the administrator.

2. Click anywhere outside the **Warning Period** menu to close it.

### Keywords

Type any words you think users might use to search for this content item. Keywords are especially useful for including relevant words that are not contained in the item's title or a Word document's contents.

### Notification Settings for Owners & Proxies

These settings let you choose which types of notification emails this content item's assigned owner and proxy author will receive.

1. Do one of the following:

- Select **Company / Personal** to use the current **Email Subscriptions** settings of the assigned owner and proxy author to determine which email notifications relating to this content item are sent to them.

**Note:** If PolicyTech is set up to let users manage their own notification email subscriptions, then this item's assigned owner and proxy author will receive only those notification emails that they've enabled in **My Profile**. If users are not allowed to manage their own email subscriptions, then the current **Email**

**Manager** settings, managed by the administrator, determine which emails are sent.

- Select **Custom**, and then select the notification email categories to enable. For a list of emails in each category, see [Email Categories for Custom Notification Settings](#).

**Important:** An administrator can lock the enabled/disabled setting for each email in the **Critical Changes**, **Content Status Changes**, and **Task Status Changes** categories. Changing a **Custom** setting for one of these categories has no effect on individually locked emails.

### ***Email Categories for Custom Notification Settings***

The following tables list the email notifications within each selectable category for **Notification Settings for Owners & Proxies** in the **Properties Wizard**.

#### ***Critical Changes***

Email Name	Description
Content Replacement Pending	(For document notifications only) Sent to the document owner and assigned proxy author when another user has set one of the owner's documents to be replaced.
Content Edited in Its Current State	(For document notifications only) Sent to the document owner, proxy author, and approvers when an administrator edits a document in its current state.
Content Set as Approved	Sent to the owner and proxy author when an administrator sets a content item as approved.
No Revision Necessary	Sent to assigned approvers and proxy author when a content item is due for review and the owner specifies that no revision is necessary. If an administrator specifies that no revision is necessary, the owner will also be notified.
Master Edited in Its Current State (active only if the Localization Workflow Module is enabled)	Sent to owners and proxy authors of localized copies when the master is modified in its current state (as opposed to creating a new version).

#### ***Content Status Changes***

Email Name	Description
Review Level Complete	Sent to the owner and assigned proxy author

Email Name	Description
	when all required reviewers on a specific level have accepted the content item and a subsequent review level exists.
Review Cycle Complete - Content Moved to Approval	Sent to the owner and assigned proxy author when a content item is accepted by all required reviewers and moved to approval.
Approval Level Complete	Sent to the owner and assigned proxy author when all required approvers on a specific level have accepted the content item and a subsequent approval level exists.
Approval Cycle Complete - Content Approved	Sent to the owner and assigned proxy author when a content item is accepted by all required approvers and moved to Pending or Published/Started status.

**Task Status Changes**

Email Subject	Action That Triggers Notification
Writer Task Complete	Sent to the owner and assigned proxy author when an assigned writer clicks <b>Finished Writing</b> .
Reviewer Task Complete	Sent to the owner and assigned proxy author when an assigned reviewer accepts, declines, or revises a content item.
Approver Task Complete	Sent to the owner and assigned proxy author when an assigned approver accepts, declines, or revises a content item.

**Enhanced Validation**

**Note:** This setting is not available for questionnaires or campaigns.

You may or may not see this optional setting, depending on how the administrator set up PolicyTech.

When this feature is enabled, a user must enter his or her user name and password (an electronic signature, in effect) in order to complete a task, such as marking a document as read, accepting a document in review, or approving a document. In the case where a kiosk computer is the point of general PolicyTech access under a generic service account, this feature provides verification that the intended user has completed a task.

If you see the setting but the text for the **Enhanced Validation** list is displayed with a gray font rather than black, the setting is displayed for your information only; you cannot change it.

If **Enhanced Validation** is active, select **Yes** or **No**.

### Original Creation Date

This setting is intended for content originally created outside of PolicyTech and then uploaded into or recreated in PolicyTech. For historical purposes, enter the date the content item was first created.

### External Review Date

As with **Original Creation Date**, **External Review Date** is intended for content originally created outside of PolicyTech and then imported or recreated.

**Important:** If the **Review Interval** option has been set, the date set for **External Review Date** is used to calculate the next review date.

### Language

This setting works in conjunction with the **Filter by Language** setting in **My Profile** (see [Changing Your Profile Settings](#)). Selecting a language for this content item enables users to filter (hide or display) the item based on its language setting.

### Editing Document

You may or may not see this optional setting, depending on how the currently assigned template was set up and what Microsoft® Office integration PolicyTech is using. Also, the **Editing Document** setting applies only to templates for Word, Excel, and PowerPoint documents.

If you see the setting but the text for the **Editing Document** list is displayed with a gray font rather than black, the setting is displayed for your information only; you cannot change it.

If the setting is active, click the **Editing Document** box, and then click **Inside the Browser** or **Outside the Browser**. The benefits of editing a Word document within a PolicyTech browser window include the following:

- Ability to insert document property fields that update automatically if they change
- Automatic display of an unremoveable watermark in documents in the draft, review, and approval statuses

If you choose to have the document open outside of the PolicyTech browser, when a user opens the document it will open in its default program. PolicyTech detects each time the document is saved in the default program and re-uploads a copy of the document.

#### Notes:

- A user must have the document's default program installed on his or her computer in order to open a document outside of the browser.
- To be able to open and edit a document, besides a Word, Excel, or

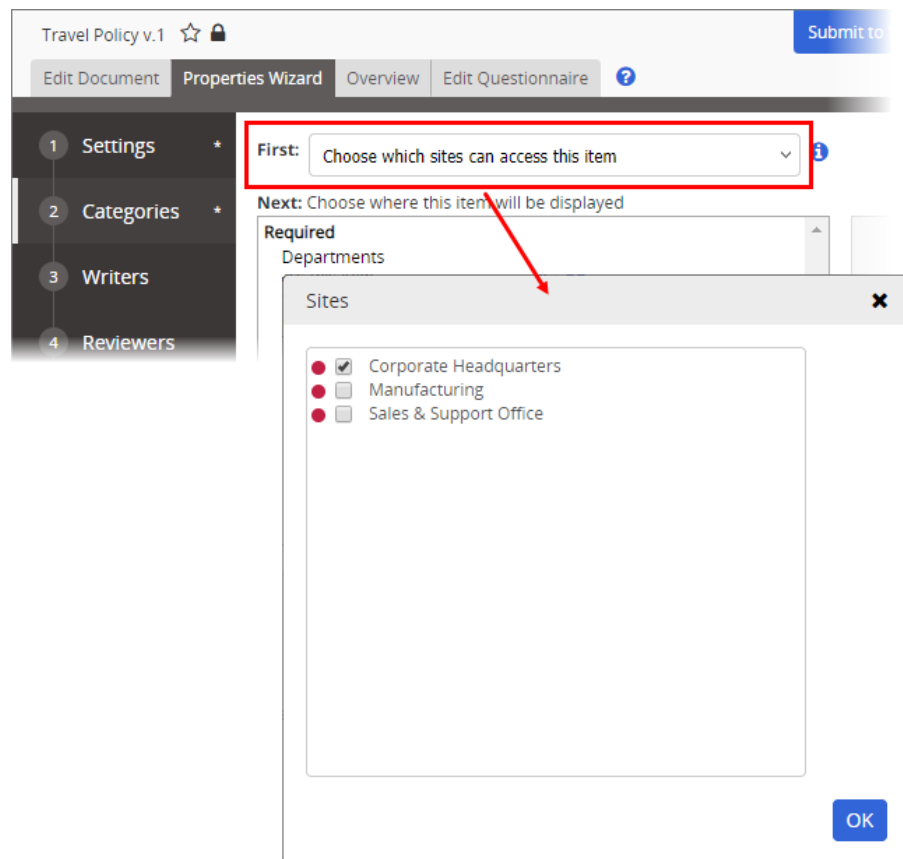

PowerPoint document, outside of the browser, that file type must have been enabled in PolicyTech. Contact your administrator if you are not sure which file types have been enabled.

- Windows controls what program a document is opened in by default.

## Assigning Sites, Departments, and Categories to a Document

An important part of document creation is determining who should interact with the document you're creating. In this step of the **Properties Wizard**, you indicate in which sites and departments the document will be visible and in which categories it belongs.

1. Click **Categories**.
2. If you have access to multiple sites, select the sites where this document will be visible, and then click **OK**.

What you see in the **Choose where this item will be displayed** box depends on the template you assigned in the **Settings** step. You will always see **Departments** under the **Required** heading, but the template creator decides which categories, if any, should be required and optional. If your **Choose where this item will be displayed** box looked like the one

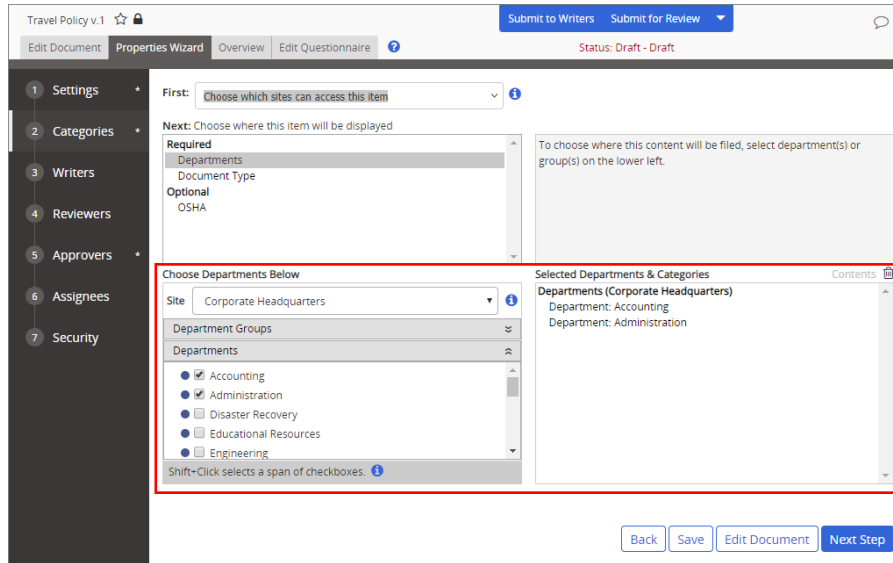

in the example below, you would be required to choose a department and a **Document Type** category. You could also assign the document to an **OSHA** category if applicable, but wouldn't have to.

3. In the **Choose where this item will be displayed** box, click **Departments**.
4. Do one of the following:
  - If there is no option for selecting a site in the **Choose Departments Below** box, simply select the departments that will have access to this document.
  - If you have access to more than one site and chose to make this document available to more than one of those sites in step 1 above, then, in the **Choose Departments Below** box, select a site, and then select the departments that will have access. Repeat this step as necessary for other sites.

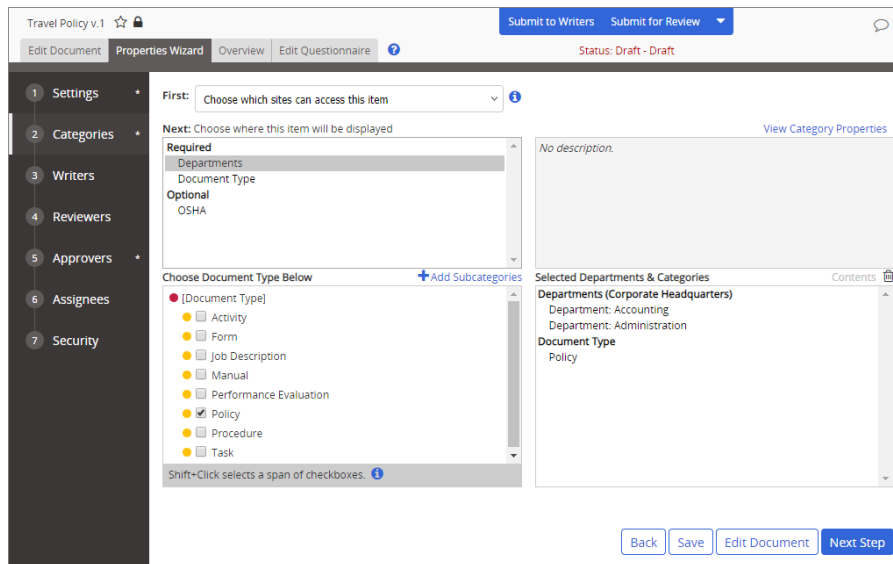

**Important:** You must select at least one department within at least one site. If you select multiple sites and do not select a department within one or more of those sites, this document will still be available on those sites but will be listed under **Unfiled** when arranging by department in **Browse**.

**Notes:**

- The assigned owner's site and department are selected by default when a new document is created.
- You can click a department name to see the users in the department.
- A department group is a combination of two or more departments from one or more sites. If desired, click **Department Groups**, and then select a department group or click the group name and select departments from within the group.

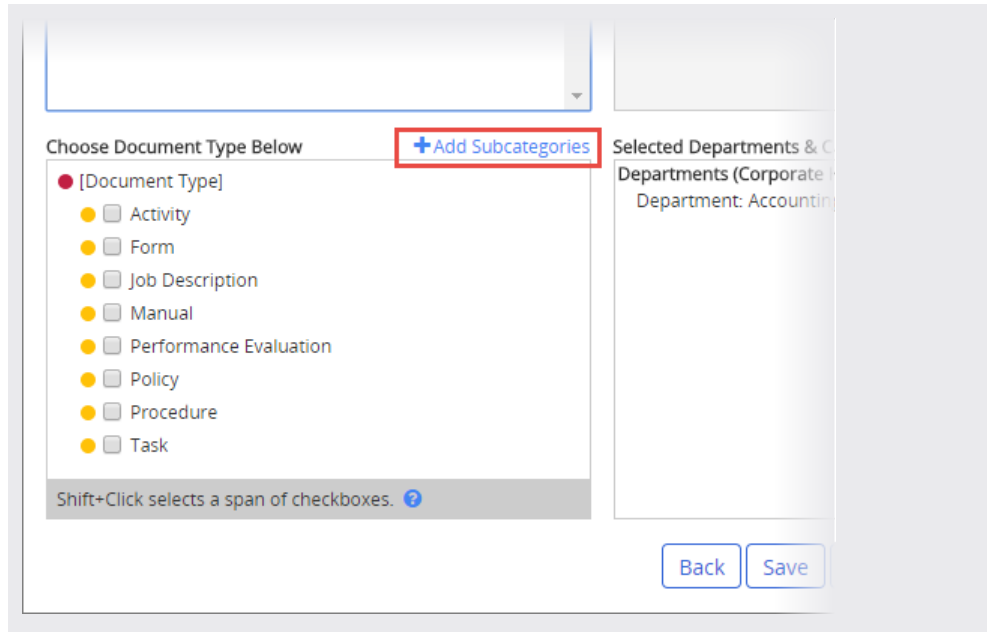

4. If a category is listed under **Required**, click it, and then select one or more subcategories.

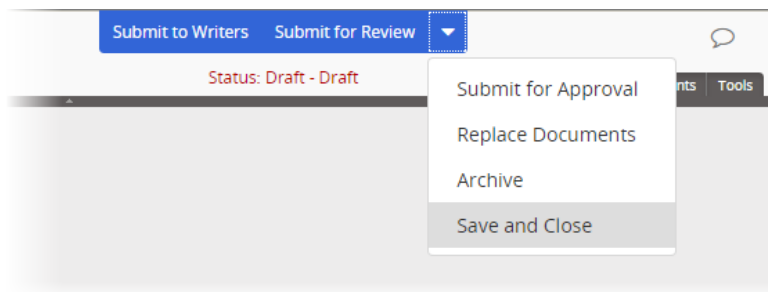

**Notes:**

- Some categories allow only one subcategory selection, while others allow multiple selections.
- If the current category allows the creation of new subcategories, **Add Subcategories** appears above the category list box, as shown below. See [Adding a Subcategory](#) below for details.

5. (Optional) If one or more categories is listed under **Optional**, click each category, and then select one or more subcategories for each.
6. Click **Save**.
7. Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Assigning Writers to a Document](#).
  - Click **Edit Document**, and then go to [Writing a Document](#).
  - To stop assigning properties and finish later, click  to the right of **Submit for Review**, and then click **Save and Close**. (When you are ready to continue with assigning properties, go to [Editing a Draft Document](#).)

### Adding a Subcategory

1. In the category list, click a top-level category (**Document Type** in the example below) or subcategory, and then click **Add Subcategories**.

Next: Choose where this item will be displayed

**Required**

- Departments

**Optional**

- Document Type
- OSHA

Choose Document Type Below + Add Subcategories

- [Document Type]
- Activity
- Form
- Job Description
- Manual
- Performance Evaluation
- Policy
- Procedure
- Task

Shift+Click selects a span of checkboxes. [i](#)

2. Type a subcategory name.

**Note:** The **Reference ID** is automatically filled in with the subcategory name as you type it. You can change the **Reference ID** if needed.

3. (Optional) Type a description to let other users know when they should assign this subcategory.
4. Click **Add** to add the new subcategory to the **Categories** box.

**Important:** Only subcategories that have been added to the **Categories** box will be saved.

The screenshot shows a dialog box titled "Add Subcategory to 'Document Type'". It has a close button in the top right corner. The dialog is divided into several sections:

- Name:** A text input field containing "Minutes" and an "Add" button to its right, which is highlighted with a red rectangular box.
- Reference ID:** A text input field containing "Minutes".
- Description:** A rich text editor area with a toolbar (including icons for bold, italic, underline, font size, and color) and a text area containing the text "For meeting minutes and agendas."
- Categories:** A list box that is currently empty.

At the bottom of the dialog, there are two buttons: "Cancel" and "Save".

5. (Optional) Repeat steps 2 through 4 to continue adding subcategories under the currently selected category.
6. With one or more subcategories listed in the **Categories** box, click **Save**.

The screenshot shows a dialog box titled "Add Subcategory to 'Document Type'". It features a "Name" input field with an "Add" button, a "Reference ID" input field, and a "Description" area with a rich text editor toolbar. Below the description is a "Categories" list with a trash icon and a scroll bar; the "Minutes" category is highlighted with a red box. At the bottom are "Cancel" and "Save" buttons.

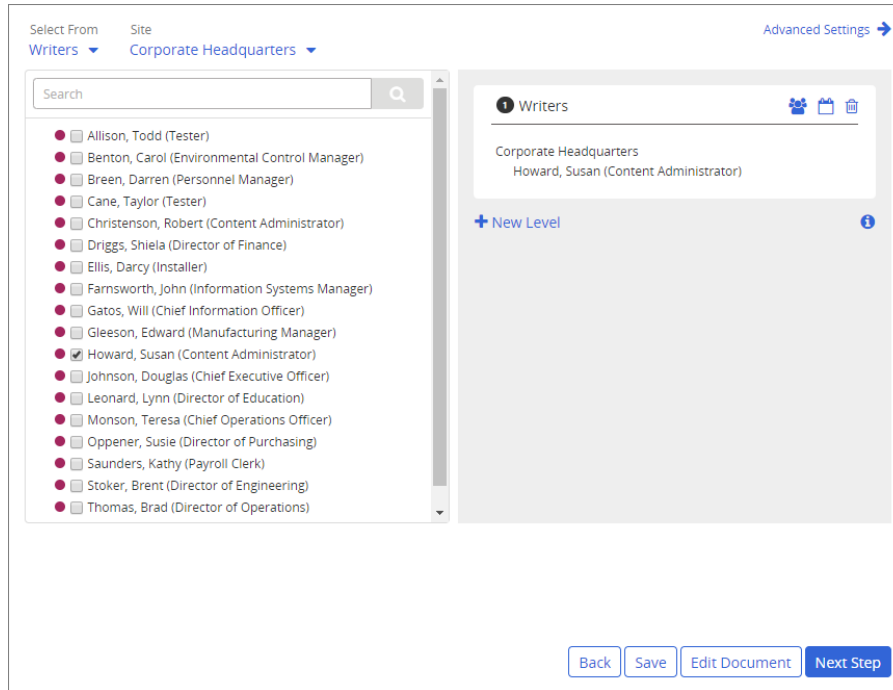

## Assigning Writers to a Document

A user assigned the Writer role can help with the creation of document content. You can invite one or more writers to collaborate on the current document.

**Note:** A writer cannot change properties and cannot submit a document for review.

Assigning writers is an optional **Properties Wizard** step.

1. In the **Writers** step, first check to see if the template included writer assignments. Any template writer assignments are optional and can be treated as suggestions. To remove an optional writer assignment, click it, and then click .

2. If your PolicyTech system has multiple sites, do one of the following.
  - Leave the default site selection to select writers from the current site.
  - Under **Site**, click ▼, select a different site, and then click **OK**.

- Under **Site**, click ▼, select **Allow multiple selections**, select two or more sites, and then click **OK**.

**Important:** If you will be assigning writers from other sites, see [Properties Wizard Task Assignments and Site Access](#) before doing so.

3. Select one or more writers.

**Note:** A list of writers within the selected site or sites is displayed by default. (If multiple sites are listed, expand a site to see and select individual writers.) To use another selection method, see [Other Ways to Select Writers](#).

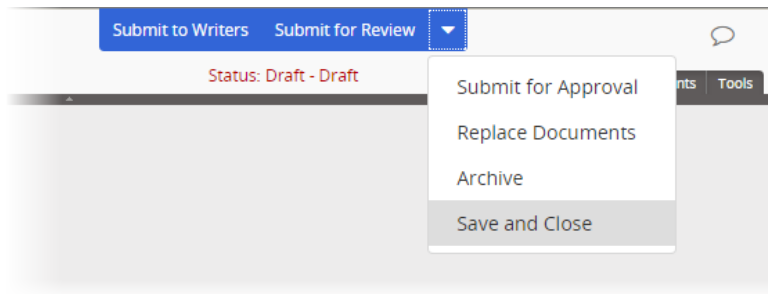

- (Optional) By default, all assigned writers must complete their tasks before the document moves on in the workflow. Alternatively, you can set a minimum number of writers of those assigned and have the document moved on in the workflow as soon as that number of writers complete their tasks.

In the right pane where writer selections are listed, click , select **Require [X] Users**, type a number, and then click **OK**.

**Note:** If a group is included and is both inherited from the template and designated as required, users within the group are counted individually toward the **Require** number. For example, suppose that, on a particular writer level, there is one individually assigned writer and a required group inherited from the template containing three writers. If you set the **Require** number at **2**, either of the following would complete the level: the individually assigned writer and one user from the required group complete their writing tasks; two users from the required group complete their writing tasks.

5. (Optional) Set a due date for when writers should be finished. See [Setting Due Dates for Writing, Review, Approval, and Assignee Tasks](#).
6. (Optional) As you assign writers, they all receive tasks when the owner clicks **Submit to Writers**. If you want the document to go to writers in a specific order, create additional review levels. See [Working with Levels](#) for details.
7. (Optional) Click **Advanced Settings**, and then click **Add Note** to include instructions or other information for the assigned writers. See [Adding Notes for Writers, Reviewers, Approvers, and Assignees](#) for details.
8. Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Assigning Reviewers to a Document](#).
  - Click **Edit Document**, and then go to [Writing a Document](#).
  - To stop assigning properties and finish later, click  to the right of **Submit for Review**, and then click **Save and Close**. (When you are ready to continue with assigning properties, go to [Editing a Draft Document](#).)

### Other Ways to Select Writers

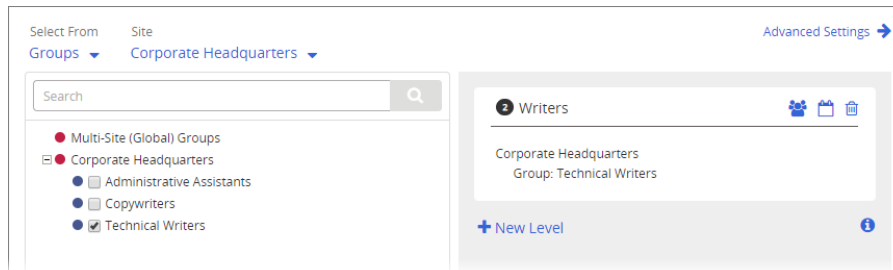

The default writer selection method is to select individual writers. You can also select by writer group, department, or job title.

### Writer Groups

1. Under **Select From**, click , click **Groups**, and then click **OK**.

2. Select one or more groups.

**Notes:**

- Use **Search** to find a group in a long list.
- A group is a combination of writers from a single site or from multiple sites.
- To assign individual writers from a group, click the group name, and then select writers.

**Departments, Department Groups, and Job Titles**

You select individual writers from departments, department groups, and job titles in essentially the same way.

1. Under **Select From**, click ▼, click **Departments**, **Department Groups**, or **Job Titles**, and then click **OK**.

2. Click a department, department group, or job title to display a list of writers from that entity, select one or more writers, and then click **OK**.

**Note:** Use **Search** to find a writer in a long list.

## Assigning Reviewers to a Document

You can assign one or more reviewers to check the document for accuracy and completeness.

Assigning reviewers is an optional **Properties Wizard** step, unless the template includes one or more required reviewers.

1. In the **Reviewers** step, first check to see if the template included reviewer assignments. In the example below, the template automatically added two reviewers. The reviewer assignment marked with  is required, meaning that you can't remove it. The other reviewer assignment is optional and can be treated as a suggestion. To remove an optional reviewer assignment, click it, and then click .

2. If your PolicyTech system has multiple sites, do one of the following.
  - Leave the default site selection to select reviewers from the current site.
  - Under **Site**, click , select a different site, and then click **OK**.

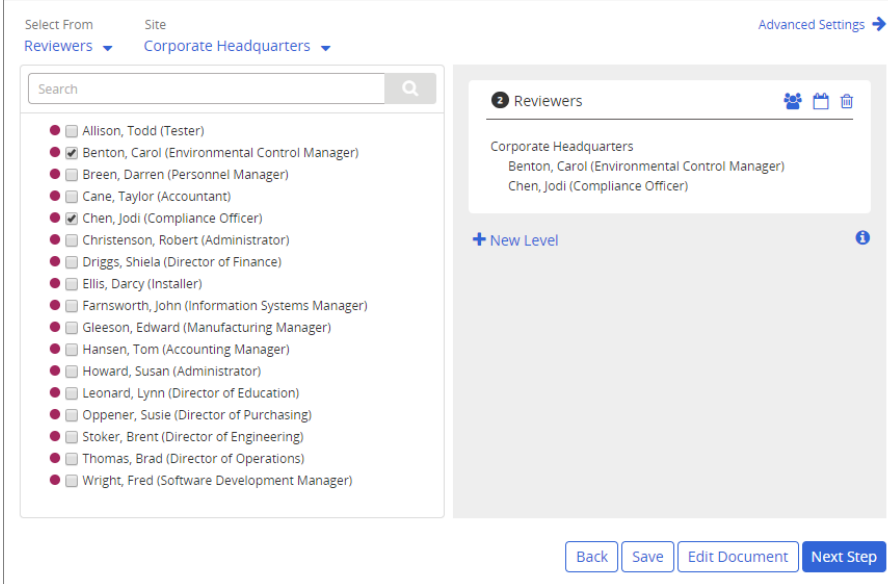

- Under **Site**, click , select **Allow multiple selections**, select two or more sites, and then click **OK**.

**Important:** If you will be assigning reviewers from other sites, see [Properties Wizard Task Assignments and Site Access](#) before doing so.

### 3. Select one or more reviewers.

**Note:** A list of reviewers within the selected site or sites is displayed by default. (If multiple sites are listed, expand a site to see and select individual reviewers.) To use another selection method, see [Other Ways to Select Reviewers](#).

## Other Ways to Select Reviewers

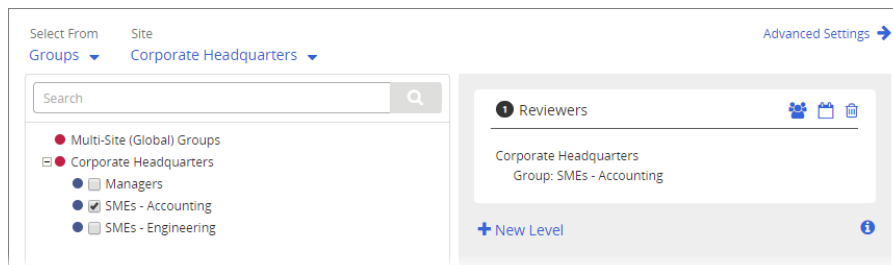

The default reviewer selection method is to select individual reviewers. You can also select reviewer groups or select individual reviewers from specific departments, department groups, or job titles.

## Reviewer Groups

1. Under **Select From**, click ▼, click **Groups**, and then click **OK**.

2. Select one or more groups.

### Notes:

- Use **Search** to find a group in a long list.
- A group is a combination of reviewers from a single site or from multiple sites.
- To assign individual reviewers from a group, click the group name, and then select reviewers.

## Departments, Department Groups, and Job Titles

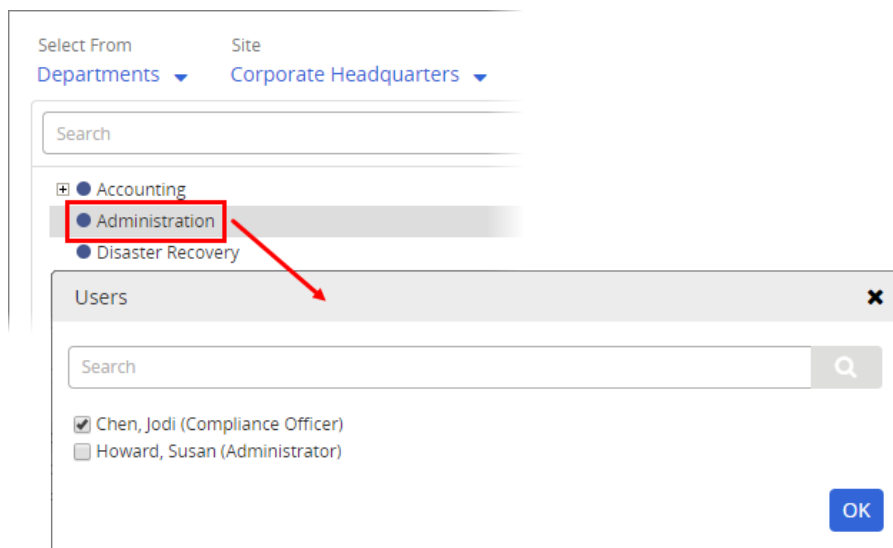

You select individual reviewers from departments, department groups, and job titles in essentially the same way.

1. Under **Select From**, click **Reviewers**, click **Departments**, **Department Groups**, or **Job Titles**, and then click **OK**.

2. Click a department, department group, or job title to display a list of reviewers from that entity, select one or more reviewers, and then click **OK**.

**Note:** Use **Search** to find a reviewer in a long list.

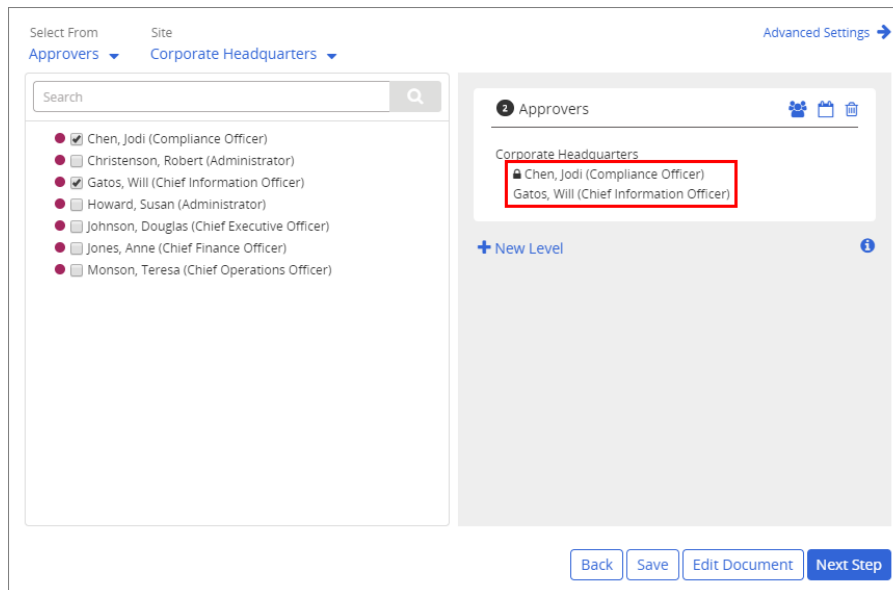

## Assigning Approvers to a Document

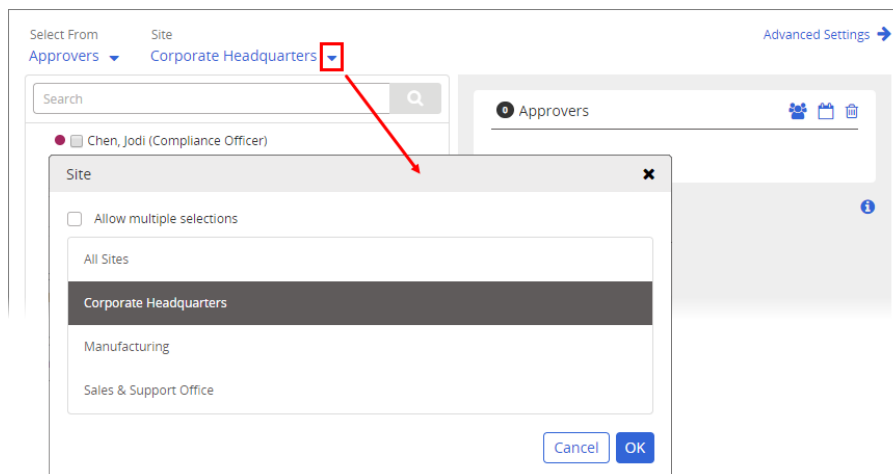

Typically, you must assign at least one approver to a document.

Approvers are usually management or executive level users who give their approval to publish the final draft of a document. They are considered an organization's top-level approving authority and typically have legal responsibility for what they approve.

1. In the **Approvers** step, first check to see if the template included approver assignments. In the example below, the template automatically added two approvers. The approver assignment marked with  is required, meaning that you can't remove it. The other approver assignment is optional and can be treated as a suggestion. To remove an optional approver assignment, click it, and then click .

2. If your PolicyTech system has multiple sites, do one of the following.
  - Leave the default site selection to select approvers from the current site.
  - Under **Site**, click , select a different site, and then click **OK**.

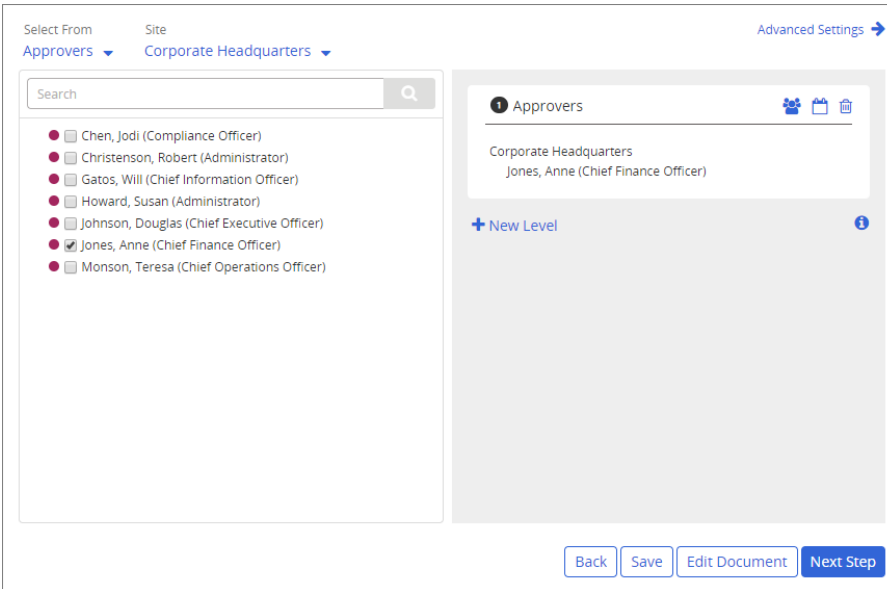

- Under **Site**, click , select **Allow multiple selections**, select two or more sites, and then click **OK**.

**Important:** If you will be assigning approvers from other sites, see [Properties Wizard Task Assignments and Site Access](#) before doing so.

- Select one or more approvers.

**Note:** A list of approvers within the selected site or sites is displayed by default. (If multiple sites are listed, expand a site to see and select individual approvers.) To use another selection method, see [Other Ways to Select Approvers](#).

**Note:** If a group is included and is both inherited from the template and designated as required, users within the group are counted individually toward the **Require** number. For example, suppose that, on a particular approver level, there is one individually assigned approver and a required group inherited from the template containing three approvers. If you set the **Require** number at **2**, either of the following would complete the level: the individually assigned approver and one user from the required group accepts the document; two users from the required group accept the document.

5. (Optional) Set a due date for when approvers should be finished. See [Setting Due Dates for Writing, Review, Approval, and Assignee Tasks](#) for details.
6. (Optional) As you assign approvers, they all receive tasks when the document goes to Approval. If you want the document to go to approvers in a specific order, create additional approval levels. See [Working with Levels](#) for details.
7. (Optional) Click **Advanced Settings**, and then click **Add Note** to include instructions or other information for the assigned approvers. See [Adding Notes for Writers, Reviewers, Approvers, and Assignees](#) for details.
8. Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Designating Assignees for a Document](#).
  - Click **Edit Document**, and then go to [Writing a Document](#).
  - Click  to the right of **Submit for Review**, and then click **Save and Close**.

### Other Ways to Select Approvers

The default approver selection method is to select individual approvers. You can also select approver groups or select individual approvers from specific departments, department groups, or job titles.

## Approver Groups

1. Under **Select From**, click **▼**, click **Groups**, and then click **OK**.

2. Select one or more groups.

### Notes:

- Use **Search** to find a group in a long list.
- A group is a combination of approvers from a single site or from multiple sites.
- To assign individual approvers from a group, click the group name, and then select approvers.
- There may be situations where a board or committee needs to approve a document or questionnaire, and many of the board or committee are

not PolicyTech users. In this case an administrator can set up an approver group to represent the board or committee, with as few as one user in the group. An administrative assistant or other individual representing the board or committee can then log in to PolicyTech during the board's or committee's meeting and accept the document/questionnaire on their behalf. This will ensure that the approval data in PolicyTech match the actual approval date. You may also want to have a legal review of such a situation in order to protect the individual who represents the board or committee.

- Some organizations choose to create an approval group of one or more users who have the responsibility to make sure the document/questionnaire is clean (all markup is removed; the department and category settings are correct; and so on) before it is approved and published/started. The group with this gatekeeper or editor role receives the document/questionnaire first (see [Working with Levels](#) for details on approval levels and workflow). The document/questionnaire then moves on to the other approvers.

### Departments, Department Groups, and Job Titles

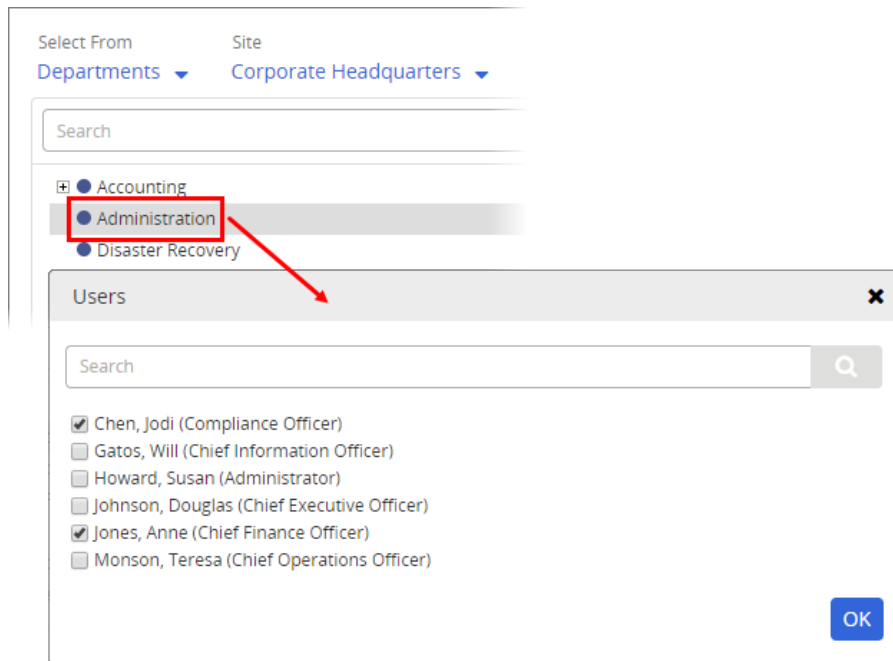

You select individual approvers from departments, department groups, and job titles in essentially the same way.

1. Under **Select From**, click ▼, click **Departments**, **Department Groups**, or **Job Titles**, and then click **OK**.

2. Click a department, department group, or job title to display a list of approvers from that entity, select one or more approvers, and then click **OK**.

**Note:** Use **Search** to find an approver in a long list.

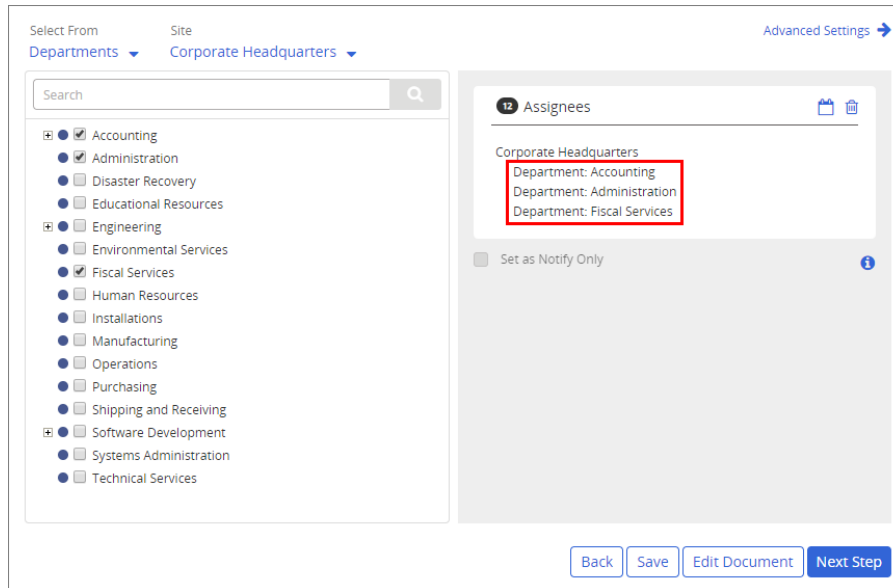

## Designating Assignees for a Document

Assignees are those users you designate to read the document. You can assign any PolicyTech user as either a required assignee or as an assignee who will only be notified that a document is available. When the document is published, all required assignees receive an email notification and a task to read the document, while "notify only" assignees receive only a notification email (no task assignment). For required assignees, you can choose to simply have each assignee mark the document as read, or you can include a questionnaire that assignees must pass in order to mark the document as read (see [Creating a Document Questionnaire](#) for details).

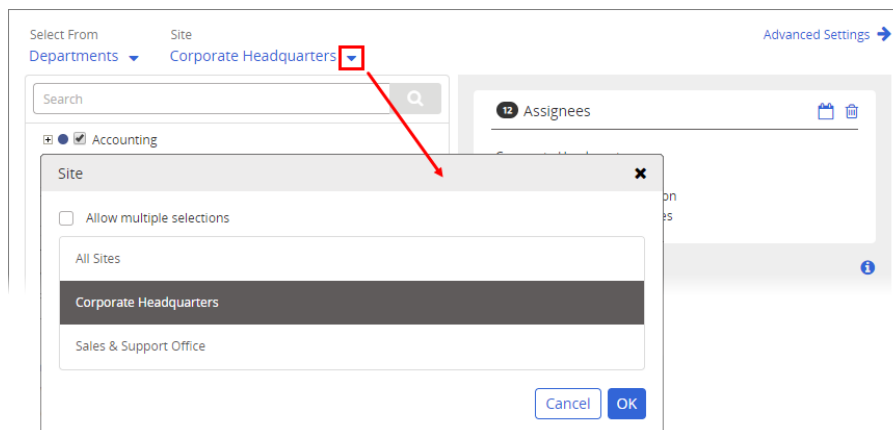

Designating assignees is a completely optional **Properties Wizard** step. (A template cannot include required assignees—only optional assignees.) If you don't designate any assignees, the document will be accessible to all users with the assignee role that have access to the sites and departments to which you assign the document.

**Important:** We recommend that you select assignees by department or job title so you don't have to worry about adding or removing assignees from the document as they are added or removed from PolicyTech. Departments and job titles are automatically updated as user changes are made.

1. In the **Assignees** step, first check to see if the template included assignees. In the example below, the template automatically added three departments. Any assignees added by the template are optional and can be treated as suggestions. To remove an optional assignee, department, or job title, click it, and then click .

2. If your PolicyTech system has multiple sites, do one of the following.
  - Leave the default site selection to select approvers from the current site.
  - Under **Site**, click , select a different site, and then click **OK**.

- Under **Site**, click , select **Allow multiple selections**, select two or more sites, and then click **OK**.

**Important:** If you will be designating assignees from other sites, see [Assignees and Site Access](#) before doing so.

3. Select one or more departments.

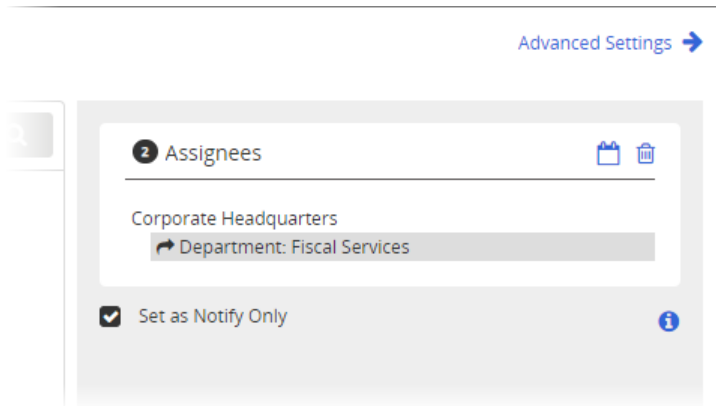

**Notes:**

- A list of departments within the selected site or sites is displayed by default. (If multiple sites are listed, expand a site to see and select departments.) To use another selection method, see [Other Ways to Select Assignees](#).
- To assign individual users from a department, click the department name, and then select users.

4. (Optional) By default, selected assignees receive a task that they must complete by reading and then marking this document as read. To only notify certain users that the document is available once it has been published and not give those users reading task assignments, click the department, job title, or assignee name in the pane on the right, and then select **Set as Notify Only**. Notice that "Notify Only" assignees are marked with 📧.

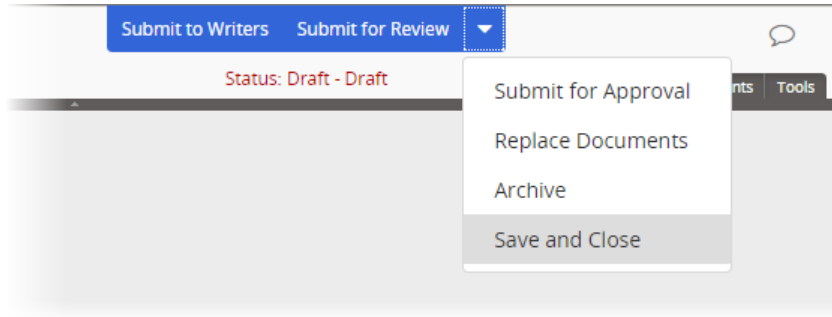

**Note:** To select multiple assignee entities, hold down the Ctrl key as you click each one. To select all **Selected Users** items (or a contiguous group of items), click the first one and then hold down the Shift key as you click the last one.

5. (Optional) Set a due date for when assignees should be finished. (This option does not apply to "Notify Only" assignees.) See [Setting Due Dates for Writing, Review, Approval, and Assignee Tasks](#) for details.
6. (Optional) Click **Advanced Settings**, and then, for **Recurrence**, click **Once** or **Every**. If you clicked **Every**, then type a number of months, and then, for **Start on**, click **approved/publication date**, or click **specified date**, and then select a date.

7. (Optional) Click **Advanced Settings**, and then click **Add Note** to include instructions or other information for the assignees. See [Adding Notes for Writers, Reviewers, Approvers, and Assignees](#) for details.
8. Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Adjusting Security Settings for a Document](#).
  - Click **Edit Document**, and then go to [Writing a Document](#).
  - To stop assigning properties and finish later, click  to the right of **Submit for Review**, and then click **Save and Close**. (When you are ready to continue with assigning properties, go to [Editing a Draft Document](#).)

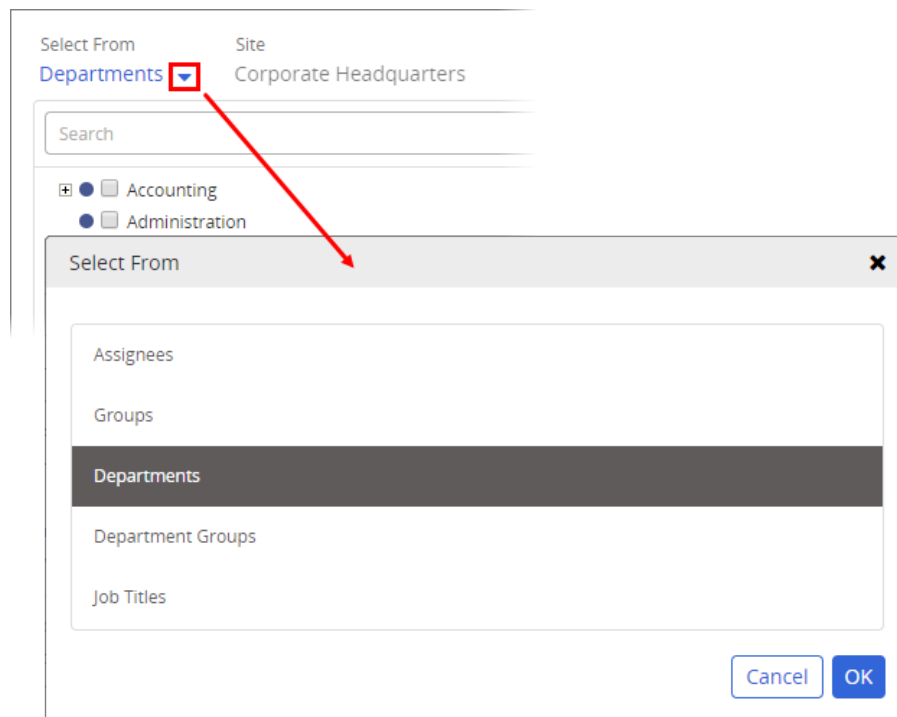

## Other Ways to Select Assignees

The default assignee selection method is by department. You can also select individual assignees, by assignee group, by department group, or by job title. You select all of these in essentially the same way.

**Note:** A group is a combination of departments, job titles, or assignees from a single site or from multiple sites.

1. Under **Select From**, click ▼, click **Assignees**, and then click **OK**.

2. Select one or more assignees, groups, or job titles.

**Note:** Use **Search** to find an item in a long list.

Security Level ⓘ

All Users

All Users: Users can view this item in the workflow stages they have permission to view. (Example: Any user with a role can view upcoming items in any status from links in the Overview > Version History.)

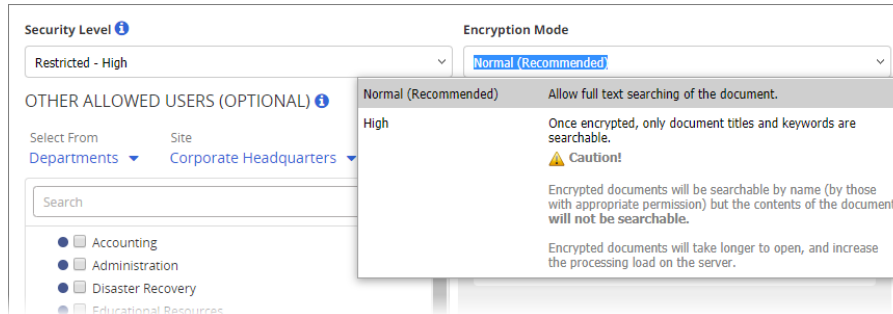

Restricted - High: Users can view this item **at any time** as long as any task is assigned to them for this item. (Ex: Reviewers can still view the item while it is in the Approval stage.)

Restricted - Severe: Users can view this item **only while it is in the status and level** for which they have a task assignment. (Example: Assigned reviewers can only view the item while it is in the Review status.)

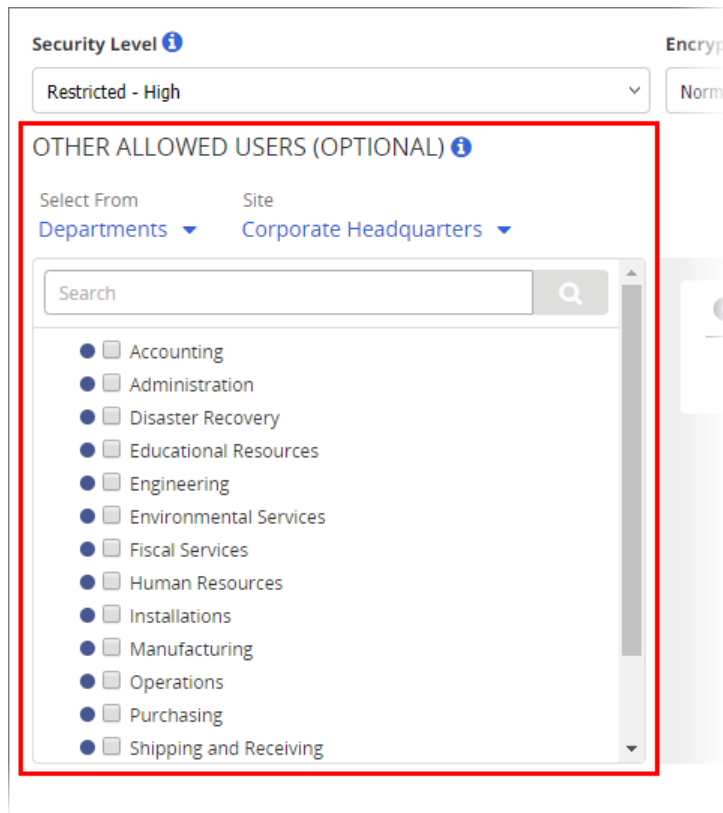

Buttons: Back | Save | Edit Document

2. Do one of the following:
  - If you selected the **All Users** security level (the default setting for all new documents), you are done with security options. Go to step 5 below.

- If you selected **Restricted - High** or **Restricted - Severe**, continue with step 3.
3. (Optional) Click the **Encryption Mode** box, and then click **Normal (Recommended)** or **High**. See [Encryption Modes](#) below for details on the two modes.

4. (Optional) To grant special access permissions to specific users who would not normally have access under the **Restricted - High** or **Restricted - Severe** security level, select those users by department, by job title, or by those with the Assignee role. See [Other Allowed Users](#) below for details on what permissions will be granted.

5. Do one of the following:

- Click **Edit Document**, and then go to [Writing a Document](#).
- If you are finished with the document/questionnaire for now, click  to the right of **Submit for Review**, and then click **Save and Close**. (When you are ready to work on the document again, go to [Editing a Draft Document](#).)

## Security Levels

An administrator can assign users various roles for working with documents and questionnaires. These roles include Document Owner, Questionnaire Owner, Writer, Reviewer, Approver, Pending, and Archived. These roles allow users access to the workflow statuses that correspond with their roles. For example, a document owner will see documents in the Draft status, a writer will see documents in the Collaboration status, and an assignee will see documents in the Published status. Which documents/questionnaires they can see in each of these statuses depends on the documents'/questionnaires' assigned security levels, as explained below.

**All Users.** When a document/questionnaire is assigned this security level, all users with the roles mentioned above can see that item in the workflow statuses they have access to, even if they are not specifically assigned to that item. For example, someone with the Document Owner role who is not a document's owner can see that item while it is in the Draft status, and someone with the reviewer role who is not assigned to a document can see it while it's in the Review status.

**Restricted - High.** With this security level assigned to a document/questionnaire, only those specifically assigned to one or more workflow statuses of the item have access to it. They can also access the document/questionnaire in any workflow status except archived. For example, someone assigned as a document's approver can see that document while it is in the Draft, Collaboration, Review, Approval, Pending, and Published statuses.

**Restricted - Severe.** As with the **Restricted - High** security level, only users specifically assigned to one or more workflow statuses of the document/questionnaire have access to it. However, they can only view that item while it is in the status to which they are assigned. For example, an

assigned writer can only see the document/questionnaire while it is in Collaboration status.

## Encryption Modes

The encryption mode determines how much of a document is searchable when a user searches for a document from a document list, such as when the **Published** status is selected.

**Normal.** The document's title, keywords, and contents are all searchable.

**High.** Only the document's title and keywords are searchable. (Keywords can be added in step **1. Settings** of the **Properties Wizard**.)

**Important:** Be aware that documents with high encryption take longer to open and increase the PolicyTech server's processing load.

## Other Allowed Users

If you assign a document or questionnaire the **Restricted - High** or **Restricted - Severe** security level, you have the ability to allow other users who are not assigned to this document/questionnaire to access it as if they were assigned to it. As with users assigned to the document/questionnaire, where other allowed users can access the item depends on their assigned roles and the item's security level.

Select other allowed users in the same way as you select users in the Assignees step.

## Working with Levels

When, in the **Properties Wizard**, you assign writers, reviewers, and approvers to a document or questionnaire, you can create levels to specify which users get the document/questionnaire first, second, and so on. When you create multiple levels, all users on the first level must complete their tasks, such as reviewing the document/questionnaire, before the same task can be sent to the users at the next level.

The following instructions assume that you are currently working on one of these **Properties Wizard** steps: **Writers**, **Reviewers**, **Approvers**.

### Add a Level

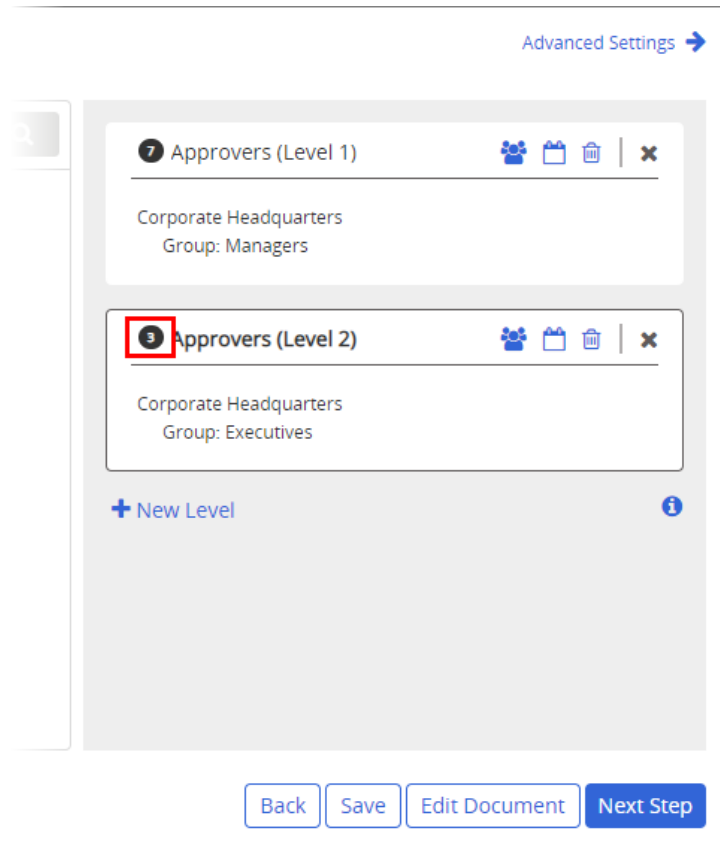

Click **New Level**.

Notice in the screenshot above that **Level 2** has a dark border, indicating that this level is now active. Any users selected at this point are added to **Level 2**. To make **Level 1** active again, click anywhere in **Level 1**.

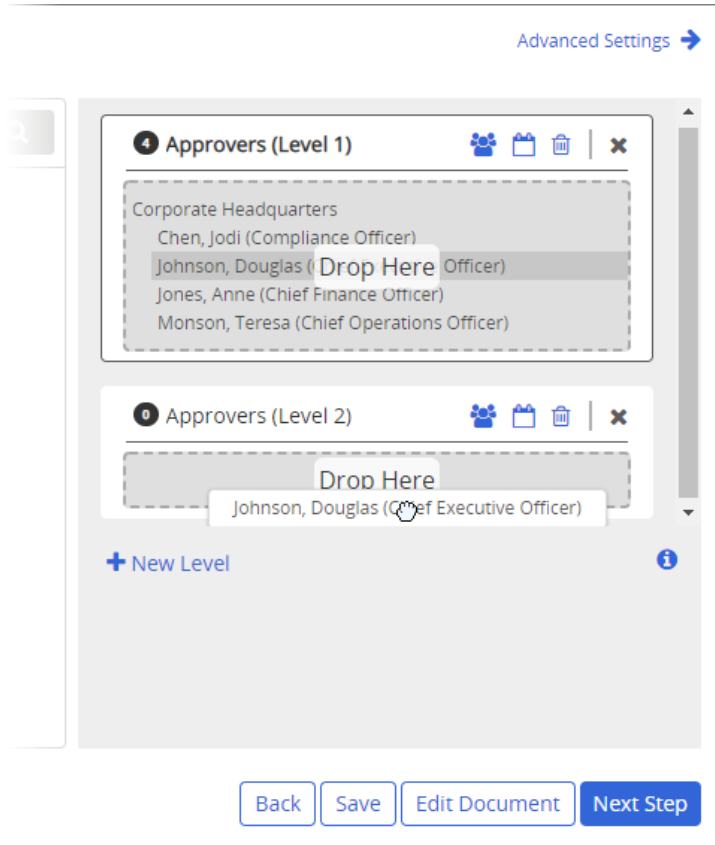

### Assign Users to a Level

Click a level to activate it, and then select users, departments, job titles, or groups. Notice that the number of selected users in the level is updated automatically.

### Move Users Between Levels

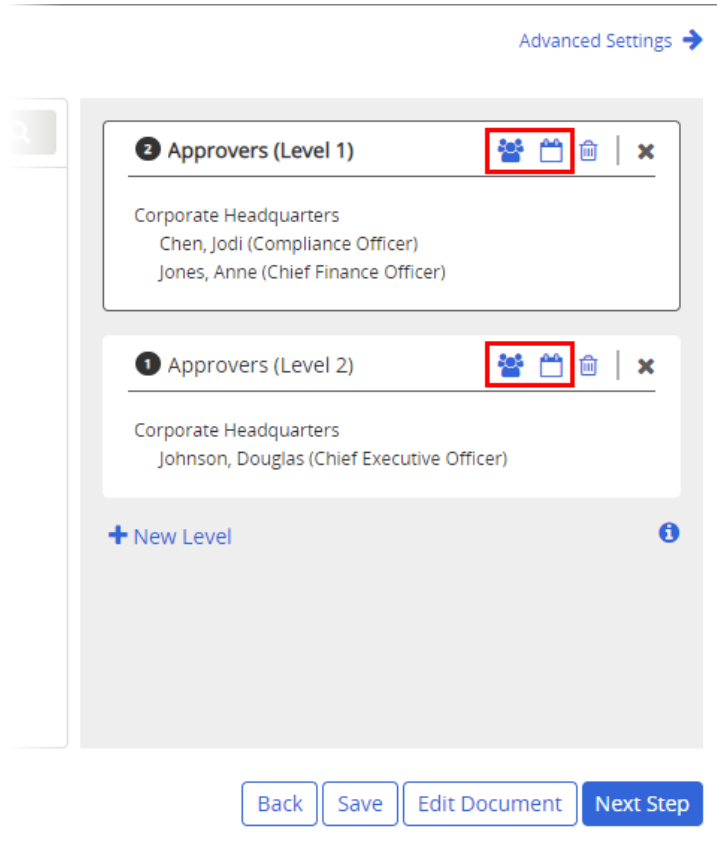

Click and drag a user to the desired level.

**Note:** To move multiple users at once, hold down the Ctrl key as you select each user, and then click and drag the selection. To select a range of users, click the top user and then hold down the Shift key as you click the last user.

### Adjust Level Settings

With multiple levels, **Due Date** and **Minimum Required Users** settings exist for each level.

### Set Due Dates

For instructions on setting due dates, see [Setting Due Dates for Writing, Review, Approval, and Assignee Tasks](#).

### Set Minimum Required Users

(Optional) By default, all assigned writers, reviewers, or approvers must complete their tasks before the document/questionnaire moves on in the workflow. Alternatively, you can set a minimum number of those assigned and have the document/questionnaire moved on in the workflow as soon as that number of writers, reviewers, or approvers complete their tasks.

In a level header, click , select **Require [X] Users**, type a number, and then click **OK**.

**Note:** If a group is included and is both inherited from the template and designated as required, users within the group are counted individually toward the **Require** number. For example, suppose that, on a particular approver level, there is one individually assigned approver and a required group inherited from the template containing three approvers. If you set the **Require** number at **2**, either of the following would complete the level: the individually assigned approver and one user from the required group accepts the document/questionnaire; two users from the required group accept the document/questionnaire.

## Remove a Level

A level must be empty before you can remove it.

1. Remove all users, groups, departments, and job titles from the level.
2. Do one of the following:
  - Click , and then click **Yes**.

- Click **Save** or click another **Properties Wizard** step to automatically remove the empty level.

## Setting Due Dates for Writing, Review, Approval, and Assignee Tasks

You can set a task due date that is a specific number of days after the user receives the task, or you can select a specific calendar date as the due date. A writer, reviewer, approver, or assignee who fails to complete a task on or before the set due date receives a one-time notification email when the task becomes overdue. If task summary emails are enabled, users can also see their tasks' overdue statuses each time they receive a task summary email.

The way you set a due date for a writing, reviewing, or approving task is the same, while [setting a due date for a reading task](#) is slightly different.

### Setting a Due Date for a Writing, Review, or Approval Task

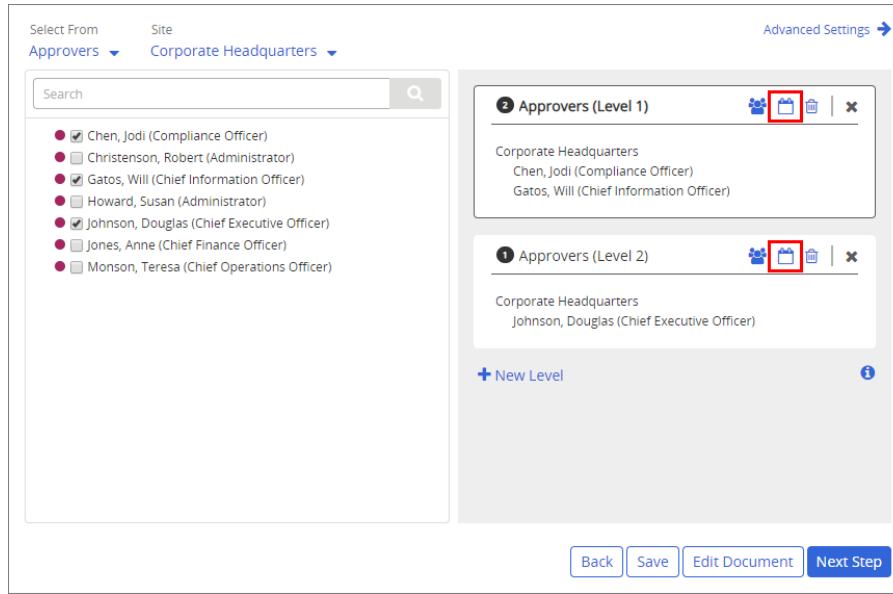

**Important:** The instructions in this section assume that you are working in one of the following **Properties Wizard** steps: **Writers, Reviewers, Approvers**.

1. Do one of the following:

- In the right pane where approver selections are listed, click .

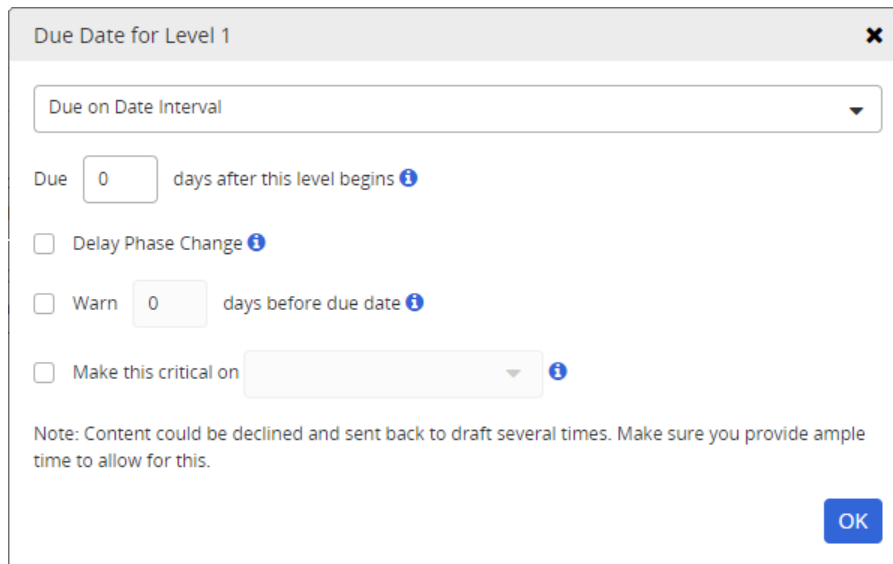

- If there are multiple levels, click  in one of the level headers.

2. Do one of the following:

- Click **Due on Date Interval**, and then type a number in the **Due** box. The user then has that many days to complete the task after receiving it.

- Click **Due on Specific Date**, click ▼ in the **Target Due Date** box, and then find and click the due date.

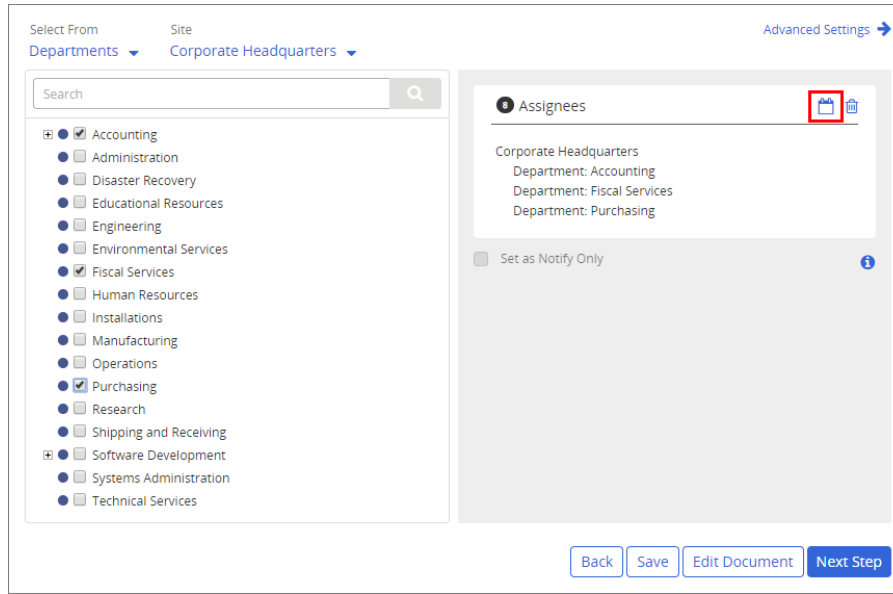

3. (Optional) The **Delay Phase Change** option applies only if you selected a number less than **All** in this level's **Minimum Requires Users** setting. Select **Delay Phase Change** if you want as many users as possible to complete their tasks up until the due date, but then want the document/questionnaire moved on to the next level if at least the number of required users have completed their tasks. The document/questionnaire will move to the next level earlier than the due date only if all users on the current level complete their tasks.
4. (Optional) Select **Warn**, and then type a number of days before the due date that you want all that level's users notified that the due date is approaching. For example, if you set **10** as the **Due on Date Interval** setting, and then you set **Warn** to **2**, any users who haven't finished their tasks for that level by the end of the eighth day will receive a task reminder.
5. (Optional) Select **Make this critical on**, click ▼, and then find and click a date that is on or after the due date. If any users haven't completed their tasks by the critical date, an escalation email is sent to both the assigned users and the document/questionnaire owner.

### Setting a Due Date for an Assignee Task

**Important:** The instructions in this section assume that you are working on the **Assignees** step of the **Properties Wizard**.

**Note:** Due dates do not apply to "Notify Only" assignees.

1. In the right pane where assignee selections are listed, click .

2. Do one of the following:

- Click **Due on Date Interval**, and then type a number in the **Due** box. The user then has that many days to complete the task after receiving it.

- Click **Due on Specific Date**, click ▼ in the **Target Due Date** box, and then find and click the due date.

**Important:** We recommend that you not set a specific due date for an assignee task as that could cause past due notices to go out to new users who were added after the due date and assigned to read the document or complete the questionnaire.

3. (Optional) Select **Warn**, and then type a number of days before the due date that you want all that level's users notified that the due date is approaching. For example, if you set **10** as the **Due on Date Interval** setting, and then you set **Warn** to **2**, any users who haven't finished their tasks for that level by the end of the eighth day will receive a task reminder.
4. (Optional) Select **Make this critical on**, click ▼, and then find and click a date that is on or after the due date. If any users haven't completed their tasks by the critical date, an escalation email is sent to both the assigned users and the document/questionnaire owner.

## Properties Wizard Task Assignments and Site Access

As users are added to PolicyTech, the administrator decides which sites each user should have access to. When you assign a writer, reviewer, approver, or assignee to a content item (document, questionnaire, or campaign) and that user is not assigned or and has not been given access to the site containing the item, PolicyTech lets the user open that content item anyway in order to complete the assigned task. However, the user can only open the content item from the task in **My Tasks** or from the link in the notification email. The content item cannot be found using **Search** or **Browse**, since the user cannot select that site.

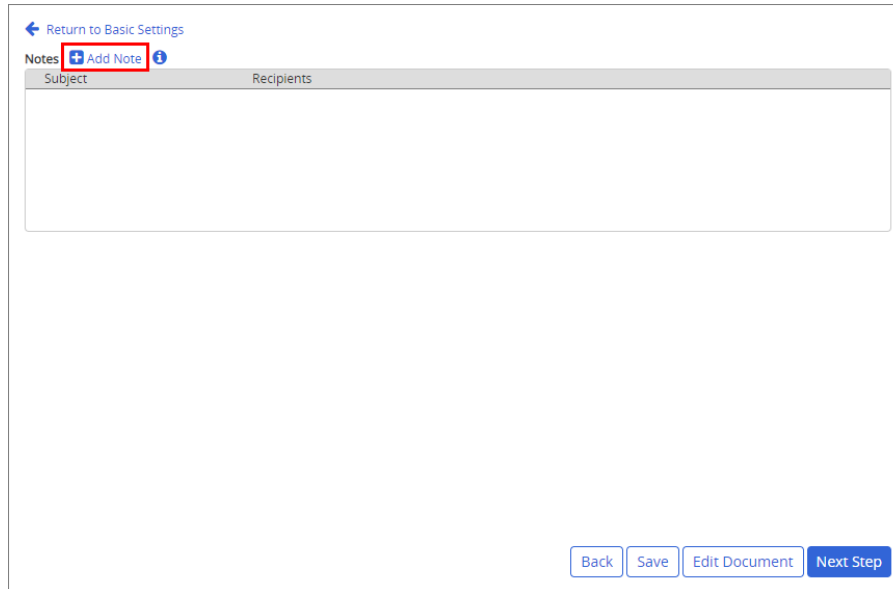

Keep this in mind as you assign users from other sites. Be sure that you're not granting a user access to a content item that the user should not have access to.

## Adding Notes for Writers, Reviewers, Approvers, and Assignees

When selecting writers, reviewers, approvers, and assignees in the **Properties Wizard**, you can include a note with instructions or other information concerning the writing, review, approval, or reading/completion of the content item (document, questionnaire, or campaign). Any note you write is included in the task notification email sent to assigned users as soon as the content item moves to the status for which the note was written. For example, if you include a note while working on the **Assignees** step, that note will be sent as soon as the

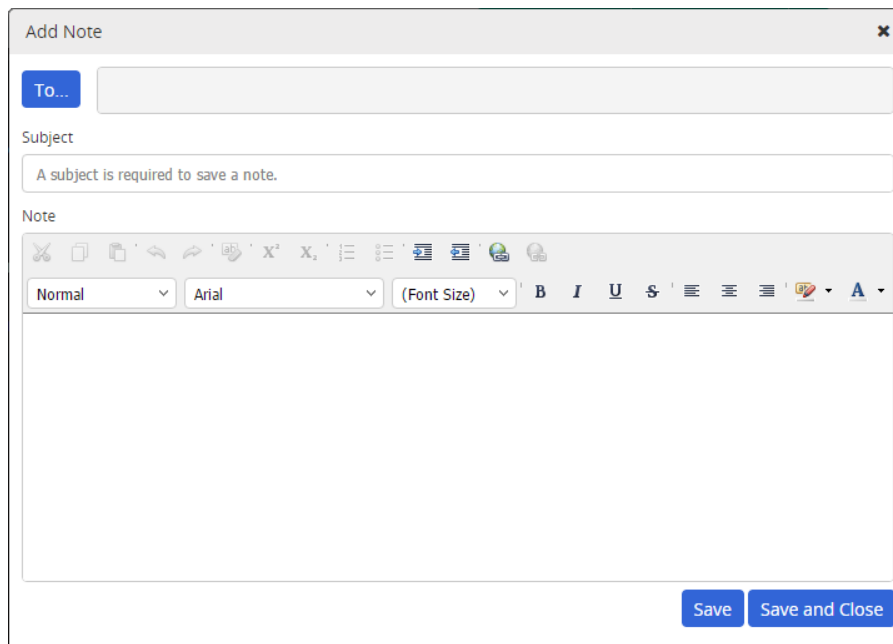

content item is published or started. A user assigned a content item task can also access a note from within the content item (see [Reviewing Notes](#) for details).

1. In the **Writers, Reviewers, Approvers, or Assignees** step of the **Properties Wizard**, click **Advanced Settings**, and then click **Add Note**.

The screenshot shows the 'Notes' section of the Properties Wizard. At the top left, there is a link 'Return to Basic Settings'. Below it, the 'Notes' section has a red box around the 'Add Note' button. The 'Notes' section is divided into two columns: 'Subject' and 'Recipients'. The 'Subject' column is currently empty. At the bottom right, there are four buttons: 'Back', 'Save', 'Edit Document', and 'Next Step'.

2. Click **To...**.

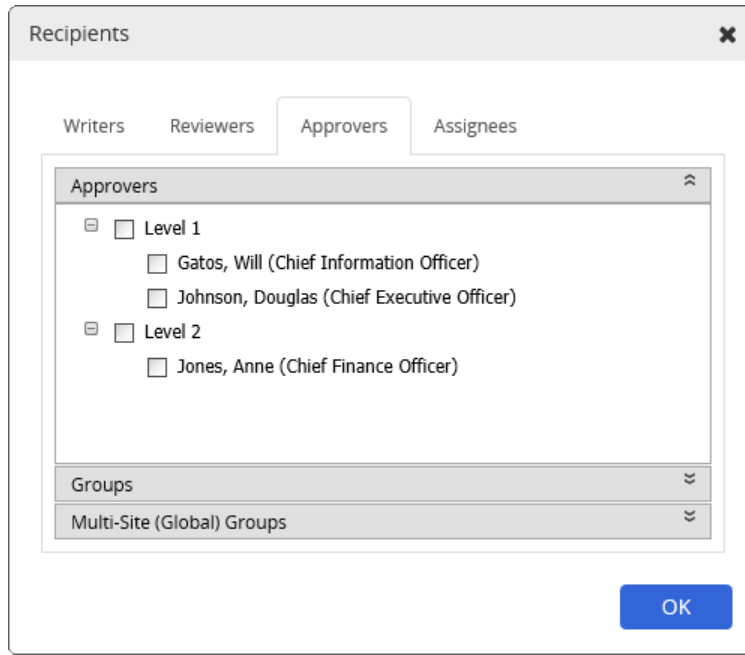

The screenshot shows the 'Add Note' dialog box. It has a title bar with 'Add Note' and a close button. The dialog is divided into three sections: 'To...', 'Subject', and 'Note'. The 'To...' section has a blue 'To...' button and an empty text field. The 'Subject' section has a text field with the message 'A subject is required to save a note.' The 'Note' section has a rich text editor with a toolbar containing various icons for text formatting and editing. The toolbar includes options for font face (Normal, Arial), font size, bold (B), italic (I), underline (U), strikethrough (ABC), bulleted list, numbered list, indent, and link. At the bottom right, there are two buttons: 'Save' and 'Save and Close'.

3. As you select note recipients, you will only see the users and groups currently assigned to the content item. Click the **Writers, Reviewers,**

**Approvers**, or **Assignees** tab, and then do any of the following:

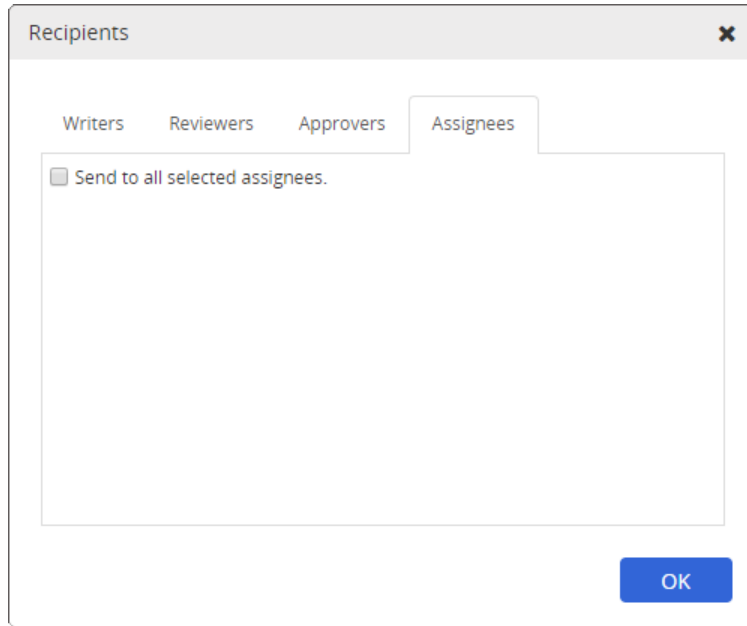

- Under the **Writers**, **Reviewers**, or **Approvers** heading, select individual assignees or select a level to include all assignees on that level.

- In the **Writers**, **Reviewers**, or **Approvers** tab, click the **Groups** heading, and then select one or more assigned groups.
- To select assignees as note recipients, click the **Assignees** tab, and then click **Send to all selected assignees**.

**Note:** If you select **Send to all selected assignees**, both required and "Notify Only" assignees receive the note in their initial email notifications.

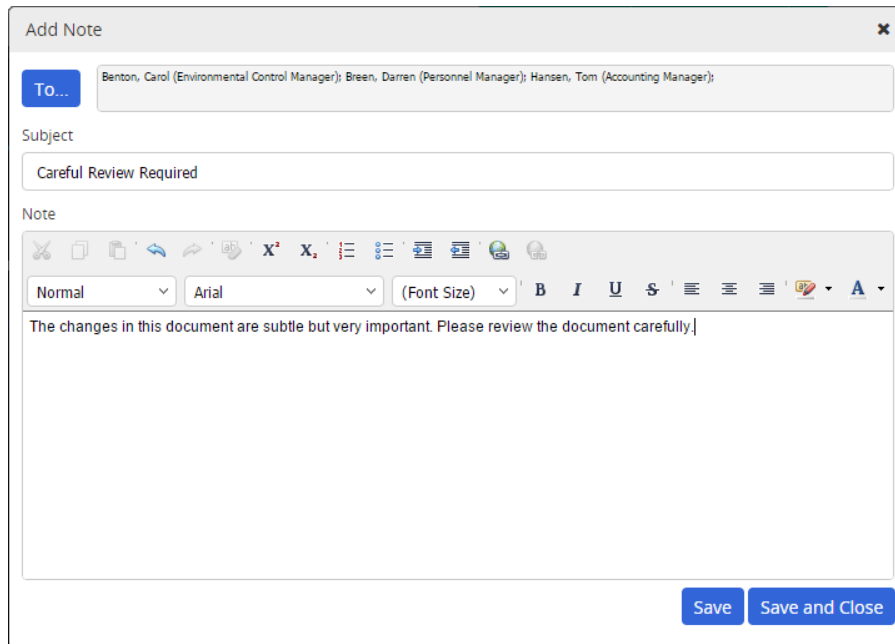

4. Type a subject.

**Note:** You must type a subject before you can save the note.

5. Type the instructions or other information, and then click **Save and Close**.

---

## Writing a Document

Refer to the section below that corresponds with the type of document you need to write.

[Adding Content to a Word Document](#)

[Adding Content to an Excel Document](#)

[Adding Content to a PowerPoint Document](#)

[Adding Content to an HTML Document](#)

[Adding Content to a Document with an Upload File Template](#)

## Adding Content to a Word Document

---

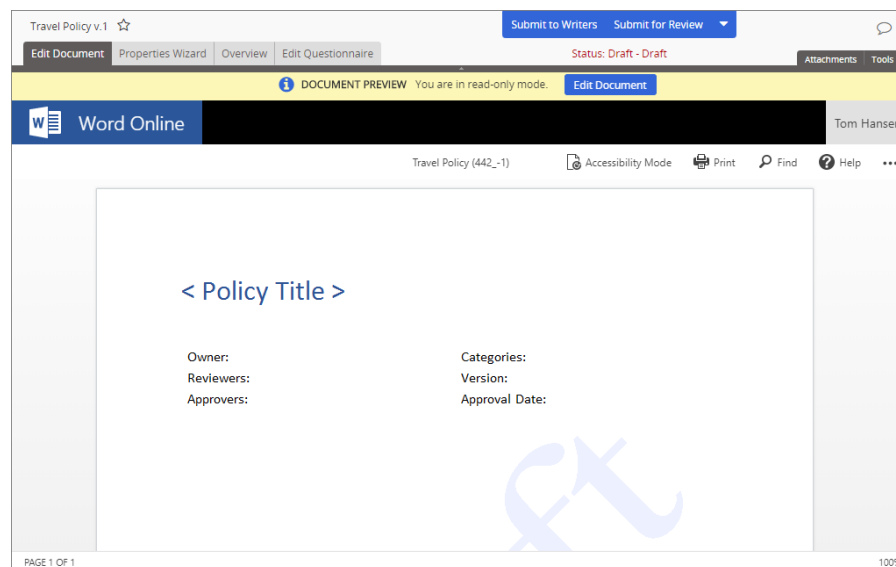

## Adding Content to a Word Document

The way you add content to a Word document depends on what type of Word integration your PolicyTech system is currently using.

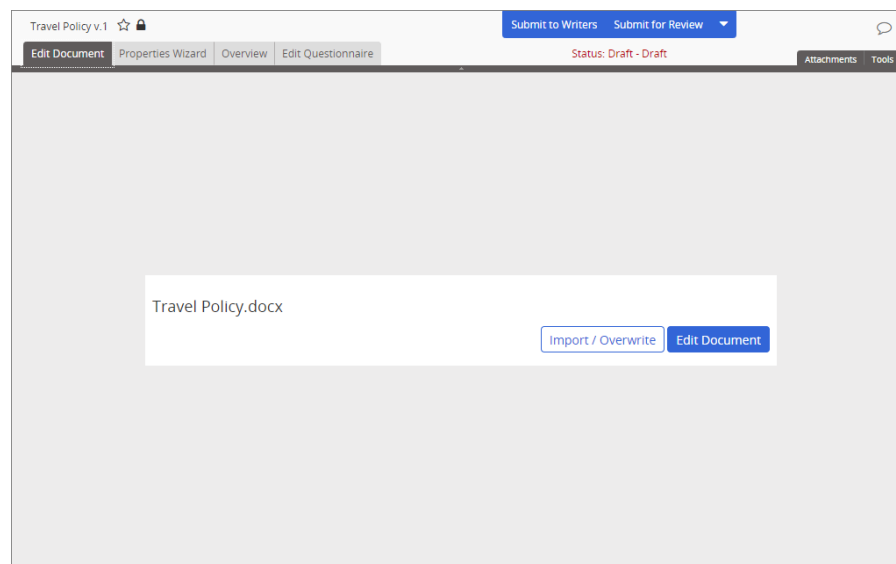

Do one of the following:

- If you see either of the following in the **Edit Document** tab, continue with the instructions in [Adding Content to a Word Document using Office Online Module](#).

### **Assigned template contains prewritten content**

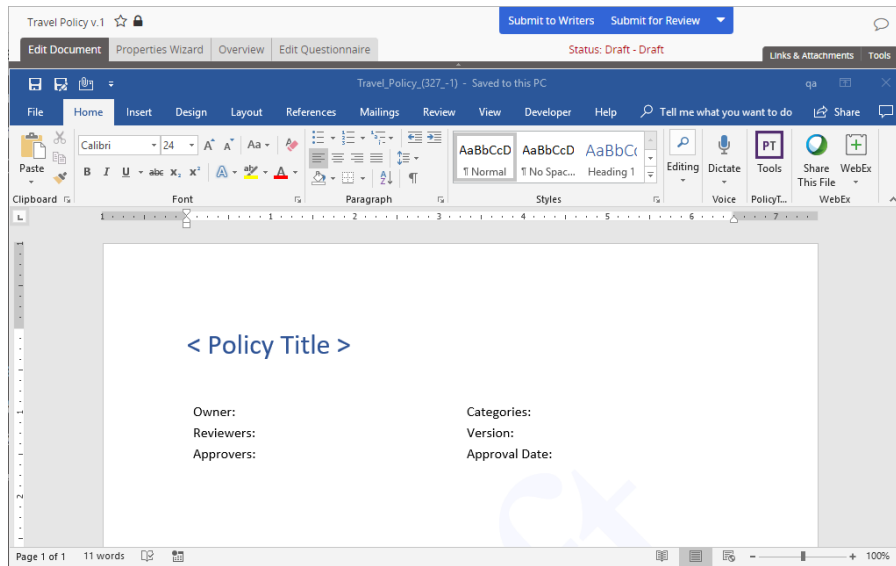

### **Assigned template contains no content**

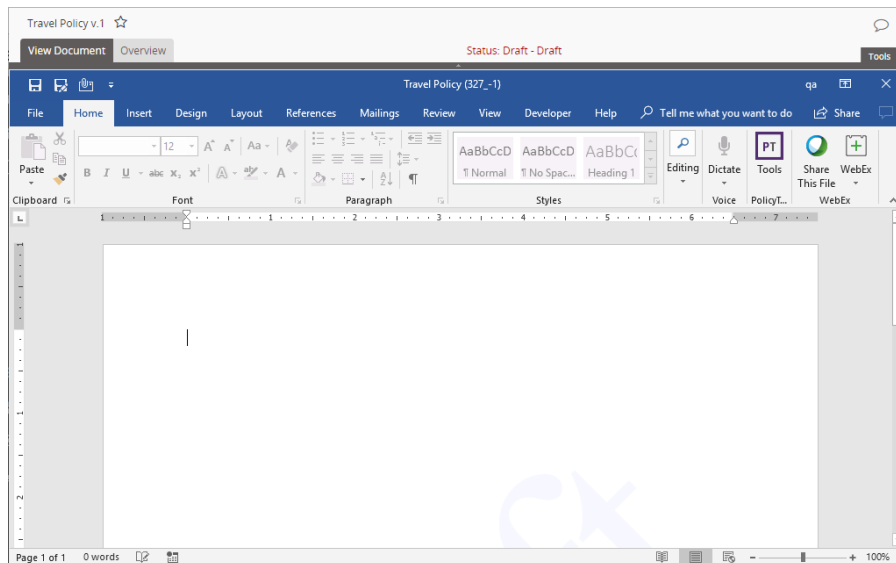

- If you see either of the following in the **Edit Document** tab, continue with the instructions in [Adding Content to a Word Document using WordModulePlus](#).

**Note:** Depending on which browser and version of Word you're using, Word may open in the **Edit Document** tab or in a separate Word application window.

#### **Assigned template contains prewritten content**

#### **Assigned template contains no content**

**Important:** If you see a prompt like the one below instead of a window link one of those above, then WordModulePlus is set to be used but has not yet been installed on your computer. Follow the instructions in [Installing WordModulePlus](#), before continuing.

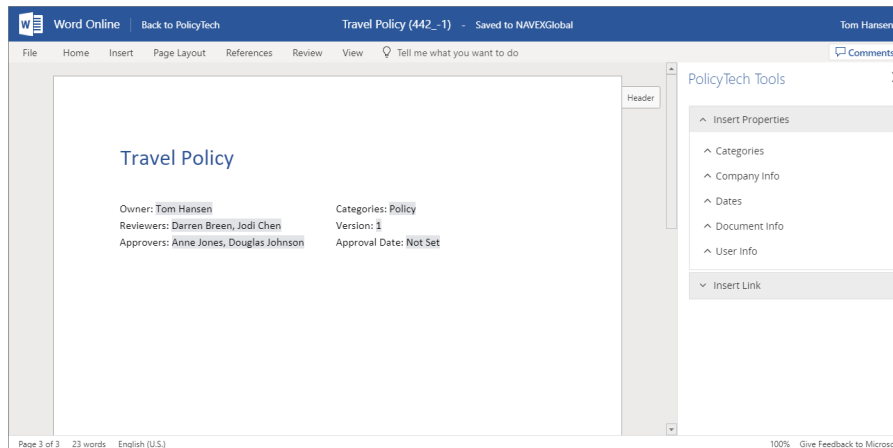

## Adding Content to a Word Document using Office Online Module

**Important:** Before you can write or otherwise add content to a Microsoft® Word document, you must complete at least the **Settings** step of the **Properties Wizard**. If you have not already done so, complete the instructions under [Adjusting Basic Document Settings](#).

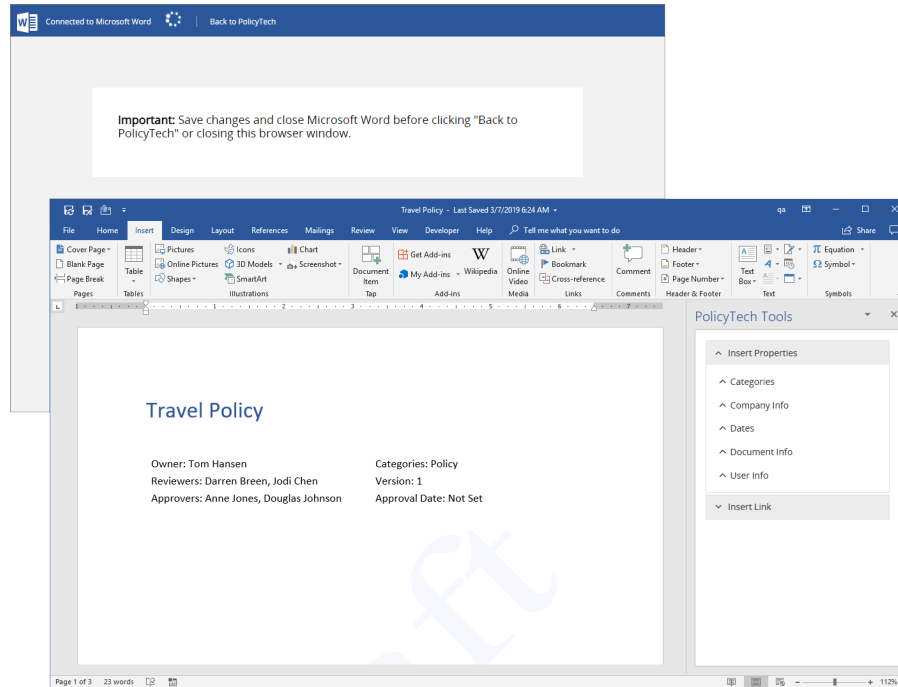

### What You Should Know about Using Word inside of PolicyTech

Opening a Word document for editing in PolicyTech either opens the document directly inside the PolicyTech document window (the **Open with Microsoft Office Online** option) or in your desktop version of Word outside the PolicyTech document window (the **Open in Office** option).

#### *Open with Microsoft Office Online*

#### *Open in Office (desktop version of Word)*

Writing a Word document within PolicyTech is nearly the same as writing a document in the Word application outside of PolicyTech. Some differences you might notice when using Word inside of PolicyTech include the following:

- Up until the document is approved and published, PolicyTech automatically adds a watermark indicating its current location in the writing, review, and approval process. For example, when you start a document, it is placed in the Draft stage and includes a Draft watermark.

**Note:** While you can add a watermark of your own, that watermark will be overwritten.

- When you save the Word document, it is saved to the PolicyTech database rather than as a file on a hard drive.
- One extra thing you can do when using Word within PolicyTech is to insert fields that contain certain document properties, such as the title you added in the **Settings** step of the **Properties Wizard**, or the names of the approvers you selected in the **Reviewers** step. These fields are automatically updated whenever the property information changes.

## Adding Document Content

1. Do one of the following to edit a document in Word:
  - If you currently have the document open and have the **Properties Wizard, Overview, or Edit Questionnaire** tab selected, click the **Edit**

**Document** tab near the upper left corner or the **Edit Document** button at the bottom of the currently displayed **Properties Wizard** step.

 Approvers: Anne Jones, Douglas Johnson Approval Date: Not Set

PAGE 1 OF 3 GIVE FEEDBACK TO MICROSOFT 100%

- If you see a prompt like the one below (shown when the assigned template has no prewritten content), click the **Edit Document** button in the prompt.

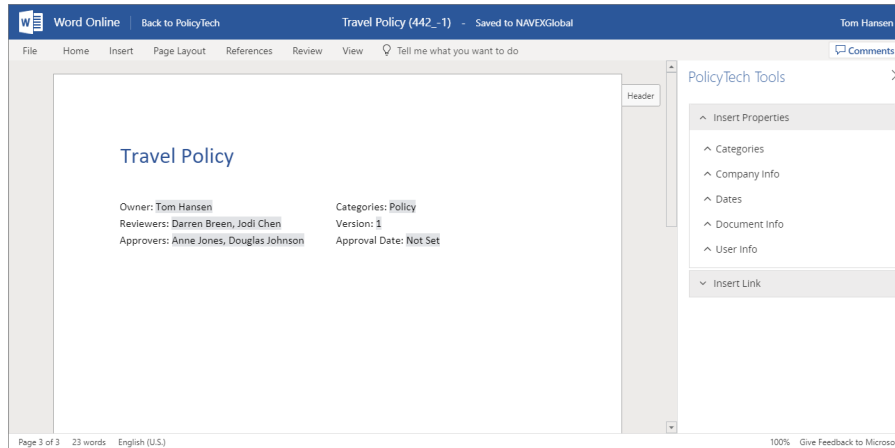

### 3. Do one of the following:

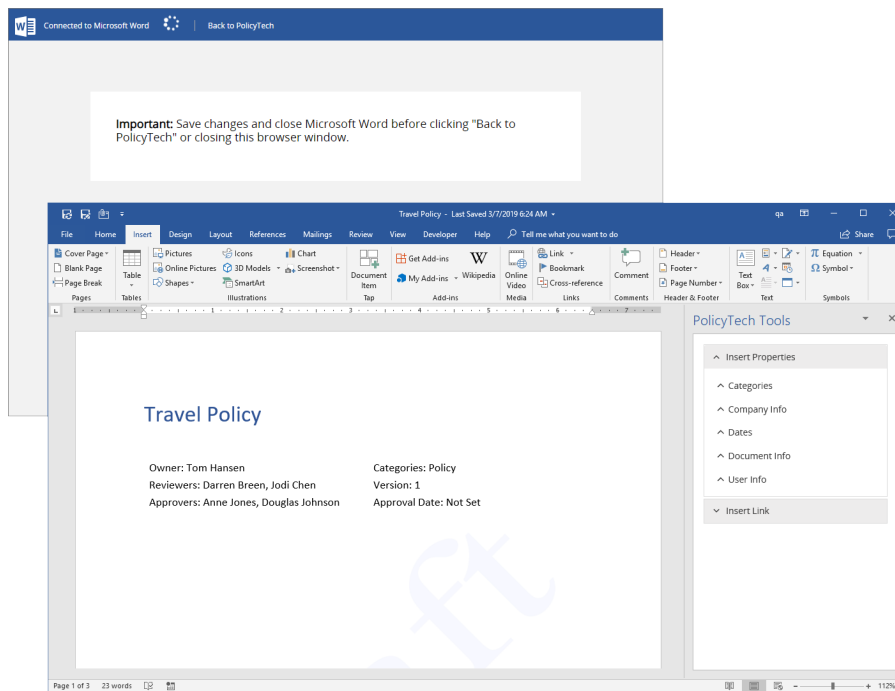

- Click **Go** for **Open with Microsoft Office Online** to edit the document using Word Online. (Select the **Set as Default** check box before clicking **Go** to skip this step next time.)

- Click **Go** for **Open in Office** to edit the document using desktop Word. (Select the **Set as Default** check box before clicking **Go** to skip this step next time.)

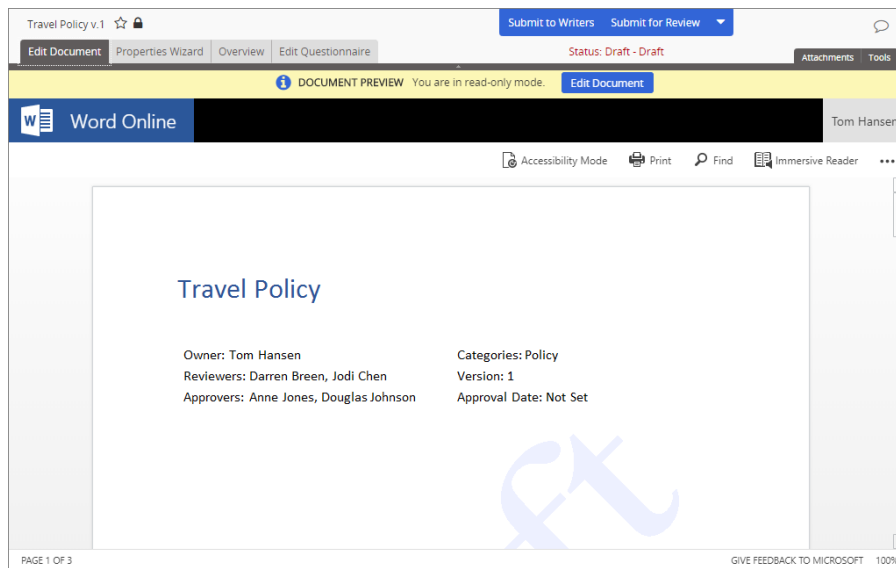

**Important:** To avoid breaking the link between desktop Word and the PolicyTech database, do not close the PolicyTech document window (with the **Back to PolicyTech** link in the header) while editing in desktop Word. Always save the document and close desktop Word before closing the PolicyTech document window.

**Notes:**

- The **Open in Office** option will not work if you don't have a desktop version of Word installed on your computer.

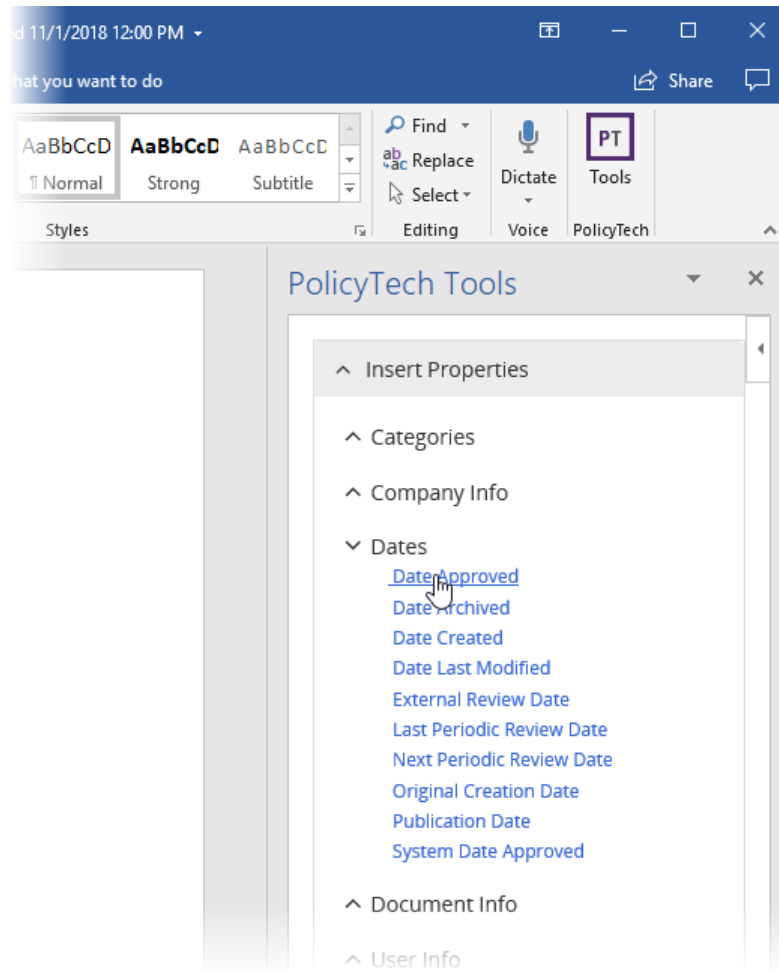

- Any changes you save in desktop Word are automatically saved back to the PolicyTech database.
  - The document may or may not already have content, depending on which template you selected.
- Click **Upload / Overwrite** and follow the prompts to upload an external PowerPoint file as the PolicyTech document. The uploaded document is displayed in preview mode.

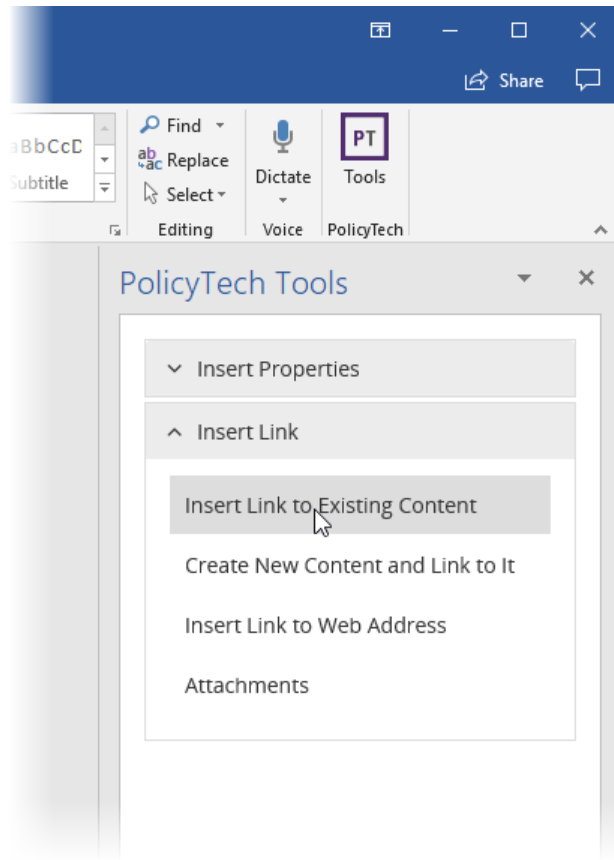

In the **DOCUMENT PREVIEW** header, click **Edit Document**, and then click **Go** for **Open with Microsoft Office Online** or **Open in Office**.

2. Do any of the following to add or edit document content:
  - Use Word features to write and format the content.
  - To insert an automatically updated document property at the current cursor position, select a property in the **Insert Properties** menu of the **PolicyTech Tools** panel (see [Inserting Document Properties](#) for detailed instructions).

**Note:** Depending on your organization's Office 365 settings and environment, the PolicyTech Tools add-in may not be available when editing in Word Online.

- To insert a link to another PolicyTech document or to a website, select an option in the **Insert Link** menu of the **PolicyTech Tools** panel (see [Inserting Links to Documents and Websites](#) for detailed instructions).

- Add supplementary materials to the document (see [Attaching Files and Adding Reference Links](#) and [Working with Discussions](#)).
- Finish assigning document properties (see [Assigning Document Properties](#)).
- Create a questionnaire for marking the document as read (see [Creating a Document Questionnaire](#)).
- Look at the document's overview (see [Working with the Overview](#)).
- Submit the document to assigned writers (see [Submitting a Document or Questionnaire to Writers \(for Collaboration\)](#)).
- Submit the document to assigned reviewers (see [Submitting a Document or Questionnaire for Review](#)).
- Submit the document to assigned approvers (see [Submitting a Document or Questionnaire for Approval](#)).
- Do one of the following:
  - If you're editing in Word Online, save the document and close the PolicyTech document window.

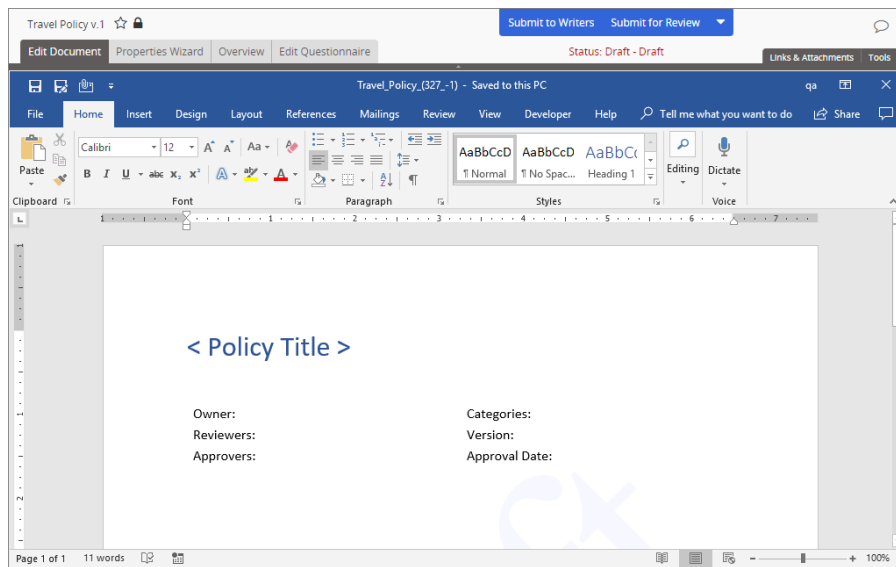

- If you're editing in desktop Word, save the document and close the Word application. Then, close the PolicyTech document window.

## Adding Content to a Word Document using WordModulePlus

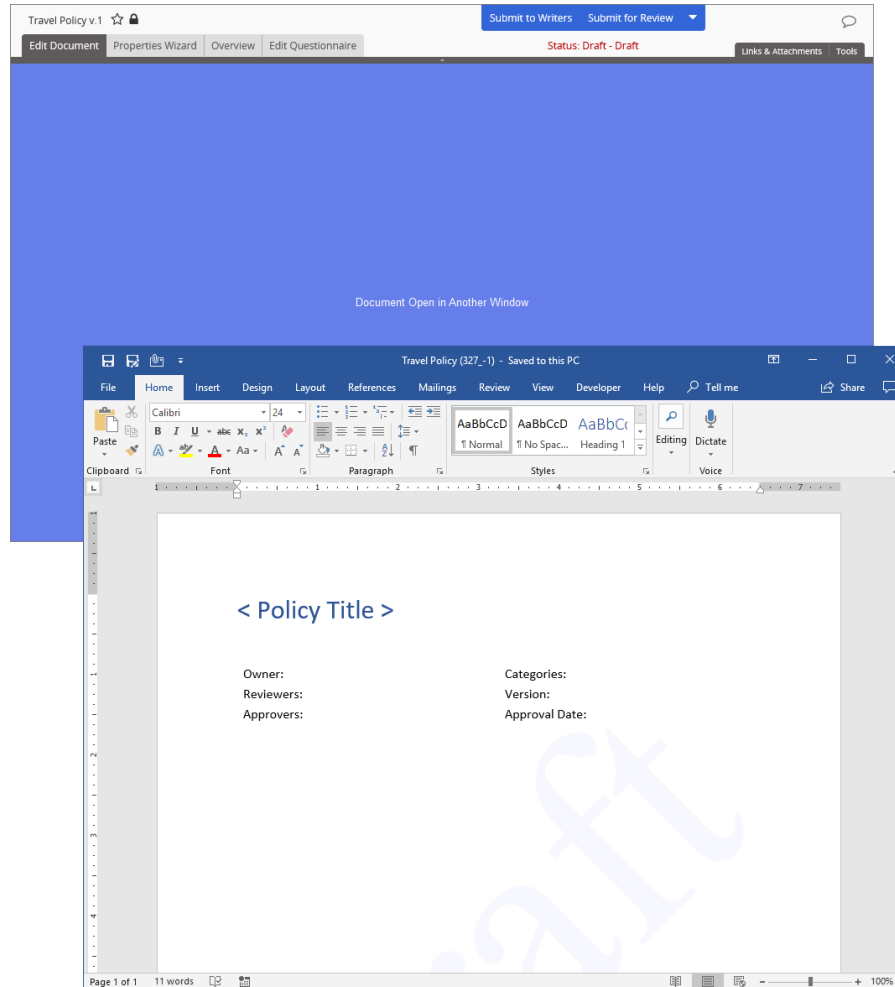

**Important:** Before you can write or otherwise add content to a Microsoft® Word document, you must complete at least the **Settings** step of the **Properties Wizard**. If you have not already done so, complete the instructions under [Adjusting Basic Document Settings](#).

### What You Should Know about Using Word inside of PolicyTech

Depending on which browser and version of desktop Word you're using, opening a Word document in PolicyTech may open the document directly inside the **Edit Document** tab of the PolicyTech document window.

Or, the document may open in a separate Word application window outside the PolicyTech document window.

Writing a Word document within PolicyTech is much the same as writing a document in the Word application outside of PolicyTech. For example, you will see any customizations you have made to the Quick Access Toolbar and Ribbon while using Word outside of PolicyTech. Some of the differences you might notice when using Word inside of PolicyTech include the following:

- When you click **Edit Document** or open a document from a document list, some processes run that enable the editing of the Word document within PolicyTech. You cannot work with the document until those processes are finished.
- Most, but not all, Word features are available.
- Up until the document is approved and published, PolicyTech automatically adds a watermark indicating its current location in the writing, review, and approval process. For example, when you start a document, it is placed in the Draft stage and includes a Draft watermark.

**Note:** While you can add a watermark of your own, that watermark will be overwritten.

- When you save the Word document, it is saved to the PolicyTech database rather than as a file on a hard drive. You might also notice that a process runs each time you save the document.
- If the document contains unsaved changes and you click one of the other tabs (**Properties Wizard**, **Overview**, or **Edit Questionnaire**), PolicyTech automatically saves the document.
- One extra thing you can do when using Word within PolicyTech is to insert fields that contain certain document properties, such as the title you added in the **Settings** step of the **Properties Wizard**, or the names of the approvers you selected in the **Reviewers** step. These fields are automatically updated whenever the property information changes.

## Adding Document Content

1. Do one of the following to open the Word editing window:

- If you currently have the document open and have the **Properties Wizard**, **Overview**, or **Edit Questionnaire** tab selected, click the **Edit Document** tab near the upper left corner or the **Edit Document** button at the bottom of the currently displayed **Properties Wizard** step.

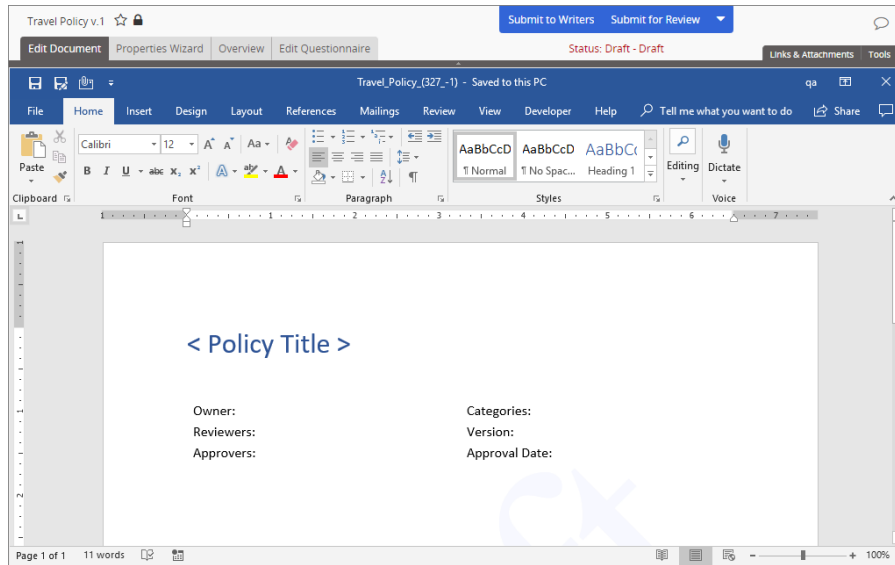

The screenshot shows the PolicyTech interface for editing a document titled "Travel Policy v.1". The "Edit Document" tab is selected in the top navigation bar. The main content area displays the "Properties Wizard" step, which includes fields for Title, Document Owner, Template, Version Number, Publication Date, and End Date. The "Edit Document" button at the bottom right is highlighted with a red box.

- If the document is currently closed, use **Search** or **Browse** to find it (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)), and then click the document title. The document opens with the **Edit Document** tab selected by default.

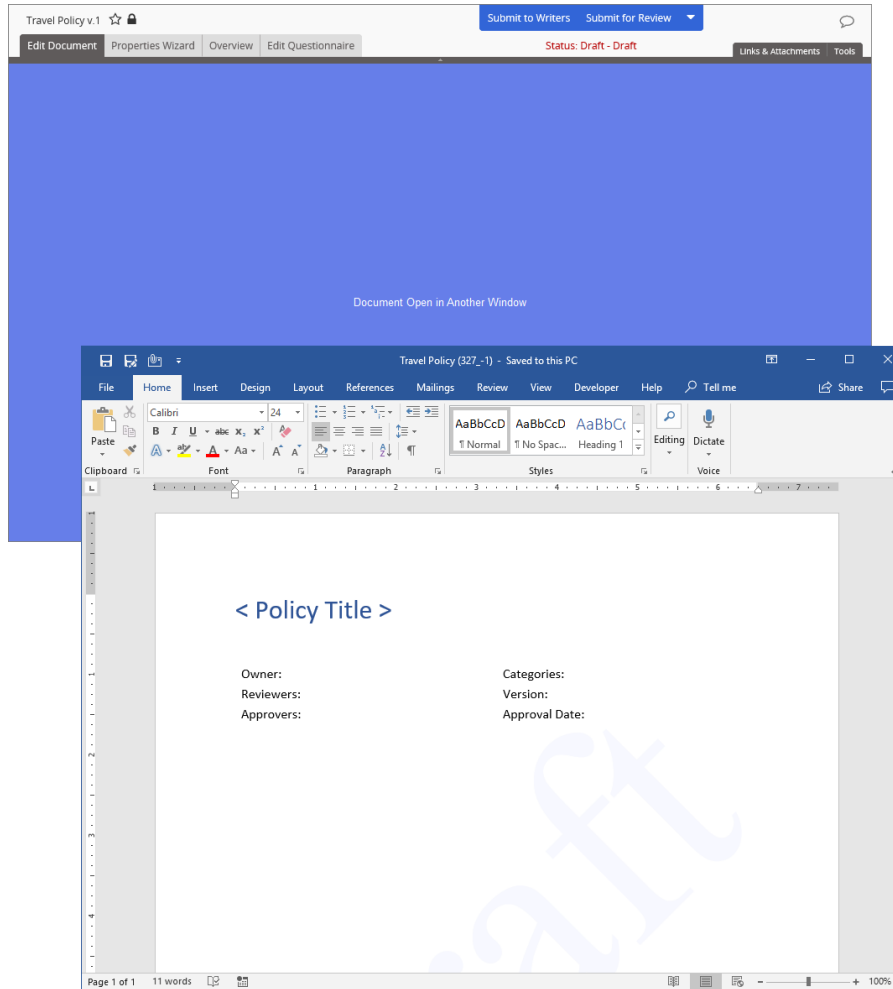

You should now see a window similar to the one below.

**Notes:**

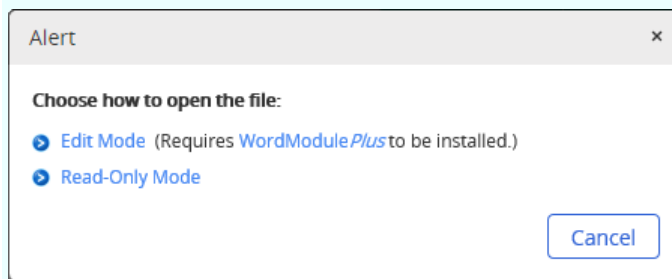

- The Word user interface may look different, depending on the version you have.
- The document may or may not already have content, depending on whether the template you selected has content.

**Important:** If you see a prompt like the one below instead of a window link one of those above, then *WordModulePlus* is set to be used but has not yet been installed on your computer. Follow the instructions in [Installing WordModulePlus](#), before continuing.

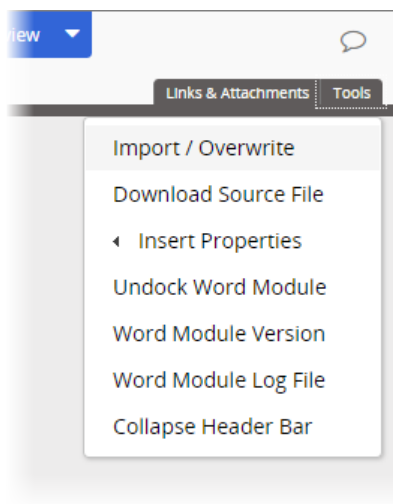

2. Do either of the following to add content to the document:
  - Use any available Word features to write and format the document.

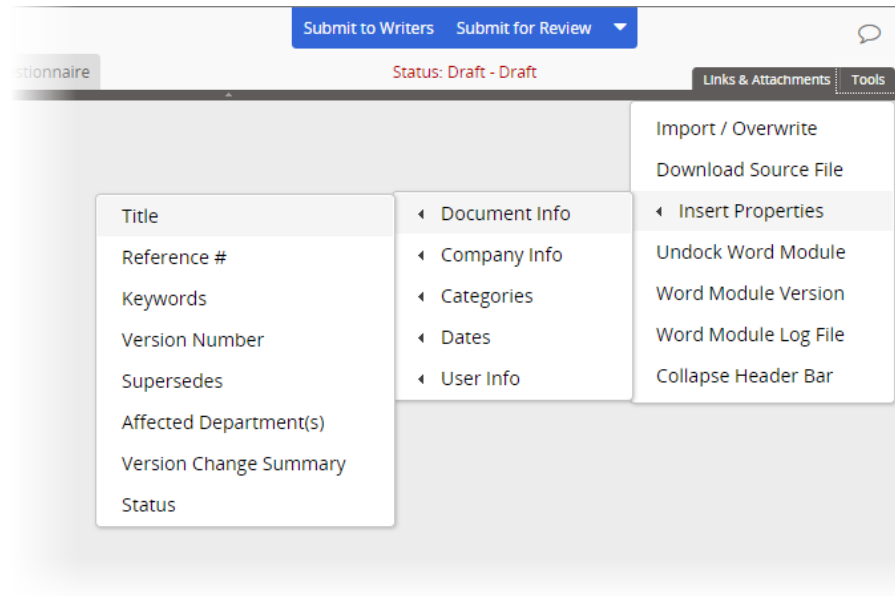

**Note:** If the document opened directly in the **Edit Document** tab and you would like to see more of the document within the window, click **Tools**, and then click **Collapse Header Bar**. When you are ready to use a feature in the header bar, click **Tools**, and then click **Expand Header Bar**.

- Click **Tools**, click **Import/Overwrite**, and then follow the prompts to import the content of an existing Word document from outside of PolicyTech.

**Important:** Importing content completely overwrites any existing content. Copy and paste information from another document if you need to preserve existing content.

3. (Optional) Place your cursor in the document where you want to insert a document property field. Click **Tools**, click **Insert Properties**, and then find and insert a document property (see [Inserting Document Properties](#) for detailed instructions).

4. When finished adding content, do any of the following:
  - Add supplementary materials to the document (see [Attaching Files and Adding Reference Links](#) and [Working with Discussions](#)).
  - Finish assigning document properties (see [Assigning Properties](#)).
  - Create a questionnaire for marking the document as read (see [Creating a Document Questionnaire](#)).
  - Look at the document overview (see [Working with the Overview](#)).
  - Submit the document to assigned writers (see [Submitting a Document or Stand-Alone Questionnaire to Writers \(for Collaboration\)](#)).
  - Submit the document to assigned reviewers (see [Submitting a Document or Stand-Alone Questionnaire for Review](#)).
  - Submit the document to assigned approvers (see [Submitting a Document or Stand-Alone Questionnaire for Approval](#)).
  - Do one of the following:
    - If the document is open in the **Edit Document** tab, save the document and close the PolicyTech document window.
    - If the document is open in a separate Word application window, save the document, and then close the PolicyTech document window, which closes both the PolicyTech document window and the Word application window (the Word application window cannot be closed first).

---

## Installing WordModulePlus

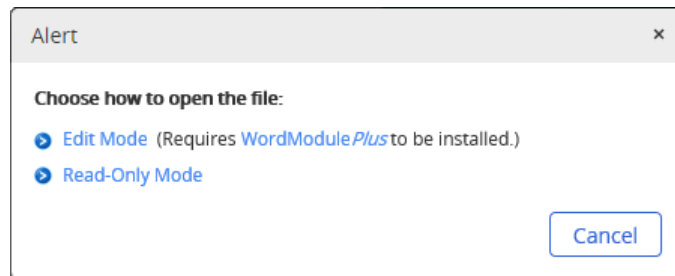

Use the following instructions if you're prompted to install WordModulePlus when opening a document. Go to the instructions for your browser.

[Internet Explorer](#)

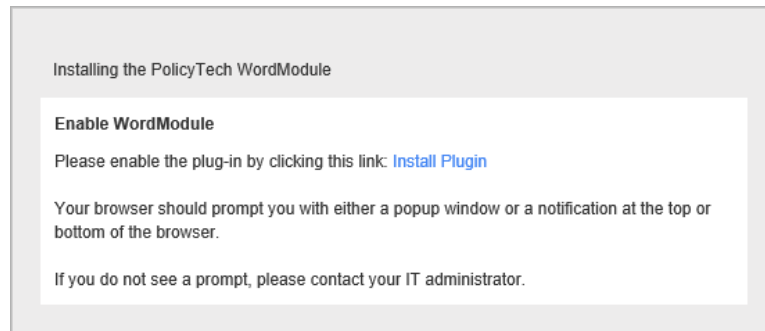

[Chrome](#)

### For Internet Explorer

1. Click **Edit Mode**.

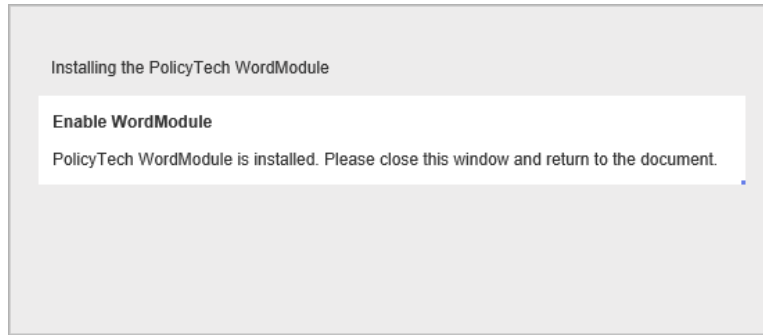

2. Click **Install Plugin**.

3. Click **Install** to confirm, and then click **Yes** when asked if you want to allow the installation program to make changes to your computer.

**Note:** If you're prompted for the user name and password of someone with administrator privileges, then you do not currently have permission to install software on your computer. Contact your PolicyTech or network administrator for help.

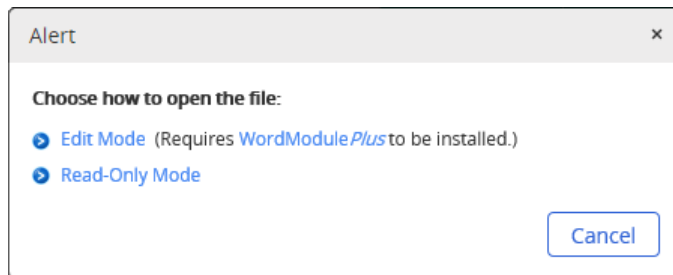

When installation is complete, a window like the one below is displayed.

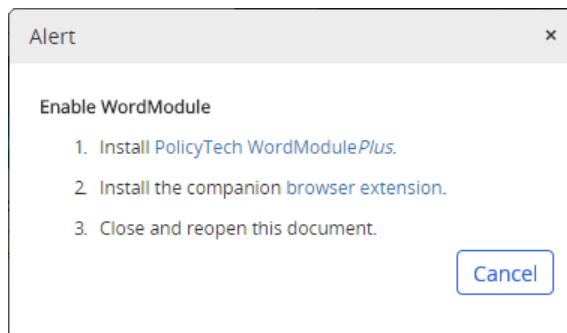

4. Close the message window to return to the document window, where the document contents should now be displayed.

## For Chrome

1. Click **Edit Mode**.

2. Click **PolicyTech WordModulePlus**.

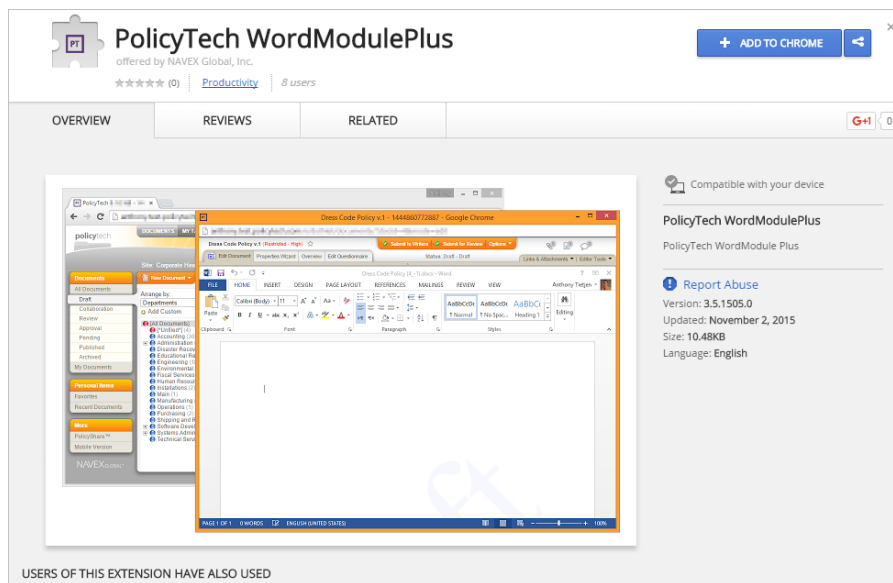

3. In the document window's footer you should see a file called **OfficeModule\_Installer\_Win32.msi** downloading. When the download is finished, click the file name, and then click **Yes** when asked if you want to allow the installation program to make changes to your computer.

**Note:** If you're prompted for the user name and password of someone with administrator privileges, then you do not currently have permission to install software on your computer. Contact your administrator or network administrator for help.

4. When the installation (which takes only a few seconds) is complete, back in the **Alert** prompt in the document window, click the **browser extension** link in step 2.
5. In a separate window, the Chrome Web Store opens with the PolicyTech WordModulePlus extension highlighted. Click **ADD TO CHROME**.

6. Close the Chrome Web Store window or tab, and then close the PolicyTech document window (the one with the **Alert** message displayed).
7. In the PolicyTech main window, find and reopen the document. Its contents should be immediately displayed.

### Inserting Document Properties

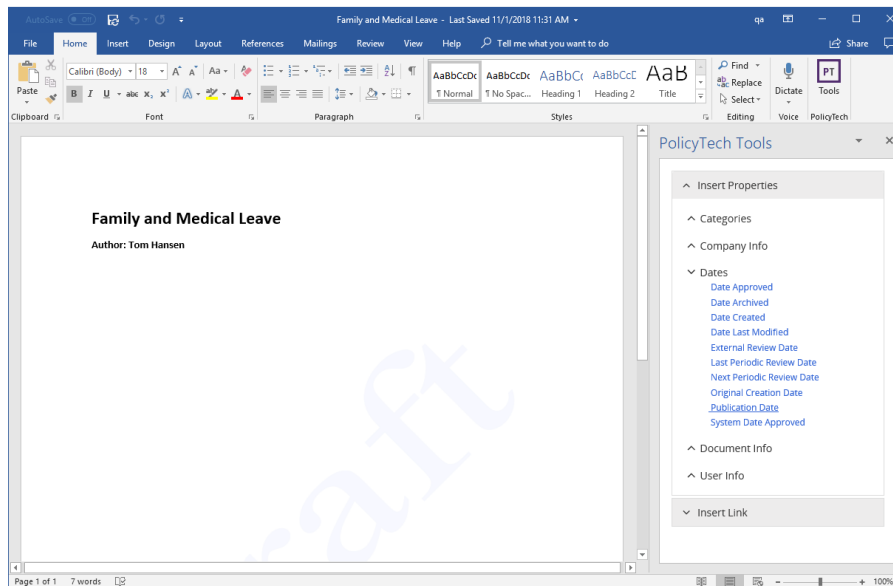

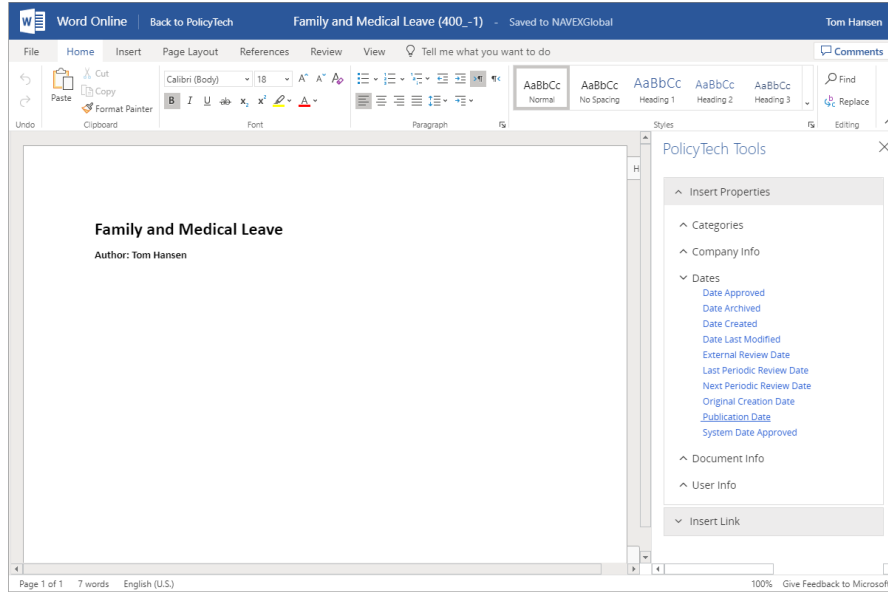

As you create a document and throughout its life cycle much information about the document is tracked and stored in the PolicyTech database. You can access this information and have it appear within the content of the Microsoft® Word or Excel® document itself by inserting what are called property fields. For example, you could insert property fields to show the name of the document owner, the date the document is approved, and names of the departments the document affects. The contents of these fields automatically change as events occur that affect those document properties.

The instructions below explain how to insert a property field into a document. For details on each document property, see [Appendix: Document Property Details](#).

*Inserting Into a Word Document*

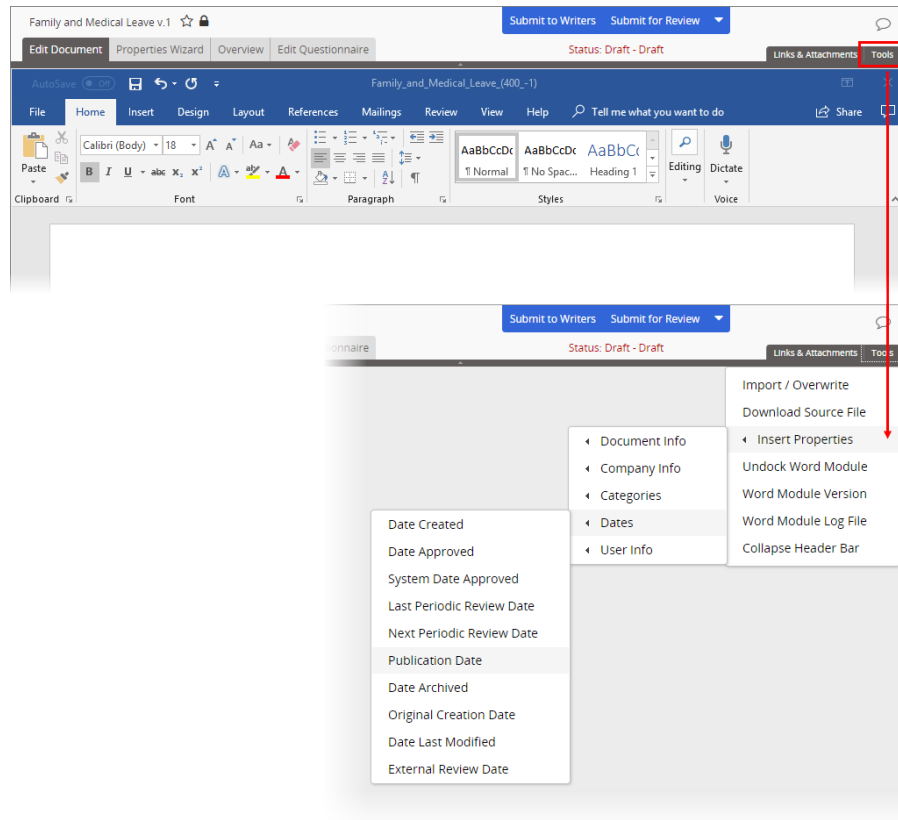

1. While editing a Word document, place your cursor where you want the property field inserted, and then do one of the following:
  - If your screen looks like one of those below, expand the **Insert Properties** menu in the **PolicyTech Tools** panel, expand a property type heading, and then click a property.

**Note:** Depending on your organization's Office 365 settings and environment, the PolicyTech Tools add-in may not be available when editing in Word Online.

- If your screen looks like the one below, click **Tools**, click **Insert Properties**, and then navigate to and click the information you want to insert.

Some fields that are inserted will immediately display the correct value, such as the document title, the document owner's name, or the current date. Other fields display the correct information only after certain events have occurred. For example, if you insert the **Publication Date** field, you will see **Not Approved Yet** as the field text until the document is approved, at which time the approval date will appear. Also keep in mind that some of a document's properties, such as its title or assigned approvers, are editable. If a property is changed in the **Properties Wizard** or in **System Settings**, that change will automatically be reflected in the corresponding inserted property field.

### ***Inserting Into an Excel Document***

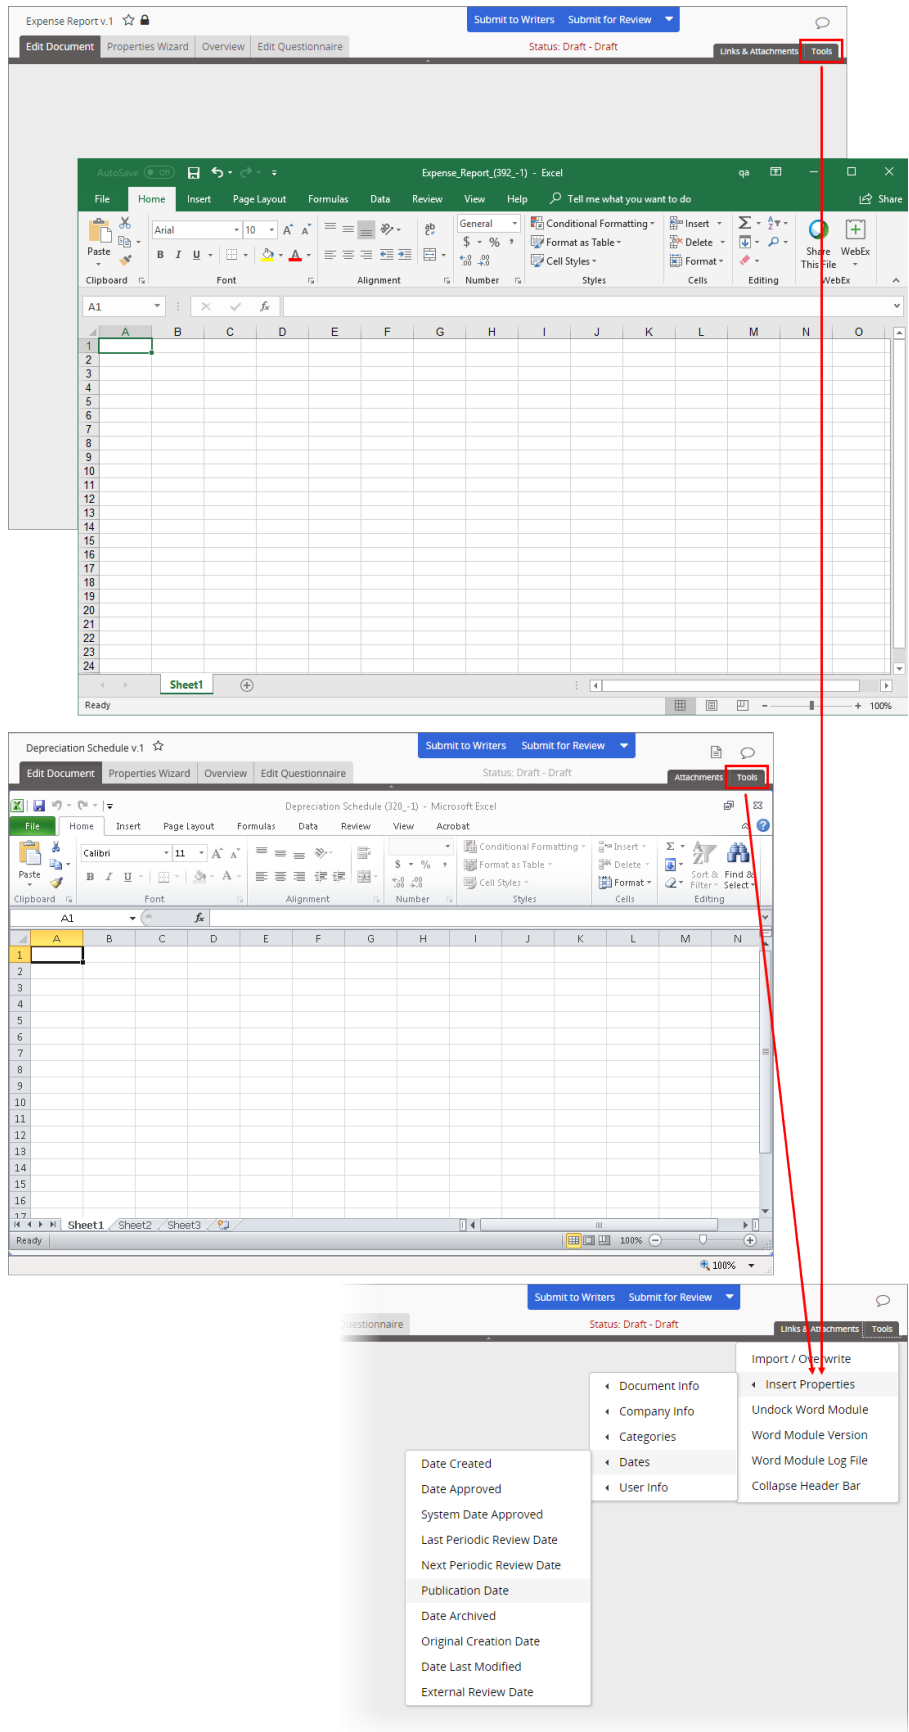

1. While editing an Excel document, select the empty cell where you want the property field inserted, click **Tools**, click **Insert Properties**, and then navigate to and click the information you want to insert.

#### **Important:**

- A property field cannot be inserted into a spreadsheet cell that already contains information or that is being edited. Make sure that the cell you select is empty and that you are not in edit mode (that the cursor is not active in the **Formula Bar** or inside the cell).
- If your screen does not look similar to one of those shown below, with the **Tools** feature available, then the Excel integration your organization is

using does not support inserting document properties into an Excel document.

## 208 - Adding Content to a Word Document

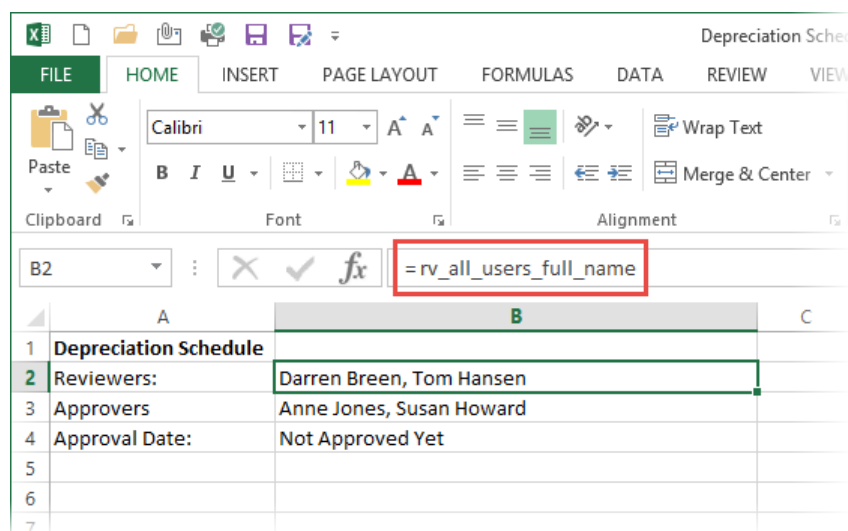

2. If you see the prompt, **Warning: Using this feature with Excel will erase your undo history**, do one of the following:
  - Click **OK** to erase the undo history and continue to insert the field.
  - Click **Cancel** to go back to editing the document without inserting the field.

**Important:** You will see the warning only once during an editing session, but inserting a field always erases the undo history. To avoid erasing information from the undo history that you might need later, we suggest you insert fields either as the first or last step of creating an Excel document.

Some fields that are inserted will immediately display the correct value, such as the document title, the document owner's name, or the current date. Other fields display the correct information only after certain events have occurred. For example, if you insert the **Publication Date** field, you will see **Not Approved Yet** as the field text until the document is approved, at which time the approval date will appear. Also keep in mind that some of a document's properties, such as its title or assigned approvers, are editable. If a property is changed in the **Properties Wizard** or in **System Settings**, that change will automatically be reflected in the corresponding inserted property field.

When you insert a field into a Microsoft Excel document, it looks like normal text, but it is not. You can identify a document property field in Excel by clicking on a cell and then looking in the Formula Bar, or by double-clicking a cell to activate edit mode. A property field contains the following formula: `=[field_name]`, where `[field_name]` is the name PolicyTech has assigned to this document property (`rv_all_users_full_name` in the example below). Because an inserted property field contains a formula, you cannot edit the property field text in an Excel document.

## Inserting Links to Documents and Websites

See the following sections for instructions on inserting links in a Word or Excel document:

[Inserting a Link to an Existing Document](#)

[Inserting a Link to a New \(Not Yet Created\) Document](#)

[Inserting a Link to a Web Address](#)

### Inserting a Link to an Existing Document

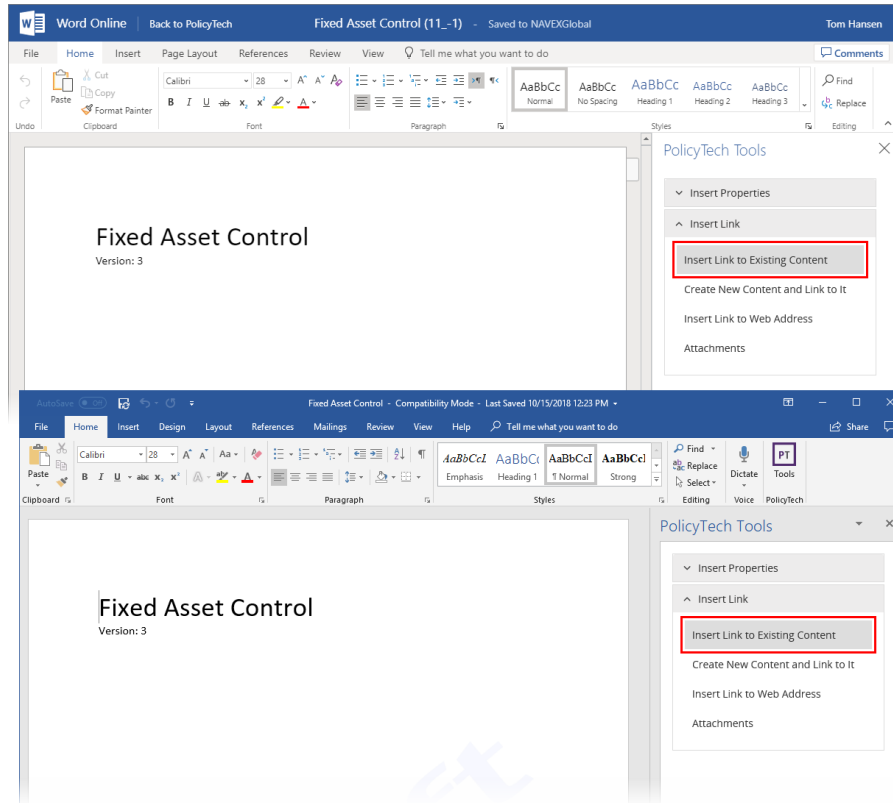

You can insert links to existing PolicyTech documents from within a Word or Excel document.

#### Notes:

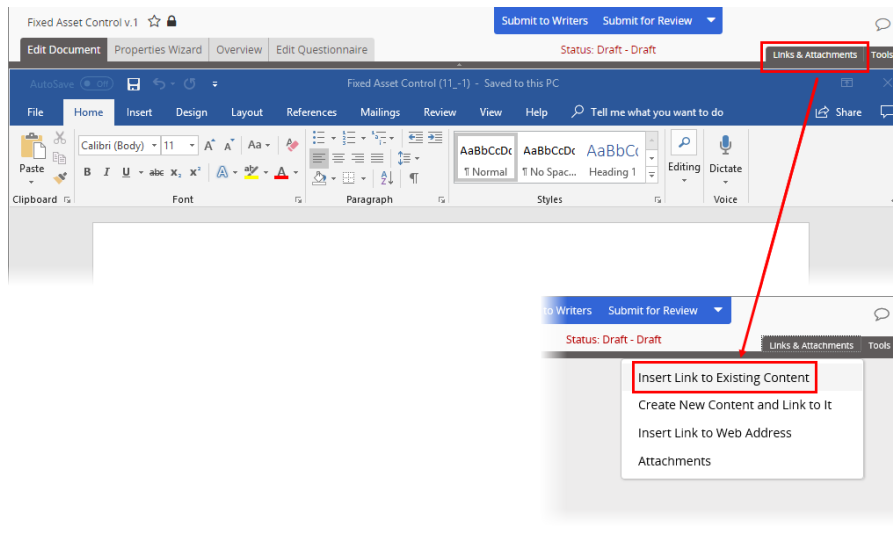

- You can remove a PolicyTech link from a document just as you would remove a hyperlink you inserted using the **Insert Hyperlink** feature in Word or Excel (see [Removing a Property Field or Link](#)).
- Inserted document links do not appear in the **Attachments** window (see [Attaching Files and Adding Reference Links](#)).
- You cannot insert links to questionnaires or campaigns.

#### *From within a Word Document*

1. Place the cursor where you want the link inserted.
2. Do one of the following:
  - If your screen looks like one of those below, expand the **Insert Link** menu in the **PolicyTech Tools** panel, and then click **Insert Link to Existing Content**.

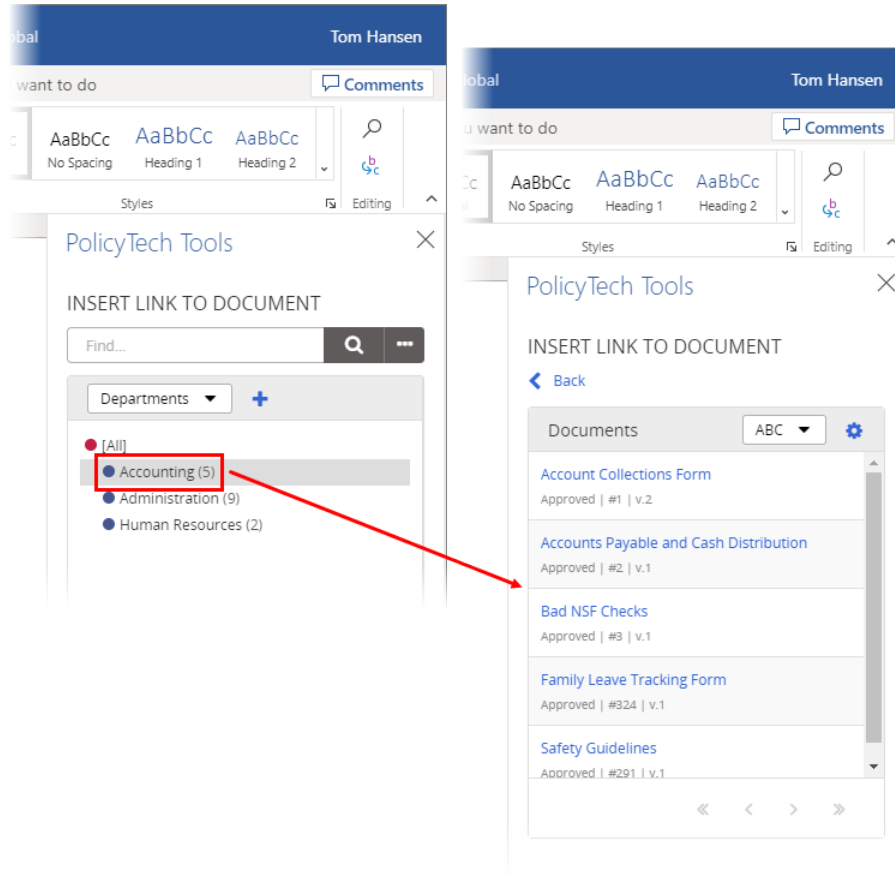

- If your screen looks like the one below, click **Links & Attachments**, and then click **Insert Link to Existing Content**.

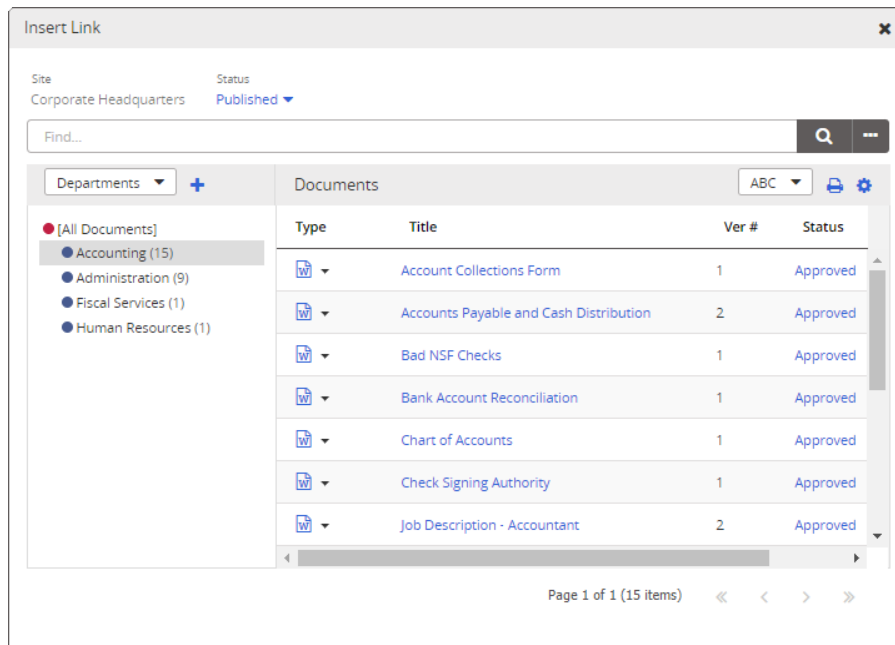

Find the document you want to link to (see [Browsing for a Content Item](#) for detailed instructions), and then click the document title.

*Document selector in the PolicyTech Tools panel*

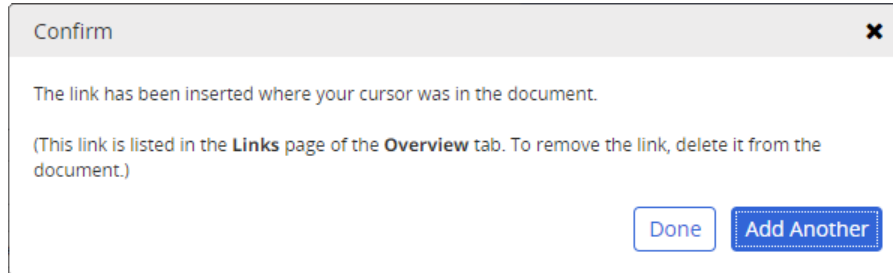

**Pop-up document selector**

2. In the **Confirm** window, do one of the following:

- Click **Done**.
- Click **Add Another** to insert another link at the current cursor location, and then click **Done** when you are finished adding links.

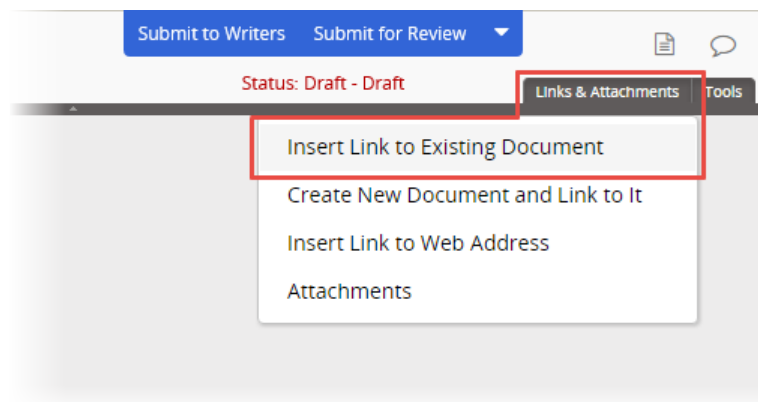

### ***From within an Excel Document***

1. Click the cell where you want the link inserted.

#### **Important:**

- A link cannot be inserted into a spreadsheet cell that already contains information or that is being edited. Make sure that the cell you select is empty and that you are not in edit mode (that the cursor is not active in the **Formula Bar** or inside the cell).
- If your screen does not look similar to one of those shown below, with the **Links & Attachments** feature available, then the Excel integration your organization is using does not support inserting PolicyTech document links into an Excel document.

2. In the **Edit Document** window, click **Links & Attachments**, and then click **Insert Link to Existing Document**.

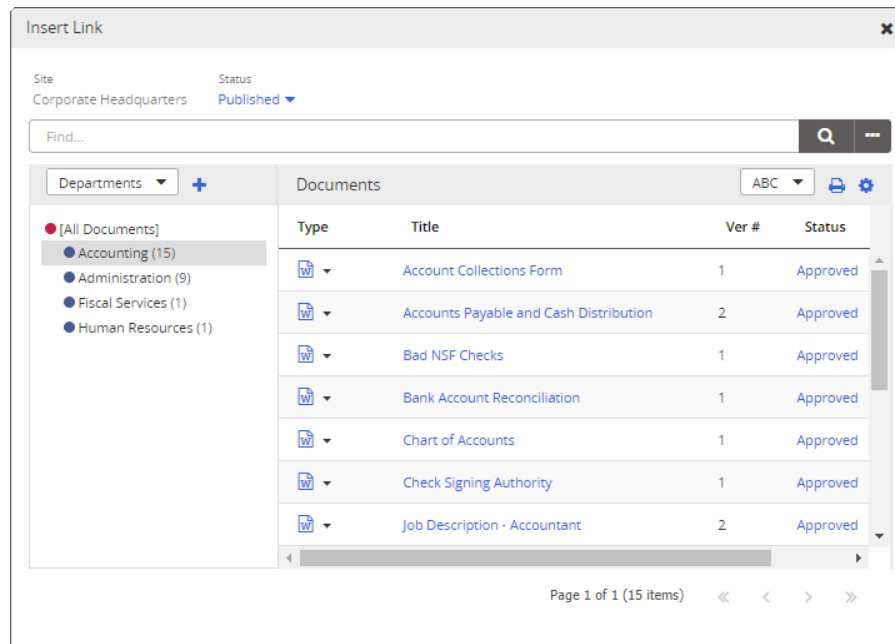

3. If you see the prompt, **Using this feature with Excel will erase your undo history**, do one of the following:

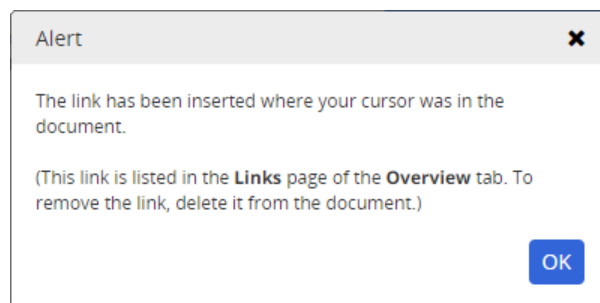

- Click **OK** to erase the undo history, and then move on to step 4.
- Click **Cancel**, and then insert the link at a later time.

**Important:** You will see the warning only once during an editing session, but inserting a link always erases the undo history. To avoid erasing information from the undo history that you might need later, we suggest you insert links either as the first or last step of creating an Excel document.

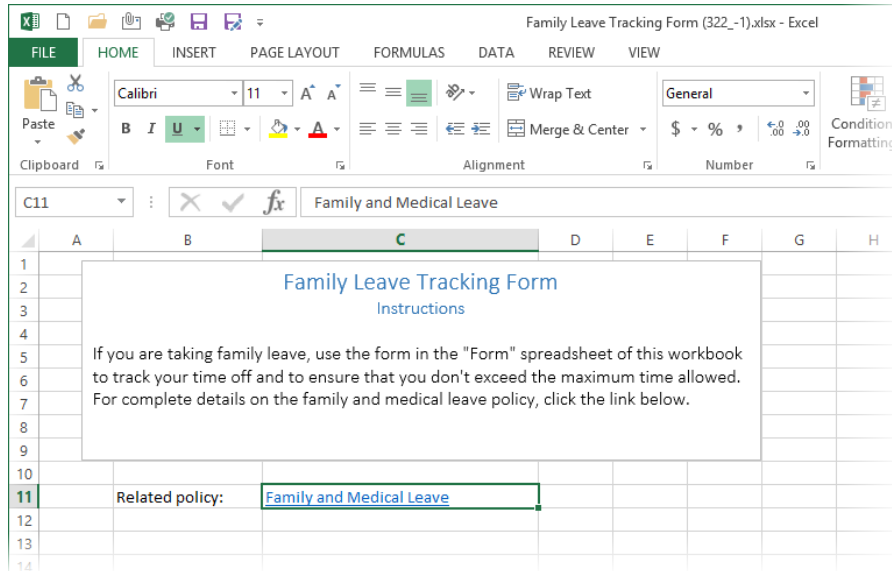

4. In the **Choose a Document** window, find the document you want to link to see [Searching for a Document or Questionnaire](#) or [Browsing for a Document or Questionnaire](#)), and then click the document title.

5. Click **OK** to clear the alert.

The link is inserted into the document.

### Inserting a Link to a New (Not Yet Created) Document

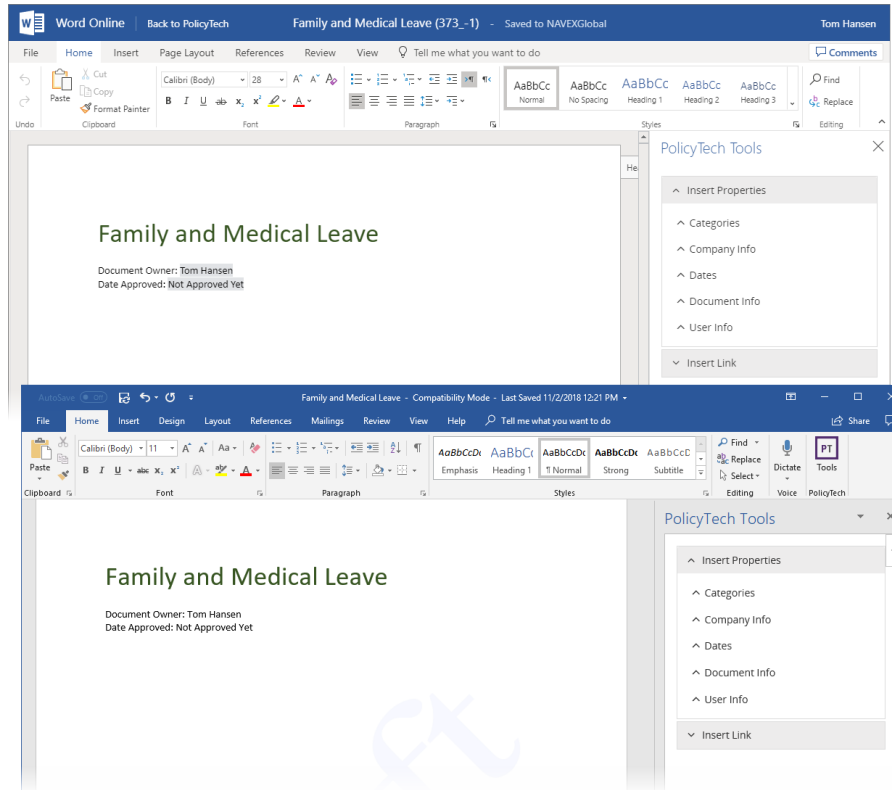

From within a Word or Excel document, you can both create a new draft document and link to it at the same time.

#### Notes:

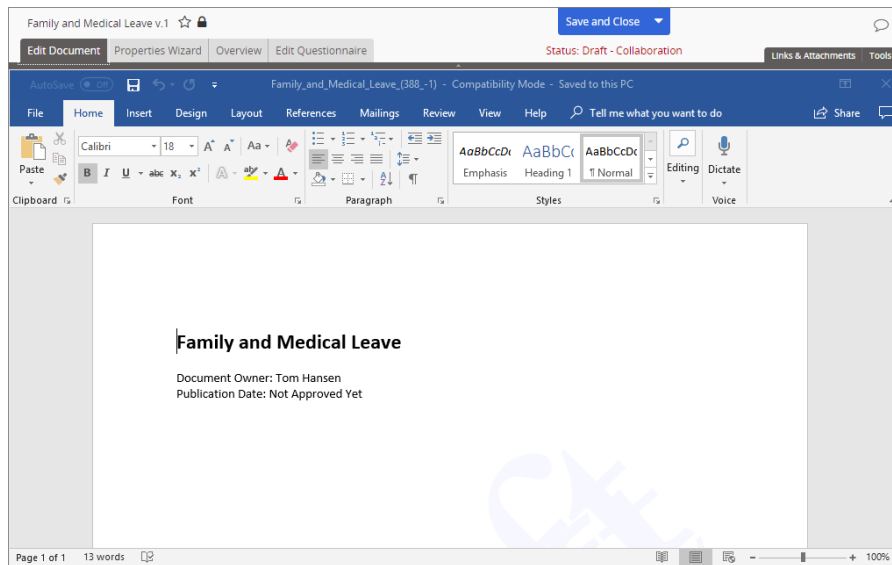

- You can remove a PolicyTech link from a document just as you would remove a hyperlink you inserted using the **Insert Hyperlink** feature in Word or Excel (see [Removing a Property Field or Link](#)).
- You cannot insert links to questionnaires or campaigns.

#### *From within a Word Document*

If your screen looks like one of the following when you edit a Word document, continue with [Using Office Online Module](#) below.

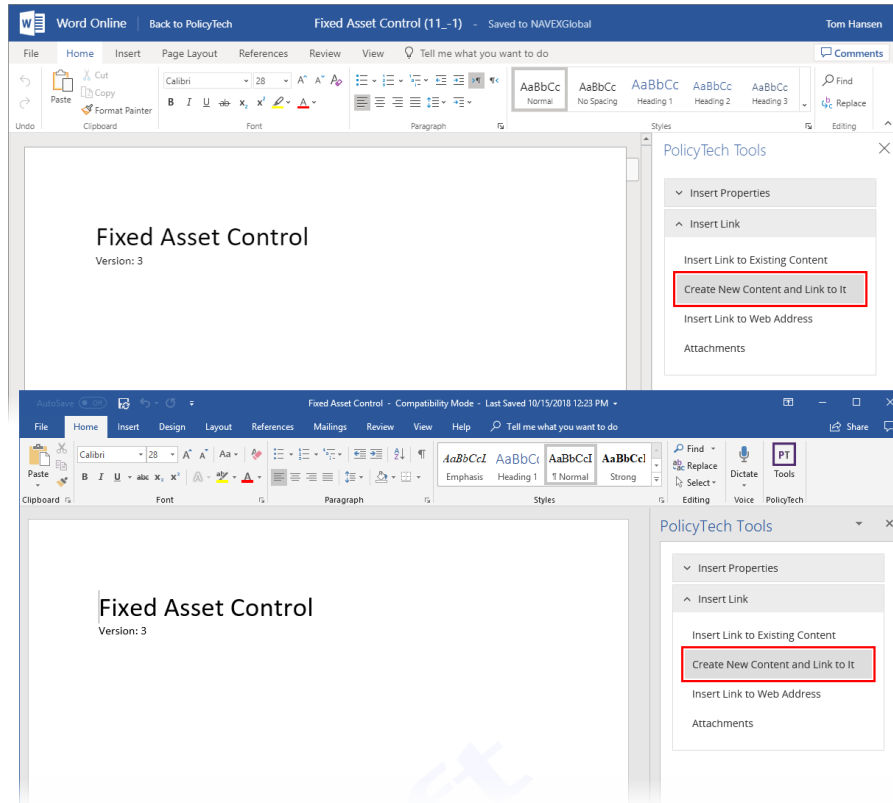

If your screen looks like the following when you edit a Word document, continue with [Using WordModulePlus](#) below.

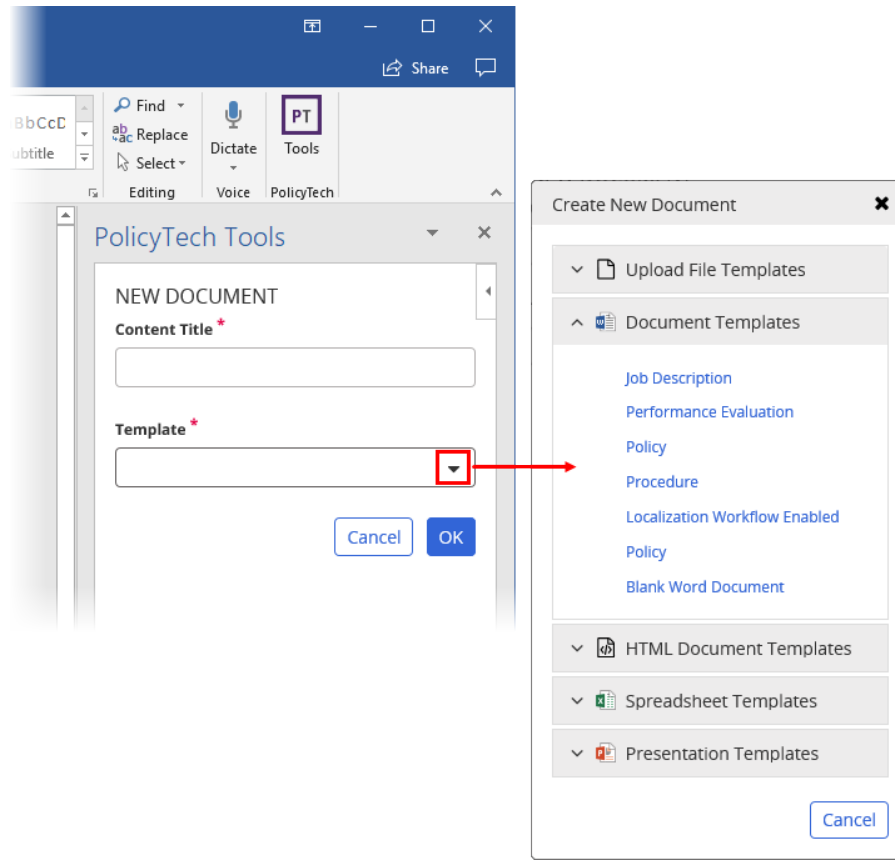

### Using Office Online Module

1. Place the cursor where you want the link inserted.
2. In the **PolicyTech Tools** panel, expand the **Insert Link** menu and then click **Create New Document and Link to It**.

3. Type a title, select a template, and then click **OK**.

4. Do one of the following:

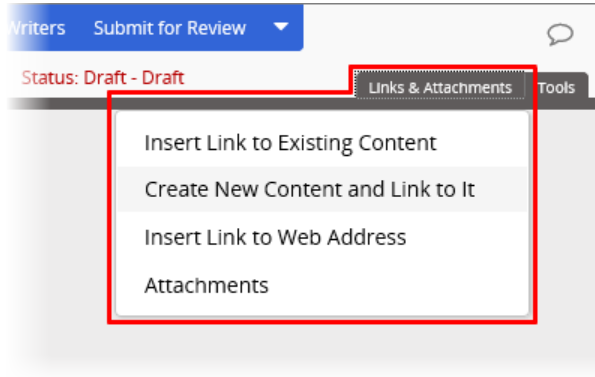

- Click **Done**.
- Click **Add Another** to create another new document and insert another link at the current cursor location, repeat step 3, and then click **Done** when you are finished adding links.

**Note:** Use **Browse** or **Search** to find the newly created document (see [Browsing for a Content Item](#) or [Searching for a Content Item](#)).

### Using WordModulePlus

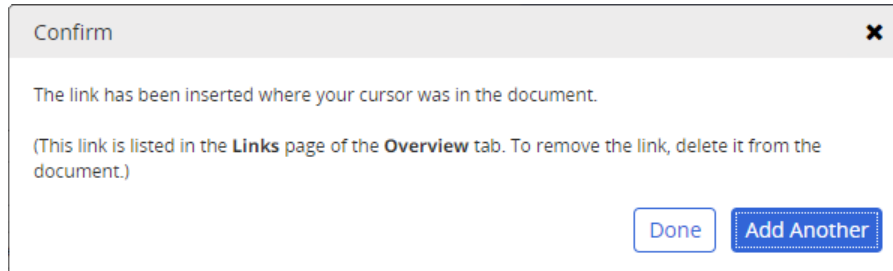

1. Place the cursor where you want the link inserted.
2. Click **Links & Attachments**, and then click **Create New Content and Link to It**.

3. A new document opens with the **Settings** step of the **Properties Wizard** displayed. Type a title, select a template, and then click **Save**.

4. The link to the new document is inserted into the original document. To return to the original document and finish the new document later, do one of the following:
  - Minimize the new document window.
  - Click  next to the **Submit for Review** button, and then click **Save and Close**.
5. You should now see the **Confirm** prompt in the original PolicyTech document window. Do one of the following:

- Click **Done**.
- Click **Add Another** to create another new document and insert another link at the current cursor location, repeat steps 2 through 4, and then click **Done** when you are finished adding links.

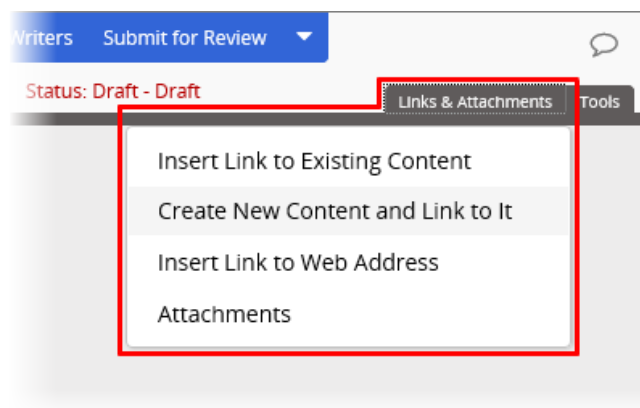

### ***From within an Excel Document***

1. Click the cell where you want the link inserted.

#### **Important:**

- A link cannot be inserted into a spreadsheet cell that already contains information or that is being edited. Make sure that the cell you select is empty and that you are not in edit mode (that the cursor is not active in the **Formula Bar** or inside the cell).
- If your screen does not look similar to one of those shown below, with the **Links & Attachments** feature available, then the Excel integration your organization is using does not support inserting PolicyTech document links into an Excel document.

2. Click **Links & Attachments**, and then click **Create New Content and Link to It**.

3. If you see the prompt, **Warning: Using this feature with Excel will erase your undo history**, do one of the following:

- Click **OK** to erase the undo history, and then move on to step 4.
- Click **Cancel**, and then insert the link at a later time.

**Important:** You will see the warning only once during an editing session, but inserting a link always erases the undo history. To avoid erasing information from the undo history that you might need later, we suggest you insert links either as the first or last step of creating an Excel document.

4. A new document opens with the **Settings** step of the **Properties Wizard** displayed. Type a title, select a template, and then click **Save**.

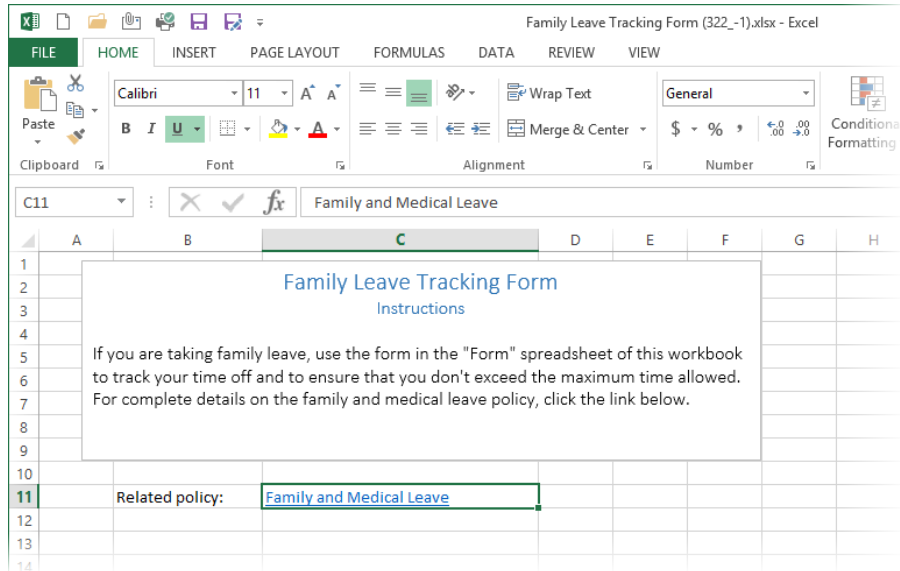

The screenshot shows the 'Properties Wizard' dialog box in a software application. The 'Settings' step is selected in the left-hand sidebar. The main area contains several input fields: 'Title' (empty), 'Document Owner' (set to 'Hansen, Tom (Accounting Manager)'), 'Template' (set to '-- Choose a template --'), 'Version Number' (set to '1'), 'Publication Date' (empty), and 'End Date (Optional)' (empty). There are also 'Advanced Settings', 'Owner Instructions', and 'Preview' links. At the bottom, there are 'Save', 'Edit Document', and 'Next Step' buttons.

5. The link to the new document is inserted into the original document. To return to the original document and finish the new document later, do one of the following:
  - Minimize the new document window.
  - Click  next to the **Submit for Review** button, and then click **Save and Close**.
6. Click **OK** to clear the alert.

The screenshot shows a 'Confirm' dialog box with a close button (X) in the top right corner. The text inside reads: 'The link has been inserted where your cursor was in the document. (This link is listed in the Links page of the Overview tab. To remove the link, delete it from the document.)' At the bottom, there are two buttons: 'Done' and 'Add Another'.

The link is inserted into the document.

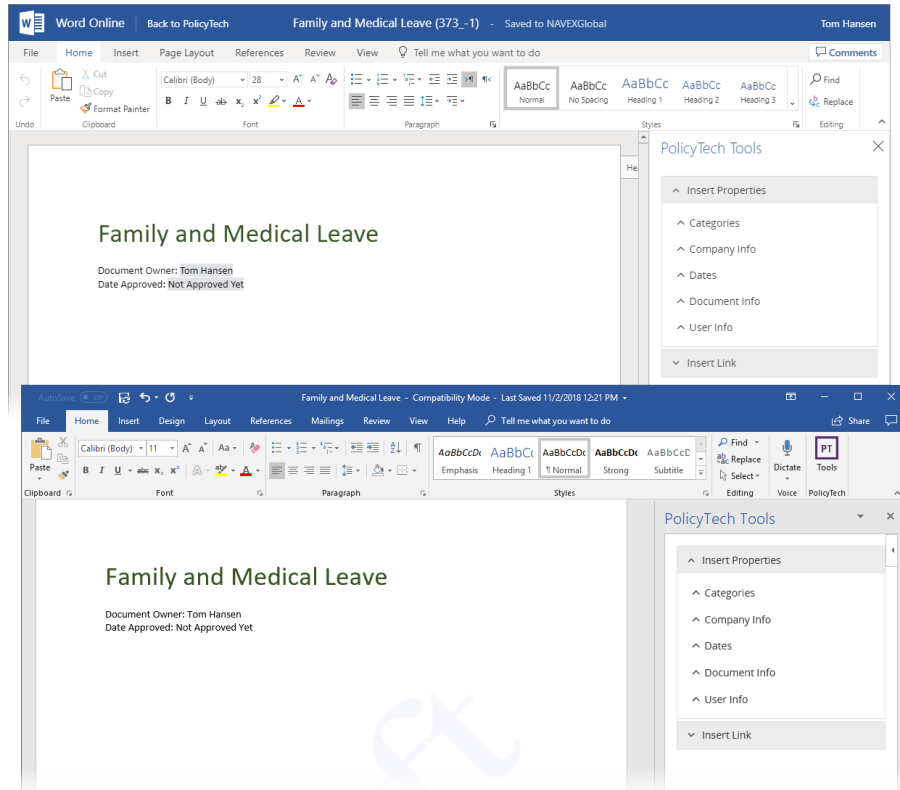

### Inserting a Link to a Web Address

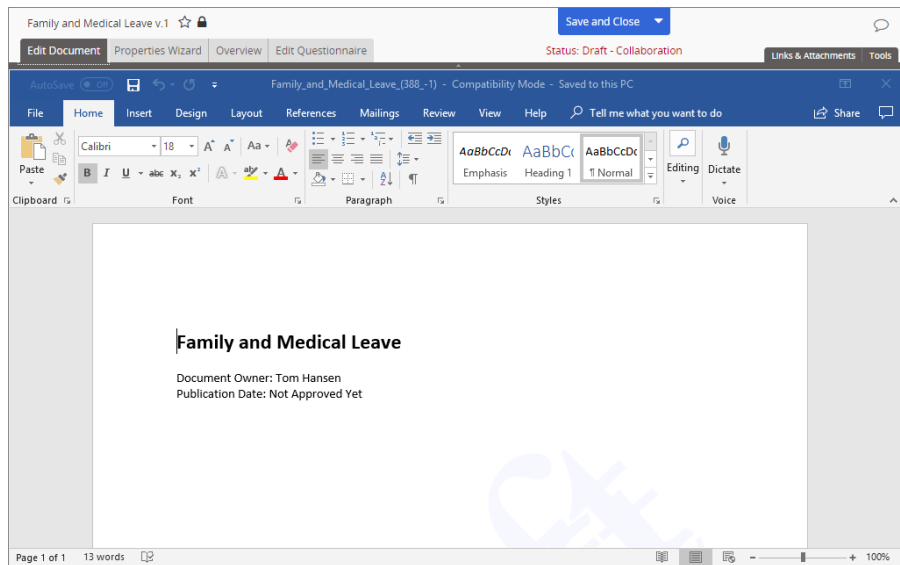

You can insert links to web addresses from within a Word or Excel document.

**Note:** You can remove a PolicyTech link from a document just as you would remove a hyperlink you inserted using the **Insert Hyperlink** feature in Word or Excel (see [Removing a Property Field or sLink](#)).

If your screen looks like one of the following when you edit a Word document, continue with [Using Office Online Module](#) below.

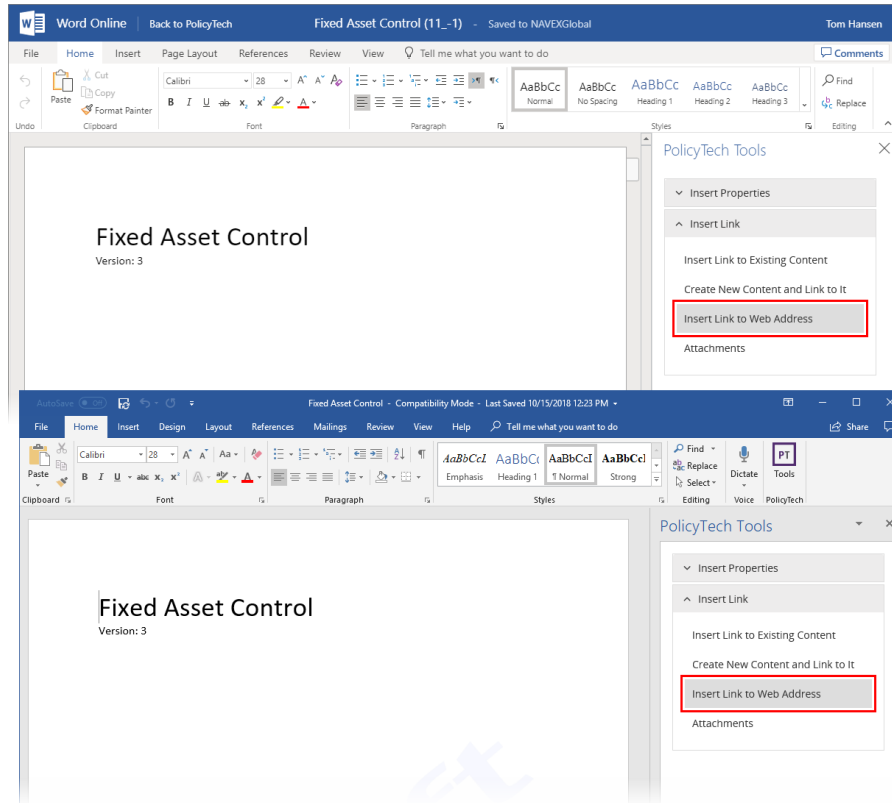

If your screen looks like the following when you edit a Word document, continue with [Using WordModulePlus](#) below.

### Using Office Online Module

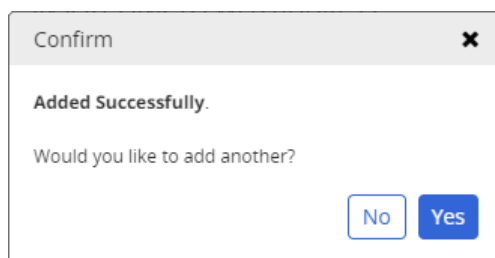

1. Place the cursor where you want the link inserted.
2. In the **PolicyTech Tools** panel, expand the **Insert Link** menu and then click **Insert Link to Web Address**.

3. Type or copy and paste the web address, type the text you want displayed as the link in the document, and then click **Add**.

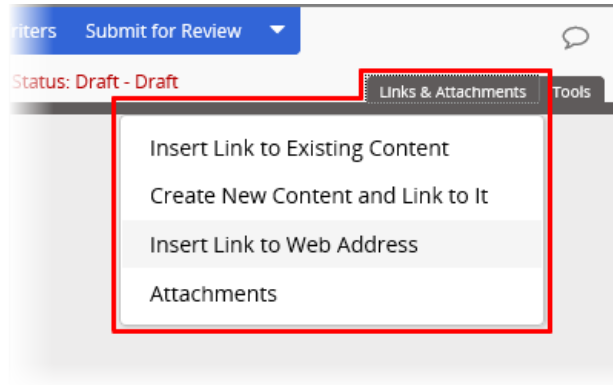

4. Do one of the following at the **Would you like to add another?** prompt:
- Click **No**.
  - Click **Yes** to create another web address link at the current cursor location, repeat step 3, and then click **No** when you are finished adding links.

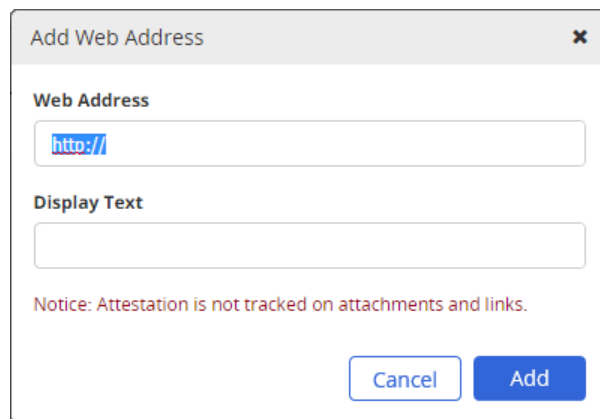

### Using WordModulePlus

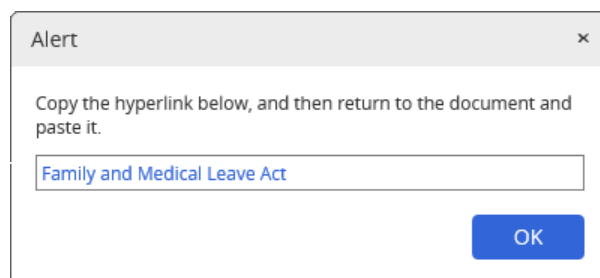

1. Place the cursor where you want the link inserted.
2. Click **Links & Attachments**, and then click **Insert Link to Web Address**.

3. Type or copy and paste the web address, type the text you want displayed as the link in the document, and then click **Add**.

4. In the **Alert** window, select and copy the new link, and then click **OK**.

5. Paste the link in the document.

### Removing a Property Field or Link

To remove a document or web address link and leave the text, right-click anywhere within the link, and then click **Remove Link**.

To entirely remove the property field or link—remove both the link and the link text—do one of the following:

- Select the entire link, and then press Delete or Backspace.
- Place the cursor immediately before the first letter in the link text, press Delete to select the entire field, and then press Delete again to delete the field.
- Place the cursor immediately after the last letter in the link text, press Backspace to select the entire field, and then press Backspace again to delete the field.

**Note:** If you place the cursor anywhere inside the field or link instead of before or after it, pressing Delete or Backspace will delete a character in the field or link text instead of selecting it.

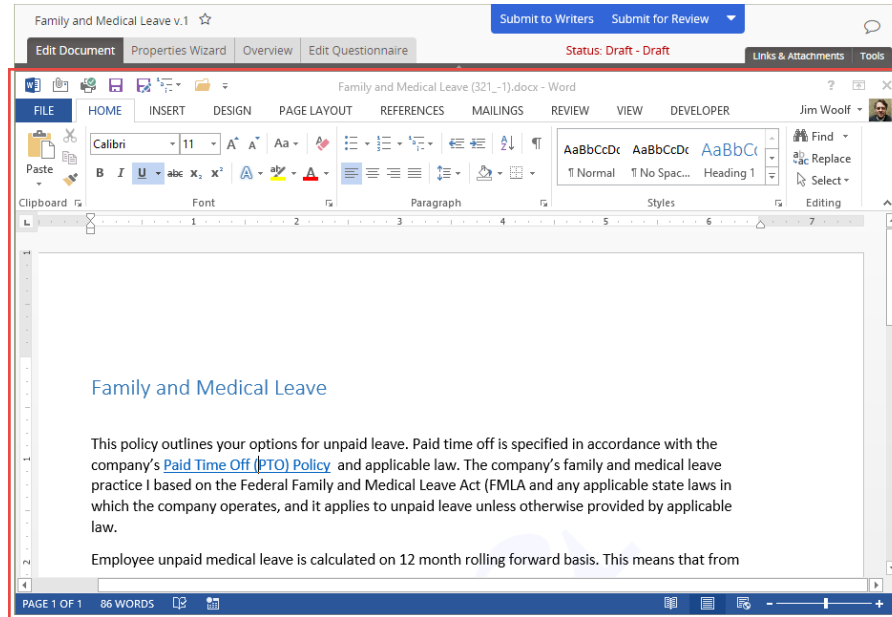

### Working with Word or Excel Undocked

**Note:** Depending on how Word and Excel are integrated with PolicyTech, this feature may not be available.

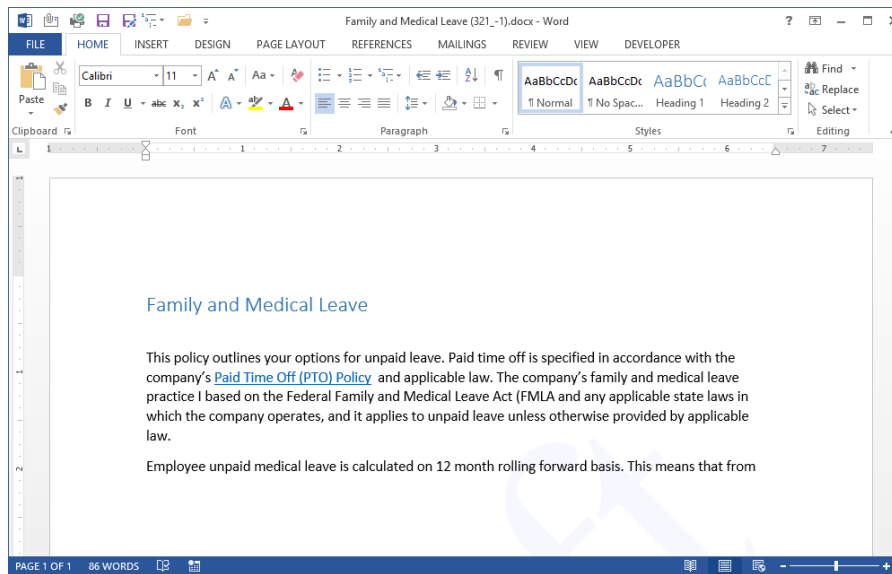

While you can edit Microsoft® Word and Excel® documents within PolicyTech, you can also work on these documents in the normal Word or Excel application window rather than in the embedded (docked) application in a PolicyTech document window in your browser. With Word or Excel undocked, you can still use PolicyTech features, such as inserting document property fields or links to other PolicyTech documents. Also, anytime you save the document in the undocked program, a copy of it is saved in the PolicyTech database. So, working with Word or Excel docked or undocked is simply a matter of preference, and you can switch between the two modes anytime.

**Important:** Excel 2013 and later only works in undocked mode (automatically opens in undocked mode and the **Dock Word Module** option is not available). When using an Internet Explorer® browser, Word 2016 or later only works in undocked mode. Any version of PowerPoint® only works in undocked mode.

*Word docked in a PolicyTech browser window*

### **Word undocked, but with the document still controlled by PolicyTech**

### **Undocking Word or Excel**

1. With the document open and the **Edit Document** tab selected, click **Tools**, and then click **Undock Word Module**.

The document opens in a separate Word program window, and the following message is displayed in the PolicyTech **Edit Document** window.

2. Work on the document in the undocked Word window as you normally would.
3. (Optional) Switch back to the **Edit Document** tab in the PolicyTech document window to insert a link or document property field into the undocked document (follow the instructions under [Inserting Links to Documents and Websites](#) or [Inserting Document Properties](#)).
4. When finished working on the document, you cannot close the undocked Word or Excel window. Instead, switch back to the PolicyTech **Edit Document** window, and then click **Dock Word Module**. This closes the undocked Word or Excel window and redisplay the document in the **Edit Document** window.
5. Click  to the right of **Submit for Review**, and then click **Save and Close**.

## Adding Content to an Excel Document

## Adding Content to an Excel Document

The way you add content to an Excel document depends on what type of Excel integration your PolicyTech system is currently using.

Do one of the following:

- If you see either of the following in the **Edit Document** tab, continue with the instructions in [Adding Content to an Excel Document using Office Online Module](#).

### Assigned template contains prewritten content

The screenshot shows the Excel Online interface for an "Expense Report Form (465\_-1)". The document is in "Read-Only" mode. The spreadsheet contains the following content:

A	B	C	D	E		
1	Expense Report					
2						
3	Purpose:		Statement Number:			
4						
5	Employee Information					
6						
7	Name:		Position:			
8	Department:		Manager:			
9	Employee ID:					
10						
11	Date	Account	Description	Hotel	Transport	Fuel
12						
13						
14						
15						
16						
17						
18						

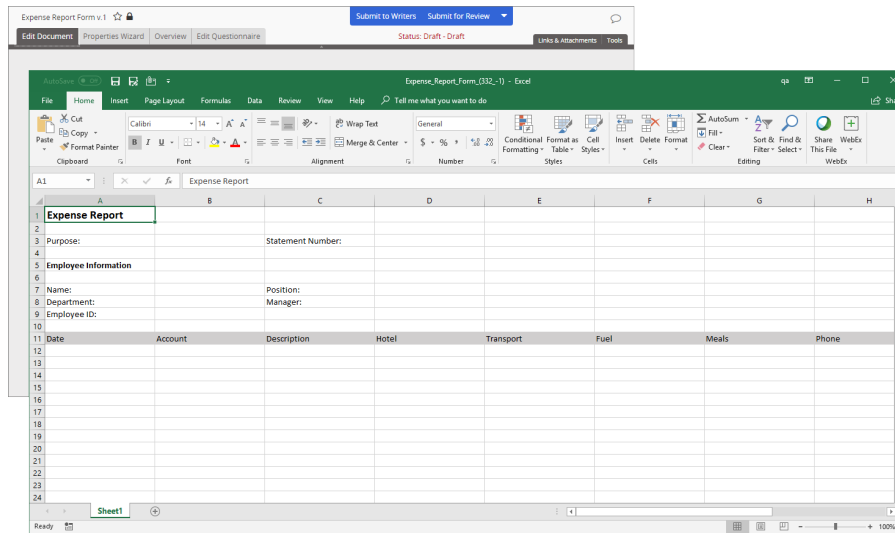

### Assigned template contains no content

The screenshot shows the Excel Online interface for an "Expense Report Form v.1". The document is in "Draft - Draft" status. The main content area is blank, with a central box containing the text "Expense Report Form.xlsx" and two buttons: "Import / Overwrite" and "Edit Document".

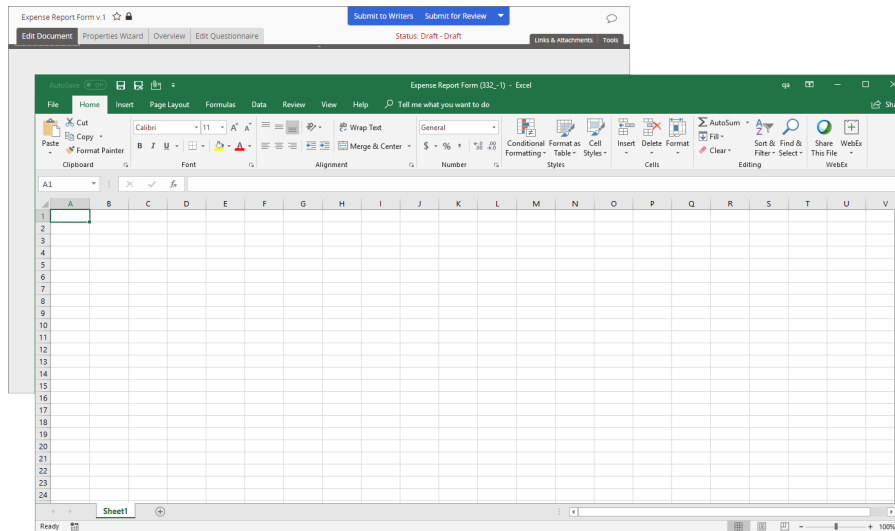

- If you see either of the following in the **Edit Document** tab, continue with the instructions in [Adding Content to an Excel Document using WordModulePlus](#).

**Note:** Depending on which version of Excel you're using, Excel may open in a separate Excel application window or in the **Edit Document** tab of the PolicyTech document window.

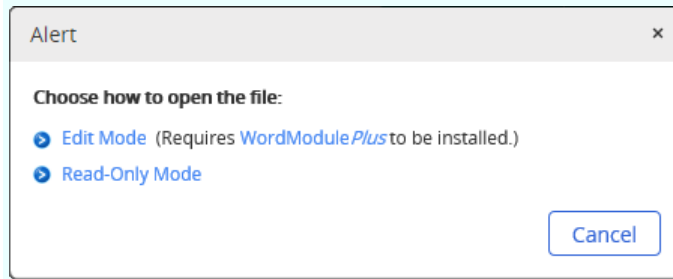

**Assigned template contains prewritten content**

**Assigned template contains no content**

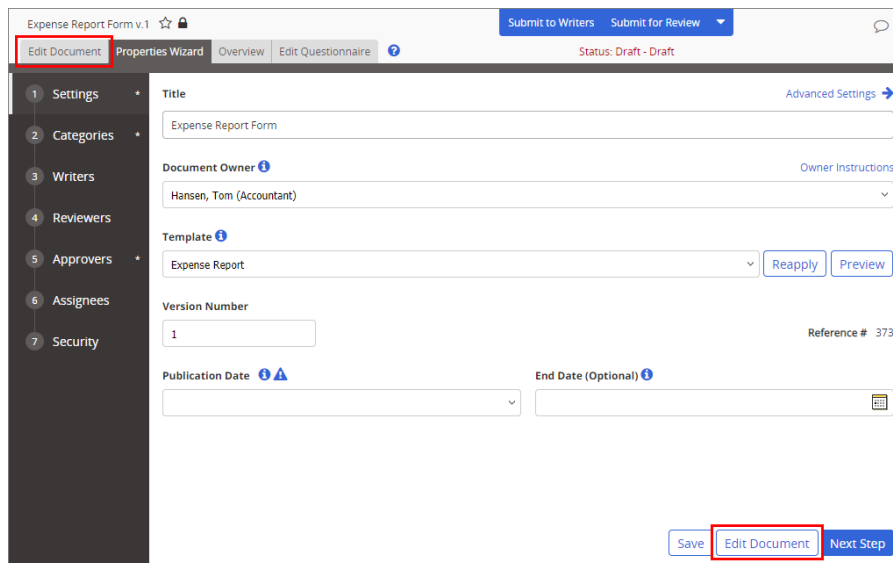

**Important:** If you see a prompt like the one below instead of a window link one of those above, then WordModulePlus is set to be used but has not yet been installed on your computer. Follow the instructions in [Installing WordModulePlus](#), before continuing.

## Adding Content to an Excel Document using Office Online Module

**Important:** Before you can write or otherwise add content to a Microsoft® Excel® document, you must complete at least the **Settings** step of the **Properties Wizard**. If you have not already done so, complete the instructions under [Adjusting Basic Document Settings](#).

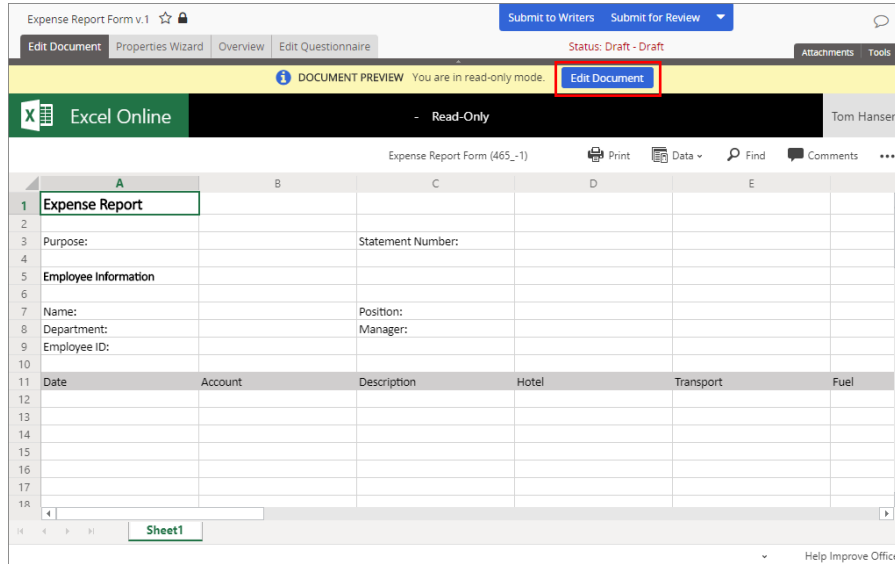

- Do one of the following to edit a document in Excel:
  - If you currently have the document open and have the **Properties Wizard, Overview, or Edit Questionnaire** tab selected, click the **Edit Document** tab near the upper left corner or the **Edit Document** button at the bottom of the currently displayed **Properties Wizard** step.

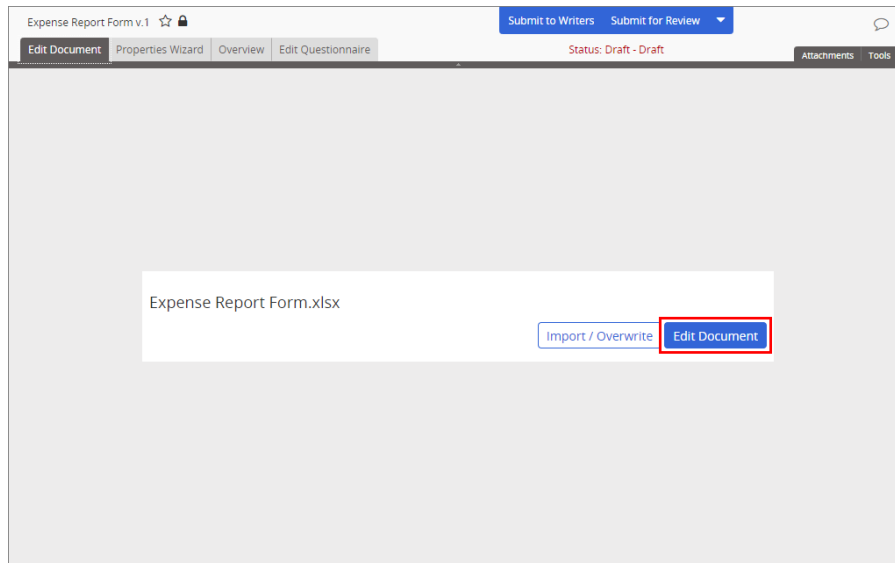

- If the document is currently closed, use **Search** or **Browse** to find it (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)), and then click the document title. The document opens with the **Edit Document** tab selected by default.

- Do one of the following, depending on what you see:

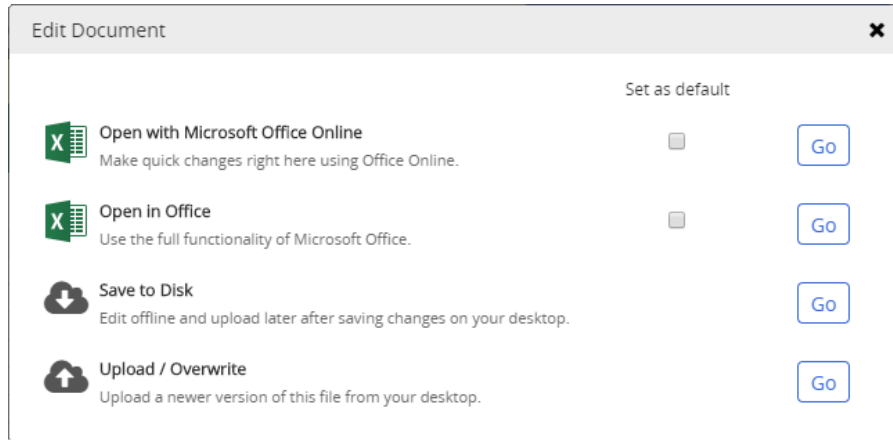

- If you see document contents (from the template) in preview mode, as shown below, click the **Edit Document** button in the **DOCUMENT PREVIEW** header.

- If you see a prompt like the one below (shown when the assigned template has no prewritten content), click the **Edit Document** button in the prompt.

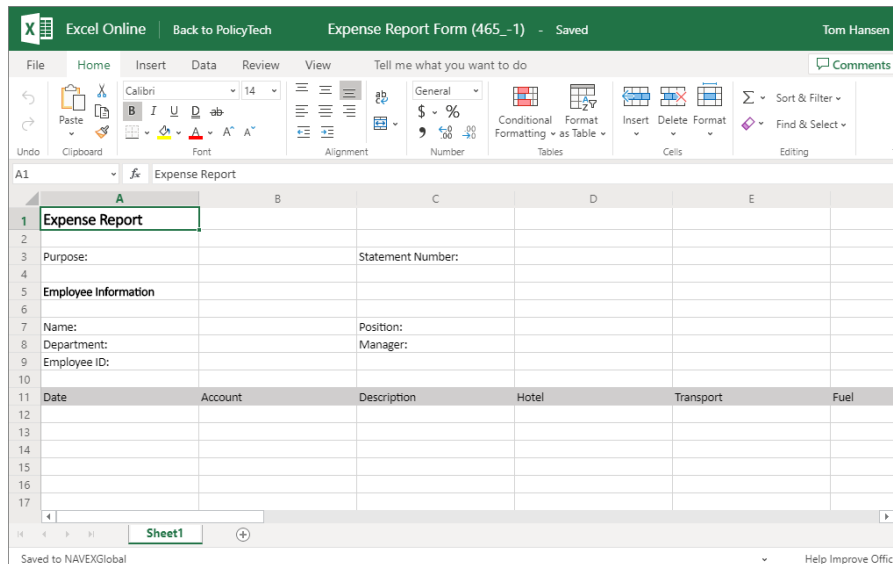

3. Do one of the following:

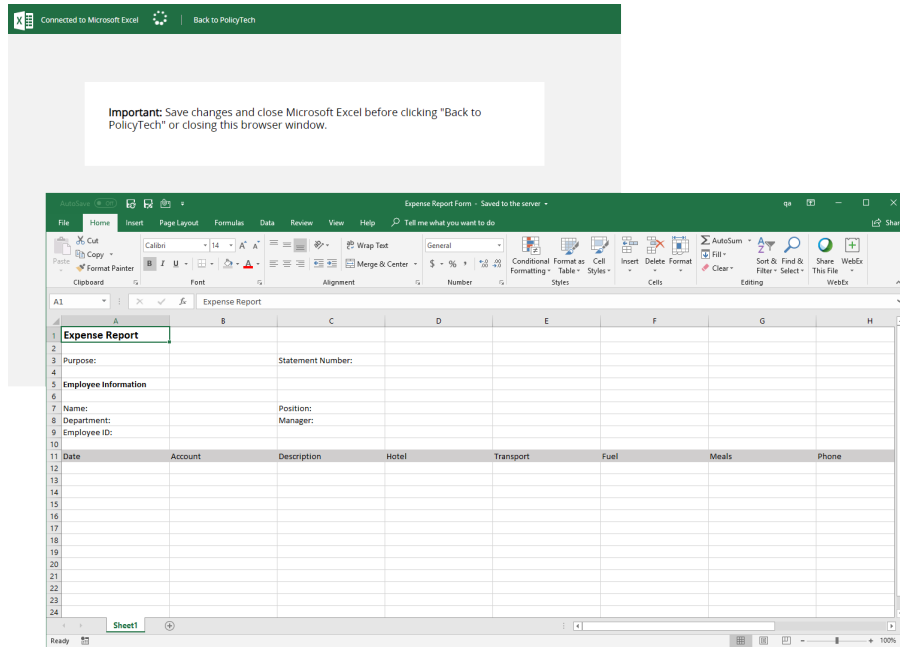

- Click **Go** for **Open with Microsoft Office Online** to edit the document using Excel Online. (Select the **Set as Default** check box before clicking **Go** to skip this step next time.)

**Important:** If you don't see **Back to PolicyTech** in the header, as shown below, press F5 to refresh the window contents. There is a known Excel Online bug that prevents **Back to PolicyTech** from being displayed initially.

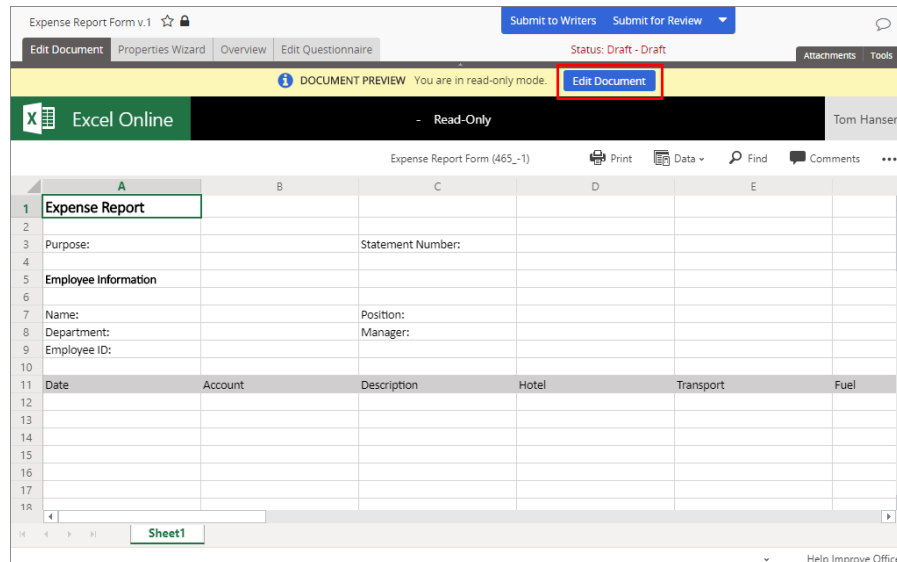

- Click **Go** for **Open in Office** to edit the document using desktop Excel. (Select the **Set as Default** check box before clicking **Go** to skip this step next time.)

**Important:** To avoid breaking the link between desktop Excel and the PolicyTech database, do not close the PolicyTech document window (with the **Back to PolicyTech** link in the header) while editing in desktop Excel. Always save the document and close desktop Excel before closing the PolicyTech document window.

#### Notes:

- The **Open in Office** option will not work if you don't have a desktop version of Excel installed on your computer.
- Any changes you save in desktop Excel are automatically saved back to the PolicyTech database.
- The document may or may not already have content, depending on which template you selected.
- Click **Upload / Overwrite** and follow the prompts to upload an external Excel file as the PolicyTech document. The uploaded document is displayed in preview mode.

In the **DOCUMENT PREVIEW** header, click **Edit Document**, and then click **Go** for **Open with Microsoft Office Online** or **Open in Office**.

2. Do any of the following to add or edit document content:
  - Use Excel features to write and format the content.
  - Add supplementary materials to the document (see [Attaching Files and Adding Reference Links](#) and [Working with Discussions](#)).
  - Finish assigning document properties (see [Assigning Document Properties](#)).
  - Create a questionnaire for marking the document as read (see [Creating a Document Questionnaire](#)).
  - Look at the document's overview (see [Working with the Overview](#)).
  - Submit the document to assigned writers (see [Submitting a Document or Questionnaire to Writers \(for Collaboration\)](#)).
  - Submit the document to assigned reviewers (see [Submitting a Document or Questionnaire for Review](#)).
  - Submit the document to assigned approvers (see [Submitting a Document or Questionnaire for Approval](#)).
  - Do one of the following:
    - If you're editing in Excel Online, save the document and close the PolicyTech document window.
    - If you're editing in desktop Excel, save the document and close the Excel application. Then, close the PolicyTech document window.

## Adding Content to an Excel Document using WordModulePlus

**Important:** Before you can write or otherwise add content to an Excel document, you must complete at least the **Settings** step of the **Properties Wizard**. If you have not already done so, complete the instructions under [Adjusting Basic Document Settings](#).

1. Do one of the following to start editing the Excel document:
  - If you currently have the document open and have the **Properties Wizard, Overview**, or **Edit Questionnaire** tab selected, click the **Edit Document** tab near the upper left corner or the **Edit Document** button at the bottom of the currently displayed **Properties Wizard** step.

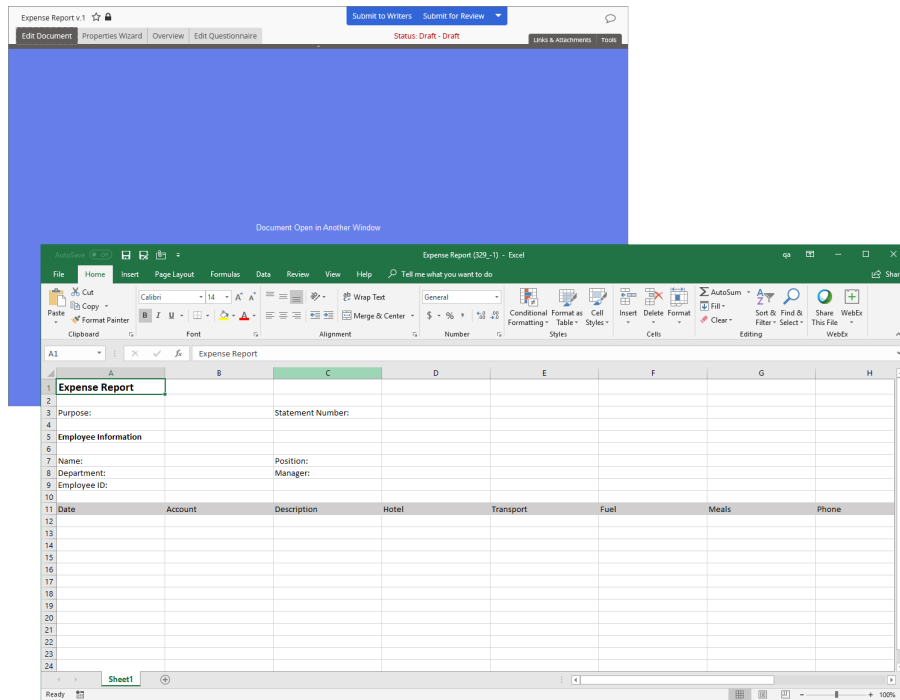

The screenshot shows the 'Properties Wizard' interface for an Excel document titled 'Expense Report v.1'. The 'Edit Document' tab is active. The interface includes a sidebar with steps: Settings, Categories, Writers, Reviewers, Approvers, Assignees, and Security. The main form contains the following fields and controls:

- Title:** Expense Report
- Document Owner:** Howard, Susan (Document, Control Administrator)
- Template:** -- Blank Excel Document -- (with 'Reapply' and 'Preview' buttons)
- Version Number:** 1
- Publication Date:** (calendar icon)
- End Date (Optional):** (calendar icon)
- Reference #:** 300
- Buttons:** Save, Edit Document (highlighted), Next Step

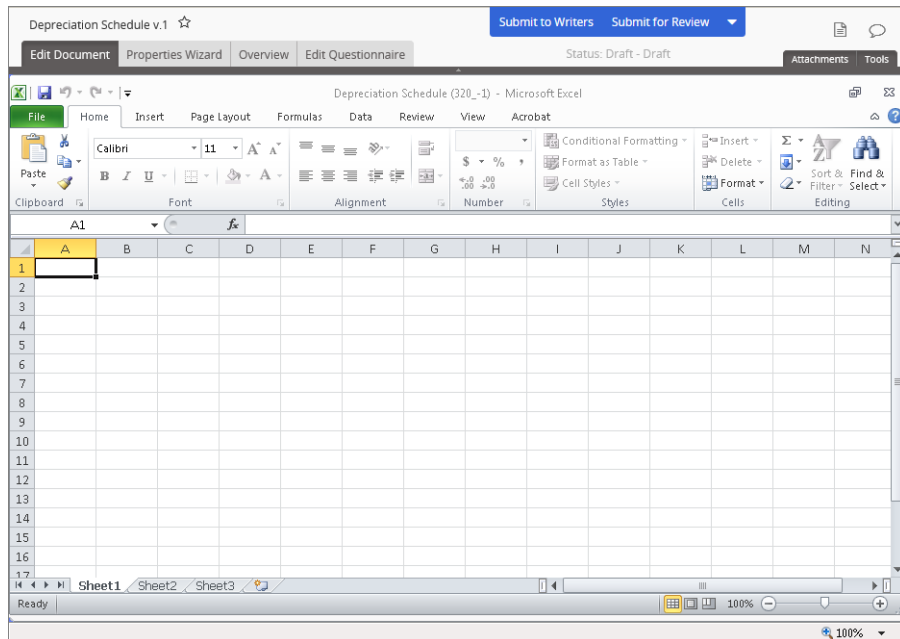

- If the document is currently closed, use **Search** or **Browse** to find it (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)), and then click the document title.

If you have Excel 2013 or later, the PolicyTech browser window remains open and the document opens in a separate Excel application window.

If you have Excel 2007 or 2010, the document opens directly in the PolicyTech browser window.

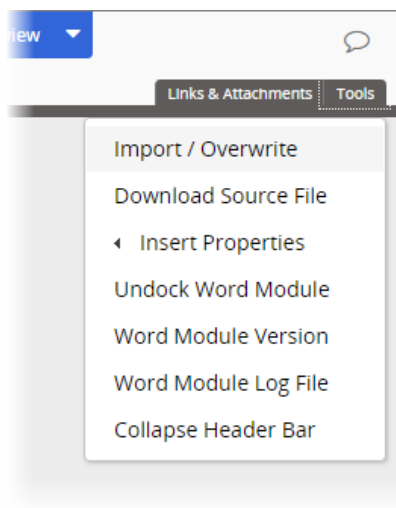

2. Do either of the following to add content to the document:
  - Use any available Excel features to write and format the document.

**Note:** If the Excel document is displayed in the PolicyTech **Edit Document** tab and you would like to see more of the document within the window, click **Tools**, and then click **Collapse Header Bar**. When you are ready to use a feature in the header bar, click **Tools**, and then click **Expand Header Bar**.

- In the PolicyTech browser window, click **Tools**, click **Import/Overwrite**, and then follow the prompts to import the content of an existing Excel document from outside of PolicyTech.

**Important:** Importing content completely overwrites any existing content. Copy and paste information from another document if you need to preserve existing content.

3. (Optional) Place your cursor in the spreadsheet cell where you want to insert a document property field. In the PolicyTech browser window, click **Tools**, click **Insert Properties**, and then find and insert a document property (see [Inserting Document Properties](#) for detailed instructions).

**Important:**

- The target cell for the inserted property must be empty.
- You will see a warning that using **Insert Properties** erases the editing history for Excel's **Undo** feature. You must click **OK** to confirm the action.

4. When finished adding content, do any of the following:
- Add supplementary materials to the document (see [Attaching Files and Adding Reference Links](#) and [Working with Discussions](#)).
  - Finish assigning document properties (see [Assigning Properties](#)).
  - Create a questionnaire for marking the document as read (see [Creating a Document Questionnaire](#)).
  - Look at the document overview (see [Working with the Document Overview](#)).
  - Submit the document to assigned writers (see [Submitting a Document or Questionnaire to Writers \(for Collaboration\)](#)).
  - Submit the document to assigned reviewers (see [Submitting a Document or Questionnaire for Review](#)).
  - Submit the document to assigned approvers (see [Submitting a Document or Questionnaire for Approval](#)).
  - Do one of the following:
    - If the document is open in the **Edit Document** tab, save the document and close the PolicyTech document window.
    - If the document is open in a separate Excel application window, save the document, and then close the PolicyTech document window, which closes both the PolicyTech document window and the Excel application window (the Excel application window cannot be closed first).

## Adding Content to a PowerPoint Document

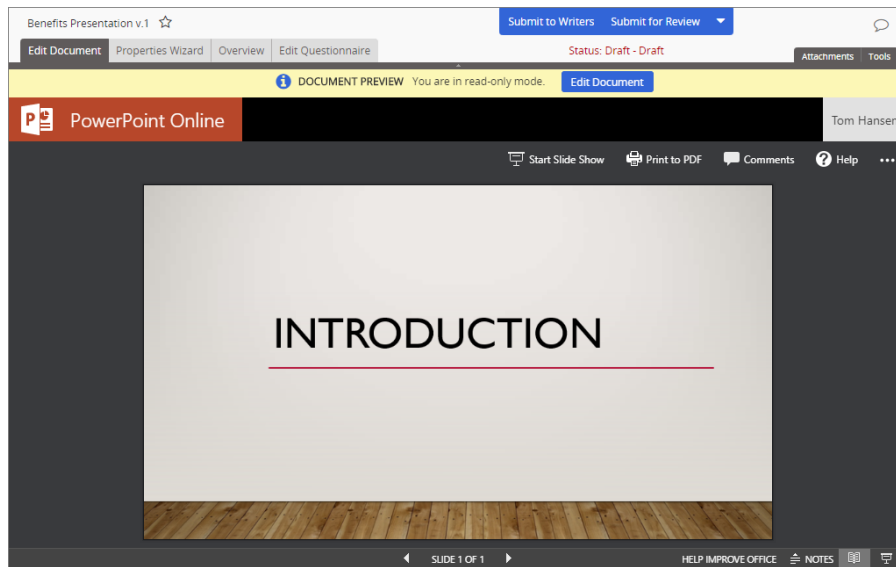

---

## Adding Content to a PowerPoint Document

The way you add content to a PowerPoint document depends on what type of PowerPoint integration your PolicyTech system is currently using.

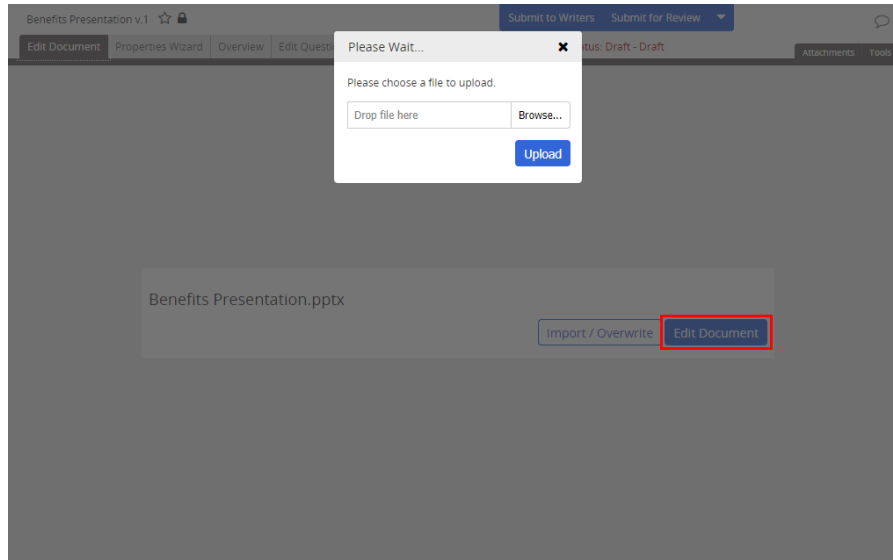

Do one of the following:

- If you see PowerPoint Online open in preview mode immediately in the **Edit Document** tab, as shown below, continue with the instructions in [Adding Content to a PowerPoint Document using Office Online Module](#).

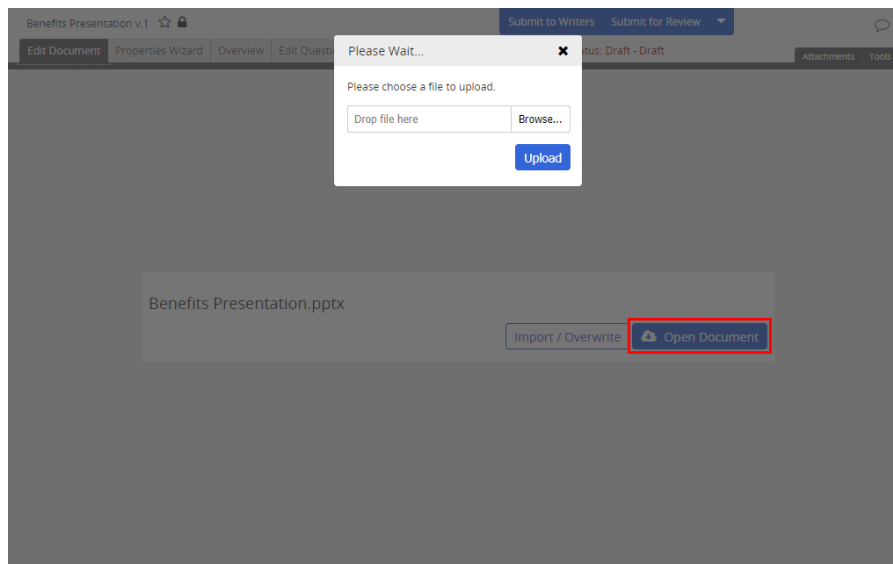

- If, when you click **Edit Document**, you see a screen like the following, check the prompt in the background under the gray overlay.

If you see the highlighted **Edit Document** button, continue with the instructions in [Adding Content to a PowerPoint Document using Office Online Module](#).

If you see highlighted **Open Document** button, continue with the instructions in [Adding Content to a PowerPoint Document using WordModulePlus](#).

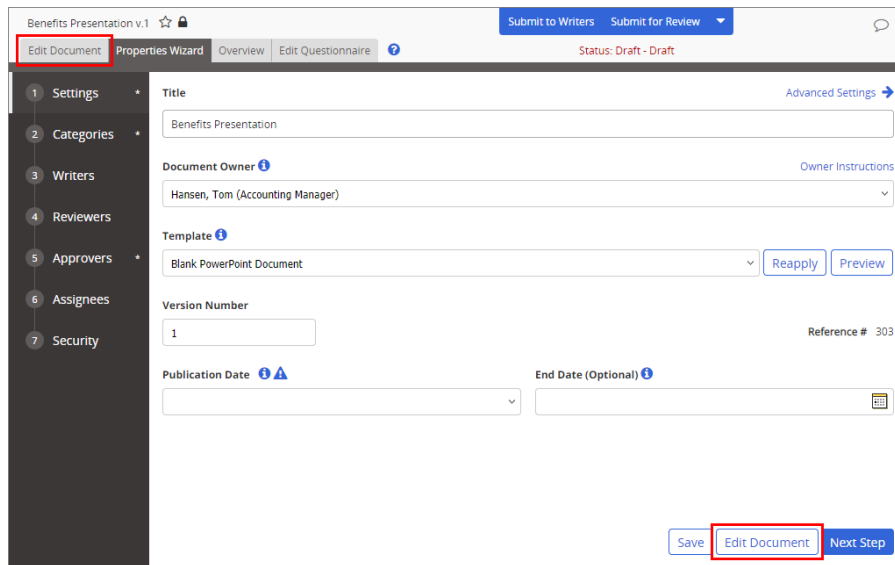

### Adding Content to a PowerPoint Document using Office Online Module

**Important:** Before you can write or otherwise add content to a Microsoft® PowerPoint® document, you must complete at least the **Settings** step of the **Properties Wizard**. If you have not already done so, complete the instructions under [Adjusting Basic Document Settings](#).

1. Do one of the following to edit a document in PowerPoint:
  - If you currently have the document open and have the **Properties Wizard**, **Overview**, or **Edit Questionnaire** tab selected, click the **Edit**

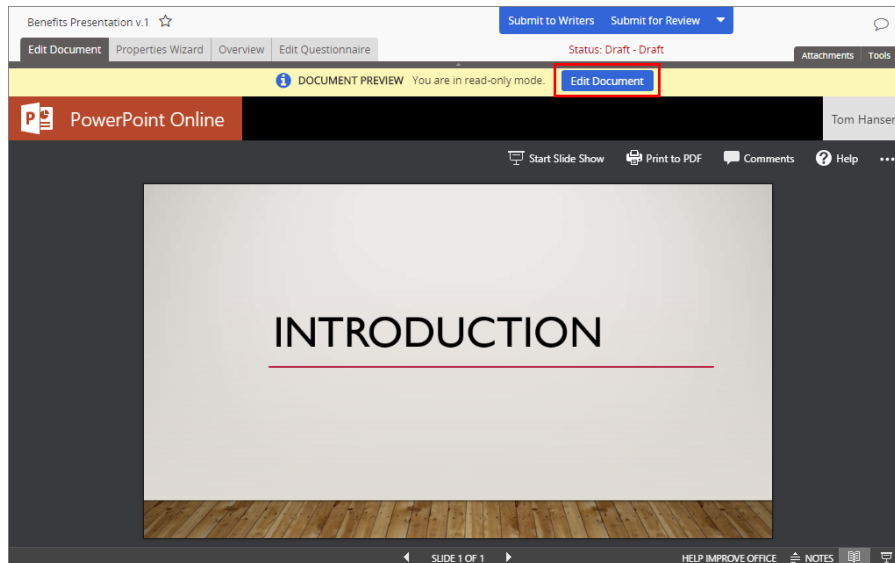

**Document** tab near the upper left corner or the **Edit Document** button at the bottom of the currently displayed **Properties Wizard** step.

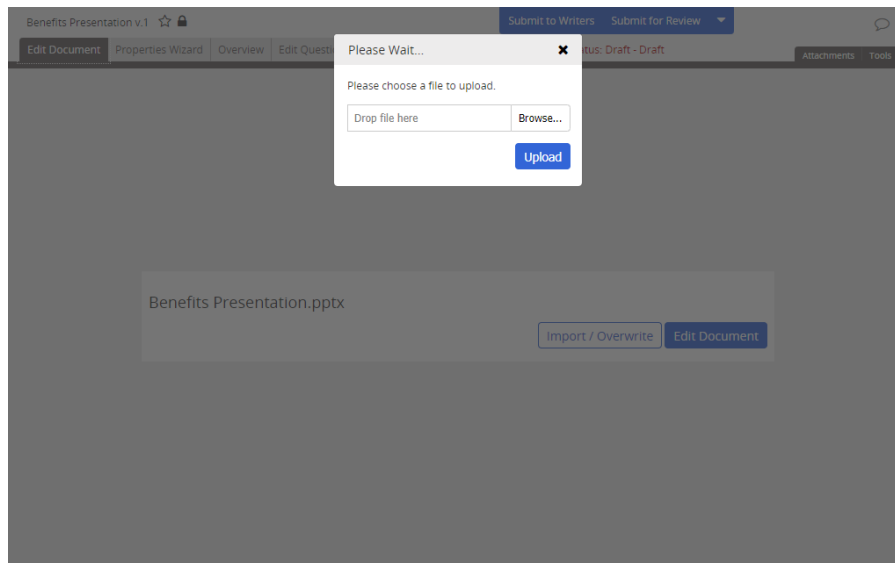

- If the document is currently closed, use **Search** or **Browse** to find it (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)), and then click the document title. The document opens with the **Edit Document** tab selected by default.

2. Do one of the following, depending on what you see:

- If you see the preview mode of document contents from the template, as shown below, click the **Edit Document** button in the **DOCUMENT PREVIEW** header.

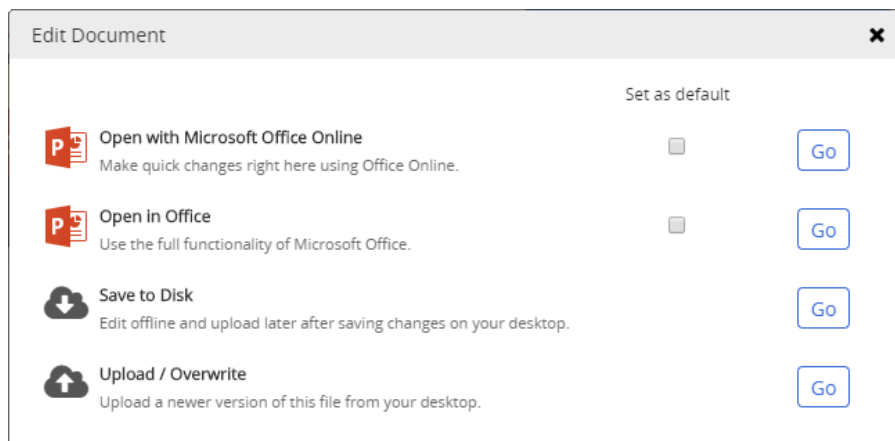

- If you see a prompt like the one below (shown when the assigned template has no prewritten content), do one of the following:

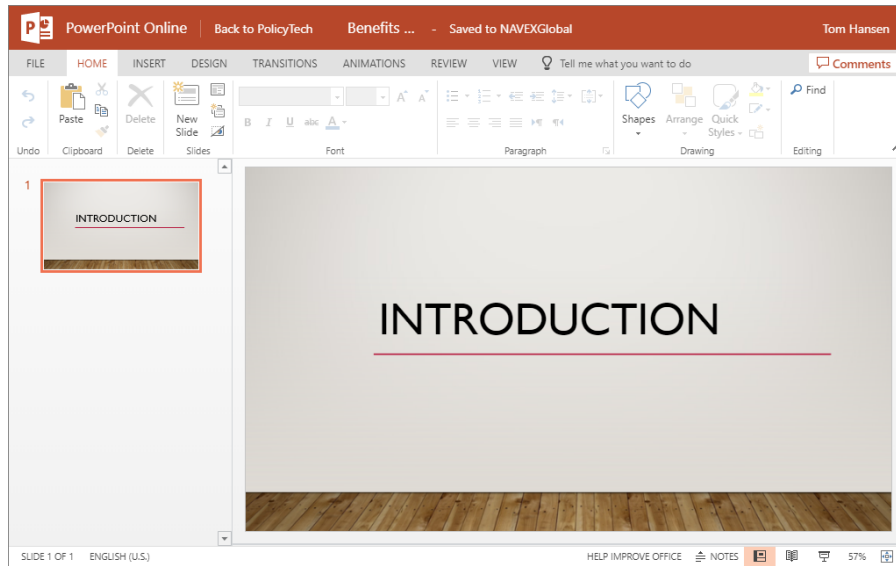

- Click **Browse**, find and click the PowerPoint file you want to upload, click **Open**, and then click **Upload**. (Alternatively, you can open Windows Explorer, find the file you want to import, click and drag the file onto the box that contains the text **Drop file here**, and then click **Upload**.) Click **OK** to open the uploaded file in preview mode, and then click the **Edit Document** button in the **DOCUMENT PREVIEW** header.
- To start editing a new, blank PowerPoint presentation, click **X** to close the **Upload** prompt, then click the **Edit Document** button (next to the **Import / Overwrite** button).

3. Do one of the following:

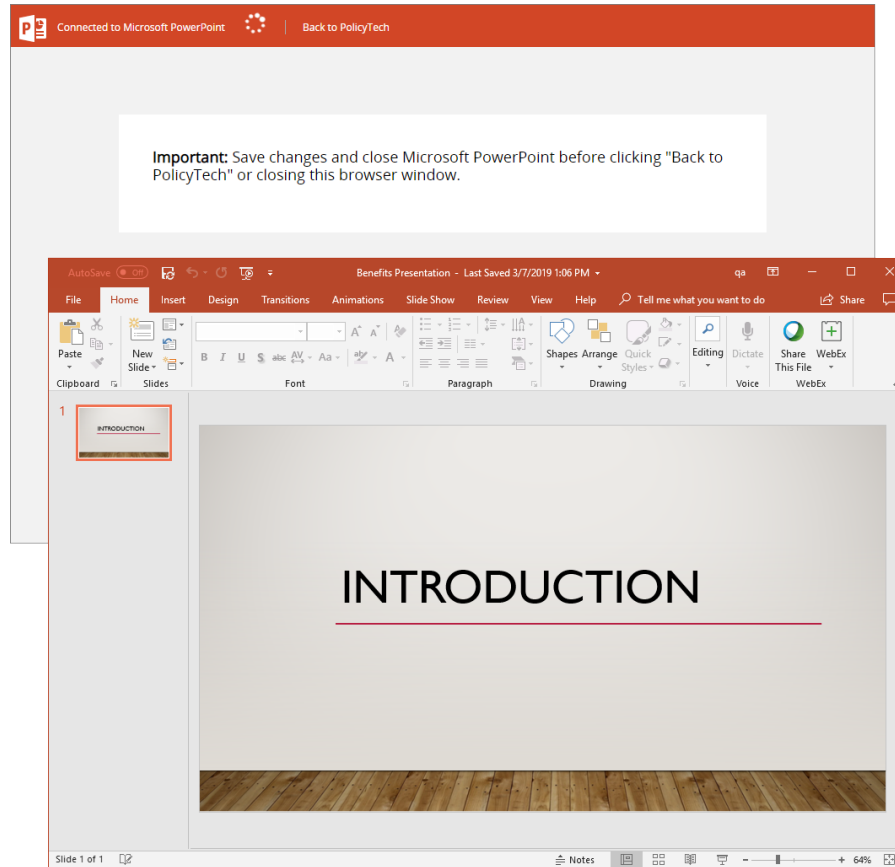

- Click **Go** for **Open with Microsoft Office Online** to edit the document using PowerPoint Online. (Select the **Set as Default** check box before clicking **Go** to skip this step next time.)

- Click **Go** for **Open in Office** to edit the document using desktop PowerPoint. (Select the **Set as Default** check box before clicking **Go** to skip this step next time.)

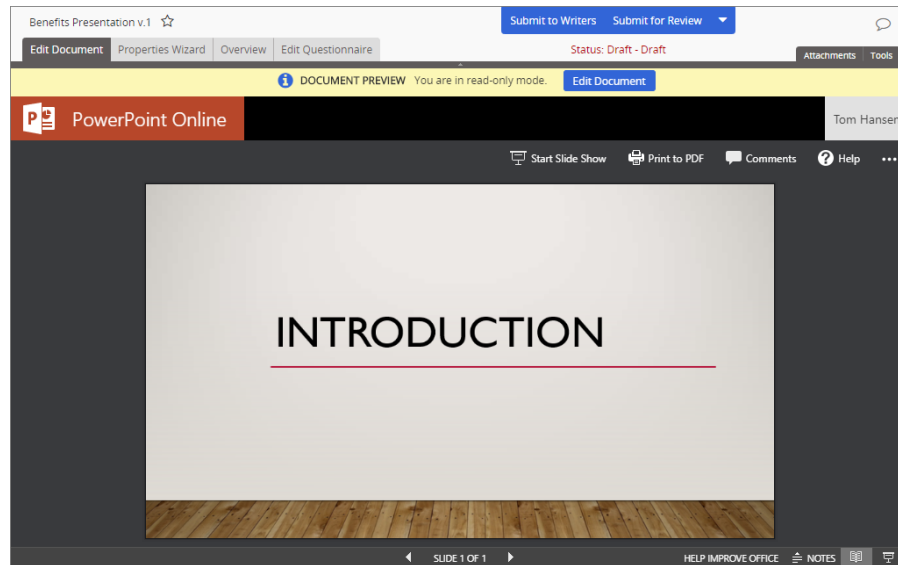

**Important:** To avoid breaking the link between desktop PowerPoint and the PolicyTech database, do not close the PolicyTech document window (with the **Back to PolicyTech** link in the header) while editing in desktop PowerPoint. Always save the document and close desktop PowerPoint before closing the PolicyTech document window.

### Notes:

- The **Open in Office** option will not work if you don't have a desktop version of PowerPoint installed on your computer.
- Any changes you save in desktop PowerPoint are automatically saved back to the PolicyTech database.
- The document may or may not already have content, depending on which template you selected.
- Click **Upload / Overwrite** and follow the prompts to upload an external Excel file as the PolicyTech document. The uploaded document is displayed in preview mode.

In the **DOCUMENT PREVIEW** header, click **Edit Document**, and then click **Go** for **Open with Microsoft Office Online** or **Open in Office**.

2. Do any of the following to add or edit document content:
  - Use PowerPoint features to write and format the content.
  - Add supplementary materials to the document (see [Attaching Files and Adding Reference Links](#) and [Working with Discussions](#)).
  - Finish assigning document properties (see [Assigning Document Properties](#)).
  - Create a questionnaire for marking the document as read (see [Creating a Document Questionnaire](#)).
  - Look at the document's overview (see [Working with the Overview](#)).
  - Submit the document to assigned writers (see [Submitting a Document or Questionnaire to Writers \(for Collaboration\)](#)).
  - Submit the document to assigned reviewers (see [Submitting a Document or Questionnaire for Review](#)).
  - Submit the document to assigned approvers (see [Submitting a Document or Questionnaire for Approval](#)).
  - Do one of the following:
    - If you're editing in PowerPoint Online, save the document and close the PolicyTech document window.

- If you're editing in desktop PowerPoint, save the document and close the PowerPoint application. Then, close the PolicyTech document window.

## Adding Content to a PowerPoint Document using WordModulePlus

**Important:** Before you can write or otherwise add content to an PowerPoint document, you must complete at least the **Settings** step of the **Properties Wizard**. If you have not already done so, complete the instructions under [Adjusting Basic Document Settings](#).

1. Do one of the following to start editing the PowerPoint document:
  - If you currently have the document open and have the **Properties Wizard**, **Overview**, or **Edit Questionnaire** tab selected, click the **Edit Document** tab near the upper left corner or the **Edit Document** button at the bottom of the currently displayed **Properties Wizard** step.

The screenshot displays the 'Properties Wizard' interface for a document titled 'Benefits Presentation v.1'. The top navigation bar includes 'Edit Document' (highlighted with a red box), 'Properties Wizard', 'Overview', and 'Edit Questionnaire'. The status is 'Draft - Draft'. The main content area contains the following fields:

- Title:** Benefits Presentation
- Document Owner:** Hansen, Tom (Accounting Manager)
- Template:** Blank PowerPoint Document
- Version Number:** 1
- Publication Date:** (calendar icon)
- End Date (Optional):** (calendar icon)

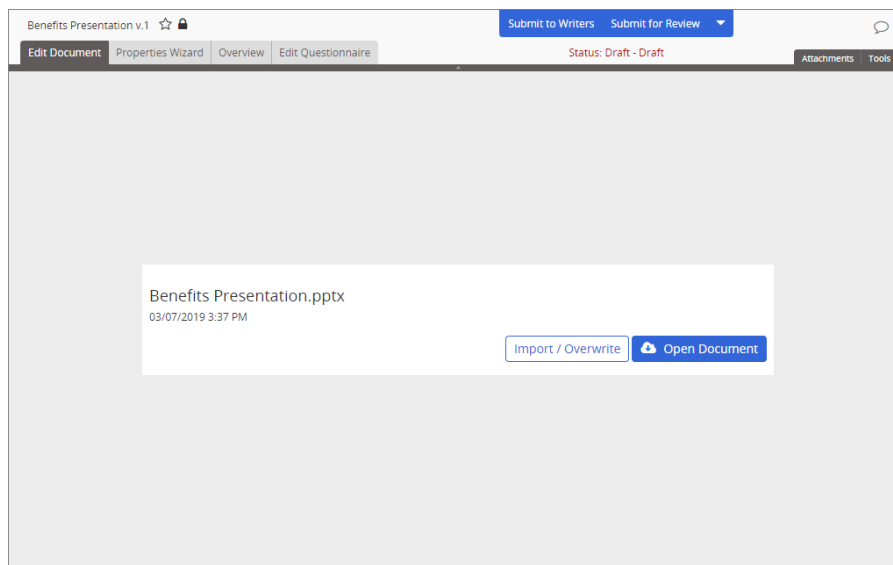

At the bottom right, there are three buttons: 'Save', 'Edit Document' (highlighted with a red box), and 'Next Step'.

- If the document is currently closed, use **Search** or **Browse** to find it (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)), and then click the document title.
2. Do one of the following, depending on what you see:
    - If your screen looks similar to the one below, the PowerPoint template you selected contains prewritten content. To modify the uploaded document's contents, click **Open Document**, to open it in a separate PowerPoint application window. Use any available PowerPoint features to create the document contents.

**Important:** To avoid breaking the link between desktop PowerPoint and the PolicyTech database, do not close the PolicyTech document window while editing in desktop PowerPoint. Always save the document and close desktop PowerPoint before closing the PolicyTech document window.

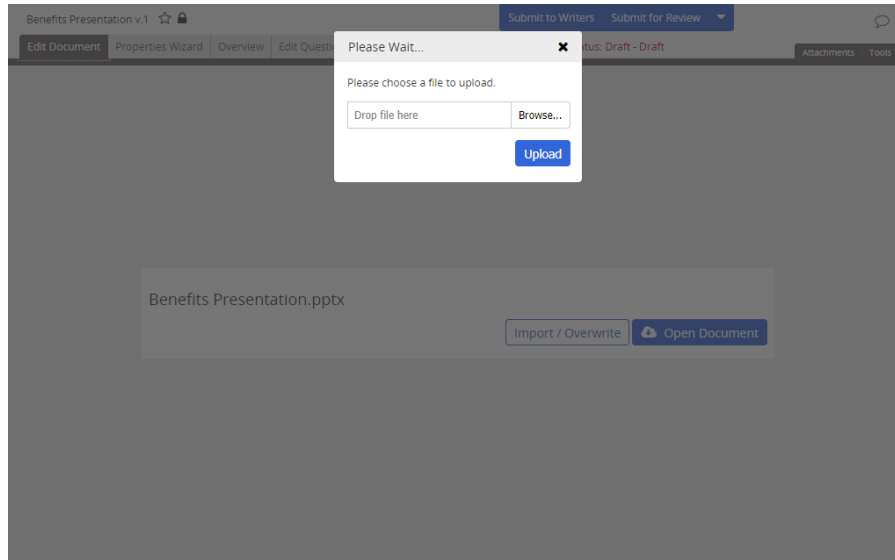

**Notes:**

- The **Open Document** option will not work if you don't have a desktop version of PowerPoint installed on your computer.
- Any changes you save in desktop PowerPoint are automatically saved back to the PolicyTech database.

- If your screen looks similar to the one below, your selected template has no content. First, create and save your PowerPoint presentation outside of PolicyTech. Then, back in the PolicyTech document window, click **Browse**, find and click the PowerPoint file you want to upload, click **Open**, and then click **Upload**. (Alternatively, you can open Windows Explorer, find the file you want to import, click and drag the file onto the box that contains the text **Drop file here**, and then click **Upload**.)

**Note:** Once you upload a PowerPoint file, you can use **Open Document** to open and edit its contents.

3. When finished adding content, do any of the following:
  - Add supplementary materials to the document (see [Attaching Files and Adding Reference Links](#) and [Working with Discussions](#)).
  - Finish assigning document properties (see [Assigning Properties](#)).
  - Create a questionnaire for marking the document as read (see [Creating a Document Questionnaire](#)).
  - Look at the document overview (see [Working with the Document Overview](#)).
  - Submit the document to assigned writers (see [Submitting a Document or Questionnaire to Writers \(for Collaboration\)](#)).
  - Submit the document to assigned reviewers (see [Submitting a Document or Questionnaire for Review](#)).
  - Submit the document to assigned approvers (see [Submitting a Document or Questionnaire for Approval](#)).
  - If the document is currently open in a separate PowerPoint application window, save the document and close PowerPoint. Then, close the PolicyTech document window.

### Adding Content to an HTML Document

**Important:** Before you can write or otherwise add content to an HTML document, you must complete at least the **Settings** step of the **Properties Wizard**. If you have not already done so, complete the instructions under [Adjusting Basic Document Settings](#).

To write an HTML document in PolicyTech, you must have selected an **HTML Document** template in the **Properties Wizard** (see [Adjusting Basic Settings](#) if you need to reselect a template). If there is no **HTML Document** template available in the **Properties Wizard**, contact your administrator, who can create one.

1. Do one of the following to open the HTML editing window:
  - If you currently have the document open and have the **Properties Wizard, Overview, or Edit Questionnaire** tab selected, click the **Edit Document** tab near the upper left corner or the **Edit Document** button at the bottom of the currently displayed **Properties Wizard** step.

The screenshot shows the 'Properties Wizard' interface for a document titled 'Employee Training v.1'. The status is 'Draft - Draft'. The 'Edit Document' tab is selected. The left sidebar contains a navigation menu with items: Settings, Categories, Writers, Reviewers, Approvers, Assignees, and Security. The main content area includes the following fields and options:

- Title:** Employee Training (with an 'Advanced Settings' link)
- Document Owner:** Hansen, Tom (Accounting Manager) (with an 'Owner Instructions' link)
- Template:** HTML Document (with 'Reapply' and 'Preview' buttons)
- Version Number:** 1 (with a 'Reference # 305' label)
- Publication Date:** (with a calendar icon)
- End Date (Optional):** (with a calendar icon)

At the bottom right, there are three buttons: 'Save', 'Edit Document', and 'Next Step'.

- If the document is currently closed, use **Search** or **Browse** to find it (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)), and then click the document title.

You should now see a window similar to the one below.

**Note:** The document may or may not already have content, depending on whether the template you selected has content.

The HTML document editor has three available modes—**Design**, **HTML**, and **Preview**—that you can access with the tabs below the content area. The **Design** (default) mode is a WYSIWYG (What You See Is What You Get) editor that offers many of the design features found in word processing applications and displays editing helps in the content, such as table grid lines. In **HTML** mode, you can add and edit standard HTML tags. The **Preview** mode approximates what the document will look like when it's opened in a browser.

**Important:** For security reasons, <script> tags are not supported and, if added, will be removed upon saving the document or when uploading an external HTML file using **Import/Overwrite**.

### Notes:

- The features in the ribbon are disabled in the HTML and Preview modes.
- If you would like to see more of the document, click **Tools**, and then click **Collapse Header Bar**. When you're ready to use a feature in the header bar, click **Tools**, and then click **Expand Header Bar**.

2. Do any of the following to add content to the document:

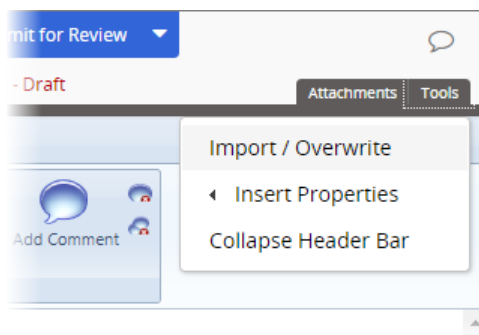

- Click **Design**, and then use any available features to write, format, and insert content.

**Important:** For instructions on inserting a video, see [Inserting a Video into an HTML Document](#).

- Click **HTML**, and then add or edit text and HTML tags.
- Click **Tools**, click **Import/Overwrite**, and then follow the prompts to import the content of an existing document from outside of PolicyTech.

**Important:**

- Importing content completely overwrites any existing content. Copy and paste information from another document if you don't want to overwrite this document's existing content.
- Importing a type of document other than HTML (a text file with a .htm or .hml extension) will change the editor to one appropriate for the type of file you imported. For example, if you import a Word file, the file is displayed in Word.

- While in **Design** or **HTML** mode, place your cursor in the document where you want to insert a document property field. Click **Tools**, click **Insert Properties**, and then find and insert a document property (see [Inserting Document Properties](#) for detailed instructions).
3. When finished adding content, do any of the following:
- Add supplementary materials to the document (see [Attaching Files and Adding Reference Links](#) and [Working with Discussions](#)).
  - Finish assigning document properties (see [Assigning Properties](#)).
  - Create a questionnaire for marking the document as read (see [Creating a Document Questionnaire](#)).
  - Look at the document overview (see [Working with the Document Overview](#)).
  - Submit the document to assigned writers (see [Submitting a Document or Questionnaire to Writers \(for Collaboration\)](#)).
  - Submit the document to assigned reviewers (see [Submitting a Document or Questionnaire for Review](#)).
  - Submit the document to assigned approvers (see [Submitting a](#)

[Document or Questionnaire for Approval](#)).

- Save and close the document.

## Inserting a Video into an HTML Document

When adding content to a document created with an **HTML Document** template, you can insert a video hosted by a web server or a video-sharing website.

**Note:** You cannot insert a video file—only an externally hosted video.

1. In the open document, in the **Design** mode ribbon, click .

2. You can reference the video using embed code or a URL. Do one of the following:
  - Video-sharing sites typically have an option for copying a video's embed code, which, in addition to the video URL, contains HTML formatting for the frame that will contain the video. After copying the code, in the **Insert Video** window in Policy Tech, click **Embed code from a video sharing site**, and then paste the embed code into the text box.

- To format the video frame yourself, click **Or manually enter the values**. In the **URL** box, type or paste the video URL, including the protocol (<http://> or <https://>), and then set the frame size by typing a width and height in pixels.

Or manually enter the values

URL

Width  Height

Include a Play button [i](#)

Some videos include a play button, while other videos start immediately. To prevent such a video from starting immediately, select **Include a Play button**, and then, in the list below that option, click one of the following:

- **Play inline.** Plays the video in the inserted frame within the document.

Ethics & Compliance Training | NAVEX Engage

Design HTML Preview

- **Popup over document.** Clicking the play button in the inserted frame opens a pop-up window above the document (within the document browser window).

- **Open in new browser window.** Clicking the play button launches a new, separate browser window.

**Note:** The **Width** and **Height** settings apply only to the frame inserted into the document. They do not apply to the pop-up window or new browser window.

3. Click **OK**.

**Important:** If you see a warning stating that you are attempting to insert a video from a non-secure site, see [Security Considerations for Inserted Videos](#).

4. To test the inserted video, click the **Preview** tab at the bottom of the document window, and then click the play button or whatever play control the video includes.

### Editing an Inserted Video

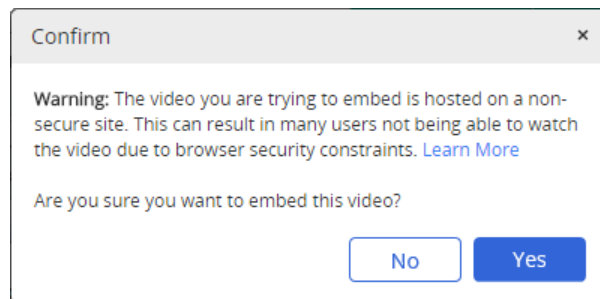

To edit an inserted video's URL or settings, click the **HTML** tab at the bottom of the document window and modify the text in the <iframe> tag.

### Deleting an Inserted a Video

Place the cursor after the video, and then press Backspace.

### Security Considerations for Inserted Videos

If you see the warning below when you attempt to insert a video into an HTML document, it is because you are logged in to PolicyTech using the HTTPS (Hypertext Transfer Protocol Secure) protocol, and you referenced a video using the normal HTTP, which is not a secure protocol.

Do one of the following:

- (Recommended) Click **No** to cancel the video insertion, change the URL scheme name to https://, and then click **OK** again to see if the web server hosting the video supports the HTTPS protocol.
- If you fully understand the possible security risks but want to proceed anyway, click **Yes**. What you see next depends on the browser you're using. Consult your browser's Help for further instructions.

### Important:

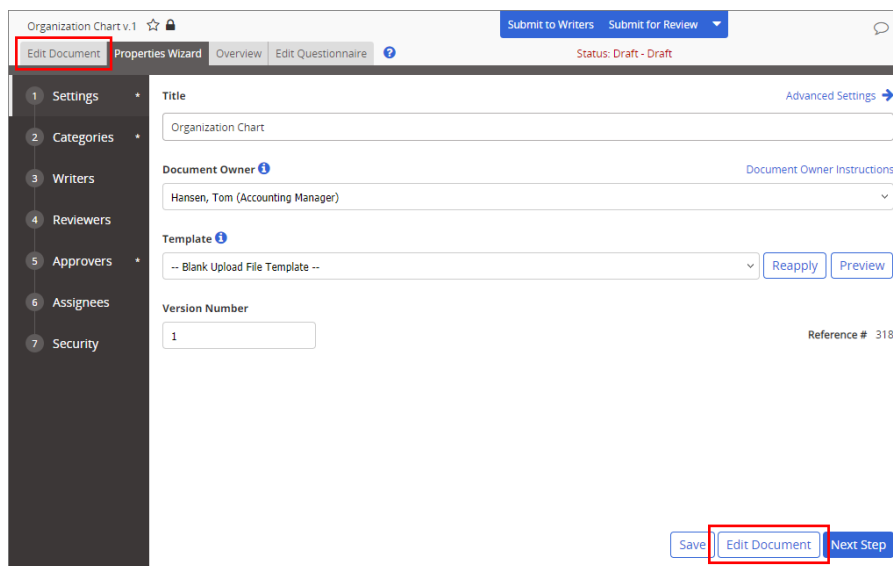

- Consult with your IT specialist before using this option.
- We highly recommend that you *not* use this option. In addition to the security issue, the assignee's experience will be undesirable at best. When an assignee attempts to view the video, he or she will have to create an exception for accessing insecure material from within an application running on a secure server. The method for creating this exception varies

widely, depending on the type and version of the assignee's browser.

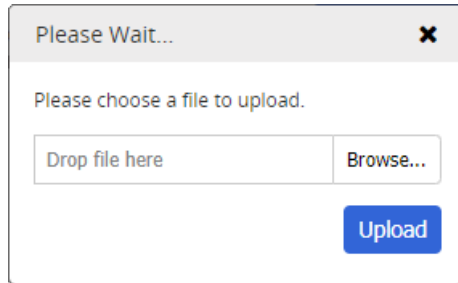

## Adding Content to a Document with an Upload File Template

**Important:** Before you can add content to a document, you must complete at least the **Settings** step of the **Properties Wizard**. If you have not already done so, complete the instructions under [Assigning Properties](#).

1. Do one of the following to open the document editing window:
  - If you currently have the document open and have the **Properties Wizard, Overview, or Edit Questionnaire** tab selected, click the **Edit Document** tab near the upper left corner or the **Edit Document** button at the bottom of the currently displayed **Properties Wizard** step.

- If the document is currently closed, use **Search** or **Browse** to find it (see [Searching for a Document or Questionnaire](#) or [Browsing for a Document or Questionnaire](#)), and then click the document title.
2. What you see now depends on whether this document's assigned upload file template already contains an uploaded file. Do one of the following, depending on what you see:
    - If the assigned template contains no uploaded file, a prompt like the one below is displayed.

- a. Click **Browse**, find and click the file you want to upload, click **Open**, and then click **Upload File**. (Alternatively, you can open Windows Explorer, find the file you want to import, click and drag the file onto the box that contains the text **Drop file here**, and then click **Upload**.)
  - b. An alert appears stating that the uploaded file has been renamed to match the document title you typed in the first step of the **Properties Wizard**. Click **OK**.
- If the assigned template contains an uploaded file (in other words, the document already contains an uploaded file), a prompt like the one below is displayed.

3. To modify the uploaded document's contents, click **Open Document**, and then do one of the following:
  - If the uploaded file is a supported file type (such as a PowerPoint or Visio file), the file opens immediately in its default application in a separate window (provided you have an application installed on your computer that can open that file type). When you're finished adding to or modifying the file's contents, save it, and then close the application window. Back in the PolicyTech document window, click **OK** to clear the alert.
  - If the uploaded file is not a supported file type, a prompt is displayed for you to open or save the file. Click **Open**.

When you're finished adding to or modifying the file's contents, save it, and then close the application window. You will now need to upload the modified file to replace the previous version.

Back in the PolicyTech document window, click **Import / Overwrite**, click **Browse**, find and click the file you want to upload, click **Open**, and then click **Upload File**.

4. When finished adding and modifying content, do any of the following:
  - Save and close the document.
  - Add supplementary materials to the document (see [Attaching Files and Adding Reference Links](#) and [Working with Discussions](#)).
  - Finish assigning document properties (see [Assigning Properties](#)).
  - Create a questionnaire for marking the document as read (see [Creating a Document Questionnaire](#)).
  - Look at the document overview (see [Working with the Document Overview](#)).
  - Submit the document to assigned writers (see [Submitting a Document or Questionnaire to Writers \(Collaboration\)](#)).
  - Submit the document to assigned reviewers (see [Submitting a Document or Questionnaire for Review](#)).
  - Submit the document to assigned approvers (see [Submitting a Document or Questionnaire for Approval](#)).

---

## Attaching Files and Adding Reference Links

Within a document's Attachments list, you can add reference links to other PolicyTech documents and websites. You can also attach (upload and link to) any type of external file. This feature is useful for referencing other materials, in addition to the document content, that you want assignees to review.

In addition, you can add attachments that can only be seen by those with permission to edit the document (the document owner, assigned proxy authors and writers, and administrators). For example, you might want to attach or link to reference material used to write a document but that you don't want to require assignees to review.

**Important:** PolicyTech does not track whether an assignee reviewed attached files or linked documents or websites.

Go to a section listed below for instructions.

[Adding a Link to an Existing PolicyTech Document](#)

[Adding a Link to a New \(Not Yet Created\) PolicyTech Document](#)

[Adding a Link to a Web Address](#)

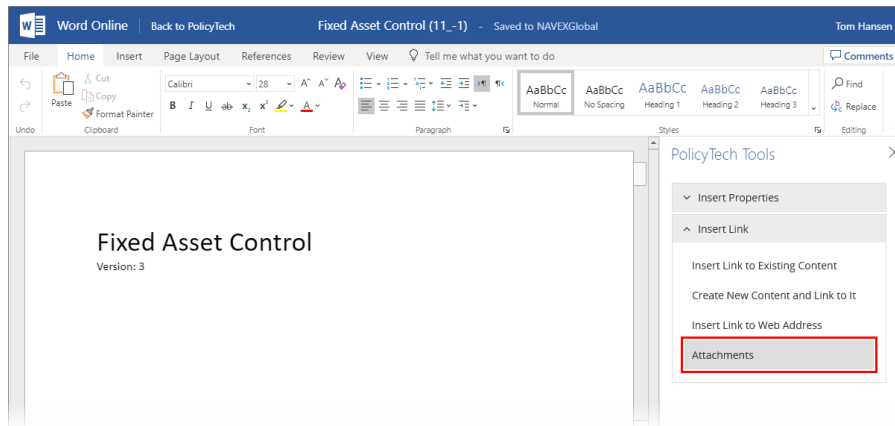

[Attaching an External File](#)

[Managing Attachments and Links](#)

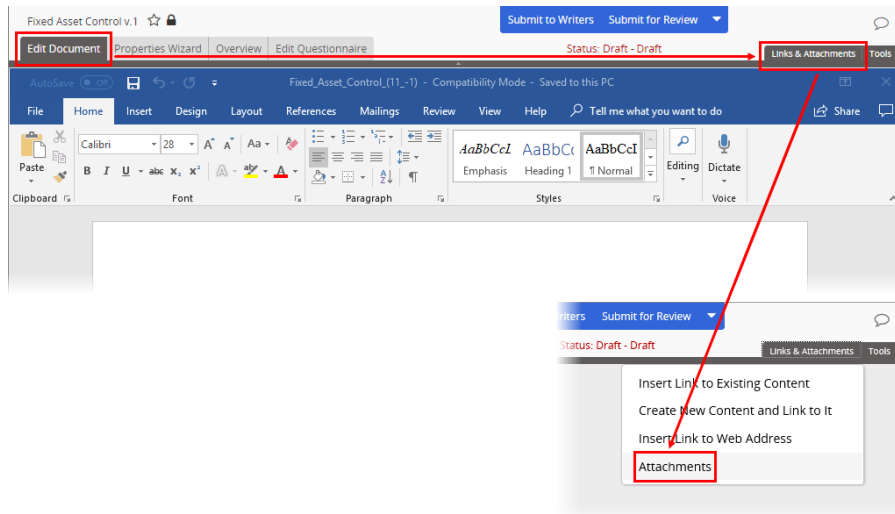

## Listing a Link to an Existing PolicyTech Document

The way you access the **Attachments** list depends on the type of document you're working with and which Microsoft® Office integration PolicyTech is set up to use.

1. To access the **Attachments** list, do one of the following:
  - While editing a document after selecting **Open with Microsoft Office Online** or **Open in Office**, expand the **Insert Link** menu in the **PolicyTech Tools** panel, and then click **Attachments**.

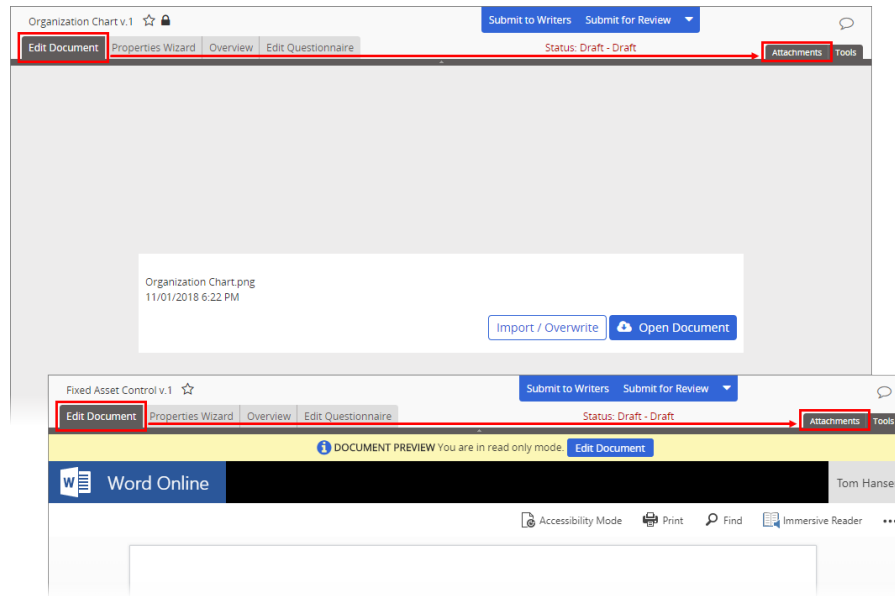

- Click the **Edit Document** tab and, if the content looks like that shown below, click **Links & Attachments**, and then click **Attachments**.

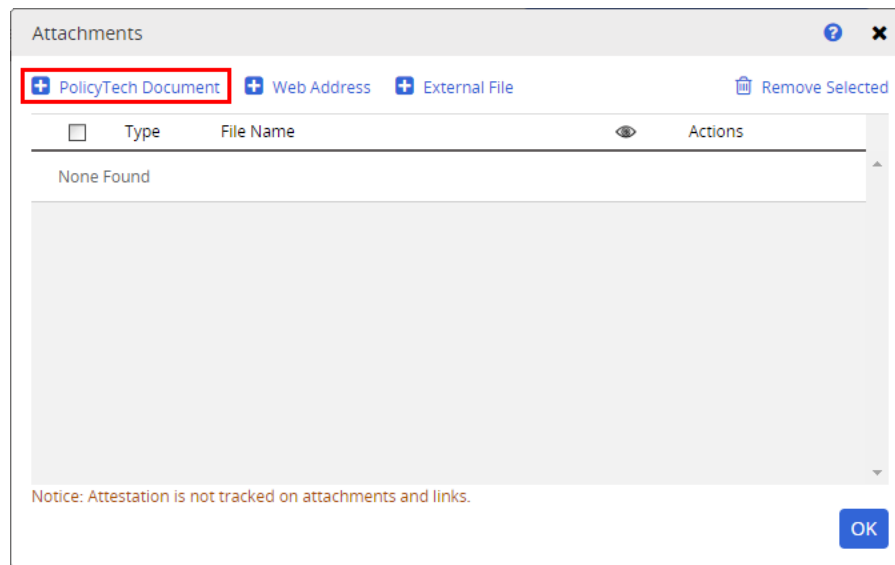

- Click the **Edit Document** tab and, if content looks like either of the following, click **Attachments**.

### 2. Click **PolicyTech Document**.

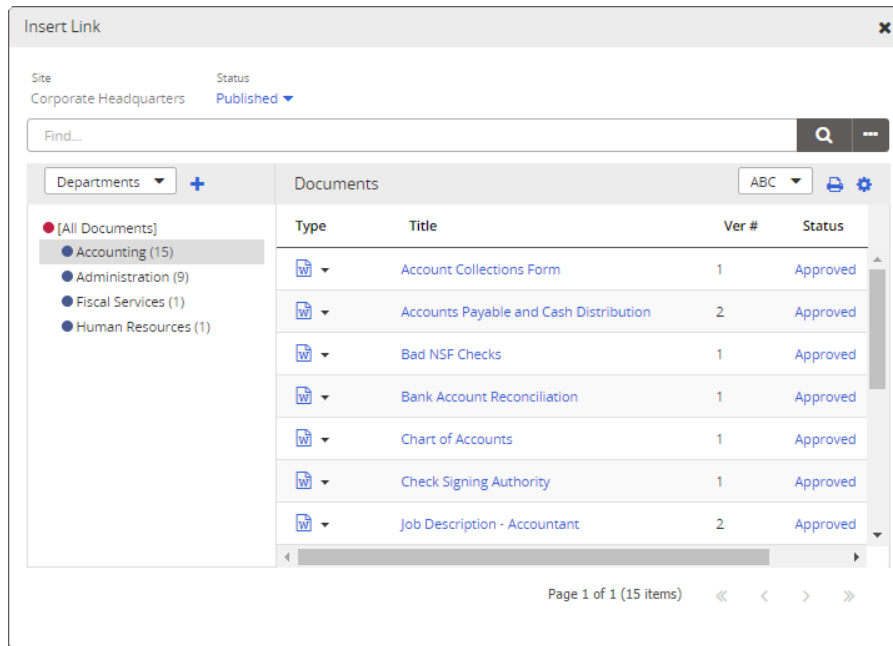

### 3. Do one of the following:

- If you accessed **Attachments** from the **PolicyTech Tools** panel (while editing a document after selecting **Open with Microsoft Office Online** or **Open in Office**), skip to step 4.
- Otherwise, click **Existing Content**.

4. Find the document you want to link to, and then click its title.

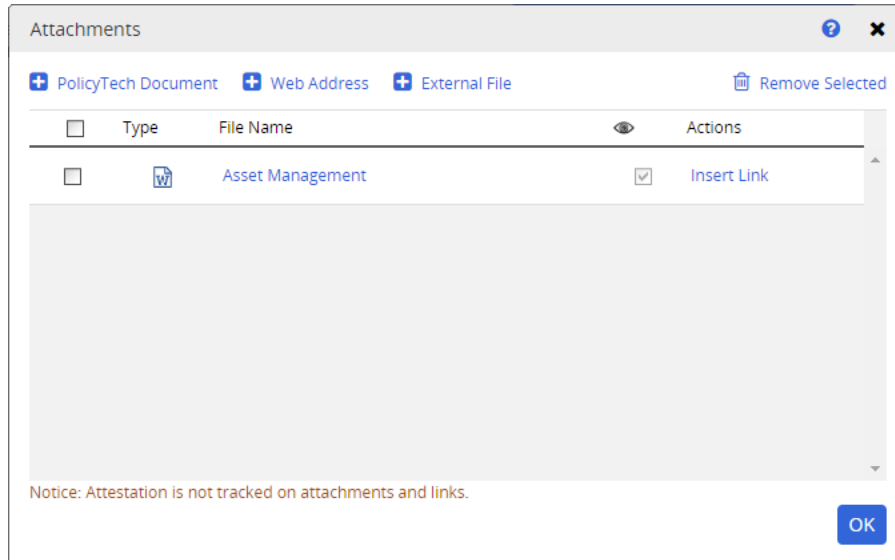

5. Do one of the following:

- Click **Add Another**, and then repeat step 4 above.
- Click **Done**, and then move on to the next step.

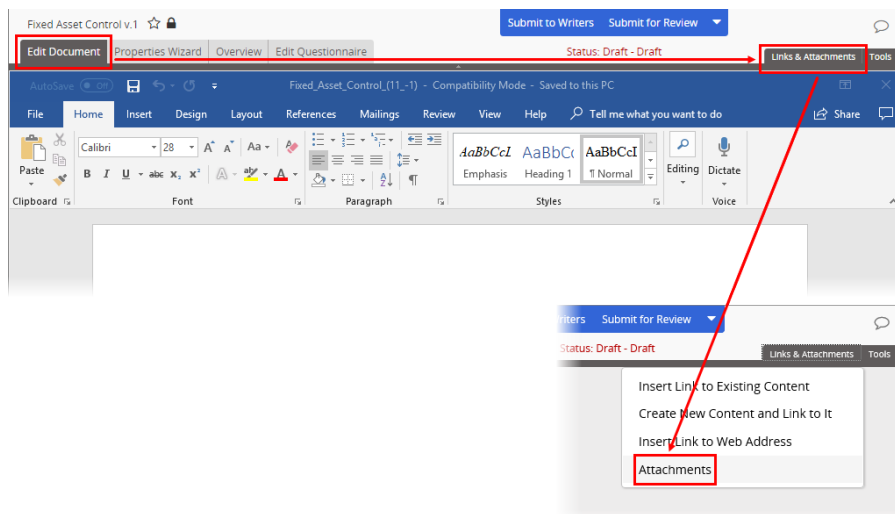

6. Click **OK** to close the **Attachments** window.

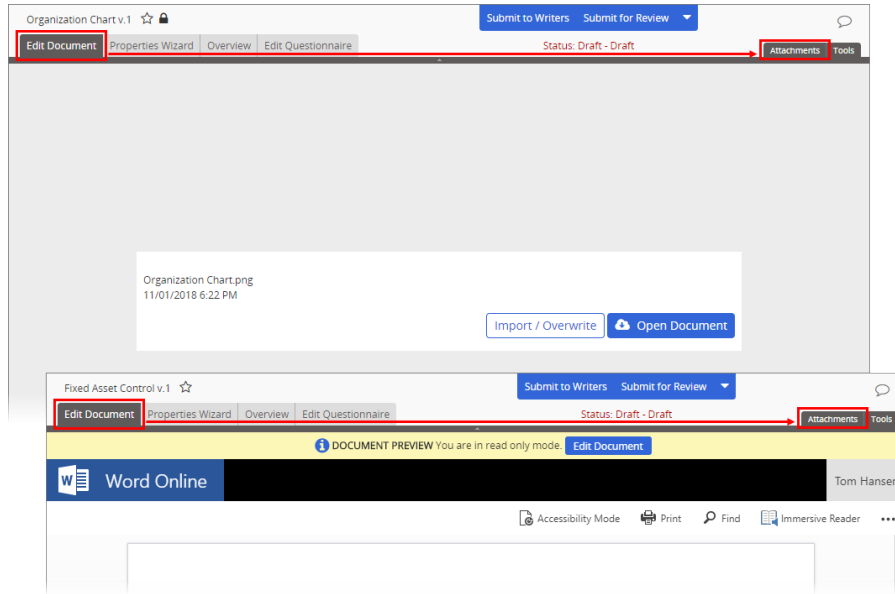

## Listing a Link to a New (Not Yet Created) PolicyTech Document

The way you access the **Attachments** list depends on the type of document you're working with and which Microsoft® Office integration PolicyTech is set up to use.

1. To access the **Attachments** list, do one of the following:
  - Click the **Edit Document** tab and, if the content looks like that shown below, click **Links & Attachments**, and then click **Attachments**.

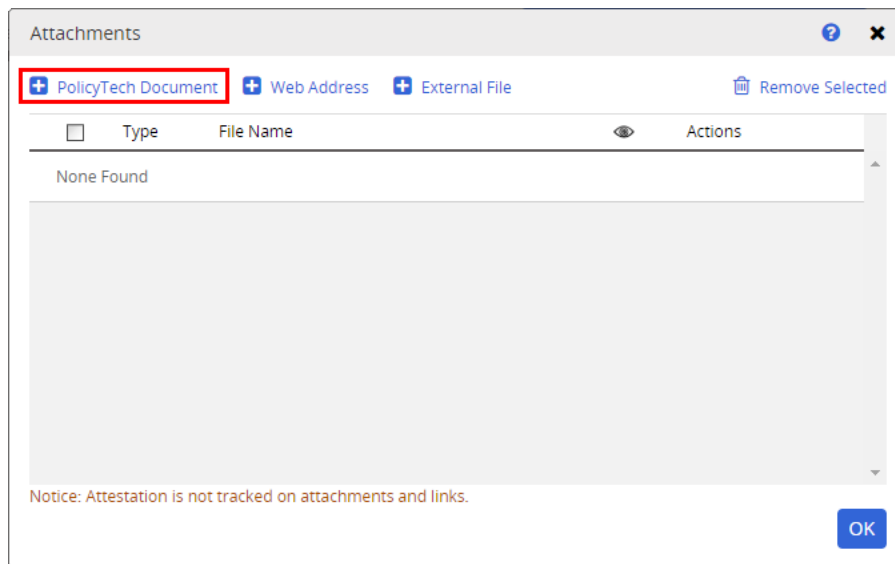

- Click the **Edit Document** tab and, if content looks like either of the following, click **Attachments**.

**Important:** If you're editing a document after selecting **Open with Microsoft Office Online** or **Open in Office**, you need to return to preview mode to be able to create a new document and link to it at the same time. Save your work, click **Back to PolicyTech**, and then click **Attachments**.

2. Click **PolicyTech Document**.

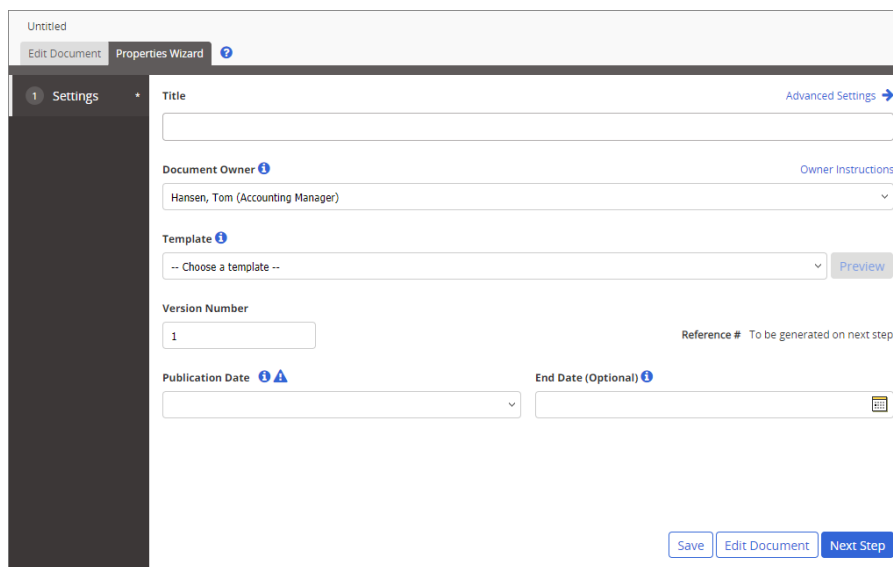

3. Click **New Document**.

4. A new document opens with the **Settings** step of the **Properties Wizard** displayed. Type a title, select a template, and then click **Save**.

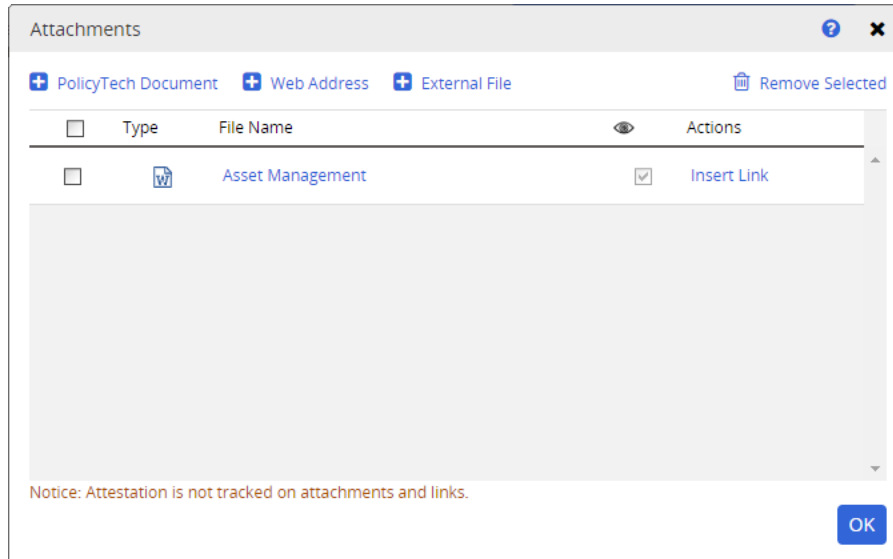

**Note:** You can finish creating the new document at any time. The steps that follow are for completing the action of adding a link to the original document.

5. The link to the new document is added to the **Attachments** window. To return to the original document and finish the new document later, do one of the following:
  - Minimize the new document window.
  - Click  or **Options**, and then click **Save and Close**.
6. Do one of the following:
  - Click **Add Another**, and then repeat steps 4 and 5 above.
  - Click **Done**, and then move on to the next step.

7. Click **OK** to close the **Attachments** window.

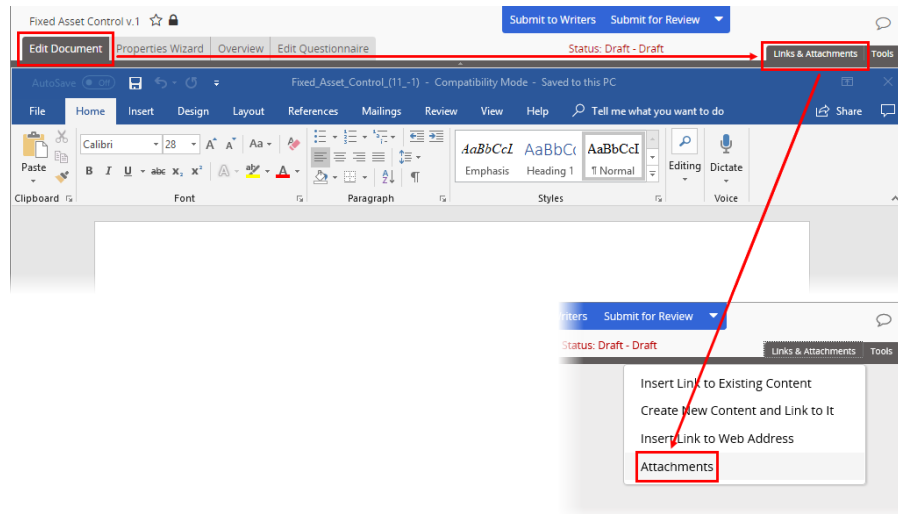

## Listing a Link to a Web Address

Using the **Attachments** window, you can add a web address link to any file type without having to insert a link into the document content. An assignee can then access the link by opening the **Attachments** window.

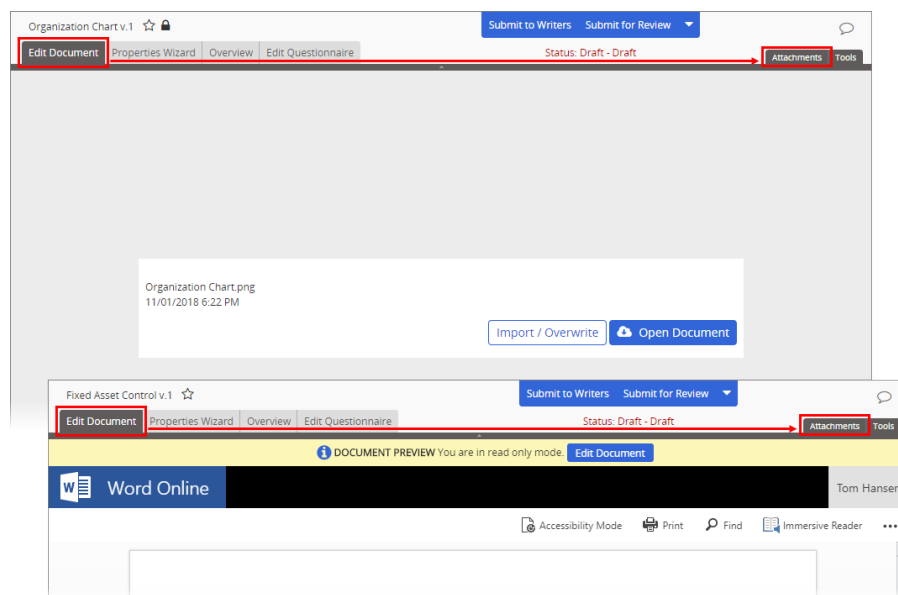

### Adding a Web Address Link in the Attachments Window

The way you access the **Attachments** list depends on the type of document you're working with and which Microsoft® Office integration PolicyTech is set up to use.

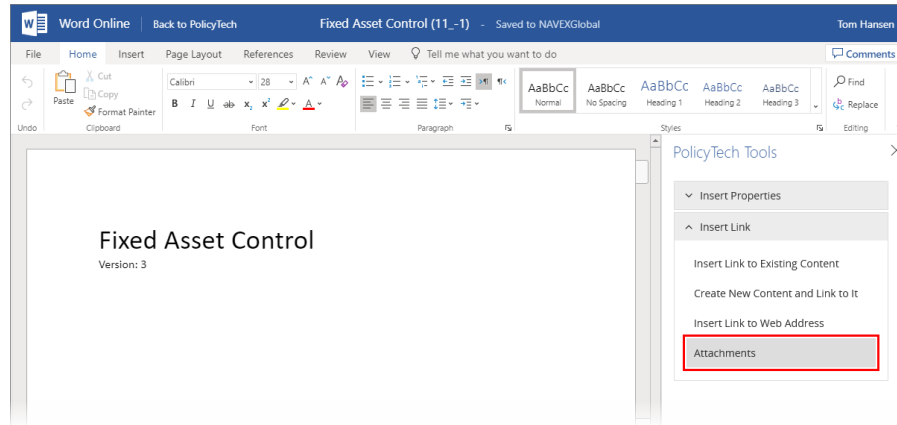

1. To access the **Attachments** list, do one of the following:
  - Click the **Edit Document** tab and, if the content looks like that shown below, click **Links & Attachments**, and then click **Attachments**.

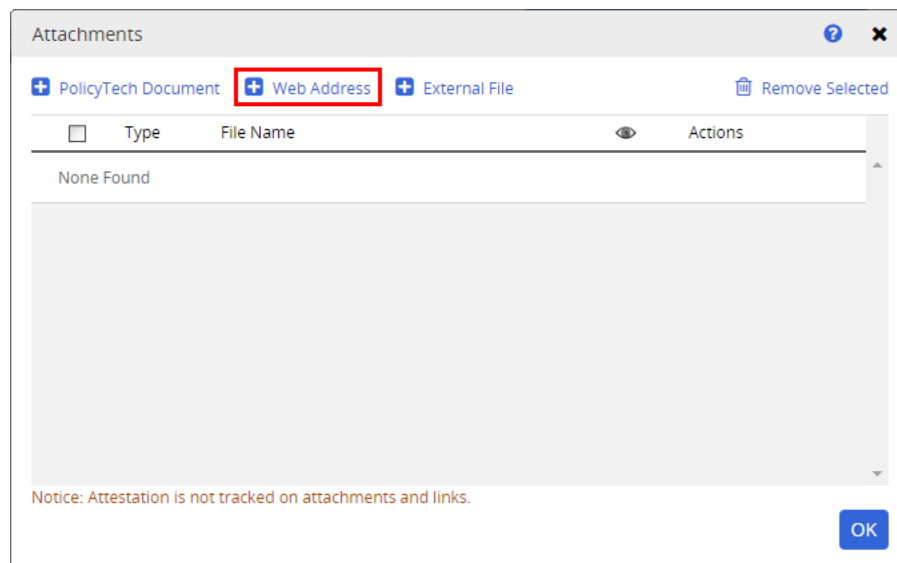

- Click the **Edit Document** tab and, if content looks like either of the following, click **Attachments**.

- While editing a document after selecting **Open with Microsoft Office Online** or **Open in Office**, expand the **Insert Link** menu in the **PolicyTech Tools** panel, and then click **Attachments**.

2. Click **Web Address**.

3. In the **Web Address** box, type or copy and paste the web address.
4. In the **Display Text** box, type a descriptive name for the link that will appear in the **Attachments** window.
5. Click **Add**.

Add Web Address

Web Address

http://www.navexglobal.com

Display Text

NAVEX Global Website

Notice: Attestation is not tracked on attachments and links.

Cancel Add

6. Do one of the following:

- Click **Add Another**, and then repeat steps 3 through 5 above.
- Click **Done**, and then move on to the next step.

Confirm

Added Successfully.

Would you like to add another?

Done Add Another

7. (Optional) By default, links added in the **Attachments** window are accessible to assignees and they are expected to read the linked material in addition to the main document. To hide a link from assignees, click to clear its check box in the  column.

**Important:** If you also insert this link into the document's body, clearing the  check box does not hide the inserted link.

8. Click **OK** to close the **Attachments** window.

## Attaching an External File

You can attach any type of file to a document in PolicyTech. However, you may want to create or upload a document into PolicyTech instead of attaching it so that the file can be controlled and tracked. Please consider the following facts about attachments before deciding to attach an external file.

Attachments:

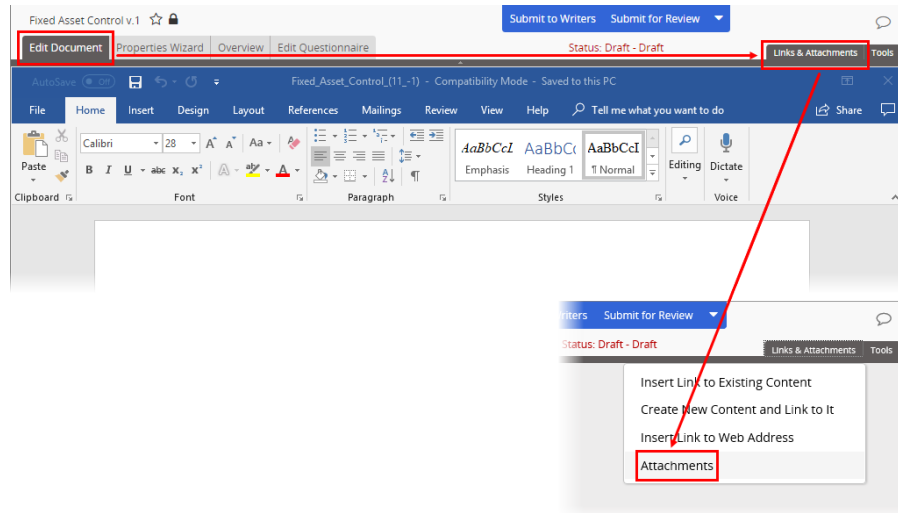

- Attachments are not indexed or searchable.
- Attachments are not controlled independently.
- Attachments cannot be attested to independently (cannot be marked as read, for example).
- Attachments cannot be linked to from within any document.
- Attachments cannot be printed in bulk if they are not Word or Excel files.
- Attachments are only accessible from within the documents where they are added.
- Attachments are actually uploaded, static copies of external files. Updates to the external files will not be reflected in uploaded attachments.

**Note:** To view a file attached to a document, the assignee must have a program installed on his or her computer that is capable of opening that type of file.

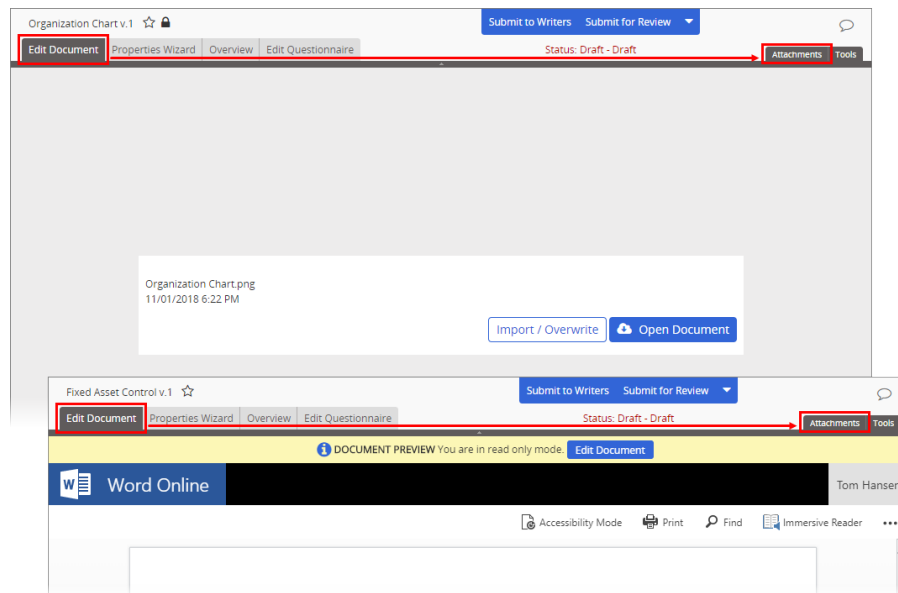

The way you access the **Attachments** list depends on the type of document you're working with and which Microsoft® Office integration PolicyTech is set up to use.

1. To access the **Attachments** list, do one of the following:

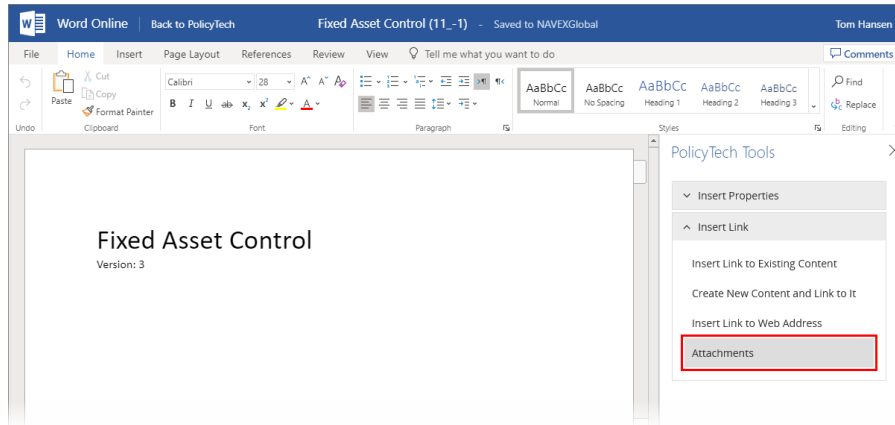

- Click the **Edit Document** tab and, if the content looks like that shown below, click **Links & Attachments**, and then click **Attachments**.

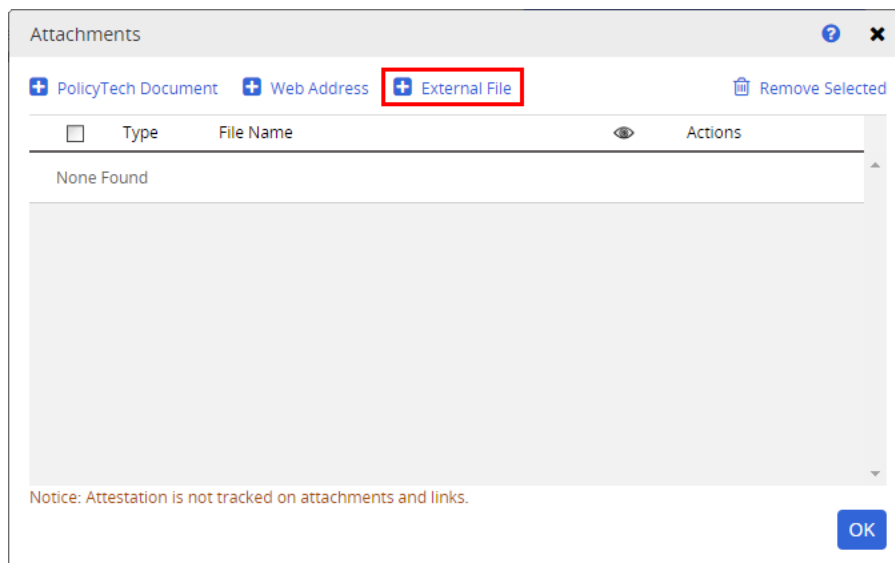

- Click the **Edit Document** tab and, if content looks like either of the following, click **Attachments**.

- While editing a document after selecting **Open with Microsoft Office Online** or **Open in Office**, expand the **Insert Link** menu in the **PolicyTech Tools** panel, and then click **Attachments**.

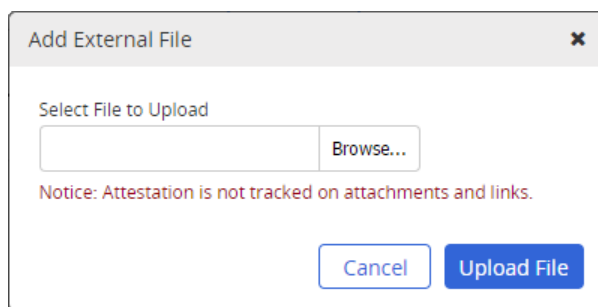

2. In the **Attachments** window, click **External File**.

3. Click **Browse**, navigate to and click a file, and then click **Open** to add the file name to the **Select File to Upload** box.

4. Click **Upload File** to create a copy of the file within PolicyTech.

5. Do one of the following:

- Click **Add Another**, and then repeat step 4 above.
- Click **Done**, and then move on to the next step.

6. (Optional) By default, links added in the **Attachments** window are accessible to assignees and they are expected to read the linked material in addition to the main document. To hide a link from assignees, click to clear its check box in the  column.

**Important:** If you also insert this link into the document's body, clearing the  check box does not hide the inserted link.

7. Click **OK** to close the **Attachments** window.

## Managing Attachments and Links

In the **Attachments** window, you can do the following:

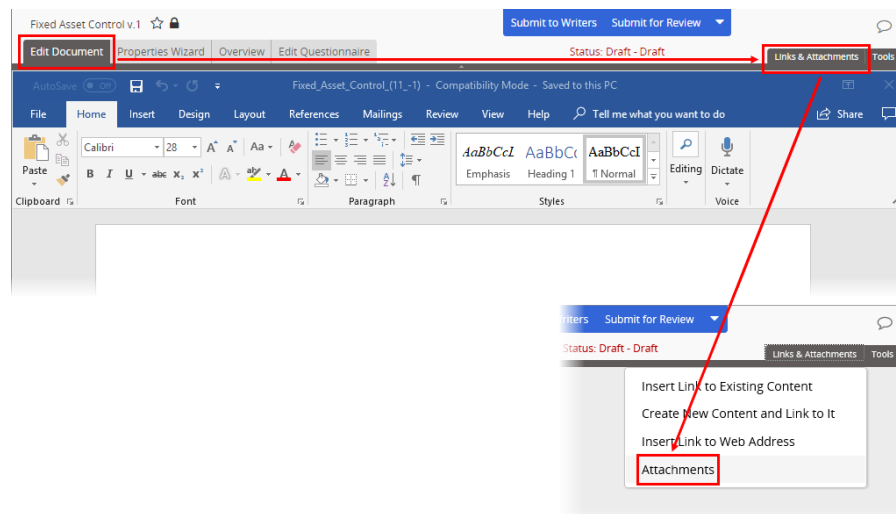

- Add attachments and reference links (see [Attaching Files and Adding Reference Links](#))
- Edit an attachment or reference link (see [Editing an Attachment or Link](#))

- Remove an attachment or reference link (see [Removing an Attachment or Link](#))
- Show or hide the attachment or reference link for assignees (see [Hiding Attachments and Links](#))
- Insert an existing link into the document (see [Inserting a Link](#))
- Convert an attached external file into a controlled PolicyTech document (see [Converting an Attachment](#))

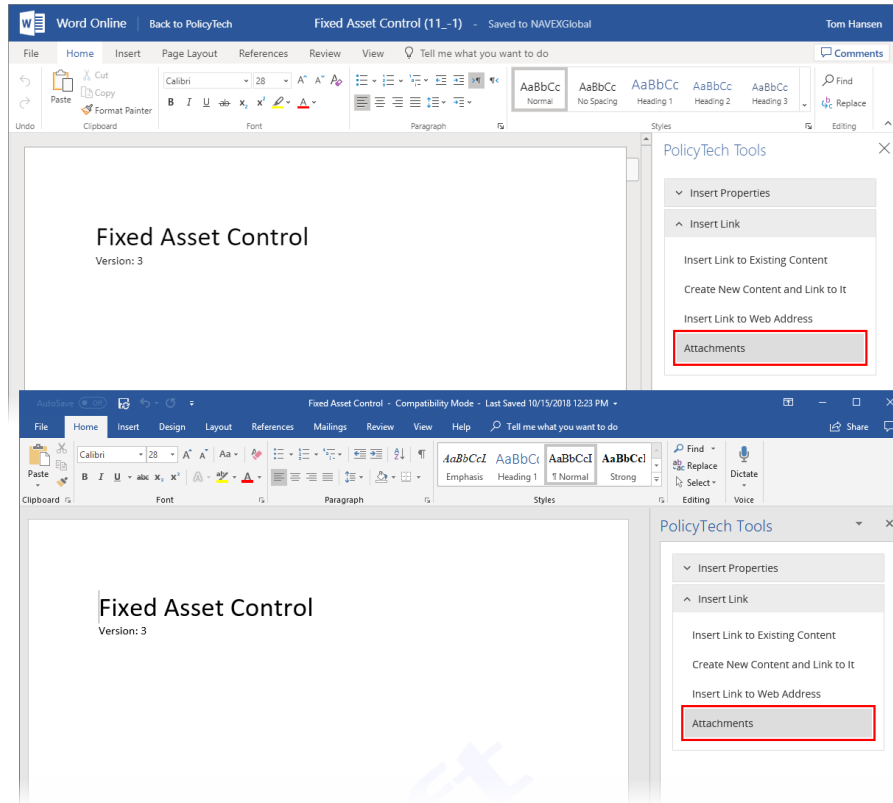

## Inserting a Link

These steps are for inserting a link that has already been added to the **Attachments** window. To create a new link and insert it at the same time, see [Inserting Links to Documents and Websites](#).

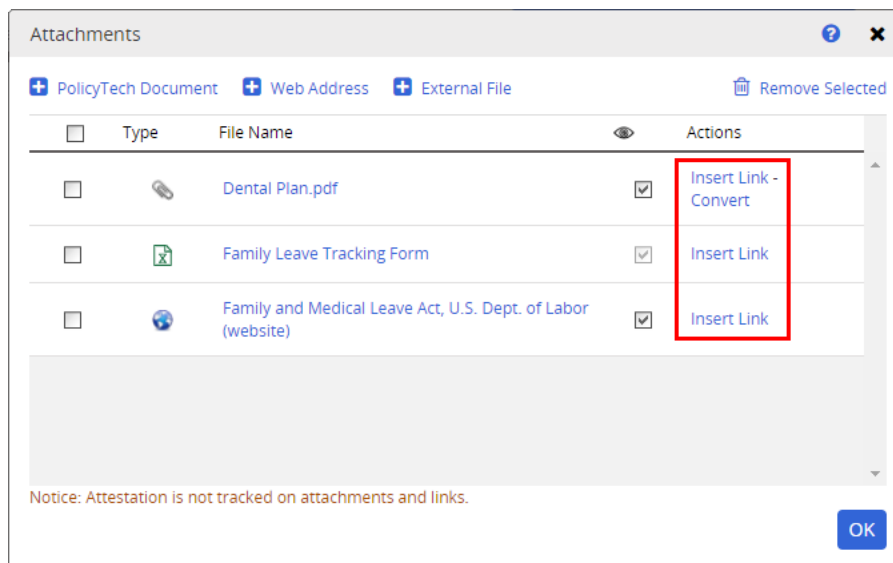

1. While editing a document, place the cursor where you want to insert a link.
2. To access the **Attachments** list, do one of the following:
  - If your screen looks like the one shown below, click **Links & Attachments**, and then click **Attachments**.

- If your screen looks like one of those shown below, expand the **Insert Link** menu in the **PolicyTech Tools** panel, and then click **Attachments**.

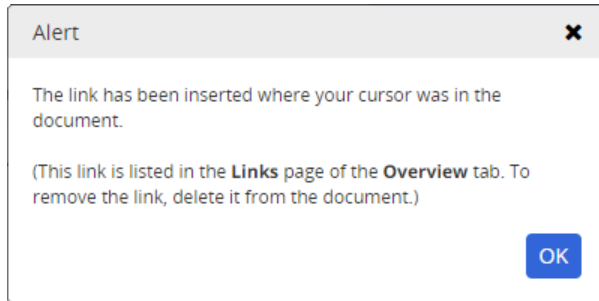

3. In the **Attachments** window, click **Insert Link** or **Insert Link - Convert** for the attachment or link you want to insert into the document.

4. What you see next depends on the type of link you're inserting.
  - **PolicyTech Document:** An alert is displayed saying that the link has been inserted into the document. Click **OK** to clear the alert, and the

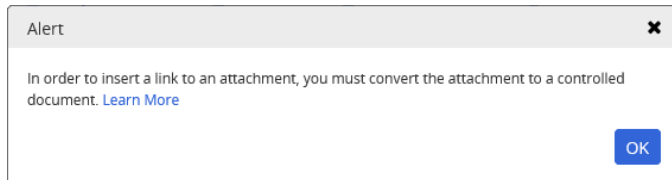

click **OK** to close the **Attachments** window.

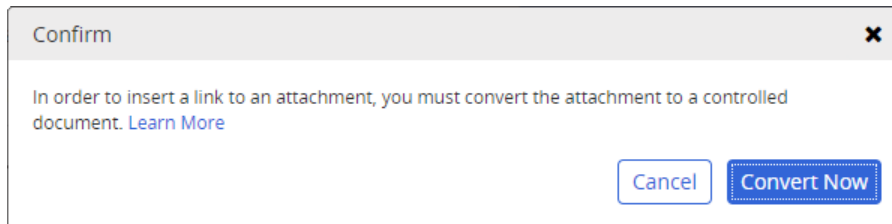

- **Web Address:** In the **Insert Link** window, select and copy the link, click **Return to Document**, and then paste the link.

- **External File:** Before you can insert a link to an external file attachment, you must convert the attachment into a PolicyTech document. Do one of the following:
  - If you see the following prompt, continue with [Converting an External File Attachment using Office Online Module](#) below.

- If you see the following prompt, continue with [Converting an External File Attachment using WordModulePlus](#) below.

**Important:** PolicyTech requires that you convert the uploaded copy of the external file into a PolicyTech document before inserting a link to it. This helps ensure that the attachment is tracked and kept up to date. For example, if

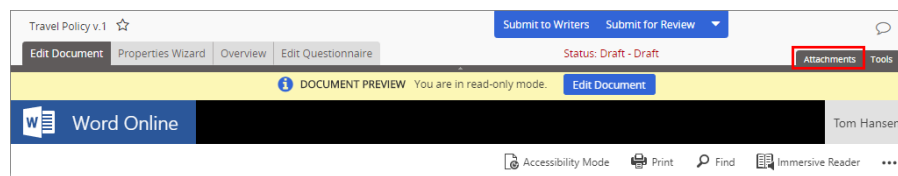

someone updates the converted attachment in PolicyTech, the owners of any documents containing a link to the converted document receive notification to update this link.

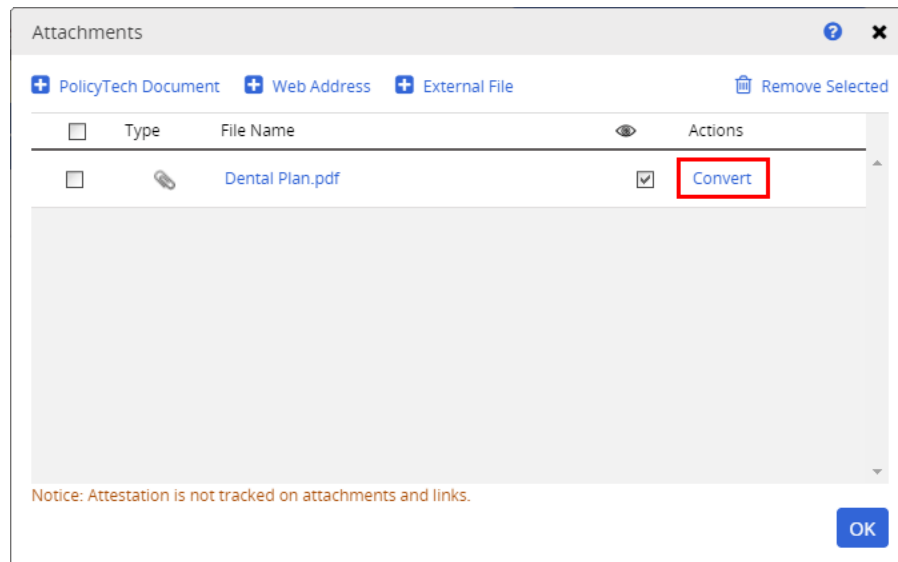

### Converting an External File Attachment using Office Online Module

To convert an external file attachment into a PolicyTech document, you must be in preview mode.

1. If you are currently editing a document (after selecting **Open with Microsoft Office Online** or **Open in Office**), save your work, and then click **Back to PolicyTech**.
2. Click **Attachments**.

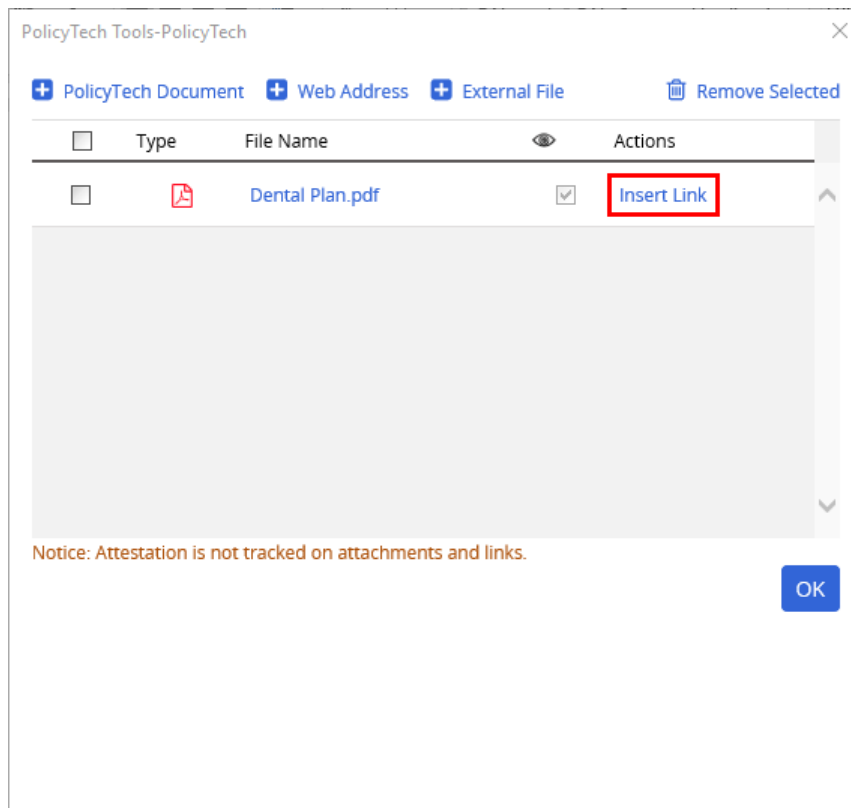

3. In the **Actions** column, click **Convert**, and then click **Convert Now**.

4. A new document opens with the settings step **Settings** of the **Properties Wizard** displayed and the attachment's file name as the title, which you can change. Select a template, and then click **Save**.

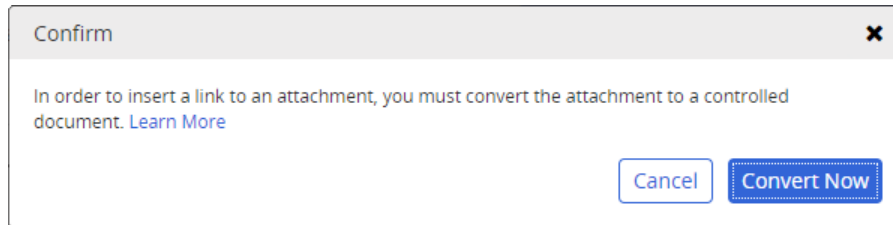

**Note:** If the external file is not a Word, Excel, PowerPoint, or HTML document, select an **Upload File** template.

5. Back in the original document window, **Click Edit** document to return to edit mode and insert the link to the newly converted document.
6. Place the cursor where you want the link inserted, expand the **Insert Link** menu in the **PolicyTech Tools** panel, and then click **Attachments**.
7. For the newly converted file, click **Insert Link**, and then click **OK** twice.

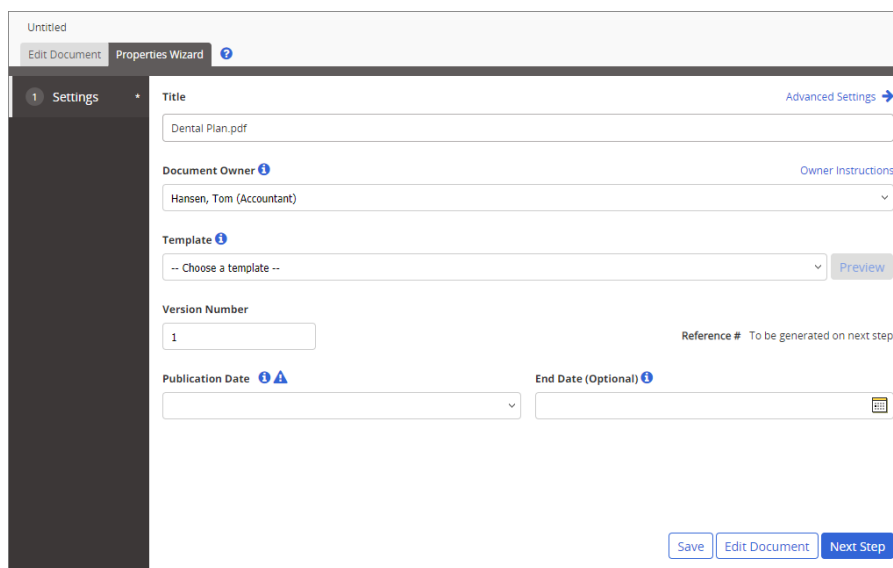

## Converting an External File Attachment using WordModulePlus

1. After clicking **Insert Link**, you'll see the following prompt. Click **Convert Now**.

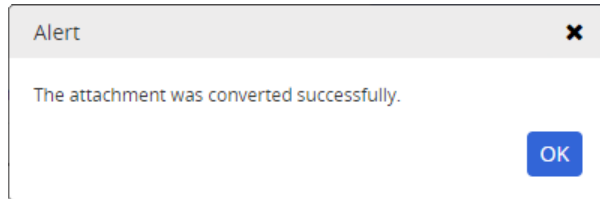

2. A new document opens with the settings step **Settings** of the **Properties Wizard** displayed and the attachment's file name as the title, which you can change. Select a template, and then click **Save**.

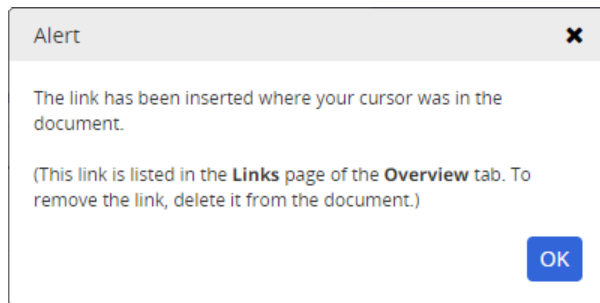

**Note:** If the external file is not a Word, Excel, PowerPoint, or HTML document, select an **Upload File** template.

3. The link to the converted document is inserted into the document. To return to the original document and finish the converted document later, either minimize the converted document window, or click , and then click **Save and Close**.
4. An alert is displayed saying that the attachment has been converted. Click **OK**.

5. Back in the **Attachments** window, click **Insert Link** again for the converted external file (now a PolicyTech document). An alert is displayed saying that the link has been inserted into the document. Click **OK** to clear the alert, and then click **OK** to close the **Attachments** window.

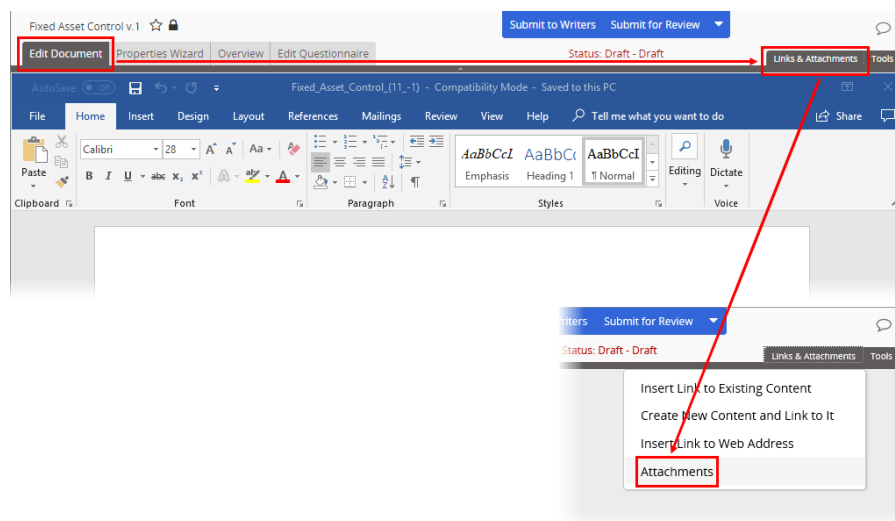

## Editing an Attachment or Link

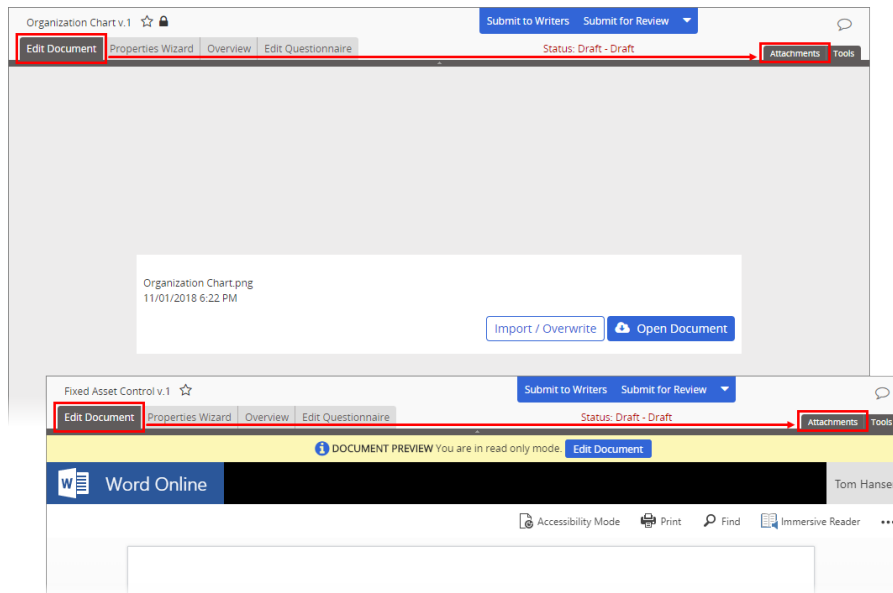

You cannot change the file or web address of an existing attachment or link. If one needs to be changed, remove it and then create a new one. See [Removing an Attachment or Link](#) and [Attaching Files and Adding Reference Links](#).

## Removing an Attachment or Link

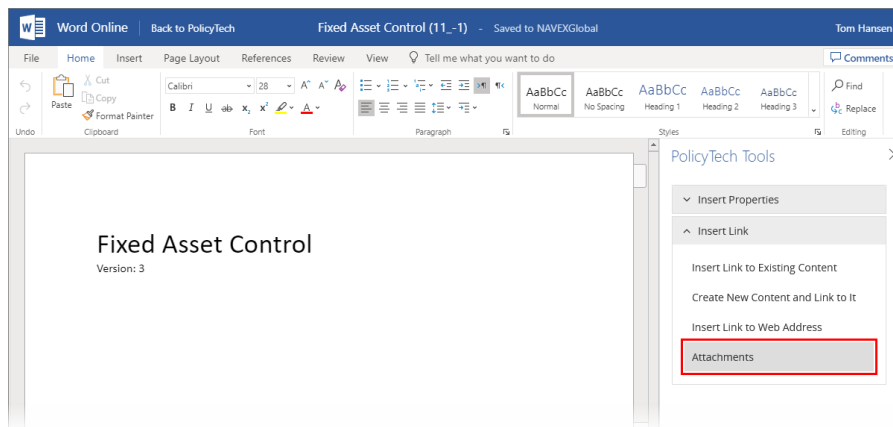

1. To access the **Attachments** list, do one of the following:
  - Click the **Edit Document** tab and, if the content looks like that shown below, click **Links & Attachments**, and then click **Attachments**.

- Click the **Edit Document** tab and, if content looks like either of the following, click **Attachments**.

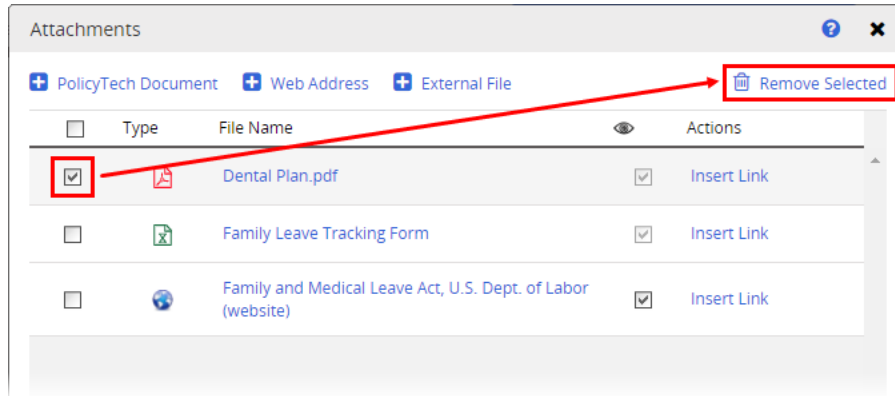

- While editing a document after selecting **Open with Microsoft Office Online** or **Open in Office**, expand the **Insert Link** menu in the **PolicyTech Tools** panel, and then click **Attachments**.

2. Do one of the following:

- Select the attachments or reference links you want to remove, and then click **Remove Selected**.

- To remove all attachments and links, select the check box in the column header, and then click **Remove Selected**.

3. Click **OK** to close the **Attachments** window.

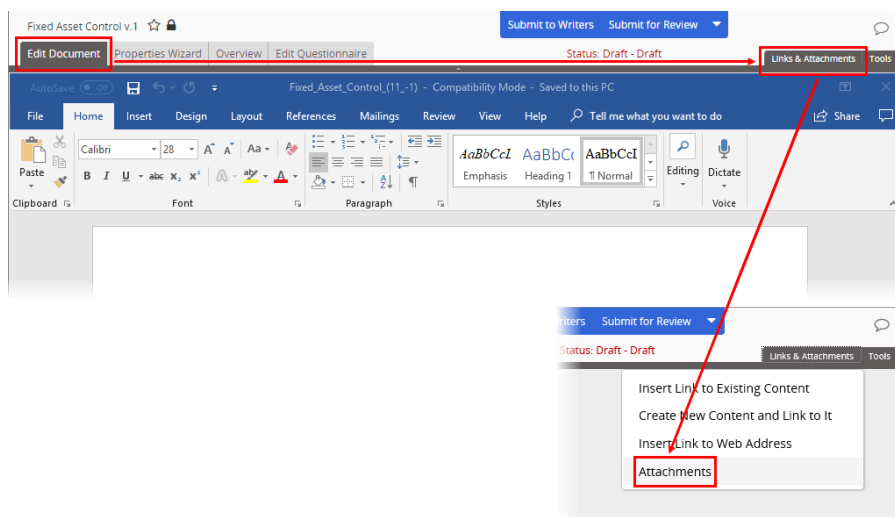

### Hiding Attachments and Links

By default, attached files are accessible to assignees and they are expected to read them in addition to the main document. You can hide an external file attachment or web address link from assignees but leave it visible to those with permission to edit the document (the document owner, an assigned proxy author or writer, or an administrator). This retains the reference without requiring assignees to read the referenced material.

**Note:** Links to other PolicyTech documents cannot be hidden. They are always accessible to assignees.

1. To access the **Attachments** list, do one of the following:

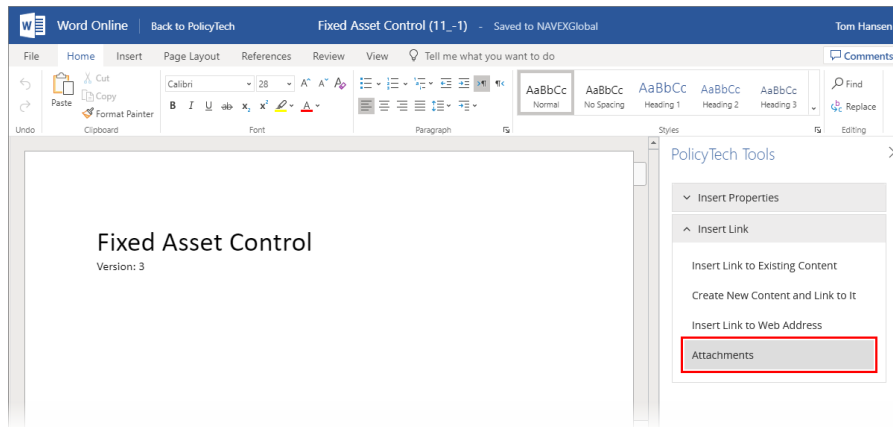

- Click the **Edit Document** tab and, if the content looks like that shown below, click **Links & Attachments**, and then click **Attachments**.

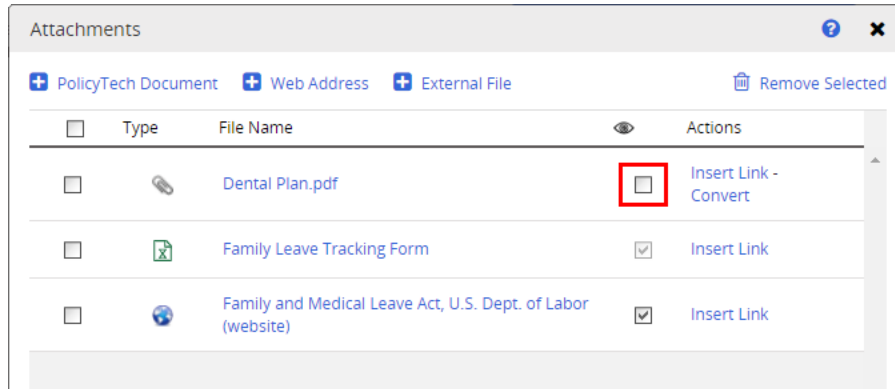

- Click the **Edit Document** tab and, if content looks like either of the following, click **Attachments**.

- While editing a document after selecting **Open with Microsoft Office Online** or **Open in Office**, expand the **Insert Link** menu in the **PolicyTech Tools** panel, and then click **Attachments**.

2. In the column with  in the header, click to clear the check box of each external file attachment or web address link that you want to hide.

3. Click **OK** to close the **Attachments** window.

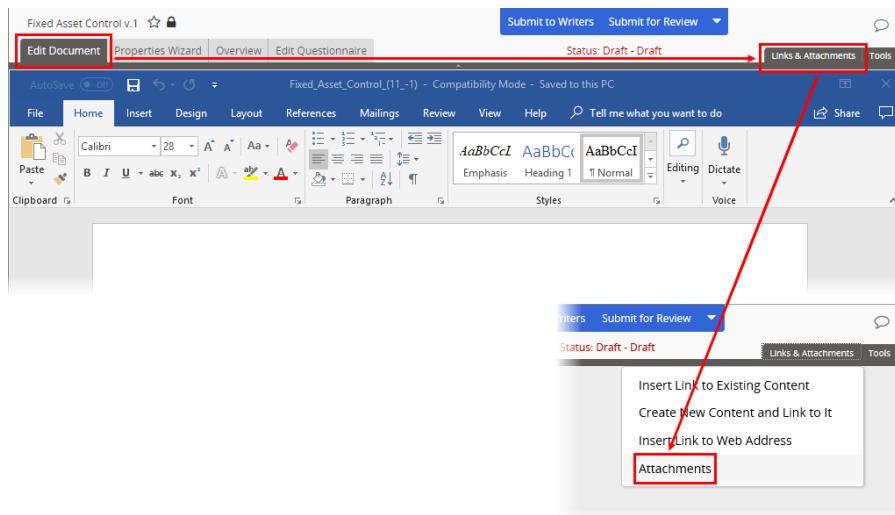

### Converting an Attachment

When you attach an external file, PolicyTech only uploads a copy of that file into the PolicyTech database. You cannot be sure that a user has read an attachment, because attachments are not tracked. If you want to control and track an external file, you will first need to convert it into a PolicyTech document.

**Note:** You can also convert an external file into a PolicyTech document while inserting a link to that file into the document (see [Inserting a Link](#)).

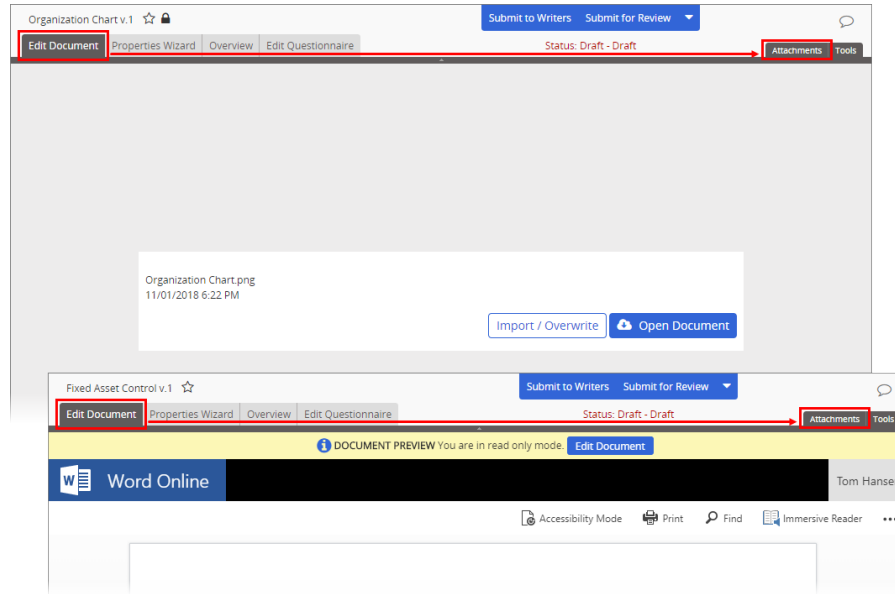

1. To access the **Attachments** list, do one of the following:

- Click the **Edit Document** tab and, if the content looks like that shown below, click **Links & Attachments**, and then click **Attachments**.

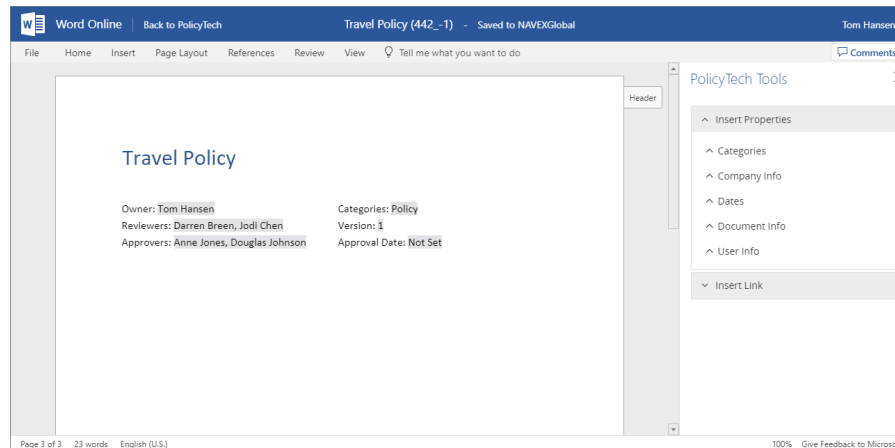

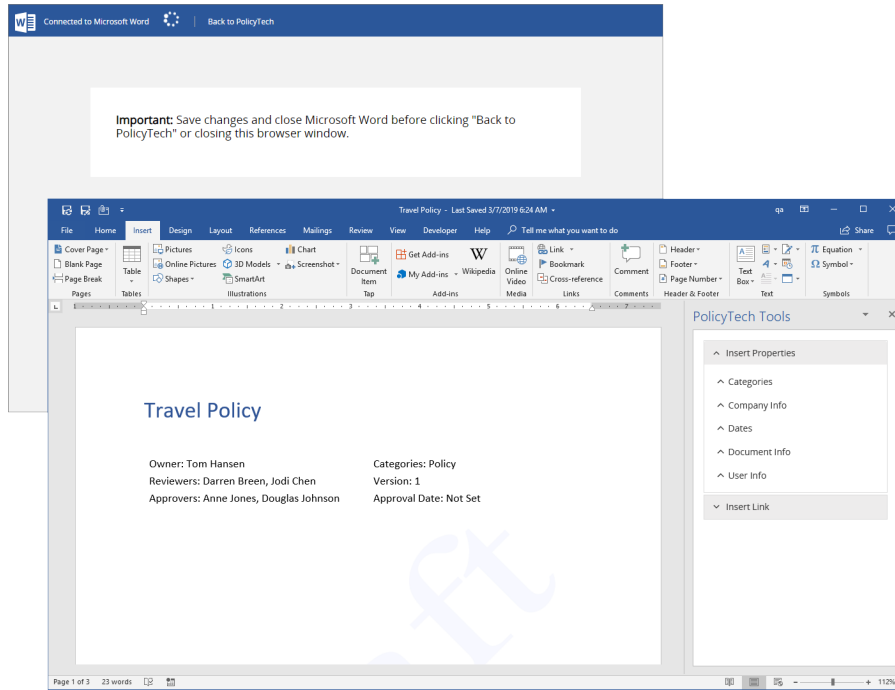

- Click the **Edit Document** tab and, if content looks like either of the following, click **Attachments**.

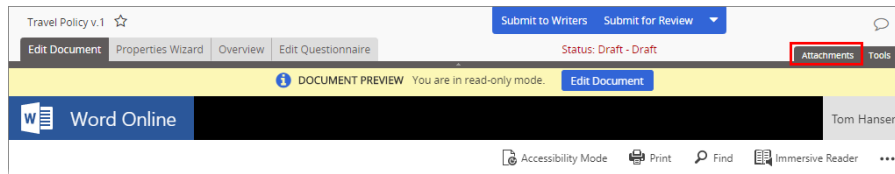

- If you're editing a document after selecting **Open with Microsoft Office Online** or **Open in Office** (your screen looks similar to one of those below, with the **PolicyTech Tools** panel on the right), click **Back to PolicyTech** (if your screen looks like the first one below), or save the document and close the application window, and then click **Back to PolicyTech** and **Continue** (if your screen looks like the second one below).

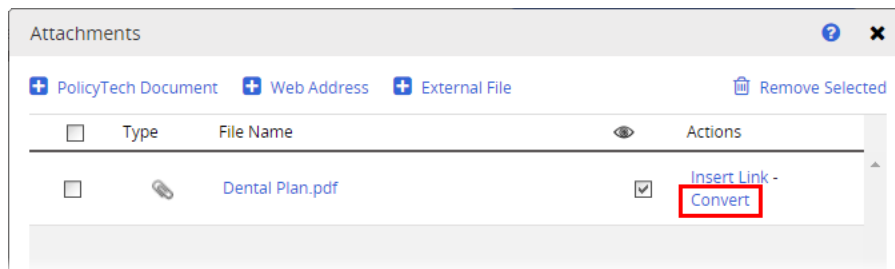

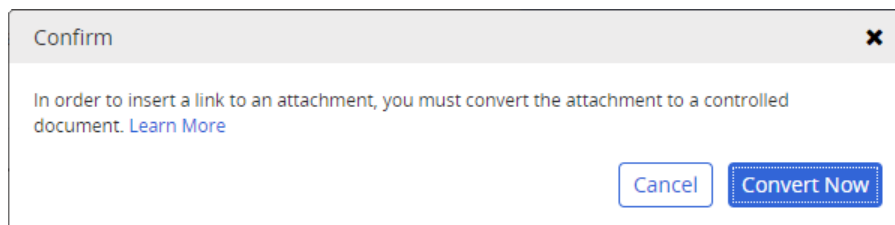

Then, in preview mode, click **Attachments**.

2. In the **Attachments** window, in the **Actions** column, click **Convert** for an external file.

3. In the **Confirm** window, click **Convert Now**.

4. A new document opens with the **Settings** step of the **Properties Wizard** displayed and the attachment's file name as the title. Change the title, if desired, select a template, and then click **Save**.

**Note:** If the external file is not a Word, Excel, PowerPoint, or HTML document, select an **Upload File** template.

5. When you click **Save**, the external file is automatically uploaded into the new document. Finish creating the document (see [Creating a Document](#)), and then save and close it.
6. Back in the **Attachments** window of the original document, click **OK**. Notice that the **Convert** option for the converted document is no longer available.
7. Click **OK** to close the **Attachments** window.

## Creating a Document Questionnaire

When you create a document, you can include a questionnaire as a quiz to test assignees' comprehension or as a survey to gather information from the assignees. Assignees will then be required to complete the quiz with a passing score or answer all survey questions in order to mark the document as read.

1. In a draft document, click the **Edit Questionnaire** tab, and then click **Create Questionnaire**.

### Notes:

- As a document owner, you can also add a questionnaire while the document is in the Collaboration, Review, or Approval status. An

administrator can add a questionnaire to an approved document by editing the document in its current state.

- If you need to create a stand-alone questionnaire (one that is not attached to a document), see [Creating a Questionnaire](#).

3. Click **Questions & Answers**, and then compose the questionnaire content (see [Adding Questions and Answers to a Questionnaire](#)).

#### Important:

- A questionnaire's validity is checked when you submit the document for review or approval. If there are errors, you must correct them before you can successfully submit the document.
- A questionnaire is activated as soon as the document containing the questionnaire is approved.

## Adjusting Questionnaire Settings

The available settings depend on whether the **Quiz** or **Survey** questionnaire type is selected. The settings also vary slightly depending on whether you're creating a stand-alone questionnaire or a questionnaire in a document.

**Note:** When creating a stand-alone questionnaire, **Survey** is selected by default. When adding a questionnaire to a document, **Quiz** is selected by default.

### Quiz Settings

Select the **Quiz** type of questionnaire to create questions whose answers will be scored. Quizzes are generally used to test concept knowledge or reading comprehension. If you create a stand-alone quiz, assignees will be required to complete the quiz with a passing score in order to complete their assigned **Read / Complete** task. If you create a quiz in a document, assignees will be required to complete the quiz with a passing score before they can mark the document as read.

 Show the user's response  
 Show the correct answer

+ [Create a stand-alone Questionnaire.](#)

Each quiz setting is described below.

**Minimum Score to Pass.** Type the percentage of questions assignees must answer correctly in order to pass the quiz. The default setting is **100**.

**Show Printable Certificate.** Select this option to give assignees the ability to print out a certificate once they pass the quiz.

**Disable Questionnaire (for document questionnaires only).** Select this option if, after creating a quiz in a document, you decide not to require it for marking the document as read.

To restrict access to these reports, select **Restrict results to administrators and the owner**.

**Questionnaire Introduction.** (Optional) In the **Questionnaire Introduction** box, type text that you want to appear at the top of the quiz. The introduction text will be preceded by "Read This First."

**Randomization.** By default, all questions you add under a section are included in the quiz. If you want PolicyTech to randomly select one question from each section and include only that question in the quiz, select **Show one random question per section**.

**Disable Numbering.** If you want the question numbers hidden when users take this quiz, select **Disable numbering on questionnaire**.

**Notes:**

- **Disable Numbering** is automatically selected and unchangeable if, for **Randomization**, you select **Show one random question per section**.
- This option hides numbers in the published quiz only. Numbers are still shown when editing questions and answers.

**Review.** By default, when assigned reviewers and approvers look at a quiz, correct answers are not indicated. To change this, select **Show correct answers to reviewers and approvers**.

**Questionnaire Results: Questions.** To show questions when an assignee fails a quiz, click **Show all questions** or **Show incorrectly answered questions**. **Don't show questions** is selected by default.

**Important:** Selecting an option to show questions also shows question feedback, if any exists. If you are opting to show questions for the first time for this quiz, none of the already added questions will have feedback text as the **Feedback** box in the **Question** window is disabled until you've opted to show questions. If you want to include feedback, you'll need to edit the questions to add it. (See [Changing a Questionnaire](#) for help with editing questions.)

**Questionnaire Results: Answers.** The options under the **Answers** area are selectable only if one of the options for showing questions is selected. To show answers with questions when an assignee fails the quiz, select one or more of the following:

- **Show all possible answers.** Lists all of a question's answers.
- **Show the user's response.** Shows only the answer the assignee selected and marks it with  if the answer is correct or with  if it's incorrect.
- **Show the correct answer.** Displays only the correct answer preceded by .

**Create a stand-alone Questionnaire (for document questionnaires only).** While in a quiz created for a document, click **Create a stand-alone Questionnaire** to open a new stand-alone quiz containing the same questions, answers, and settings as the document quiz.

**Note:** This does not affect the original document quiz in any way. It only creates a copy of the document quiz and creates a new stand-alone quiz from that copy.

### Survey Settings

Select the **Survey** type of questionnaire to create questions whose answers will not be scored. Surveys are generally used to gather information. If you create a stand-alone survey, assignees will be required to complete the survey in order to complete their assigned **Read / Complete** task. If you create a survey in a document, assignees will be required to complete the survey before they can mark the document as read.

**Show Printable Certificate.** Select this option to give assignees the ability to print out a certificate once they complete the survey.

**Disable Questionnaire (for document questionnaires only).** Select this option if, after creating a survey in a document, you decide not to require it for marking a document as read.

**Confidentiality.** Survey results can be seen by running a questionnaire report (**Questionnaire Results by Content** or **Questionnaire Results by User**). By default, those with the following role or system permission assignments and with access to the document containing the survey or to the stand-alone survey can run these reports and see survey results:

- Document Owner or Questionnaire Owner (**Questionnaire Results by Content** only)
- Manager (**Questionnaire Results by User** only)
- Report Manager
- Administrator

To restrict access to these reports, select **Restrict results to administrators and the owner.**

**Questionnaire Introduction.** (Optional) In the **Questionnaire Introduction** box, type text that you want to appear at the top of the survey. The introduction text will be preceded by "Read This First."

**Disable Numbering.** If you want the question numbers hidden when assignees complete this survey, select **Disable numbering on questionnaire**.

**Note:** This option hides numbers in the published survey only. Numbers are still shown when editing questions and answers.

**Create a stand-alone Questionnaire (for document questionnaires only).** While in a survey created for a document, click **Create a stand-alone Questionnaire** to open a new stand-alone survey containing the same questions, answers, and settings as the document survey.

**Note:** This does not affect the original document survey in any way. It only creates a copy of the document survey and creates a new stand-alone survey from that copy.

## Adding Questions and Answers to a Questionnaire

1. Do one of the following to start adding questions and answers to a questionnaire:
  - If the **Questions & Answers** page is already displayed, move on to the next step.

- If you're currently on the **Questionnaire Settings** page, click **Questions & Answers**.

- If you haven't started a questionnaire yet, follow the instructions in [Creating a Questionnaire \(Overview\)](#) for a stand-alone questionnaire or [Creating a Document Questionnaire](#) before continuing.
2. (Optional) To include a section for the first group of questions, click **New Section**, type the section heading, and then click **Save**.

3. To add a question, click **New Question** near the upper left corner or click **New Question** in the section header.

**Important:** When you have only one section, clicking either **New Question** option does the same thing. However, if you have multiple sections, clicking **New Question** in the upper left corner adds a question to the first section, while clicking **New Question** in a section header adds the question to that section.

4. Select a **Question Type** option. As shown below, the options in the **Answers** area change based on the question type selected.

**Important:** If you change the question type after typing answers, those answers will be deleted.

**Note:** An open-ended question in a quiz-type questionnaire is not included when calculating a score.

The image displays three overlapping 'Question' editor windows. Each window has a title bar with a close button (X) and a warning icon with the text 'Changing this will delete your answers and any subquestions.'

- Top Window (Multiple Choice):** The 'Question Type' dropdown is set to 'Multiple Choice'. Below it, there are radio buttons for 'Only one answer is correct' (selected) and 'Any answer is acceptable (Useful for surveys)'. A red box highlights the 'Only one answer is correct' option.
- Middle Window (True or False):** The 'Question Type' dropdown is set to 'True or False'. Below it, there are radio buttons for 'Only one answer is correct' (selected) and 'Any answer is acceptable (Useful for surveys)'. A red box highlights the 'Only one answer is correct' option. Below the radio buttons, there are two input fields: 'True' and 'False', each with an 'Options' button next to it. A red box highlights this entire section.
- Bottom Window (Open Ended):** The 'Question Type' dropdown is set to 'Open Ended'. Below it, there are radio buttons for 'Only one answer is correct' (selected) and 'Any answer is acceptable (Useful for surveys)'. A red box highlights the 'Only one answer is correct' option. Below the radio buttons, there is a text box containing the text: 'The user will be presented with a text box to enter their response. The response will not affect the user's score negatively.' A red box highlights this text box.

Each window also includes a 'Question' text area (2048 character(s) left), a 'Feedback' section (Feedback is not enabled), and a 'Section' dropdown (General Questions) with '+', '-', and edit icons. At the bottom of the interface are 'Save and Close' and 'Add question >' buttons.

5. Type the question text.

To include a link, click , select **URL** or **E-mail address**, and then type at least the URL or email address.

**Notes:**

- A URL must include **http://** or **https://**.
- Text you type in the **Text** box will be displayed as the link text instead of the actual URL or email address.
- Text you type in the **ToolTip** box will be displayed when assignees completing the questionnaire hover their cursors over the link text.
- To remove a link, click anywhere in the link text, and then click .

6. If the current **Questionnaire Type** setting in **Questionnaire Settings** is **Quiz** and you selected **Multiple Choice**, **True or False**, or **Yes or No** as the current question type, then, directly below the **Answers** heading, do one of the following:

- If you're creating a quiz-type question, select **Only one answer is correct** (the default setting for new questions when **Questionnaire Type** is **Quiz**).
- If you're creating a survey-type question, select **Any answer is acceptable**.

**Note:** A question with **Any answer is acceptable** selected is included when calculating a score and any answer selection is counted as correct.

7. If this is a **Multiple Choice** question, type the answers you want users to select from.

**Notes:**

- The answers will appear in the questionnaire in the same order that you enter them here.
- To include more than four answers, click **Add answer**.
- To include less than four answers, simply leave unneeded answers empty.
- To delete an answer, click .

8. If you selected **Multiple Choice**, **True or False**, or **Yes or No** as the type for this question and selected **Only one answer is correct**, select the button to the left of the correct answer .

**Answers**

Only one answer is correct  Any answer is acceptable (Useful for surveys)

Place a check next to the correct answer.

Federal Family and Medical Leave Act

State laws

Local laws

All of the above

9. (Optional) At this point, you can set up several actions for PolicyTech to take based on which answer an assignee chooses. Click an item in the list below to go to detailed instructions about an action.

**Important:** Before you can assign an action, you must type a question and, if it's not an open-ended question, type answers and select the correct answer.

- [Present a follow-on question \(subquestion\)](#)
  - [Present a follow-on task](#)
  - [Flag an exception that can be viewed in a report](#)
  - [Create a case](#) (only if Case Management Integration has been enabled)
10. (Optional) If all of the following are true, add whatever text you feel would be useful for the quiz taker, such as an explanation of the concept the question is about.
- You activated feedback in **Questionnaire Settings** (see [Adjusting Questionnaire Settings](#)).
  - The current **Questionnaire Type** setting is **Quiz**.
  - **Only one answer is correct** is selected for the current question.

**Note:** You cannot add feedback to an open-ended question.

11. (Optional) If the current **Questionnaire Type** setting is **Quiz**, do one of the following for **Section**:

- Leave the current section selection.
- To create a new section and assign the current question to it, click , type the section description, and then click **Save**.
- To keep the question in the currently selected section and edit the section description, click , make changes, and then click **Save**.
- If you've already defined two or more sections and want to assign the current question to a different section, click  to the right of the currently selected section and select a different one.

12. Do one of the following:

- To continue creating the questionnaire, click **Add question**, and then repeat the steps above starting with step 4.
- If you're done adding questions, click **Save and Close**.

### **Creating a Subquestion**

1. To the right of an answer you've added, click **Options**, and then click **Add Sub Question**.

Question

**Question Type** ⚠ Changing this will delete your answers and any subquestions.

Yes or No

**Question**

I have accepted a gift worth more than \$25 from a vendor.

General Questions + -

Save and Close Add question >

A new **Question** window appears with the subquestion display condition at the top.

Question ✕

**⚠** This will create a subquestion which will only display under the following condition:

- **Question:** I have accepted a gift worth more than \$25 from a vendor.
- **Answer:** Yes

**Question Type** ⚠ Changing this will delete your answers and any subquestions.

Multiple Choice

**Question**

 

2048 character(s) left

**Answers**

Only one answer is correct     Any answer is acceptable (Useful for surveys)

Place a check next to the correct answer.

**Feedback** (Displays after taking questionnaire.)

Feedback is not enabled. (You can enable it by adjusting the **Questionnaire Results** options in the Questionnaire Settings.)

2. Define the subquestion the same as you would a top-level question. You can add any number of question sublevels.
3. (Optional) To add another subquestion under the same answer, click **Add Next Question**, and then repeat step 2.
4. Click **Save and Close**.

## Adding a Questionnaire Task

You can use a follow-on questionnaire task to instruct the user to do something if a certain answer is selected. For example, you could assign someone who chooses a certain answer to watch a training video, fill out a form, or see a manager for further clarification.

**Important:** Selecting an answer with a questionnaire task assigned does not affect the status of a user's assigned **Read / Complete** task for that particular document or questionnaire, nor does it affect the questionnaire results (beyond whether you designated that answer as correct or incorrect); it simply adds an independent, custom task to the user's **My Tasks** list.

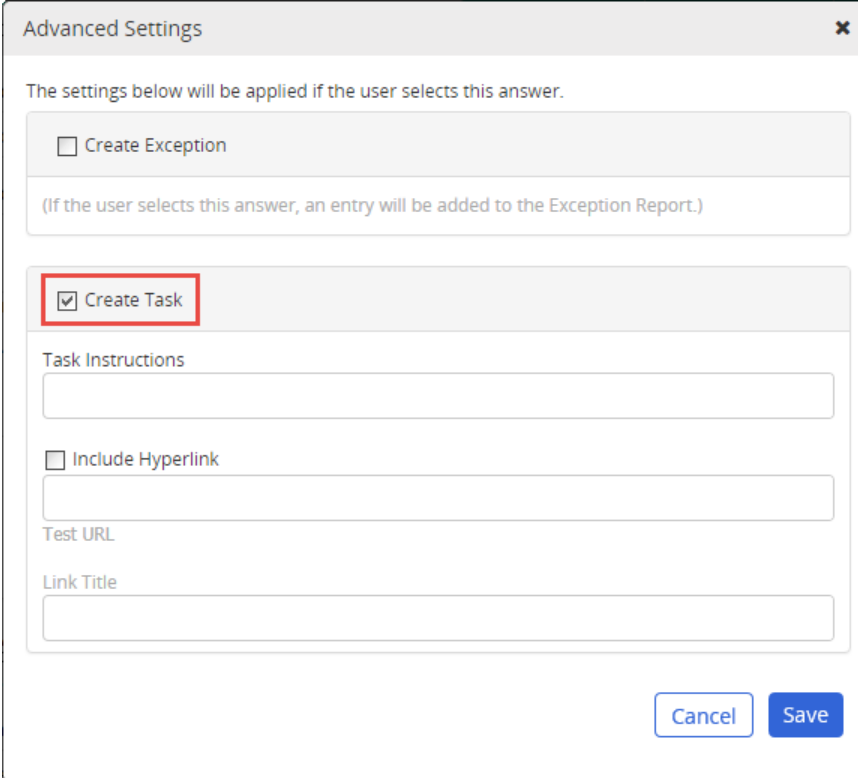

1. To the right of an answer you've typed, click **Options**, and then click **Advanced Settings**.

**Note:** This feature is not available for open-ended questions.

The screenshot shows a 'Question' configuration window with the following elements:

- Question Type:** A dropdown menu currently set to 'Yes or No'. A warning icon and text state: 'Changing this will delete your answers and any subquestions.'
- Question:** A text area containing the question: 'I have accepted a gift worth more than \$25 from a vendor.' Below the text area, it indicates '1991 character(s) left'.
- Answers:** Two radio buttons are present: 'Only one answer is correct' (unselected) and 'Any answer is acceptable (Useful for surveys)' (selected).
- Options:** A button labeled 'Options' is located to the right of the answer fields. A dropdown menu is open, showing 'Advanced Settings' (highlighted with a red box) and 'Add Subquestion'.
- Feedback:** A section with the text: 'Feedback (Displays after taking questionnaire.) Feedback is not enabled. (You can enable it by adjusting the Questionnaire Results options in the Questionnaire Settings.)'
- Section:** A dropdown menu set to 'General Questions' with '+' and '-' icons.
- Buttons:** 'Save and Close' and 'Add question >' buttons are at the bottom right.

2. Select **Create Task**, and then type the task instructions.

Advanced Settings

The settings below will be applied if the user selects this answer.

## Changing a Questionnaire

Your ability to change a questionnaire varies depending on whether it is a stand-alone questionnaire or a questionnaire in a document.

### Changing a Stand-Alone Questionnaire

The content (questions and answers) of a stand-alone questionnaire can only be edited while it is in Draft or Collaboration status (see [Editing Questions, Answers, and Sections](#) below for details). If you need to edit a stand-alone questionnaire's content after it has been submitted for review or approval, you must use the **Send to Draft** option first (see [Sending a Document or Questionnaire Back to Draft](#)). To make changes to a stand-alone questionnaire's content after it has been approved, you must create a new version of it (see [Doing a Periodic Review and Creating a New Version](#)).

You can change any questionnaire settings while a stand-alone questionnaire is in Draft or Collaboration status. You can change only the following questionnaire settings while a stand-alone questionnaire is in Review or Approval status:

- Confidentiality
- Disable Numbering
- Questionnaire Results options

To make changes to other questionnaire settings while a stand-alone questionnaire is in Review or Approval status, you must use the **Send to Draft** option first (see [Sending a Document or Questionnaire Back to Draft](#)). To make changes to a stand-alone questionnaire's settings after it has been approved, you must create a new version of it (see [Doing a Periodic Review and Creating a New Version](#)).

## Changing a Document Questionnaire

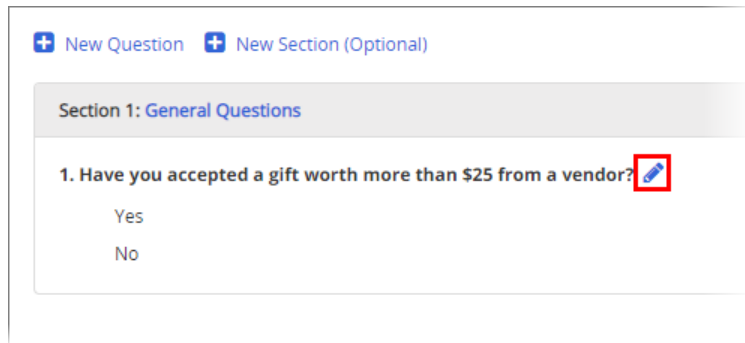

You can edit the content (questions and answers) and settings of a document questionnaire while the document is in Draft, Collaboration, Review, or Approval status (see [Editing Questions, Answers, and Sections](#) below for details). If you need to edit a document questionnaire after the document has been published, you must create a new version of the document (see [Doing a Periodic Review and Creating a New Version](#)) or ask your PolicyTech administrator to edit the document in its current state.

## Editing Questions, Answers, and Sections

1. Do one of the following:
  - To edit the content of a stand-alone questionnaire, find and open it in Draft or Collaboration status.
  - To edit the content of a document questionnaire, open the document in the Draft, Collaboration, Review, or Approval status, and then click the **Edit Questionnaire** tab.

2. Do any of the following:
  - Add a section, question, answer, or subquestion (see [Adding Questions and Answers to a Questionnaire](#) if you need help).
  - To make changes to a question, its answers, or its settings, click  after the question text.

- To edit a subquestion, click  before the parent answer to show the subquestion, and then click  after the subquestion text.
- To change a section heading, click its text.
- To reorder questions, simply drag a question to a new location.
- To move a question to a different section, drag it there.

**Important:** Deleting a section also deletes all questions currently assigned to that section. Deleting a question also deletes its answers and any subquestions attached to those answers.

### Helpful Answer Shortcuts

Add a subquestion to this answer

Open **Advanced** Settings for this answer

Open the **Case Creation** window for this answer (available only when Case Management Integration is set up and enabled, and when the **Create Case** option is currently selected for an answer)

### Disabling and Reactivating a Document Questionnaire

By default, a document questionnaire is automatically activated as soon as the document containing the questionnaire is approved. As a document owner, you can disable a questionnaire while its document is in any active status (not archived). With the questionnaire disabled, assignees will not have to take the questionnaire in order to mark the document as read.

1. Open the document.
2. Click the **Edit Questionnaire** tab.

3. Click **Questionnaire Settings**.
4. Select **Disable Questionnaire**.

5. Click **Save**, and then close the document.

To reactivate the questionnaire, repeat the steps above, but click to clear the **Disable Questionnaire** check box in step 4.

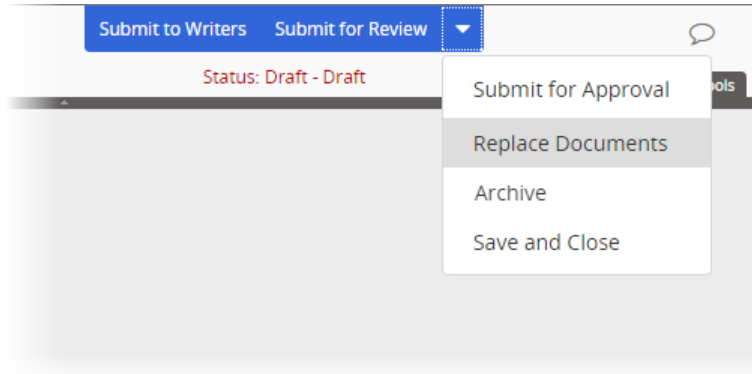

## Designating a Document to Be Replaced

**Important:** This option is not intended for creating a new version of an existing document—it is for replacing one or more existing documents with an entirely new and different document. If you need to create a new version of an existing document, see [Doing a Periodic Review and Creating a New Version](#).

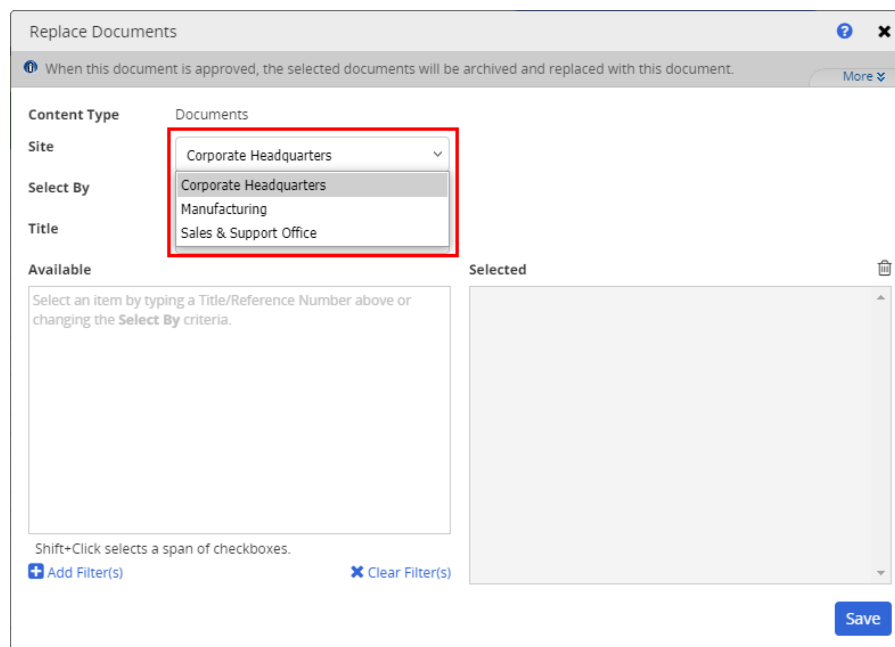

If you're creating a document that will completely replace one or more other documents, you can designate the documents to be replaced. Then, when the document is approved, the designated documents will be archived automatically.

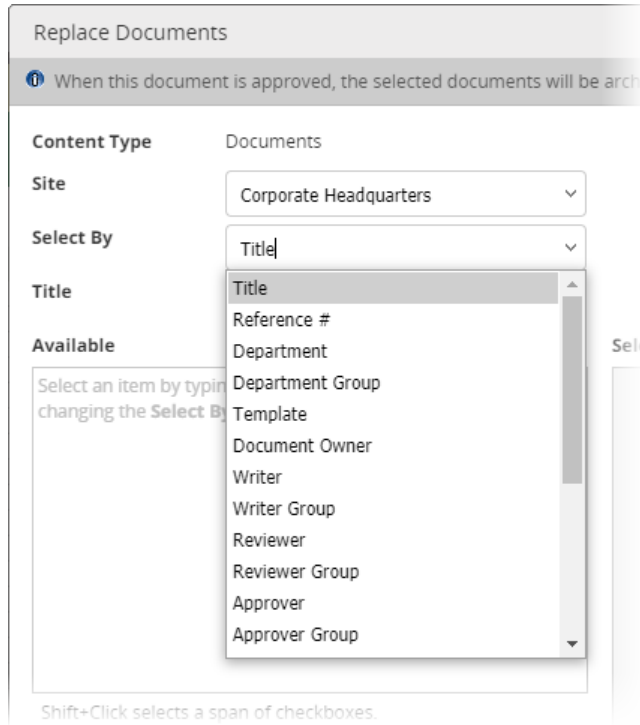

1. Start creating or open the document that will replace one or more other documents.
2. Click , and then click **Replace Documents**.

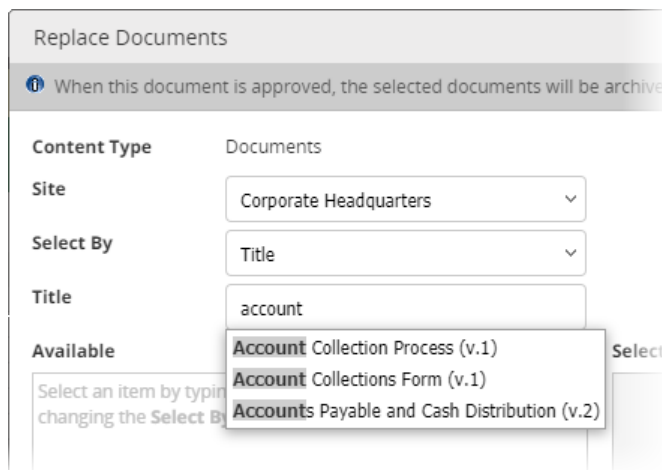

3. If multiple sites exist, select a site containing at least one of the documents you want replaced.

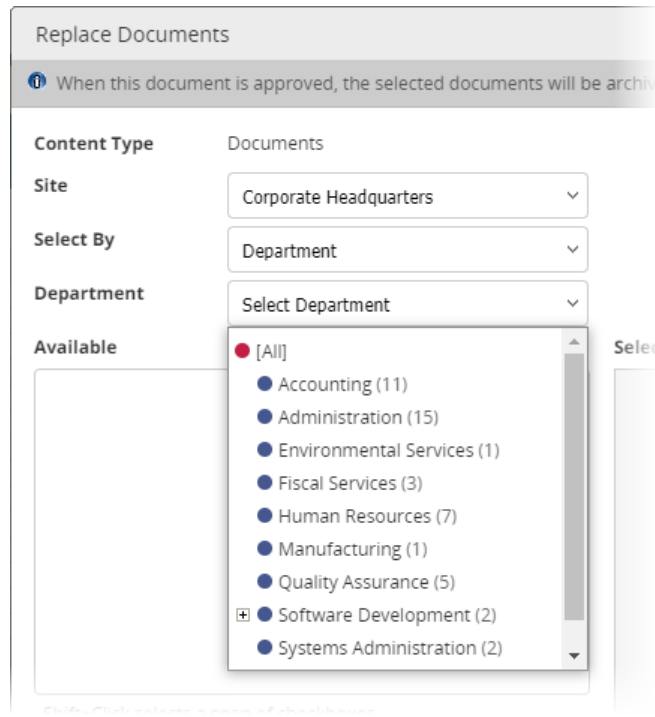

4. For **Select By**, choose how you want to find the documents to be replaced.

5. The list below the **Select By** list changes, depending on the **Select By** option you choose. Do one of the following:
  - If the **Select By** setting is currently **Title** or **Reference #**, type the text you want to find. As you type, a list of documents matching the search text is displayed. Click a document to add it to the **Selected Documents** box.

- If the **Select By** setting is any other option, in the list below **Select By**, find and click an item. For example, if you chose **Department** for **Select By**, in the **Department** list you would click a department.

Then, in the document list, click one or more documents to add them to **Selected** box.

### Notes:

- To narrow a long list of documents, you can add one or more filters. See [Applying Filters to a Content Item Grid](#).
- To remove a document from the **Selected** box, double-click the document title, or click it and then click .

Replace Documents

When this document is approved, the selected documents will be archived and replaced with this document. [More](#)

## Editing a Draft Document

You can freely make changes to a document's properties and contents for as long as it remains in Draft status.

### Notes:

- Documents submitted to writers (in the Collaboration status) are considered draft documents and are completely editable by document owners.
- For instructions on editing a document after it has been returned to Draft after one or more reviewers or approvers have revised or declined it, see [Working with a Revised or Declined Document or Questionnaire](#).
- As the document owner, you can make changes to a document even after submitting it for review or approval. See [Editing the Content of a Document in Review or Approval](#) for details.

To edit a draft document, find it in the Draft or Collaboration status and open it (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)). You can then add or change any of the following:

- Document content (see [Writing a Document](#)).
- Properties (see [Assigning Document Properties](#))

- File attachments and web address links (see [Attaching Files and Adding Reference Links](#))
- Attached questionnaire (see [Creating a Document Questionnaire](#))
- Documents to be replaced (see [Designating a Document to Be Replaced](#))

Be sure to save your changes.

---

## Submitting a Document or Questionnaire to Writers, Reviewers, or Approvers

Where a newly created draft document or questionnaire should go next depends on the assignments made in the **Properties Wizard**. Because assigning an approver is typically required, the document/questionnaire must at least be submitted for approval, but it could also be submitted to assigned writers or reviewers.

**Note:** You can skip assigned writers by submitting directly to review or approval from the draft status. You can also skip assigned reviewers (unless the assigned template contains required reviewers) by submitting directly to approval from the draft or collaboration status. However, you cannot skip submitting the document/questionnaire to assigned approvers.

Go to the section below for what you need to do next with the draft document.

[Submitting a Document or Questionnaire to Writers \(for Collaboration\)](#)

[Submitting a Document or Questionnaire for Review](#)

[Submitting a Document or Questionnaire for Approval](#)

## Submitting a Document or Questionnaire to Writers (for Collaboration)

**Important:** These instructions apply only if the currently assigned template includes the **Writers** step.

If you, as a document owner, questionnaire owner, or proxy author, assigned one or more writers to a document or questionnaire and are ready for them to work on it, your next step is to submit it to those writers. While a document/questionnaire is with assigned writers, it is in the Collaboration status.

**Note:** If you did not assign writers, move on to [Submitting a Document or Questionnaire for Review](#) or [Submitting a Document or Questionnaire for Approval](#).

As each assigned writer indicates that he or she has finished writing, you receive a notification email (if your email subscription settings include these

types of notifications). When all assigned writers have indicated that they are finished writing the document/questionnaire, PolicyTech returns it to Draft status and notifies you that it is ready to submit to review.

You can also check writer status from the **Overview** page (see [Working with the Overview](#) for details). To access the document/questionnaire while it is in Collaboration status, see [Searching for a Content Item](#) or [Browsing for a Content Item](#).

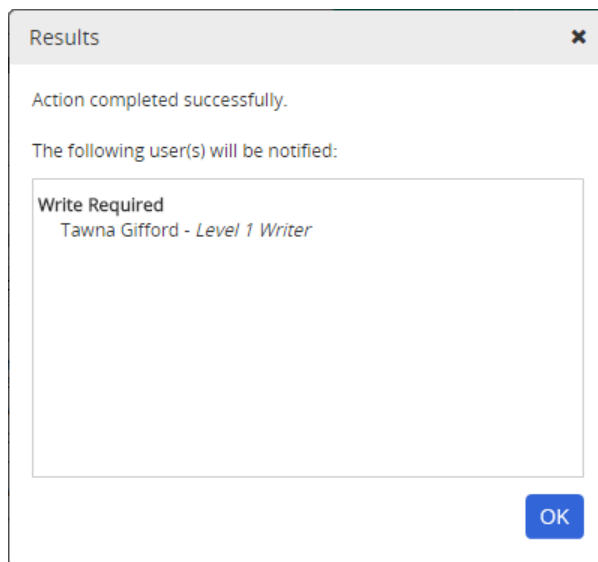

**Note:** Because assigning writers is not a required **Properties Wizard** step, if the assigned template contains no required writers or does not include the **Writers** step, you can submit the document/questionnaire directly to review or approval.

1. Find and open the document or questionnaire (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click **Submit to Writers**.

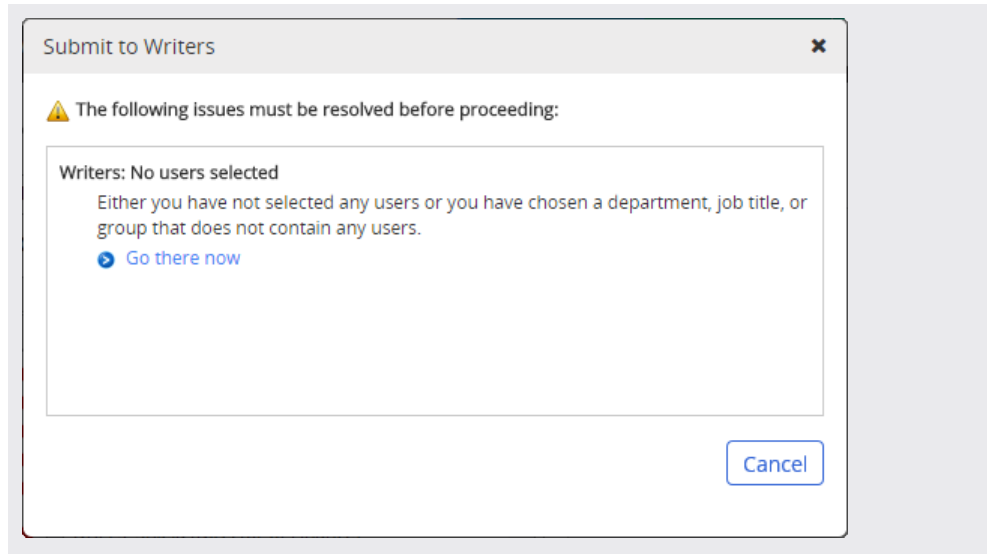

**Note:** If the currently assigned template does not include the **Writers** step, the **Submit to Writers** step is not available.

3. In the **Results** window, click **OK**.

**Note:** If no writers have been assigned yet, you will see a window like the one below. Click **Go there now**, assign one or more writers, and then click **Submit to Writers** again.

## Submitting a Document or Questionnaire for Review

**Important:** These instructions apply only if the currently assigned template includes the **Reviewers** step.

It is time to submit a document or questionnaire for review when both of the following are true:

- The document/questionnaire owner, the assigned proxy author (if any), and all assigned writers (if any) have finished writing the document/questionnaire.
- The document/questionnaire has been assigned to one or more reviewers in the **Properties Wizard**.

**Important:** Only the document owner, questionnaire owner, or an administrator can submit a document/questionnaire for review. If you wrote the document as a proxy author and are finished, see [Requesting a Review \(as a Proxy Author\)](#).

Once you submit a document/questionnaire for review, each assigned reviewer has the option to accept, revise, or decline the document or to accept or decline the questionnaire. As each reviewer acts on the document/questionnaire, you receive a notification email (if your email subscription settings include these types of notifications). When all reviewers have finished, you receive another email notification, and the document/questionnaire is sent to one of two places. If one or more reviewers revise or decline the document/questionnaire, it is sent back to Draft status. If all reviewers accept the document/questionnaire, it is automatically submitted for approval.

You can also check reviewer status from the **Overview** page (see [Working with the Overview](#) for details). To access the document/questionnaire while it is in

Review status, see [Searching for a Content Item](#) or [Browsing for a Content Item](#).

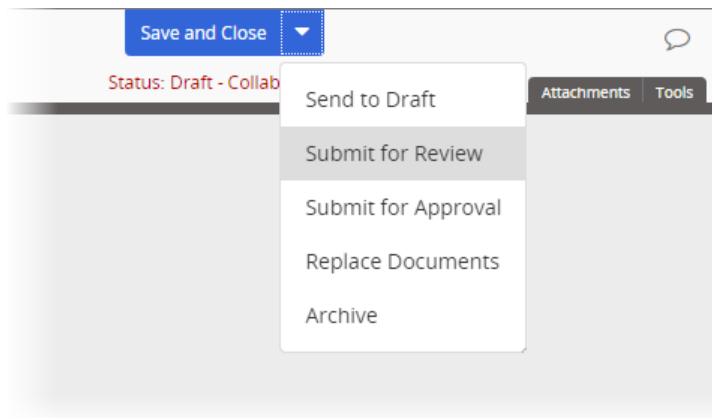

**Note:** Depending on your organization's policies and the type of document/questionnaire, you may not need to assign and submit the document/questionnaire to reviewers. If this is the case, move on to [Submitting a Document for Approval](#). Also, because assigning reviewers is not a required **Properties Wizard** step, if the assigned template contains no required reviewers or does not include the **Reviewers** step, you can submit the document/questionnaire directly to approval.

1. Find and open the document or questionnaire in the Draft or Collaboration status (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Do one of the following:

If the document/questionnaire is currently in Draft status, click **Submit for Review**.

If the document/questionnaire is currently in Collaboration status, click , and then click **Submit for Review**.

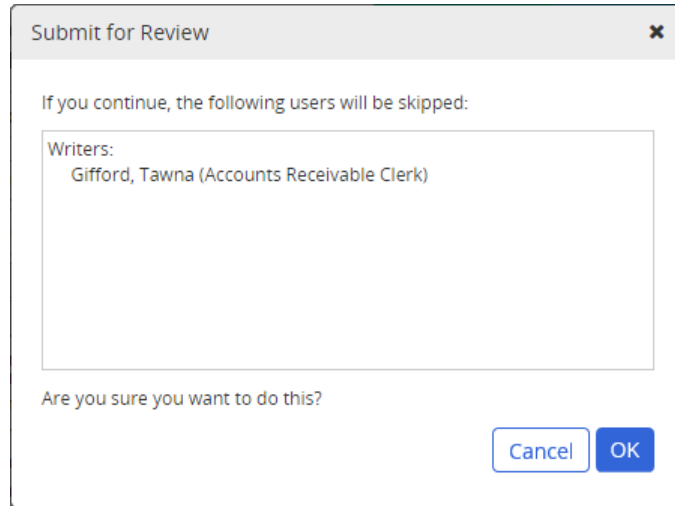

**Notes:**

- If the currently assigned template does not include the **Reviewers** step, the **Submit to Reviewers** step is not available.
- As the document owner, you can make changes to the document content even after submitting it for review. See [Editing Document Content](#) for details. (Questionnaire content cannot be modified in Review status.)

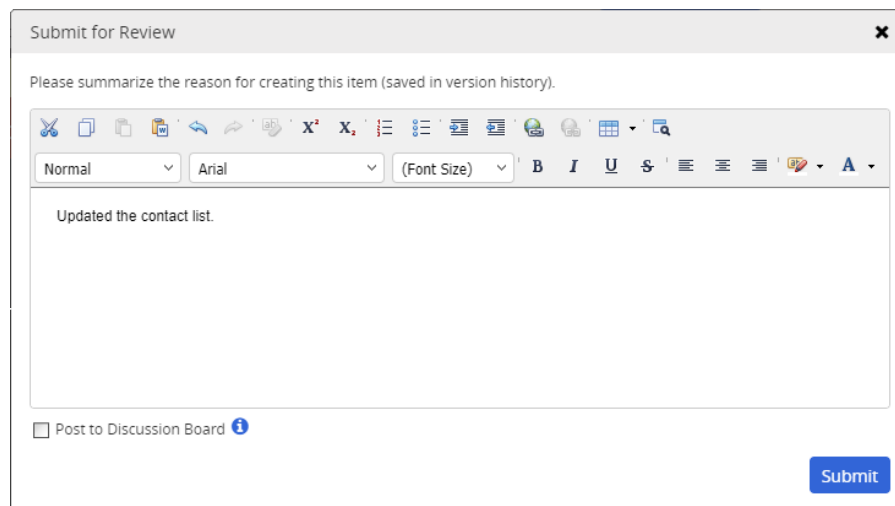

3. (Conditional) If the document/questionnaire has any assigned writers who have not finished yet, a window similar to the following is displayed. To skip any unfinished writers and submit the document/questionnaire for review, click **OK**.

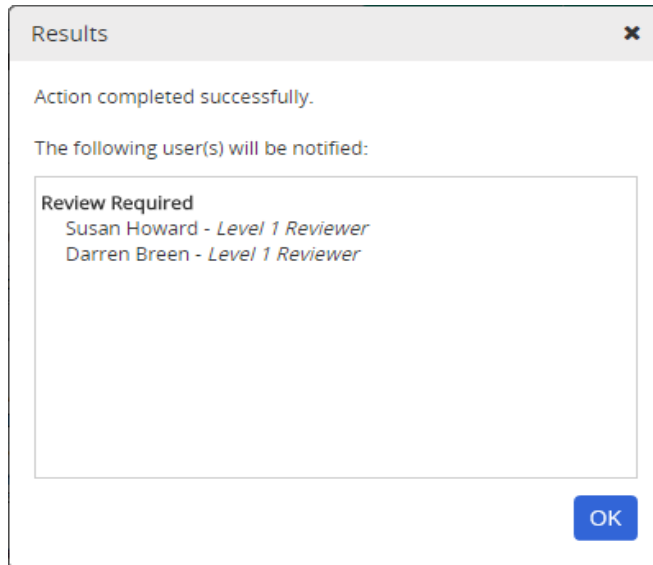

4. (Optional) In the **Submit for Review** window, delete the default text— "New Document" or "New Version"—and then type the purpose of the new document/questionnaire or a summary of changes for the document's/questionnaire's new version. Any assigned reviewers, approvers, and assignees will be able to see your comments.

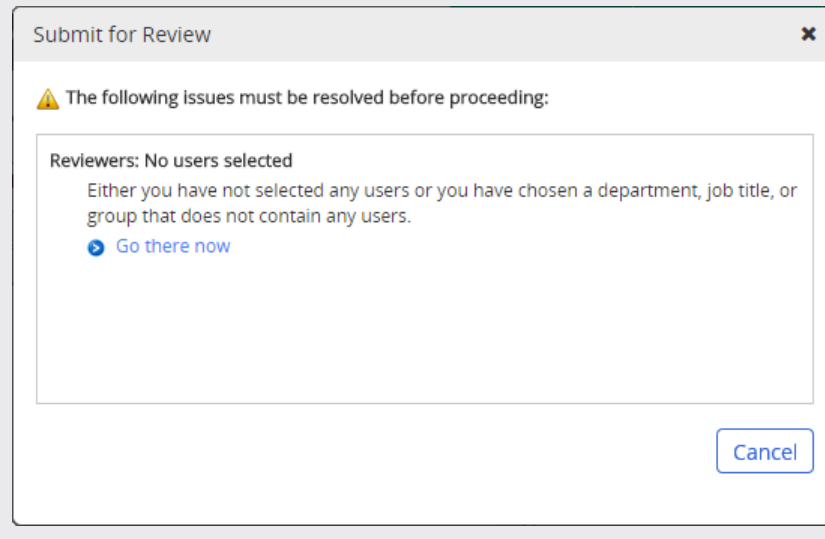

**Note:** If necessary, you, as the document owner, or an administrator can make changes to this change summary. See "Editing a Change Summary" in the [Administrator's Guide](#) for details.

- (Optional) To add what you wrote to this document's/questionnaire's discussion board, click **Post to Discussion Board** (see [Working with Discussions](#) for details).
- Click **Submit**.
- In the **Results** window, click **OK**.

**Note:** If no reviewers have been assigned yet, you will see a window like the one below. Click **Go there now**, assign one or more reviewers, and then click **Submit for Review** again.

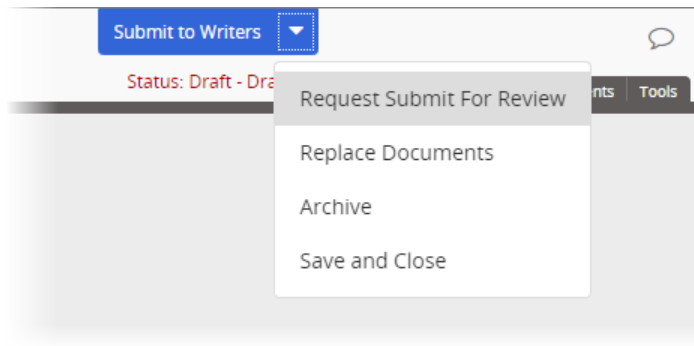

### Requesting a Review (as a Proxy Author)

If you are a proxy author and have finished writing a document or questionnaire (already clicked **Finished Writing**), you can send a request to the owner to

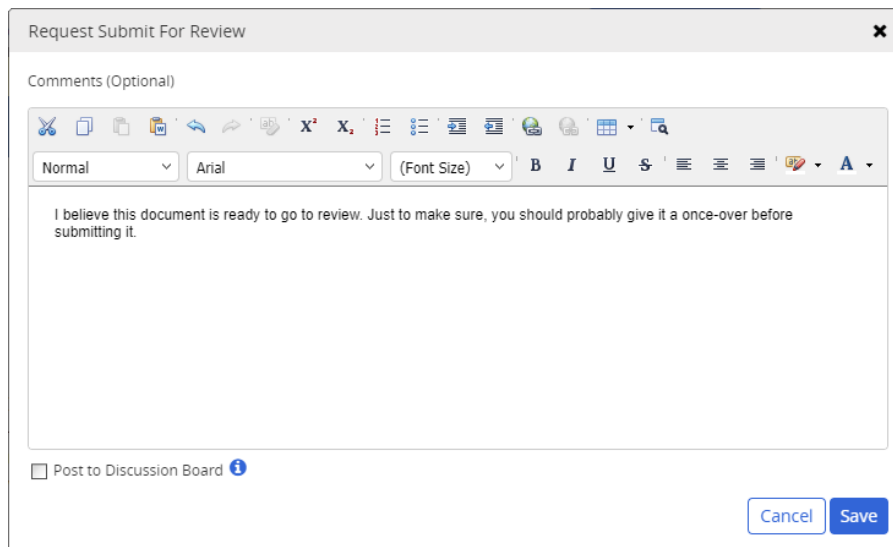

submit the document/questionnaire for review.

**Note:** Requesting submission for review sends an email notification to the document owner or questionnaire owner, but it does not add a task to the owner's **My Tasks** list. You can add an owner task in the **Settings** step of the **Properties Wizard** (see [Adjusting Basic Settings](#)).

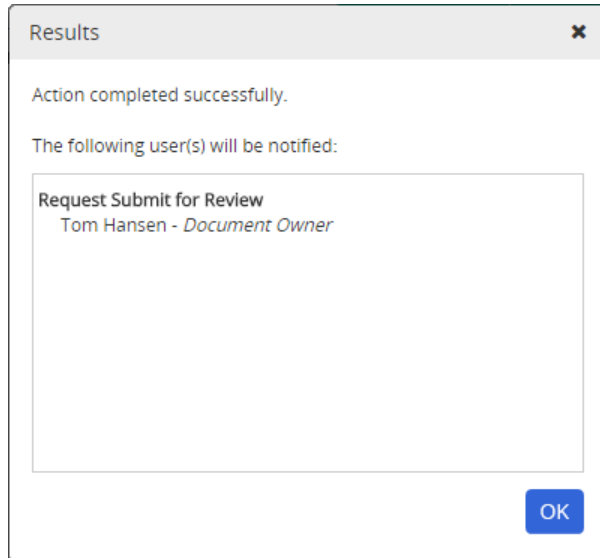

1. Find and open the document (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click , and then click **Request Submit for Review**.

3. (Optional) In the **Comments** box, type any comments you want to include.

4. (Optional) To add what you wrote to this document's/questionnaire's discussion board, click **Post to Discussion Board** (see [Working with Discussions](#) for details).
5. Click **Save**.
6. In the **Results** window, click **OK**.

## Submitting a Document or Questionnaire for Approval

**Important:** If you submitted a document or questionnaire for review, you don't need to submit it to approval. The document/questionnaire will automatically be submitted to approval once all reviewers accept it.

If a content item's (document's or questionnaire's) template contains no required reviewers or if it does not include the **Reviewers** step, you can submit the draft item directly to approval, skipping the review step. You must assign at least one approver before submitting a content item for approval.

**Note:** Only the document owner or an administrator can submit a draft document or questionnaire for approval.

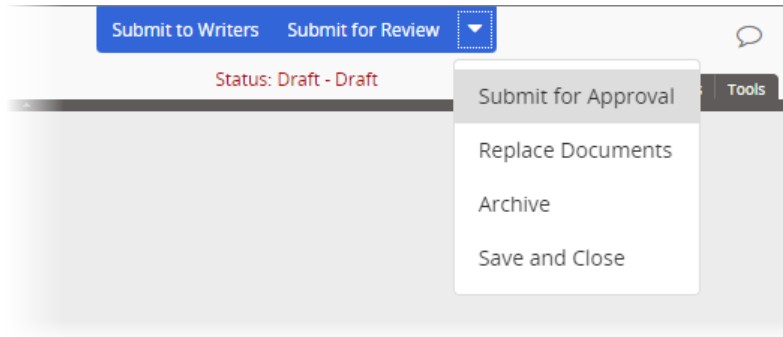

After submitting a content item for approval, each assigned approver has the option to accept, revise, or decline the document or to accept or decline the questionnaire. As each approver acts on the content item, you receive a notification email (if your email subscription settings include these types of notifications). When all approvers have finished, you receive another email notification, and the item is sent to one of two places. If one or more approvers revise or decline the item, it is sent back to Draft status. If all approvers accept the item, it is automatically published or started (unless it has been assigned a publication date sometime in the future, in which case it is moved to Pending status until that date).

You can also check approver status from the **Overview** page (see [Working with the Overview](#) for details). To access the content item while it is in approval status, see [Searching for a Content Item](#) or [Browsing for a Content Item](#).

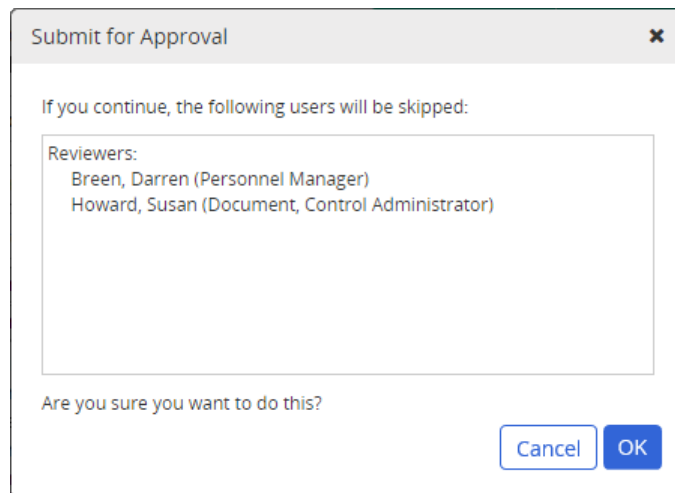

1. Find and open the document or questionnaire in the Draft, Collaboration, or Review status (see [Searching for a Content Item](#) or [Browsing for a Content](#)

[Item](#)).

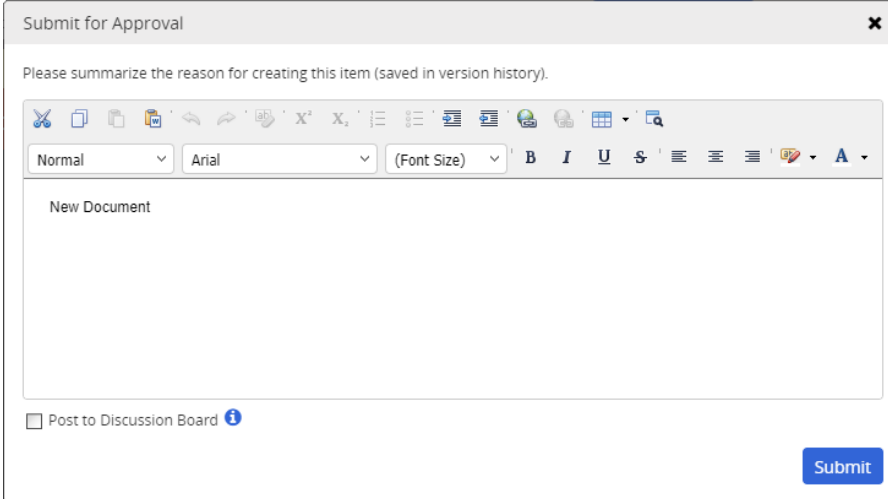

2. Click , and then click **Submit for Approval**.

3. (Conditional) If the document/questionnaire has any assigned reviewers who have not finished yet, a window similar to the following is displayed. To skip any unfinished reviewers and submit the document/questionnaire for approval, click **OK**.

4. (Optional) In the **Submit for Approval** window, delete the default text—**New Document**, **New Questionnaire**, or **New Version**—and then type the purpose of the new content item or a summary of changes for its new version. Any of the content item's reviewers, approvers, and assignees will be able to see your comments.

---

## Creating and Working with Questionnaires (for Questionnaire Owners and Proxy Authors)

**Note:** These instructions are for creating stand-alone questionnaires. To add a questionnaire to a document, see [Creating a Document Questionnaire](#).

Users assigned the Questionnaire Owner role or users with the Proxy Author role, who are assigned as proxies to questionnaire owners, can perform the following tasks:

- Create questionnaires (define properties, adjust settings, and assign users to write, review, approve, and complete the questionnaires)
- Manage questionnaires through the review and approval process
- Maintain approved questionnaires

---

### Creating a Questionnaire (Overview)

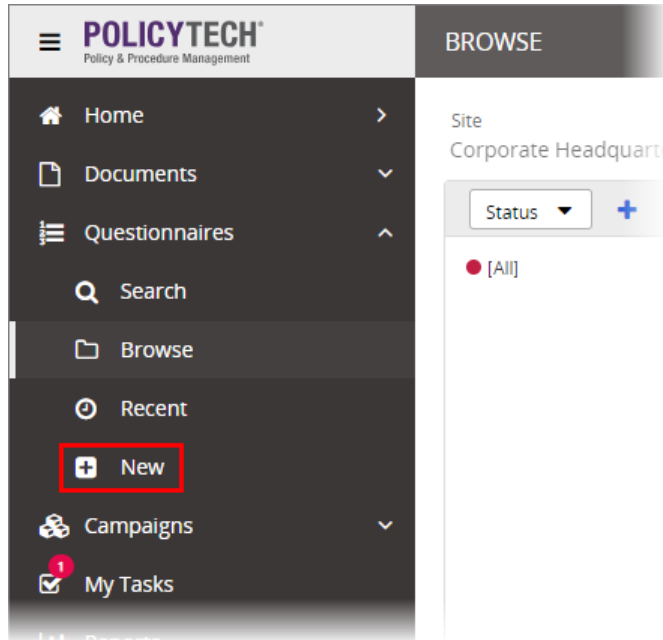

The following steps provide an overview of the creation process for questionnaires, along with references to more detailed instructions.

**Notes:**

- The ability to create stand-alone questionnaires is an optional feature that may or may not be enabled. If you don't see **Questionnaires** below **Documents** in the sidebar menu and you need to create a stand-alone questionnaire, talk to your PolicyTech administrator.
- If you need to add a questionnaire to a document, see [Creating a Document Questionnaire](#).

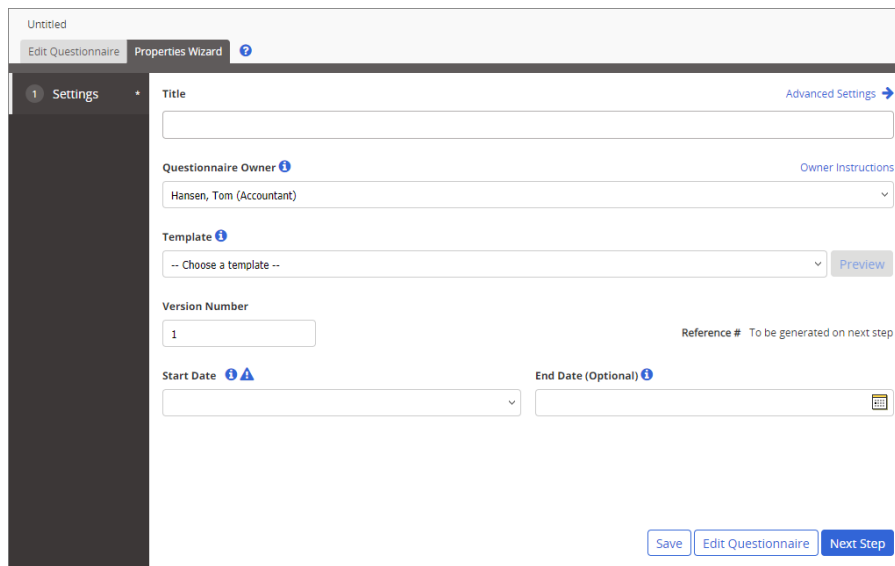

1. Click **Questionnaires**. If you've been assigned the questionnaire owner or proxy author role, you'll see the **New** option, as shown below.

2. Click **New**.

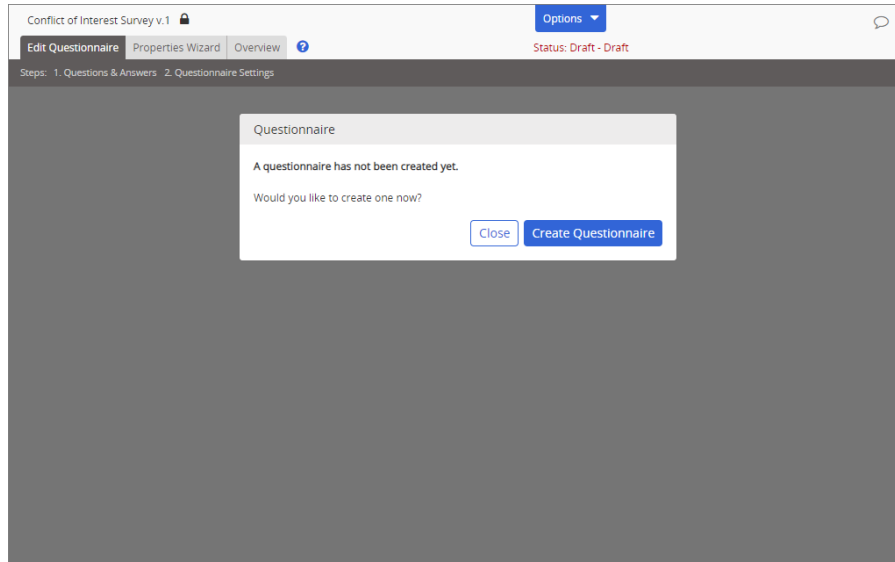

Your screen should now look similar to the one below. These settings constitute the first step of the **Properties Wizard**, which guides you through all of the available properties settings.

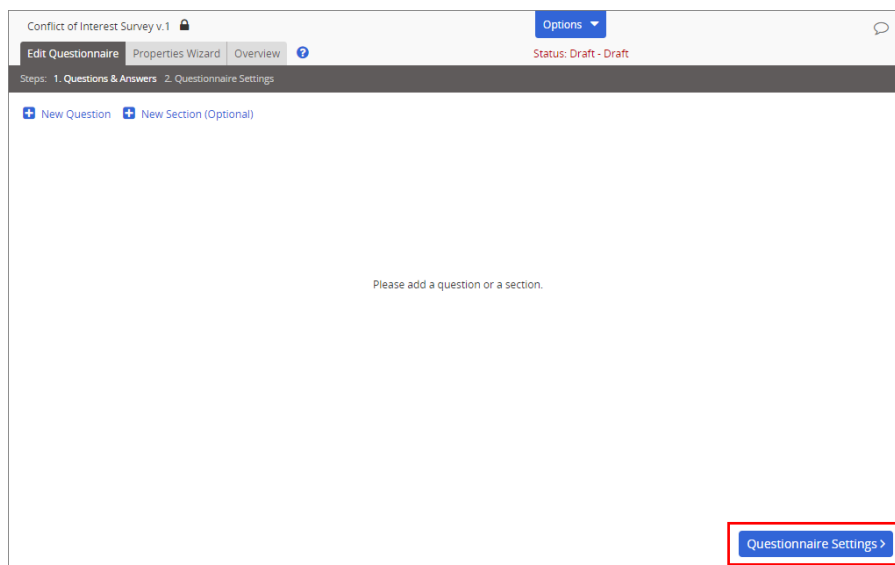

3. To work your way through the **Properties Wizard** steps, see [Assigning Questionnaire Properties](#).

**Important:** You must at least type a title, choose a template, and then click **Save** or **Next Step** before you can see the remaining **Properties Wizard** steps and edit the questionnaire.

4. Click **Edit Questionnaire**, and then click **Create Questionnaire**.

5. Click **Questionnaire Settings**.

6. Select **Quiz** if you want to use this questionnaire to test assignees' knowledge, or select **Survey** if you just need to gather information.

7. Adjust the other settings as needed (see [Adjusting Questionnaire Settings](#)), and then click **Save**.
8. Click **Questions & Answers**, and then add the questionnaire content (see [Adding Questions and Answers to a Questionnaire](#)).
9. Submit the questionnaire to writers, for review, or for approval (see [Submitting a Document or Questionnaire to Writers, Reviewers, or Approvers](#)).

**Note:** The ability to assign writers and reviewers depends on whether those workflow steps were included in the currently assigned template. Typically, one or more approvers is required, so you should at least see the **Submit for Approval** option.

10. Manage the questionnaire through the review and approval process (see [Working with Documents or Questionnaires in Review and Approval](#)).

---

## Assigning Questionnaire Properties

The **Properties Wizard** breaks up property assignment for a questionnaire into the following steps:

**Notes:**

- Depending on how the currently assigned template was set up, you may have fewer steps available than the ones listed below. Typically, you will see at least the Settings, Categories, Approvers, Assignees, and Security steps. Some or all of the other steps may be removed from the template.
- You will most likely not need to perform all available steps for every

questionnaire you create.

- **Settings:** Set the questionnaire's critical properties (**Title, Questionnaire Owner, Template**) and other basic and advanced properties. See [Adjusting Basic Settings](#).
- **Categories:** Assign sites, departments, and categories. See [Assigning Sites, Departments, and Categories to a Questionnaire](#).
- **Writers:** Assign the questionnaire to the writers who will collaborate on creating content. See [Assigning Writers to a Questionnaire](#).
- **Reviewers:** Assign users as reviewers. See [Assigning Reviewers to a Questionnaire](#).
- **Approvers:** Assign users as approvers. See [Assigning Approvers to a Questionnaire](#).
- **Assignees:** Assign those required to complete the questionnaire when it is started. See [Designating Assignees for a Questionnaire](#).
- **Security:** Set a security level. See [Adjusting Security Settings for a Questionnaire](#).

## Adjusting Basic Questionnaire Settings

When you create a new questionnaire, you see a screen similar to the one below with only the first step—**Settings**—of the **Properties Wizard** displayed.

**Note:** If the **Settings** step of the new questionnaire is not currently displayed, open the questionnaire, and then click the **Properties Wizard** tab.

The screenshot shows the 'Settings' step of the 'Properties Wizard' for a questionnaire. The interface includes a sidebar with 'Settings' selected, a main content area with various input fields, and a bottom navigation bar. The main content area contains the following fields:

- Title:** A text input field with a link to 'Advanced Settings'.
- Questionnaire Owner:** A dropdown menu showing 'Hansen, Tom (Accounting Manager)' and a link to 'Owner Instructions'.
- Template:** A dropdown menu with 'Questionnaire' selected and a 'Preview' button.
- Version Number:** A text input field with '1' entered.
- Reference #:** A note indicating it will be generated on the next step.
- Start Date:** A dropdown menu with 'Start as soon as approved.' selected.
- End Date (Optional):** A date picker field.

At the bottom, there are three buttons: 'Save', 'Edit Questionnaire', and 'Next Step'.

1. Type a title.
2. Do one of the following to select a questionnaire owner:
  - If you've been assigned the Questionnaire Owner role, your user name is automatically selected. Move on to step 3.
  - If you've been assigned as proxy author for a single questionnaire owner, that user's name is automatically selected. Move on to step 4.
  - If you've been assigned as proxy author for more than one questionnaire owner, or if you're an administrator, select a questionnaire owner.
3. (Optional) To create a task and add it to the owner's **My Tasks** list, click **Owner Instructions**, select **Create task for owner**, write the task instructions, and then click **Close**.

This option can be especially useful if you are creating or editing the questionnaire as a proxy author or administrator and need the owner to do something regarding this questionnaire, such as submitting it for review.

4. Your administrator can create any number of templates with specific settings and assignments in the **Properties Wizard**.

Do one of the following:

- If **Template** options are available, select one.
- If you see a template name but no option for selecting a different template, there is only one template available, so it has been selected automatically.

The screenshot shows the 'Properties Wizard' interface for creating a questionnaire. The window title is 'Untitled'. The interface has a dark sidebar on the left with a 'Settings' tab. The main content area is titled 'Properties Wizard' and contains several fields and buttons:

- Title:** A text input field with a blue arrow icon labeled 'Advanced Settings' to its right.
- Questionnaire Owner:** A dropdown menu showing 'Hansen, Tom (Accountant)' with a blue arrow icon labeled 'Owner Instructions' to its right.
- Template:** A dropdown menu showing 'Questionnaire', which is highlighted with a red rectangular box.
- Version Number:** A text input field containing the number '1'.
- Reference #:** A label 'Reference #' followed by the text 'To be generated on next step'.
- Start Date:** A dropdown menu showing 'Start on' with a blue arrow icon and a warning icon.
- End Date (Optional):** A text input field with a blue arrow icon and a warning icon, and a calendar icon to its right.
- Buttons:** At the bottom right, there are three buttons: 'Save', 'Edit Questionnaire', and 'Next Step'.

**Notes:**

- Click **Preview** to open the selected template's **Overview** tab in a separate browser tab or window.
- The template list includes all templates from all sites you have access to.
- If you have questions about which template to use, contact your administrator.

5. (Optional) Change the default version number of 1.

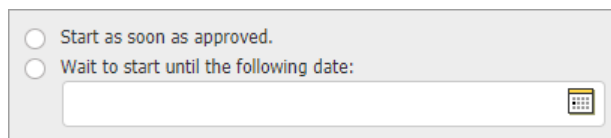

**Note:** You cannot change the version number after the questionnaire has been approved.

6. (Optional) Depending on how your administrator has set up PolicyTech, you may or may not need to enter a reference number.

- If you see **To be generated on next step** after **Reference #**, move on to the next step.
- If you see a blank box after **Reference #**, type a number. The number can contain numbers, letters, and all other standard characters except <, |, and ^.

**Important:** A questionnaire's reference number must be unique throughout the PolicyTech system. If you are not sure what numbering scheme your organization is using, contact your administrator.

7. (Optional) By default, a new questionnaire is started as soon as it is approved. For **Start Date**, select **Wait to start until the following date**, click , and then select a date.

8. (Optional) For **End Date**, specify the date you want all assignee tasks for this questionnaire to expire. On that date, all incomplete tasks will be canceled, removing them from assignees' **My Tasks** lists. Also, if any assignee groups, departments, or job titles are selected, new users added to one of these entities after the task end date will not receive tasks.

9. Click **Save**.

**Important:** You must save the questionnaire at this point before you can access **Advanced Settings** and the other **Properties Wizard** steps.

You should now see all **Properties Wizard** steps included in the template, as shown below.

**Note:** The **Properties Wizard** page for your questionnaire may have more or fewer steps, depending on how the currently selected template was set up.

The screenshot shows the 'Properties Wizard' interface for a questionnaire titled 'Conflict of Interest Survey v.1'. The status is 'Draft - Draft'. The left sidebar lists steps: Settings, Categories, Writers, Reviewers, Approvers, Assignees, and Security. The main content area includes:

- Title:** Conflict of Interest Survey
- Questionnaire Owner:** Hansen, Tom (Accountant)
- Template:** Survey (with 'Reapply' and 'Preview' buttons)
- Version Number:** 1 (with 'Reference # 359')
- Start Date:** (calendar icon)
- End Date (Optional):** (calendar icon)

Buttons at the bottom are 'Save', 'Edit Questionnaire', and 'Next Step'.

10. (Optional) Click **Advanced Settings**, and then make adjustments as needed. See [Advanced Settings: Settings Step for a Questionnaire](#) below for details.

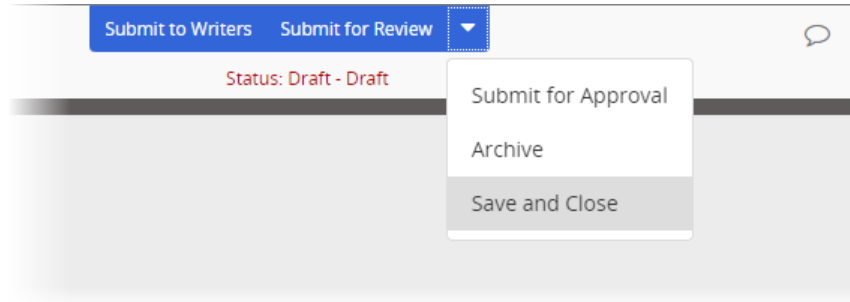

The screenshot shows the 'Advanced Settings' page for a questionnaire. It includes:

- Assigned Proxy Author:** - Unassigned - Choose an Assignable Proxy Author - (calendar icon)
- Archive Date:** (calendar icon)
- Review Interval:** Every 12 months from approve/last reviewed date
- Warning Period:** Warn 1 month(s) before Review Interval.
- Keywords:** (text input field, 'Expand Textbox' link)
- Notification Settings for Owners & Proxies:** Company / Personal
- Original Creation Date:** (calendar icon)
- External Review Date:** (calendar icon)
- Language:** English (English)

Buttons at the bottom are 'Save', 'Edit Questionnaire', and 'Next Step'.

11. Do one of the following:

- To continue with assigning properties, click **Next Step**, and then go to [Assigning Sites, Departments, and Categories to a Questionnaire](#).
- To begin work on content, click **Edit Questionnaire**, and then go to [Adjusting Questionnaire Settings](#) and [Adding Questions and Answers to a Questionnaire](#).
- Click  to the right of **Submit for Review**, and then click **Save and Close**.

## Advanced Settings: Settings Step for a Questionnaire

[Assigned Proxy Author](#)

[Archive Date](#)

[Review Interval](#)

[Warning Period](#)

[Keywords](#)

[Notification Settings for Owners & Proxies](#)

[Original Creation Date](#)

[External Review Date](#)

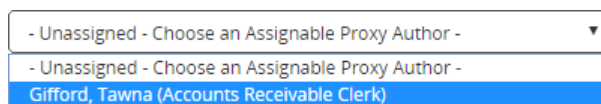

[Language](#)

### Assigned Proxy Author

This setting applies only if a proxy author has been assigned for the owner selected in **Basic Settings**.

If you see **No Available Proxy Authors**, you cannot change this setting. (Contact your PolicyTech administrator if you need a proxy author assigned to an owner.)

(Optional) If one or more proxy authors are available, select one.

A screenshot of a dropdown menu for the 'Assigned Proxy Author' setting. The menu is open, showing three options. The top two options are '- Unassigned - Choose an Assignable Proxy Author -'. The third option, 'Gifford, Tawna (Accounts Receivable Clerk)', is selected and highlighted with a blue background.

### Archive Date

If you know there will be no new versions of this content item created and that it will no longer be relevant at some point in the future, you can specify the date when you want the approved item automatically moved to the **Archive**.

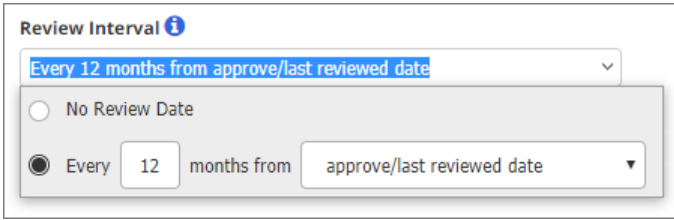

#### Notes:

- Only administrators and users assigned the **Archived Content** role can access archived content.
- If the archive date passes before a content item is approved, it will be archived immediately upon approval.

### Review Interval

When a review interval is set, the content item will come due for review after the specified interval has passed. The owner receives an email and a PolicyTech task as the review date approaches (see the next setting section—"Warning Period"—for details). The default review interval setting is whatever the template creator selected.

1. To change the default setting, do one of the following:

- Click **Every [number] months from [selected event or specified date]**, and then type a number of months. For **from**, select one of the following:
  - **approve/last reviewed date**: Sets the review date the number of specified months after version 1 of the content item is approved and after the previous review date for all subsequent versions.
  - **specified date**: Sets the review date the number of specified months after the specified date. After clicking **specified date**, click , and then select a date.

At this point, the **Force next review on [date]** option appears. By default, PolicyTech uses **Smart Scheduling** to determine the next review date when a content item is approved. If it is approved within the warning period for the currently selected review interval, **Smart Scheduling** equates the approval to a completed review and postpones the next review for another review interval. Select **Force next review on [date]** to override this behavior and retain the original next review due date.

- Click **No Review Date** only if you do not want a reminder and a task sent to the owner, who will then need to use some other means to track when the content item needs reviewing.

2. Click anywhere outside the **Review Interval** menu to close it.

### Warning Period

Use this setting to change when the owner receives notification that the next review due date is approaching.

**Note:** This setting is available only when a review interval has been set.

1. For **Warning Period**, do one of the following:

- Click **Warn [n] months before Review Interval**, and then type a number in the box.

- Click **Use Default Warning of [n] month(s) before Review Interval**.

**Note:** The default warning period is set by the administrator.

2. Click anywhere outside the **Warning Period** menu to close it.

### Keywords

Type any words you think users might use to search for this content item. Keywords are especially useful for including relevant words that are not contained in the item's title or a Word document's contents.

### Notification Settings for Owners & Proxies

These settings let you choose which types of notification emails this content item's assigned owner and proxy author will receive.

1. Do one of the following:

- Select **Company / Personal** to use the current **Email Subscriptions** settings of the assigned owner and proxy author to determine which email notifications relating to this content item are sent to them.

**Note:** If PolicyTech is set up to let users manage their own notification email subscriptions, then this item's assigned owner and proxy author will receive only those notification emails that they've enabled in **My Profile**. If users are not allowed to manage their own email subscriptions, then the current **Email Manager** settings, managed by the administrator, determine which emails are sent.

- Select **Custom**, and then select the notification email categories to enable. For a list of emails in each category, see [Email Categories for Custom Notification Settings](#).

**Important:** An administrator can lock the enabled/disabled setting for each email in the **Critical Changes**, **Content Status Changes**, and **Task Status Changes** categories. Changing a **Custom** setting for one of these categories has no effect on individually locked emails.

### ***Email Categories for Custom Notification Settings***

The following tables list the email notifications within each selectable category for **Notification Settings for Owners & Proxies** in the **Properties Wizard**.

#### ***Critical Changes***

Email Name	Description
Content Replacement Pending	(For document notifications only) Sent to the document owner and assigned proxy author when another user has set one of the owner's documents to be replaced.
Content Edited in Its Current State	(For document notifications only) Sent to the document owner, proxy author, and approvers when an administrator edits a document in its current state.
Content Set as Approved	Sent to the owner and proxy author when an administrator sets a content item as approved.
No Revision Necessary	Sent to assigned approvers and proxy author when a content item is due for review and the owner specifies that no revision is necessary. If an administrator specifies that no revision is necessary, the owner will also be notified.
Master Edited in Its Current State (active only if the Localization Workflow Module is enabled)	Sent to owners and proxy authors of localized copies when the master is modified in its current state (as opposed to creating a new version).

**Content Status Changes**

Email Name	Description
Review Level Complete	Sent to the owner and assigned proxy author when all required reviewers on a specific level have accepted the content item and a subsequent review level exists.
Review Cycle Complete - Content Moved to Approval	Sent to the owner and assigned proxy author when a content item is accepted by all required reviewers and moved to approval.
Approval Level Complete	Sent to the owner and assigned proxy author when all required approvers on a specific level have accepted the content item and a subsequent approval level exists.
Approval Cycle Complete - Content Approved	Sent to the owner and assigned proxy author when a content item is accepted by all required approvers and moved to Pending or Published/Started status.

**Task Status Changes**

Email Subject	Action That Triggers Notification
Writer Task Complete	Sent to the owner and assigned proxy author when an assigned writer clicks <b>Finished Writing</b> .
Reviewer Task Complete	Sent to the owner and assigned proxy author when an assigned reviewer accepts, declines, or revises a content item.
Approver Task Complete	Sent to the owner and assigned proxy author when an assigned approver accepts, declines, or revises a content item.

**Original Creation Date**

This setting is intended for content originally created outside of PolicyTech and then uploaded into or recreated in PolicyTech. For historical purposes, enter the date the content item was first created.

**External Review Date**

As with **Original Creation Date**, **External Review Date** is intended for content originally created outside of PolicyTech and then imported or recreated.

**Important:** If the **Review Interval** option has been set, the date set for **External Review Date** is used to calculate the next review date.

## Language

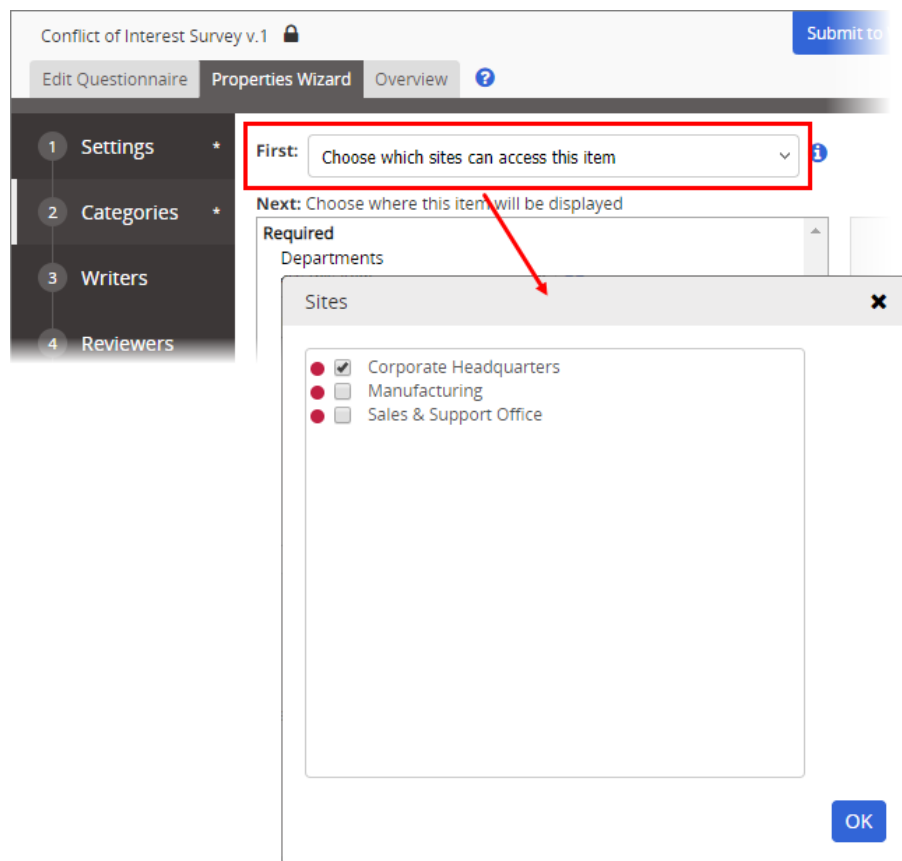

This setting works in conjunction with the **Filter by Language** setting in **My Profile** (see [Changing Your Profile Settings](#)). Selecting a language for this content item enables users to filter (hide or display) the item based on its language setting.

## Assigning Sites, Departments, and Categories to a Questionnaire

By assigning sites, departments, and categories to a questionnaire, you determine where it is visible in **Browse** for administrators, other questionnaire owners and proxy authors, and users with the Reviewer or Approver role.

**Note:** Users without one of the abovementioned roles cannot browse for questionnaires.

1. Click **Categories**.
2. If you have access to multiple sites, select the sites where this questionnaire will be visible, and then click **OK**.

What you see in the **Choose where this item will be displayed** box depends on the template you assigned in the **Settings** step. You will

always see **Departments** under the **Required** heading, but the template creator decides which categories, if any, should be required and optional. If your **Choose where this item will be displayed** box looked like the one in the example below, you would be required to choose a department and a **Document Type** category. You could also assign the document to an **OSHA** category if applicable, but wouldn't have to.

Select Department

3. In the **Choose where this item will be displayed** box, click **Departments**.
4. Do one of the following:
  - If there is no option for selecting a site in the **Choose Departments Below** box, simply select the departments that will have access to this questionnaire.
  - If you have access to more than one site and chose to make this questionnaire available to more than one of those sites in step 1 above, then, in the **Choose Departments Below** box, select a site, and then select the departments that will have access. Repeat this step as necessary for other sites.

**Important:** You must select at least one department within at least one site. If you select multiple sites and do not select a department within one or more of those sites, this questionnaire will still be available on those sites but will be listed under **Unfiled** when arranging by department in **Browse**.

**Notes:**

- The assigned owner's site and department are selected by default when a new questionnaire is created.
- You can click a department name to see the users in the department.
- A department group is a combination of two or more departments from

one or more sites. If desired, click **Department Groups**, and then select a department group or click the group name and select departments from within the group.

### Notes:

- Some categories allow only one subcategory selection, while others allow multiple selections.
- If the current category allows the creation of new subcategories, **Add**

**Subcategories** appears above the category list box, as shown below. See [Adding a Subcategory](#) below for details.

5. (Optional) If one or more categories are listed under **Optional**, click each category, and then select one or more subcategories for each.
6. Click **Save**.
7. Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Assigning Writers to a Questionnaire](#).
  - To begin work on content, click **Edit Questionnaire**, and then go to [Adjusting Questionnaire Settings](#) and [Adding Questions and Answers to a Questionnaire](#).
  - Click  to the right of **Submit for Review**, and then click **Save and Close**.

## Adding a Subcategory

1. In the category list, click a top-level category (**Document Type** in the example below) or subcategory, and then click **Add Subcategories**.

The screenshot shows a configuration interface for adding subcategories. At the top, it says "Next: Choose where this item will be displayed". Below this is a list of categories divided into "Required" and "Optional". Under "Optional", "Document Type" is selected and highlighted. Below the category list is a section titled "Choose Document Type Below" with a red box around the "+ Add Subcategories" button. This section contains a list of subcategories, each with a radio button and a checkbox: "[Document Type]" (selected), "Activity", "Form", "Job Description", "Manual", "Performance Evaluation", "Policy", "Procedure", and "Task". At the bottom of this section, there is a note: "Shift+Click selects a span of checkboxes." with an information icon.

2. Type a subcategory name.

**Note:** The **Reference ID** is automatically filled in with the subcategory name as you type it. You can change the **Reference ID** if needed.

3. (Optional) Type a description to let other users know when they should assign this subcategory.
4. Click **Add** to add the new subcategory to the **Categories** box.

**Important:** Only subcategories that have been added to the **Categories** box will be saved.

The screenshot shows a dialog box titled "Add Subcategory to 'Document Type'". It contains the following fields and controls:

- Name:** A text input field containing "Minutes" and an "Add" button to its right, which is highlighted with a red rectangular box.
- Reference ID:** A text input field containing "Minutes".
- Description:** A rich text editor with a toolbar (including icons for bold, italic, underline, font size, and color) and a text area containing the text "For meeting minutes and agendas."
- Categories:** An empty list box with a vertical scrollbar on the right side.
- Buttons:** "Cancel" and "Save" buttons are located at the bottom right of the dialog.

5. (Optional) Repeat steps 2 through 4 to continue adding subcategories under the currently selected category.
6. With one or more subcategories listed in the **Categories** box, click **Save**.

The screenshot shows a dialog box titled "Add Subcategory to 'Document Type'". It contains the following elements:

- Name:** A text input field with a cursor and an "Add" button to its right.
- Reference ID:** An empty text input field.
- Description:** A rich text editor with a toolbar containing icons for font size, bold, italic, underline, link, and unlink.
- Categories:** A list box with a trash icon and a scroll bar. The "Minutes" category is highlighted with a red rectangular box.
- Buttons:** "Cancel" and "Save" buttons at the bottom right.

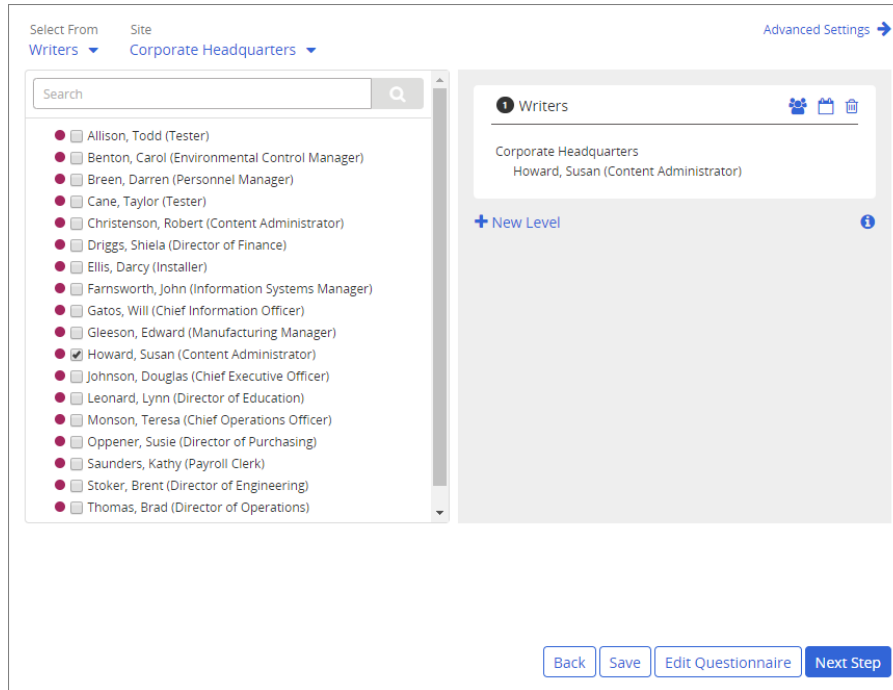

## Assigning Writers to a Questionnaire

A user assigned the Writer role can help with the creation of questionnaire content. You can invite one or more writers to collaborate on the current questionnaire.

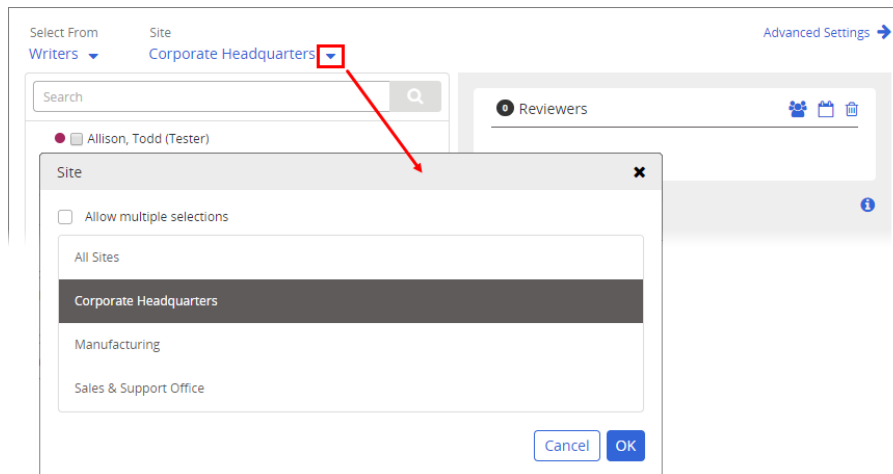

**Note:** A writer cannot change properties and cannot submit a questionnaire for review.

Assigning writers is an optional **Properties Wizard** step.

1. In the **Writers** step, first check to see if the template included writer assignments. Any template writer assignments are optional and can be treated as suggestions. To remove an optional writer assignment, click it, and then click .

2. If your PolicyTech system has multiple sites, do one of the following.
  - Leave the default site selection to select writers from the current site.
  - Under **Site**, click ▼, select a different site, and then click **OK**.

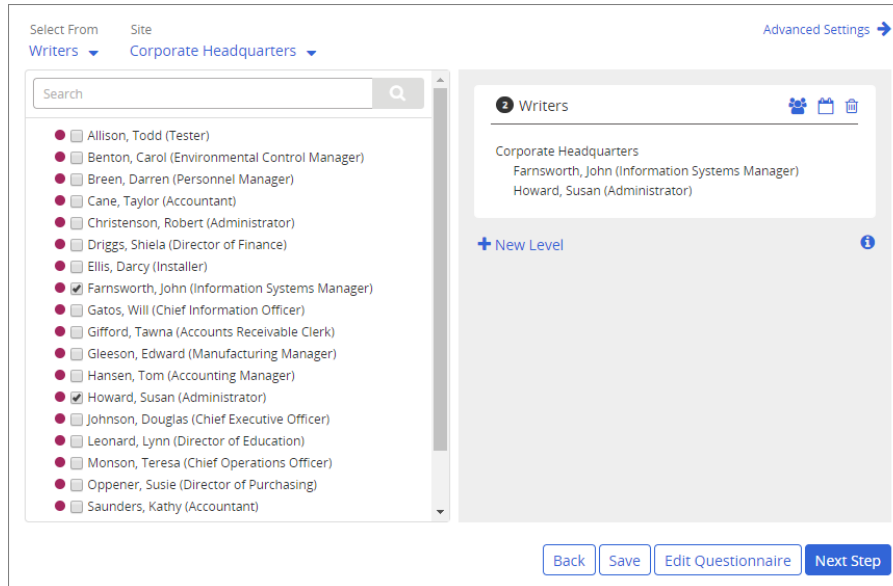

- Under **Site**, click ▼, select **Allow multiple selections**, select two or more sites, and then click **OK**.

**Important:** If you will be assigning writers from other sites, see [Properties Wizard Task Assignments and Site Access](#) before doing so.

3. Select one or more writers.

**Note:** A list of writers within the selected site or sites is displayed by default. (If multiple sites are listed, expand a site to see and select individual writers.) To use another selection method, see [Other Ways to Select Writers](#).

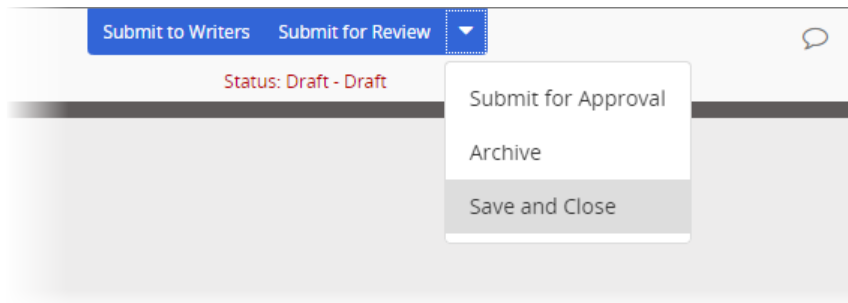

- (Optional) By default, all assigned writers must complete their tasks before the questionnaire moves on in the workflow. Alternatively, you can set a minimum number of writers of those assigned and have the questionnaire moved on in the workflow as soon as that number of writers complete their tasks.

In the right pane where writer selections are listed, click , select **Require [X] Users**, type a number, and then click **OK**.

**Note:** If a group is included and is both inherited from the template and designated as required, users within the group are counted individually toward the **Require** number. For example, suppose that, on a particular writer level, there is one individually assigned writer and a required group inherited from the template containing three writers. If you set the **Require** number at **2**, either of the following would complete the level: the individually assigned writer and one user from the required group complete their writing tasks; two users from the required group complete their writing tasks.

5. (Optional) Set a due date for when writers should be finished. See [Setting Due Dates for Writing, Review, Approval, and Assignee Tasks](#).
6. (Optional) As you assign writers, they all receive tasks when the owner clicks **Submit to Writers**. If you want the questionnaire to go to writers in a specific order, create additional review levels. See [Working with Levels](#) for details.
7. (Optional) Click **Advanced Settings**, and then click **Add Note** to include instructions or other information for the assigned writers. See [Adding Notes for Writers, Reviewers, Approvers, and Assignees](#) for details.
8. Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Assigning Reviewers to a Questionnaire](#).
  - To begin work on content, click **Edit Questionnaire**, and then go to [Adjusting Questionnaire Settings](#) and [Adding Questions and Answers to a Questionnaire](#).
  - Click  to the right of **Submit for Review**, and then click **Save and Close**.

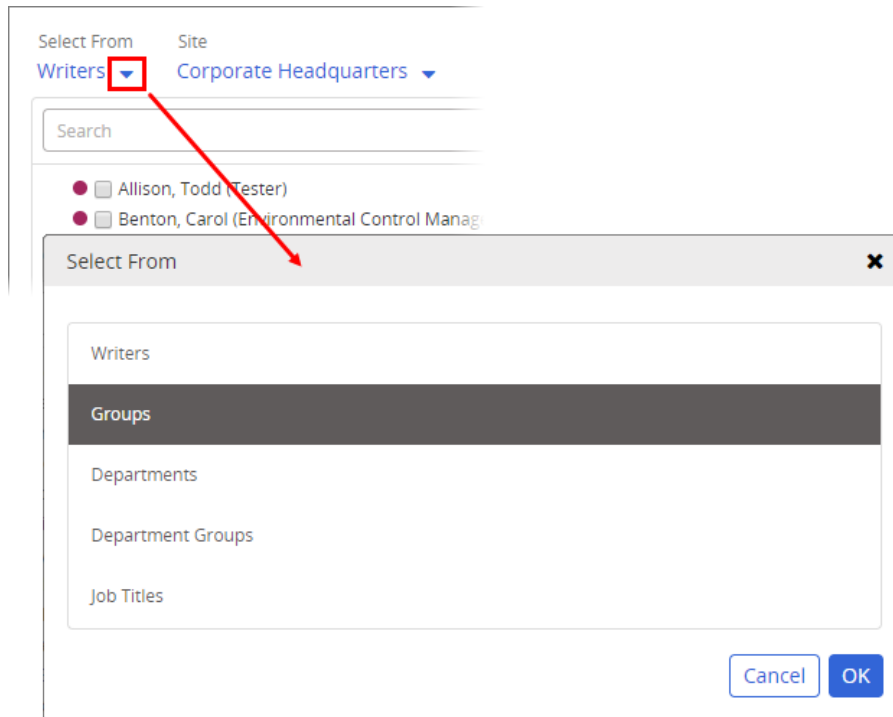

### Other Ways to Select Writers

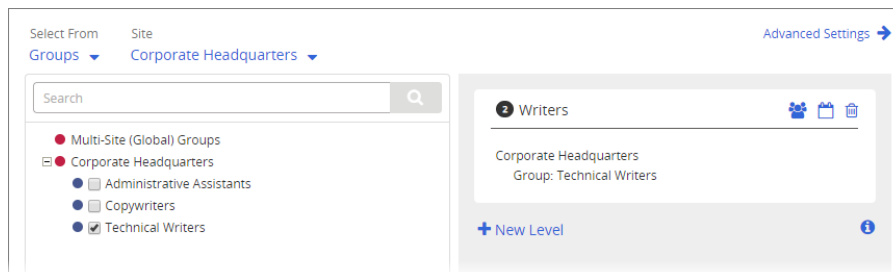

The default writer selection method is to select individual writers. You can also select by writer group, department, or job title.

### Writer Groups

1. Under **Select From**, click , click **Groups**, and then click **OK**.

2. Select one or more groups.

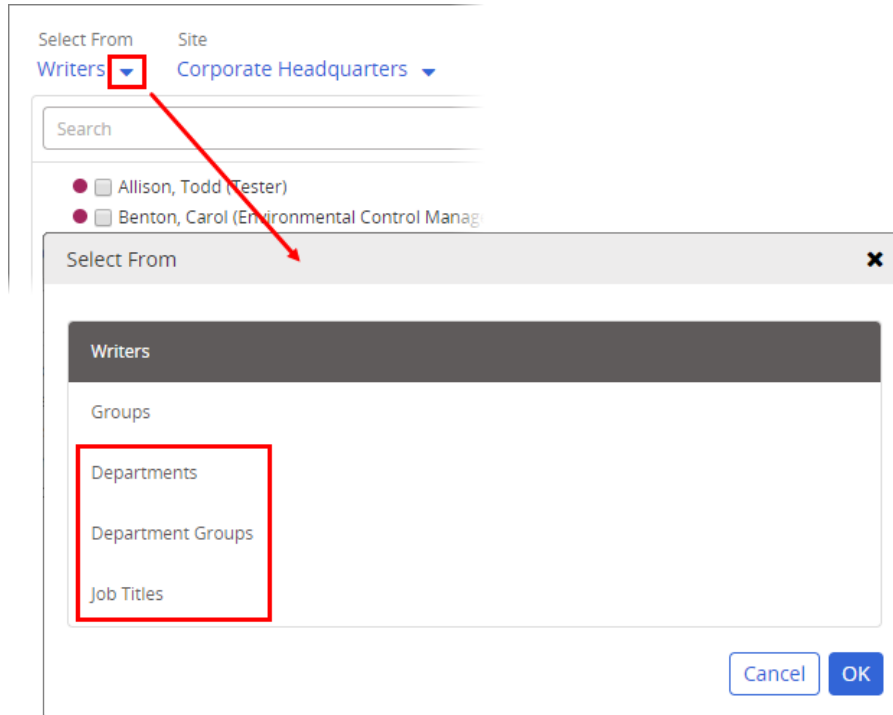

**Notes:**

- Use **Search** to find a group in a long list.
- A group is a combination of writers from a single site or from multiple sites.
- To assign individual writers from a group, click the group name, and then select writers.

**Departments, Department Groups, and Job Titles**

You select individual writers from departments, department groups, and job titles in essentially the same way.

1. Under **Select From**, click ▼, click **Departments**, **Department Groups**, or **Job Titles**, and then click **OK**.

2. Click a department, department group, or job title to display a list of writers from that entity, select one or more writers, and then click **OK**.

**Note:** Use **Search** to find a writer in a long list.

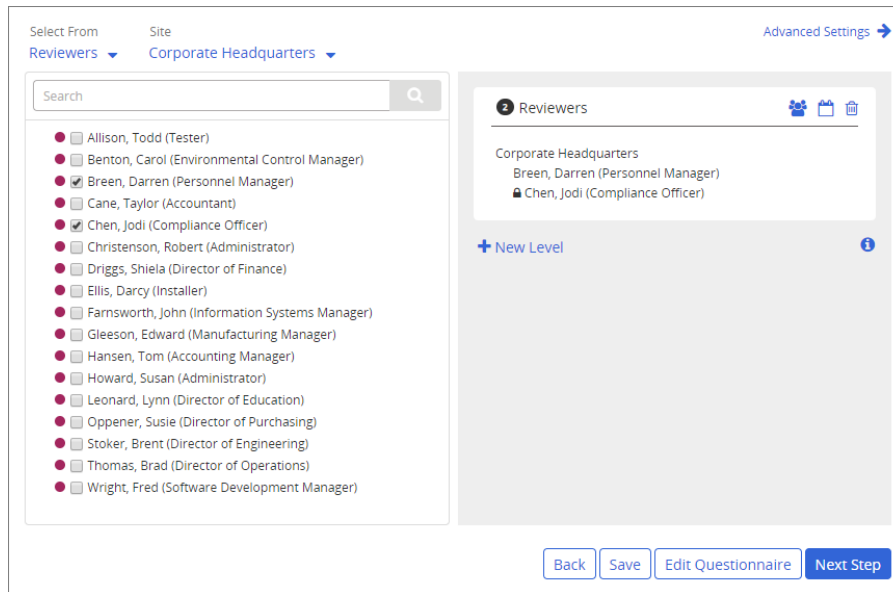

## Assigning Reviewers to a Questionnaire

You can assign one or more reviewers to check the questionnaire for accuracy and completeness.

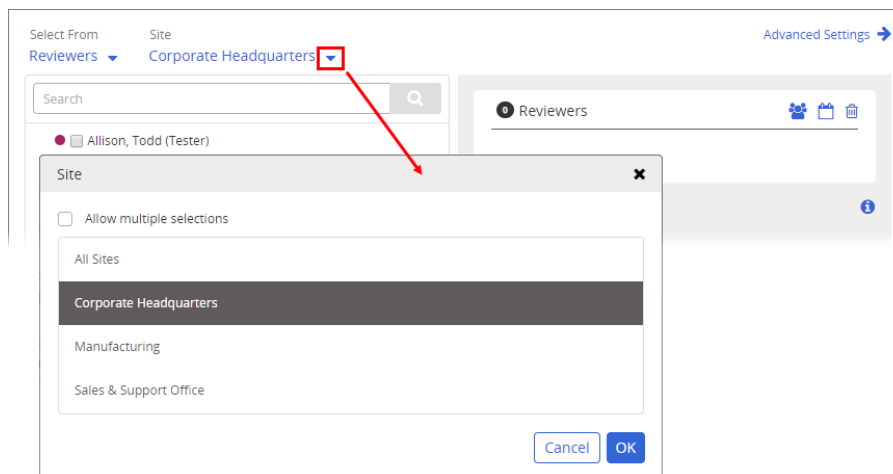

Assigning reviewers is an optional **Properties Wizard** step, unless the template includes one or more required reviewers.

1. In the **Reviewers** step, first check to see if the template included reviewer assignments. In the example below, the template automatically added two reviewers. The reviewer assignment marked with  is required, meaning that you can't remove it. The other reviewer assignment is optional and can be treated as a suggestion. To remove an optional reviewer assignment, click it, and then click .

2. If your PolicyTech system has multiple sites, do one of the following.
  - Leave the default site selection to select reviewers from the current site.
  - Under **Site**, click , select a different site, and then click **OK**.

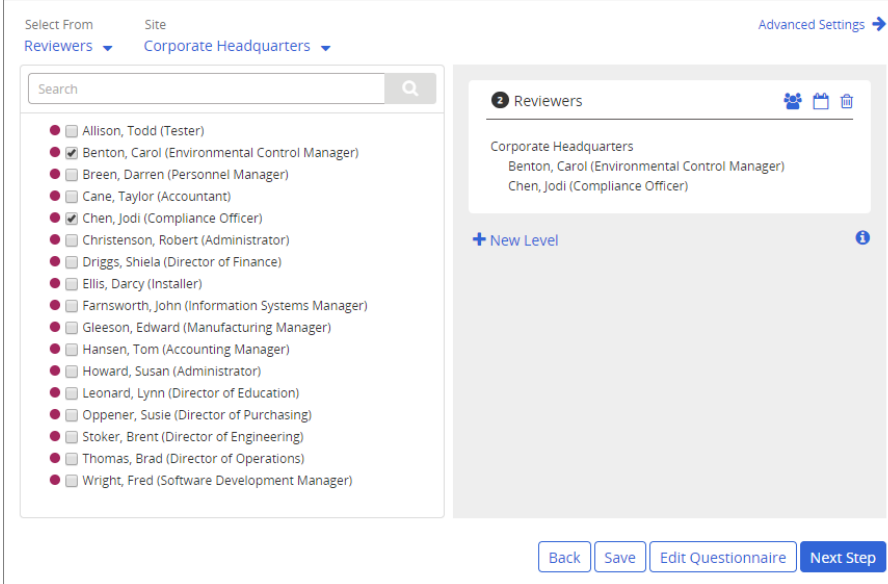

- Under **Site**, click , select **Allow multiple selections**, select two or more sites, and then click **OK**.

**Important:** If you will be assigning reviewers from other sites, see [Properties Wizard Task Assignments and Site Access](#) before doing so.

3. Select one or more reviewers.

**Note:** A list of reviewers within the selected site or sites is displayed by default. (If multiple sites are listed, expand a site to see and select individual reviewers.) To use another selection method, see [Other Ways to Select Reviewers](#).

4. (Optional) By default, all assigned reviewers must complete their tasks before the questionnaire moves on in the workflow. Alternatively, you can set a minimum number of reviewers of those assigned and have the questionnaire moved on in the workflow as soon as that number of reviewers complete their tasks.

In the right pane where reviewer selections are listed, click , select **Require [X] Users**, type a number, and then click **OK**.

Minimum Required Users for Level 1

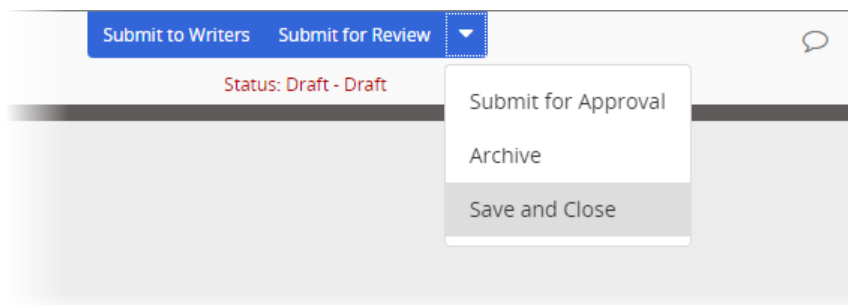

Require All Users

Require  Users

OK

**Note:** If a group is included and is both inherited from the template and designated as required, users within the group are counted individually toward the **Require** number. For example, suppose that, on a particular reviewer level, there is one individually assigned reviewer and a required group inherited from the template containing three reviewers. If you set the **Require** number at **2**, either of the following would complete the level: the individually assigned reviewer and one user from the required group accepts the questionnaire; two users from the required group accept the questionnaire.

5. (Optional) Set a due date for when reviewers should be finished. See [Setting Due Dates for Writing, Review, Approval, and Assignee Tasks](#).
6. (Optional) As you assign reviewers, they all receive tasks when you submit the questionnaire for review. If you want the questionnaire to go to reviewers in a specific order, create additional review levels. See [Working with Levels](#) for details.
7. (Optional) Click **Advanced Settings**, and then click **Add Note** to include instructions or other information for the assigned reviewers. See [Adding Notes for Writers, Reviewers, Approvers, and Assignees](#) for details.
8. Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Assigning Approvers to a Questionnaire](#).
  - To begin work on content, click **Edit Questionnaire**, and then go to [Adjusting Questionnaire Settings](#) and [Adding Questions and Answers to a Questionnaire](#).
  - Click  to the right of **Submit for Review**, and then click **Save and Close**.

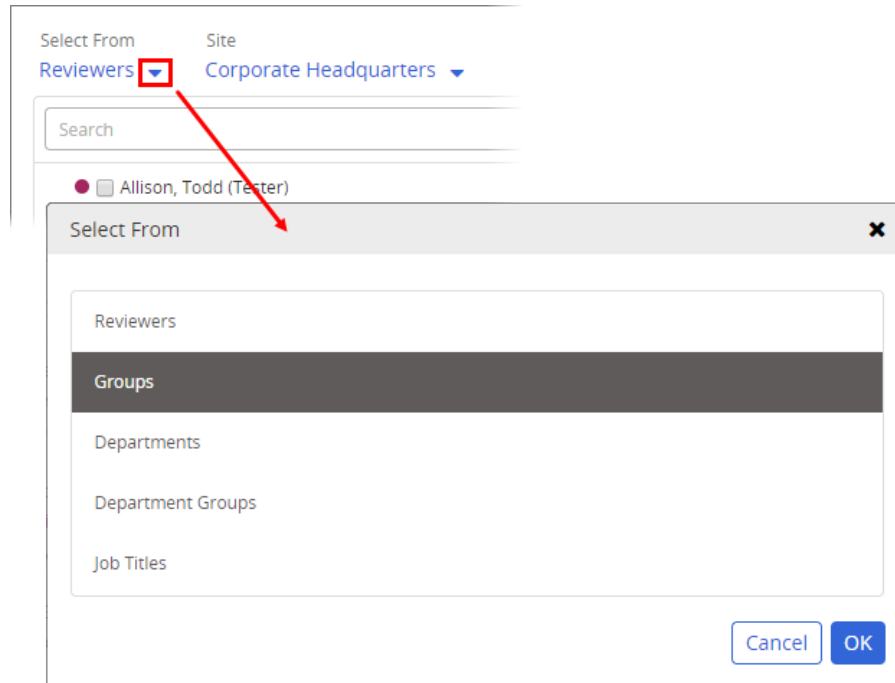

### Other Ways to Select Reviewers

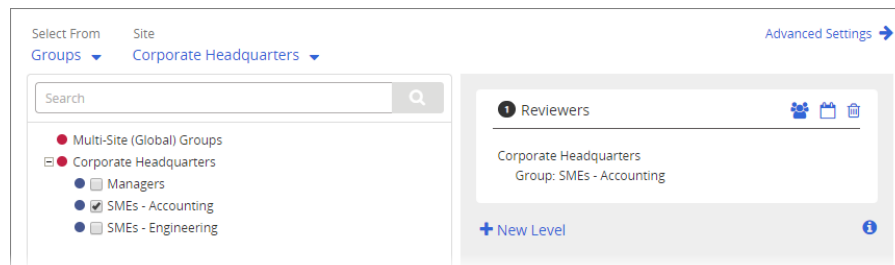

The default reviewer selection method is to select individual reviewers. You can also select reviewer groups or select individual reviewers from specific departments, department groups, or job titles.

## Reviewer Groups

1. Under **Select From**, click ▼, click **Groups**, and then click **OK**.

2. Select one or more groups.

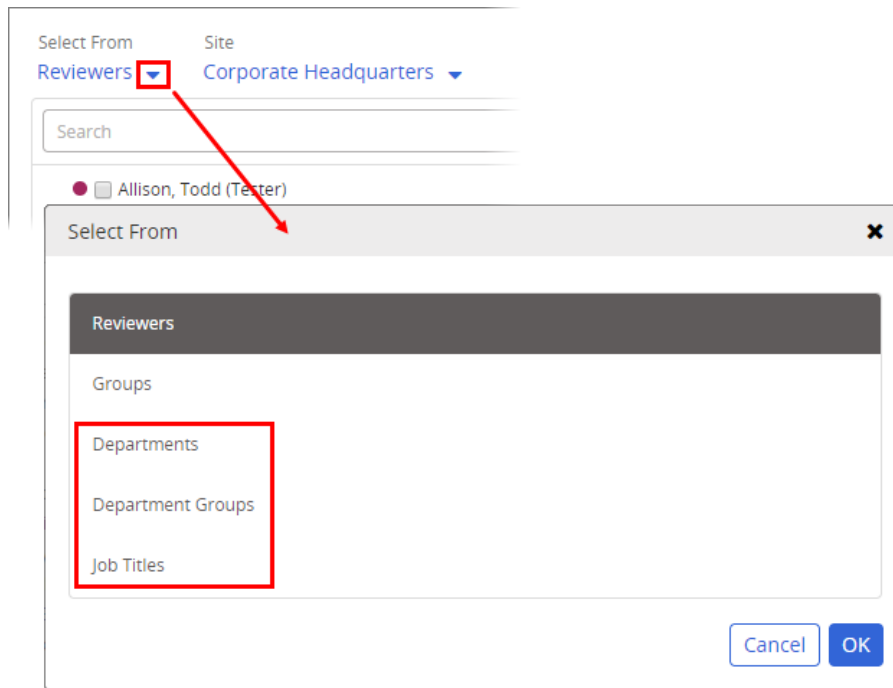

### Notes:

- Use **Search** to find a group in a long list.
- A group is a combination of reviewers from a single site or from multiple sites.
- To assign individual reviewers from a group, click the group name, and then select reviewers.

## Departments, Department Groups, and Job Titles

You select individual reviewers from departments, department groups, and job titles in essentially the same way.

1. Under **Select From**, click **Reviewers**, click **Departments**, **Department Groups**, or **Job Titles**, and then click **OK**.

2. Click a department, department group, or job title to display a list of reviewers from that entity, select one or more reviewers, and then click **OK**.

**Note:** Use **Search** to find a reviewer in a long list.

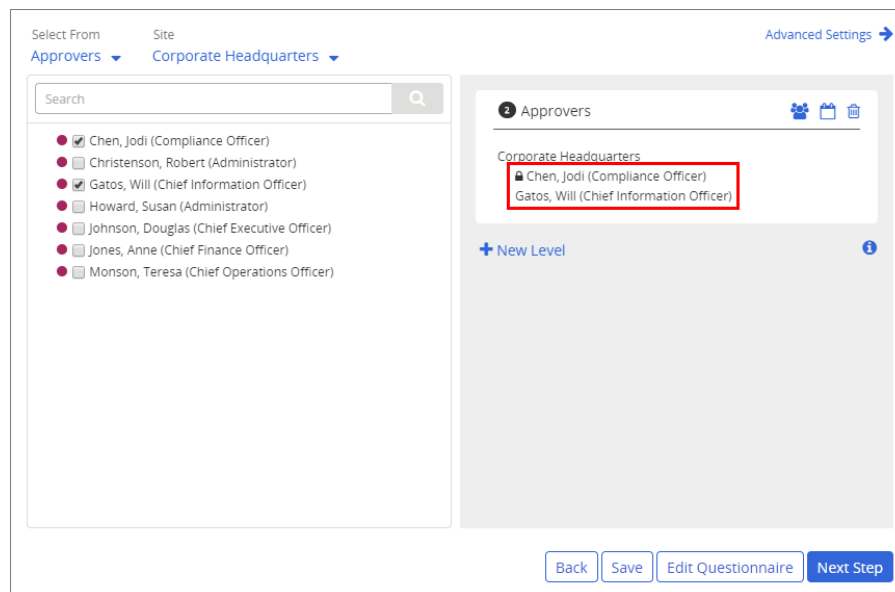

## Assigning Approvers to a Questionnaire

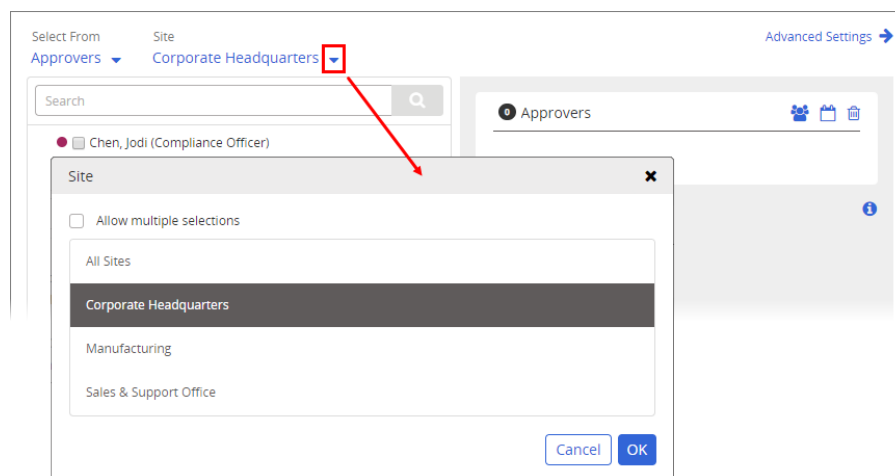

Typically, you must assign at least one approver to a questionnaire.

Approvers are usually management or executive level users who give their approval to publish the final draft. They are considered an organization's top-level approving authority and typically have legal responsibility for what they approve.

1. In the **Approvers** step, first check to see if the template included approver assignments. In the example below, the template automatically added two approvers. The approver assignment marked with  is required, meaning that you can't remove it. The other approver assignment is optional and can be treated as a suggestion. To remove an optional approver assignment, click it, and then click .

2. If your PolicyTech system has multiple sites, do one of the following.
  - Leave the default site selection to select approvers from the current site.
  - Under **Site**, click , select a different site, and then click **OK**.

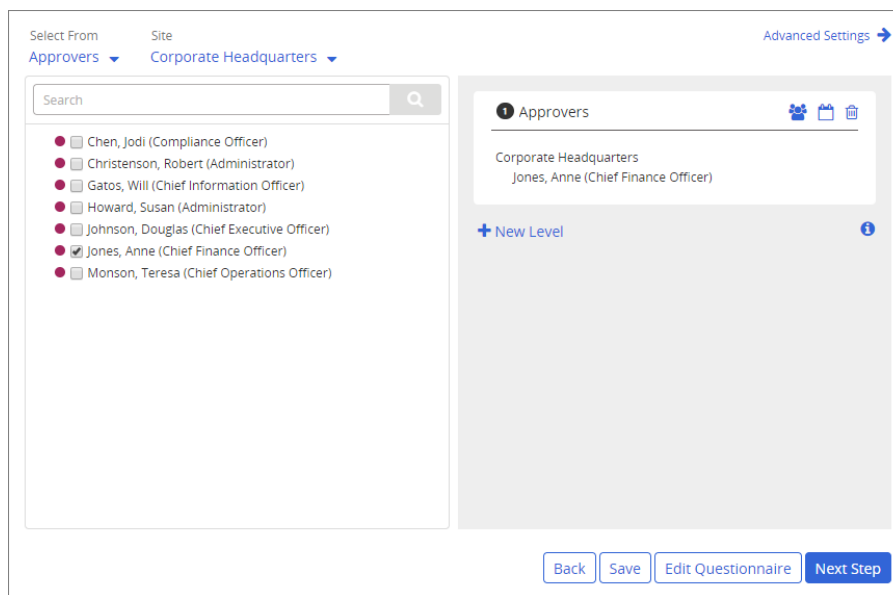

- Under **Site**, click , select **Allow multiple selections**, select two or more sites, and then click **OK**.

**Important:** If you will be assigning approvers from other sites, see [Properties Wizard Task Assignments and Site Access](#) before doing so.

3. Select one or more approvers.

**Note:** A list of approvers within the selected site or sites is displayed by default. (If multiple sites are listed, expand a site to see and select individual approvers.) To use another selection method, see [Other Ways to Select Approvers](#).

Require All Users

Require  Users

OK

**Note:** If a group is included and is both inherited from the template and designated as required, users within the group are counted individually toward the **Require** number. For example, suppose that, on a particular approver level, there is one individually assigned approver and a required group inherited from the template containing three approvers. If you set the **Require** number at **2**, either of the following would complete the level: the individually assigned approver and one user from the required group accepts the questionnaire; two users from the required group accept the questionnaire.

5. (Optional) Set a due date for when approvers should be finished. See [Setting Due Dates for Writing, Review, Approval, and Assignee Tasks](#) for details.
6. (Optional) As you assign approvers, they all receive tasks when the questionnaire goes to Approval. If you want the questionnaire to go to approvers in a specific order, create additional approval levels. See [Working with Levels](#) for details.
7. (Optional) Click **Advanced Settings**, and then click **Add Note** to include instructions or other information for the assigned approvers. See [Adding Notes for Writers, Reviewers, Approvers, and Assignees](#) for details.
8. Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Designating Assignees for a Questionnaire](#).
  - To begin work on content, click **Edit Questionnaire**, and then go to [Adjusting Questionnaire Settings](#) and [Adding Questions and Answers to a Questionnaire](#).
  - Click  to the right of **Submit for Review**, and then click **Save and Close**.

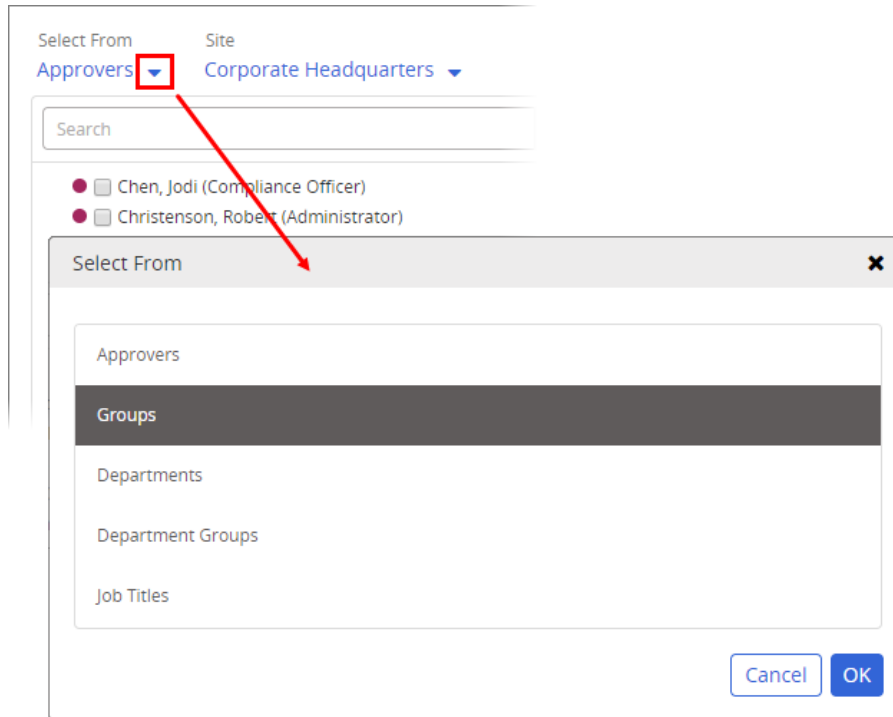

## Other Ways to Select Approvers

The default approver selection method is to select individual approvers. You can also select approver groups or select individual approvers from specific departments, department groups, or job titles.

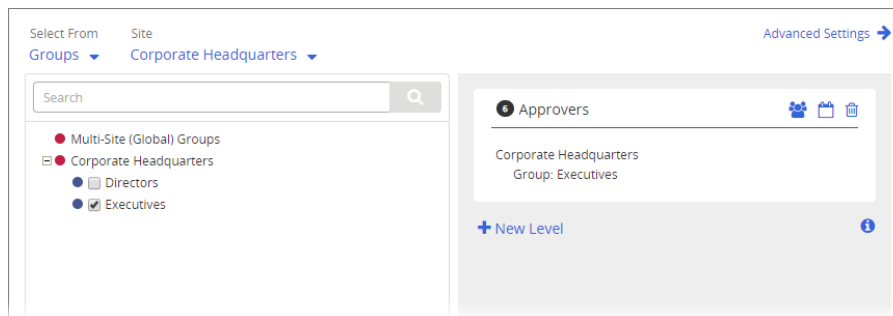

## Approver Groups

1. Under **Select From**, click ▼, click **Groups**, and then click **OK**.

2. Select one or more groups.

### Notes:

- Use **Search** to find a group in a long list.
- A group is a combination of approvers from a single site or from multiple sites.
- To assign individual approvers from a group, click the group name, and then select approvers.
- There may be situations where a board or committee needs to approve a document or questionnaire, and many of the board or committee are

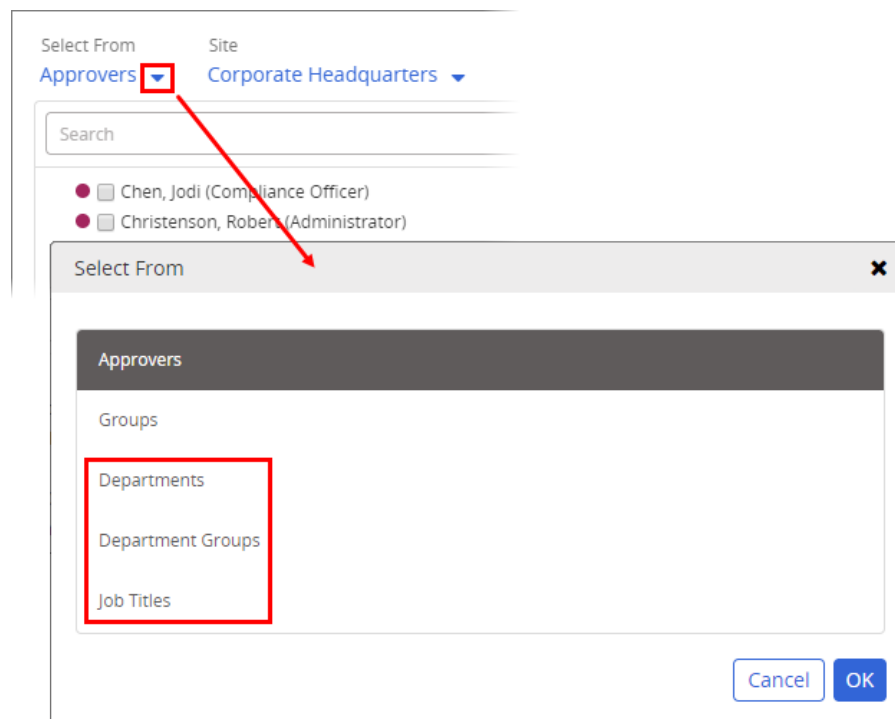

not PolicyTech users. In this case an administrator can set up an approver group to represent the board or committee, with as few as one user in the group. An administrative assistant or other individual representing the board or committee can then log in to PolicyTech during the board's or committee's meeting and accept the document/questionnaire on their behalf. This will ensure that the approval data in PolicyTech match the actual approval date. You may also want to have a legal review of such a situation in order to protect the individual who represents the board or committee.

- Some organizations choose to create an approval group of one or more users who have the responsibility to make sure the document/questionnaire is clean (all markup is removed; the department and category settings are correct; and so on) before it is approved and published/started. The group with this gatekeeper or editor role receives the document/questionnaire first (see [Working with Levels](#) for details on approval levels and workflow). The document/questionnaire then moves on to the other approvers.

### Departments, Department Groups, and Job Titles

You select individual approvers from departments, department groups, and job titles in essentially the same way.

1. Under **Select From**, click ▼, click **Departments**, **Department Groups**, or **Job Titles**, and then click **OK**.

2. Click a department, department group, or job title to display a list of approvers from that entity, select one or more approvers, and then click **OK**.

**Note:** Use **Search** to find an approver in a long list.

## Designating Assignees for a Questionnaire

Assignees are those users you require to complete a questionnaire.

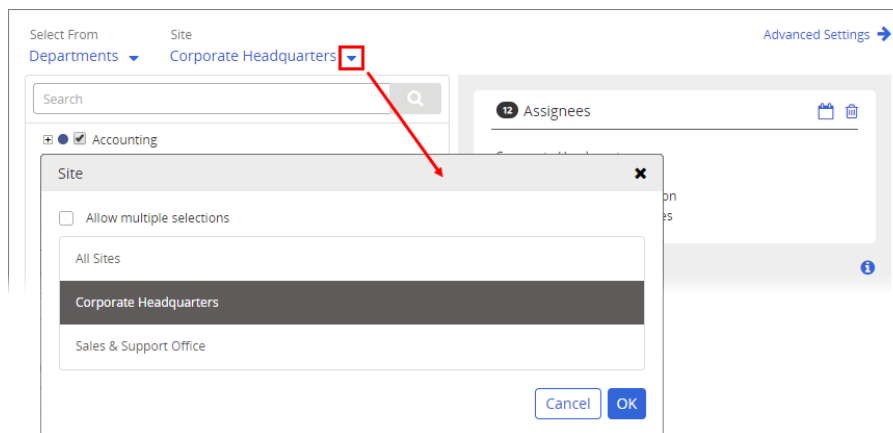

**Important:** We recommend that you select assignees by department or job title so you don't have to worry about adding or removing assignees from the questionnaire as they are added or removed from PolicyTech. Departments and job titles are automatically updated as user changes are made.

1. In the **Assignees** step, first check to see if the template included assignees. In the example below, the template automatically added two approvers. Any assignees added by the template are optional and can be treated as suggestions. To remove an optional assignee, department, or job title, click it, and then click .

2. If your PolicyTech system has multiple sites, do one of the following.

- Leave the default site selection to select approvers from the current site.
- Under **Site**, click ▼, select a different site, and then click **OK**.

- Under **Site**, click ▼, select **Allow multiple selections**, select two or more sites, and then click **OK**.

**Important:** If you will be designating assignees from other sites, see [Assignees and Site Access](#) before doing so.

3. Select one or more departments.

**Notes:**

- A list of departments within the selected site or sites is displayed by default. (If multiple sites are listed, expand a site to see and select

departments.) To use another selection method, see [Other Ways to Select Assignees](#).

- To assign individual users from a department, click the department name, and then select users.

- Click  to the right of **Submit for Review**, and then click **Save and Close**.

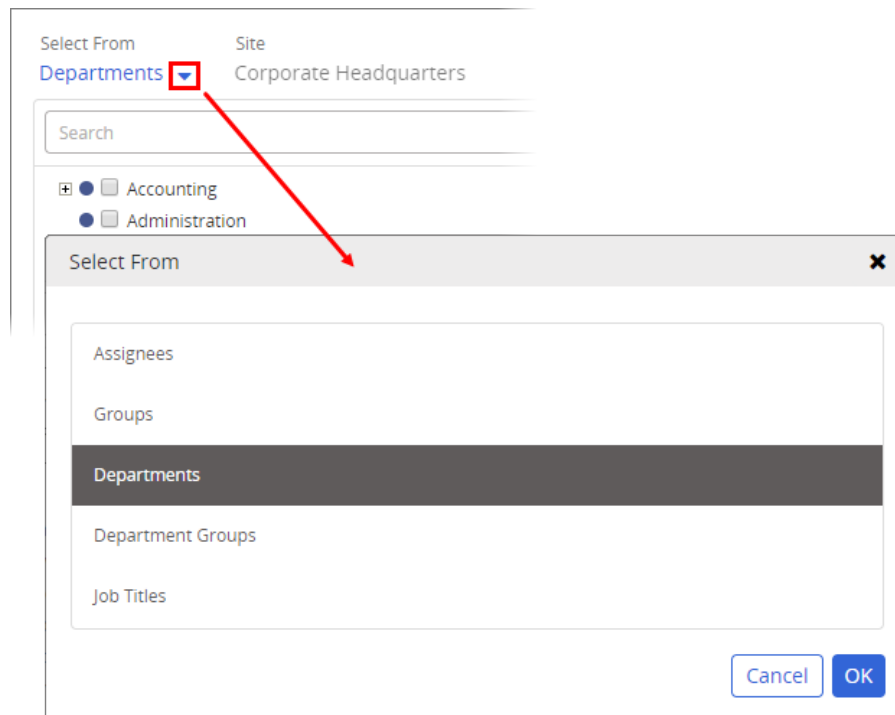

### Other Ways to Select Assignees

The default assignee selection method is by department. You can also select individual assignees, by assignee group, by department group, or by job title. You select all of these in essentially the same way.

**Note:** A group is a combination of departments, job titles, or assignees from a single site or from multiple sites.

1. Under **Select From**, click , click **Assignees**, and then click **OK**.

2. Select one or more assignees, groups, or job titles.

**Note:** Use **Search** to find an item in a long list.

The screenshot shows a web interface for selecting assignees. At the top, it says "Select From Assignees" and "Site Corporate Headquarters". There is a search bar and a list of 25 assignees, each with a radio button. The list includes names and titles such as "Allison, Todd (Tester)", "Benton, Carol (Environmental Control Manager)", "Breen, Darren (Personnel Manager)", etc. To the right, a preview window titled "Assignees" shows the selected items: "Corporate Headquarters", "Benton, Carol (Environmental Control Manager)", "Breen, Darren (Personnel Manager)", "Farnsworth, John (Information Systems Manager)", "Gleeson, Edward (Manufacturing Manager)", and "Hansen, Tom (Accounting Manager)". Below the preview is a checkbox for "Set as Notify Only". At the bottom are buttons for "Back", "Save", "Edit Document", and "Next Step".

## Adjusting Security Settings for a Questionnaire

You can assign different security and encryption levels to a questionnaire to restrict who can work with or view it.

1. In the **Security** step, select a level. See [Security Levels](#) below for details on each level.

The screenshot shows the "Security Level" selection screen in a questionnaire tool. The top navigation bar includes "Conflict of Interest Survey v.1", "Submit to Writers", and "Submit for Review". The main navigation menu on the left has items for "Settings", "Categories", "Writers", "Reviewers", "Approvers", "Assignees", and "Security". The "Security Level" dropdown is currently set to "All Users". A tooltip explains the levels: "All Users" (Users can view this item in the workflow stages they have permission to view.), "Restricted - High" (Users can view this item at any time as long as a task is assigned to them for this item.), and "Restricted - Severe" (Users can view this item only while it is in the status and level for which they have a task assignment.). At the bottom are buttons for "Back", "Save", and "Edit Questionnaire".

2. Do one of the following:

- If you selected the **All Users** security level (the default setting for all new questionnaires), you are done with security options. Go to step 4 below.
  - If you selected **Restricted - High** or **Restricted - Severe**, continue with step 3.
3. (Optional) To grant special access permissions to specific users who would not normally have access under the **Restricted - High** or **Restricted - Severe** security level, select those users by department, by job title, or by those with the Assignee role. See [Other Allowed Users](#) below for details on what permissions will be granted.

5. Do one of the following:
- To begin work on content, click **Edit Questionnaire**, and then go to [Adjusting Questionnaire Settings](#) and [Adding Questions and Answers to a Questionnaire](#).
  - Click  to the right of **Submit for Review**, and then click **Save and Close**.

## Security Levels

An administrator can assign users various roles for working with documents and questionnaires. These roles include Document Owner, Questionnaire Owner, Writer, Reviewer, Approver, Pending, and Archived. These roles allow users access to the workflow statuses that correspond with their roles. For example, a document owner will see documents in the Draft status, a writer will see documents in the Collaboration status, and an assignee will see documents in the Published status. Which documents/questionnaires they can see in each of these statuses depends on the documents'/questionnaires' assigned security levels, as explained below.

**All Users.** When a document/questionnaire is assigned this security level, all users with the roles mentioned above can see that item in the workflow statuses they have access to, even if they are not specifically assigned to that item. For example, someone with the Document Owner role who is not a document's owner can see that item while it is in the Draft status, and someone with the reviewer role who is not assigned to a document can see it while it's in the Review status.

**Restricted - High.** With this security level assigned to a document/questionnaire, only those specifically assigned to one or more workflow statuses of the item have access to it. They can also access the document/questionnaire in any workflow status except archived. For example, someone assigned as a document's approver can see that document while it is in the Draft, Collaboration, Review, Approval, Pending, and Published statuses.

**Restricted - Severe.** As with the **Restricted - High** security level, only users specifically assigned to one or more workflow statuses of the document/questionnaire have access to it. However, they can only view that item while it is in the status to which they are assigned. For example, an assigned writer can only see the document/questionnaire while it is in Collaboration status.

## Encryption Modes

The encryption mode determines how much of a document is searchable when a user searches for a document from a document list, such as when the **Published** status is selected.

**Normal.** The document's title, keywords, and contents are all searchable.

**High.** Only the document's title and keywords are searchable. (Keywords can be added in step **1. Settings** of the **Properties Wizard**.)

**Important:** Be aware that documents with high encryption take longer to open and increase the PolicyTech server's processing load.

### Other Allowed Users

If you assign a document or questionnaire the **Restricted - High** or **Restricted - Severe** security level, you have the ability to allow other users who are not assigned to this document/questionnaire to access it as if they were assigned to it. As with users assigned to the document/questionnaire, where other allowed users can access the item depends on their assigned roles and the item's security level.

Select other allowed users in the same way as you select users in the Assignees step.

### Working with Levels

When, in the **Properties Wizard**, you assign writers, reviewers, and approvers to a document or questionnaire, you can create levels to specify which users get the document/questionnaire first, second, and so on. When you create multiple levels, all users on the first level must complete their tasks, such as reviewing the document/questionnaire, before the same task can be sent to the users at the next level.

The following instructions assume that you are currently working on one of these **Properties Wizard** steps: **Writers**, **Reviewers**, **Approvers**.

#### Add a Level

Click **New Level**.

Notice in the screenshot above that **Level 2** has a dark border, indicating that this level is now active. Any users selected at this point are added to **Level 2**. To make **Level 1** active again, click anywhere in **Level 1**.

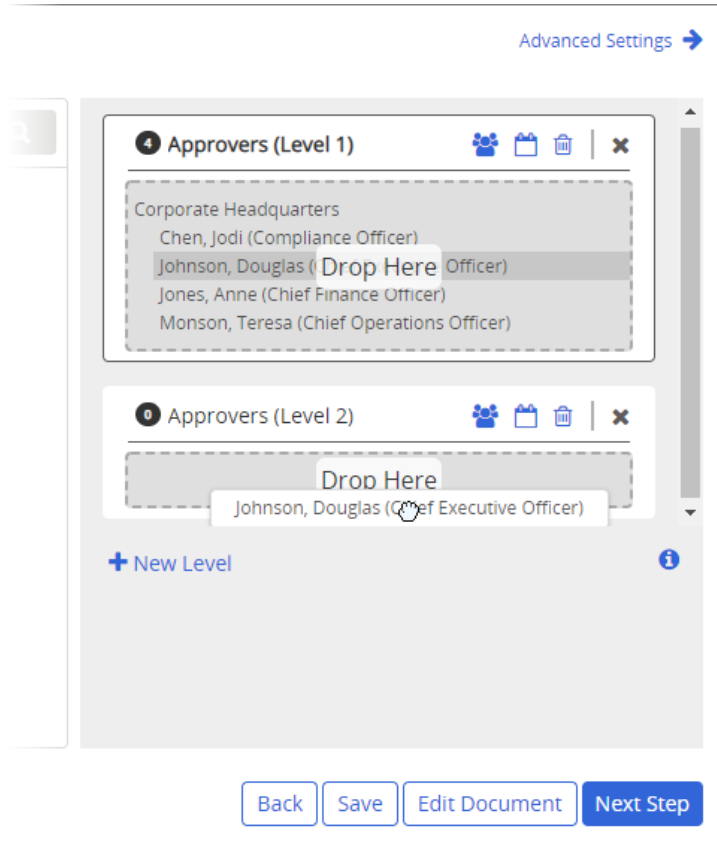

### **Assign Users to a Level**

Click a level to activate it, and then select users, departments, job titles, or groups. Notice that the number of selected users in the level is updated automatically.

### Move Users Between Levels

Click and drag a user to the desired level.

**Note:** To move multiple users at once, hold down the Ctrl key as you select each user, and then click and drag the selection. To select a range of users, click the top user and then hold down the Shift key as you click the last user.

### Adjust Level Settings

With multiple levels, **Due Date** and **Minimum Required Users** settings exist for each level.

### Set Due Dates

For instructions on setting due dates, see [Setting Due Dates for Writing, Review, Approval, and Assignee Tasks](#).

### Set Minimum Required Users

(Optional) By default, all assigned writers, reviewers, or approvers must complete their tasks before the document/questionnaire moves on in the workflow. Alternatively, you can set a minimum number of those assigned and have the document/questionnaire moved on in the workflow as soon as that number of writers, reviewers, or approvers complete their tasks.

In a level header, click , select **Require [X] Users**, type a number, and then click **OK**.

**Note:** If a group is included and is both inherited from the template and designated as required, users within the group are counted individually toward the **Require** number. For example, suppose that, on a particular approver level, there is one individually assigned approver and a required group inherited from the template containing three approvers. If you set the **Require** number at **2**, either of the following would complete the level: the individually assigned approver and one user from the required group accepts the document/questionnaire; two users from the required group accept the document/questionnaire.

### Remove a Level

A level must be empty before you can remove it.

1. Remove all users, groups, departments, and job titles from the level.
2. Do one of the following:
  - Click **X**, and then click **Yes**.

- Click **Save** or click another **Properties Wizard** step to automatically remove the empty level.

## Setting Due Dates for Writing, Review, Approval, and Assignee Tasks

You can set a task due date that is a specific number of days after the user receives the task, or you can select a specific calendar date as the due date. A writer, reviewer, approver, or assignee who fails to complete a task on or before the set due date receives a one-time notification email when the task becomes overdue. If task summary emails are enabled, users can also see their tasks' overdue statuses each time they receive a task summary email.

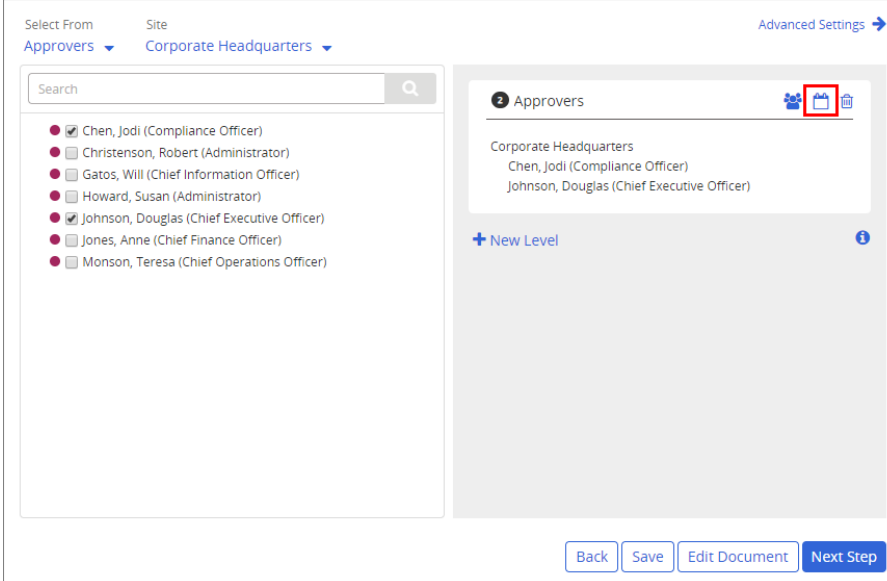

The way you set a due date for a writing, reviewing, or approving task is the same, while [setting a due date for a reading task](#) is slightly different.

### Setting a Due Date for a Writing, Review, or Approval Task

**Important:** The instructions in this section assume that you are working in one of the following **Properties Wizard** steps: **Writers, Reviewers, Approvers**.

1. Do one of the following:

- In the right pane where approver selections are listed, click .

The screenshot displays the 'Approvers' configuration screen. At the top, it shows 'Select From' as 'Approvers' and 'Site' as 'Corporate Headquarters'. A search bar is present above a list of approvers. The list includes: Chen, Jodi (Compliance Officer) [checked], Christenson, Robert (Administrator), Gatos, Will (Chief Information Officer), Howard, Susan (Administrator), Johnson, Douglas (Chief Executive Officer) [checked], Jones, Anne (Chief Finance Officer), and Monson, Teresa (Chief Operations Officer). On the right, the 'Approvers' pane shows the selected approver 'Chen, Jodi (Compliance Officer)' under the 'Corporate Headquarters' site. A calendar icon is highlighted with a red box in the top right of this pane. At the bottom of the interface are buttons for 'Back', 'Save', 'Edit Document', and 'Next Step'.

- If there are multiple levels, click  in one of the level headers.

The screenshot shows a configuration window for questionnaire approvers. At the top, it says "Select From" and "Site Corporate Headquarters". Below this is a search bar and a list of approvers with checkboxes. The list includes: Chen, Jodi (Compliance Officer), Christenson, Robert (Administrator), Gatos, Will (Chief Information Officer), Howard, Susan (Administrator), Johnson, Douglas (Chief Executive Officer), Jones, Anne (Chief Finance Officer), and Monson, Teresa (Chief Operations Officer). On the right, there are two "Approvers (Level 1)" and "Approvers (Level 2)" sections. Each section shows a list of approvers for that level. The "Approvers (Level 1)" section lists Chen, Jodi (Compliance Officer) and Gatos, Will (Chief Information Officer). The "Approvers (Level 2)" section lists Johnson, Douglas (Chief Executive Officer). There is a "+ New Level" button at the bottom left of the right-hand panel. At the bottom of the window are buttons for "Back", "Save", "Edit Document", and "Next Step".

2. Do one of the following:

- Click **Due on Date Interval**, and then type a number in the **Due** box. The user then has that many days to complete the task after receiving it.

The screenshot shows a dialog box titled "Due Date for Level 1". It has a close button (X) in the top right corner. The main content area has a dropdown menu set to "Due on Date Interval". Below this is a "Due" field with the value "0" and the text "days after this level begins". There are three checkboxes: "Delay Phase Change", "Warn" (with a "0" in a field and "days before due date"), and "Make this critical on" (with a dropdown menu). At the bottom, there is a note: "Note: Content could be declined and sent back to draft several times. Make sure you provide ample time to allow for this." and an "OK" button.

- Click **Due on Specific Date**, click ▼ in the **Target Due Date** box, and then find and click the due date.

Due Date for Level 1

Due on Specific Date

Target Due Date:   

Delay Phase Change 

Warn  days before due date 

Make this critical on  

Note: Content could be declined and sent back to draft several times. Make sure you provide ample time to allow for this.

OK

3. (Optional) The **Delay Phase Change** option applies only if you selected a number less than **All** in this level's **Minimum Requires Users** setting. Select **Delay Phase Change** if you want as many users as possible to complete their tasks up until the due date, but then want the document/questionnaire moved on to the next level if at least the number of required users have completed their tasks. The document/questionnaire will move to the next level earlier than the due date only if all users on the current level complete their tasks.
4. (Optional) Select **Warn**, and then type a number of days before the due date that you want all that level's users notified that the due date is approaching. For example, if you set **10** as the **Due on Date Interval** setting, and then you set **Warn** to **2**, any users who haven't finished their tasks for that level by the end of the eighth day will receive a task reminder.
5. (Optional) Select **Make this critical on**, click , and then find and click a date that is on or after the due date. If any users haven't completed their tasks by the critical date, an escalation email is sent to both the assigned users and the document/questionnaire owner.

### Setting a Due Date for an Assignee Task

**Important:** The instructions in this section assume that you are working on the **Assignees** step of the **Properties Wizard**.

**Note:** Due dates do not apply to "Notify Only" assignees.

1. In the right pane where assignee selections are listed, click .

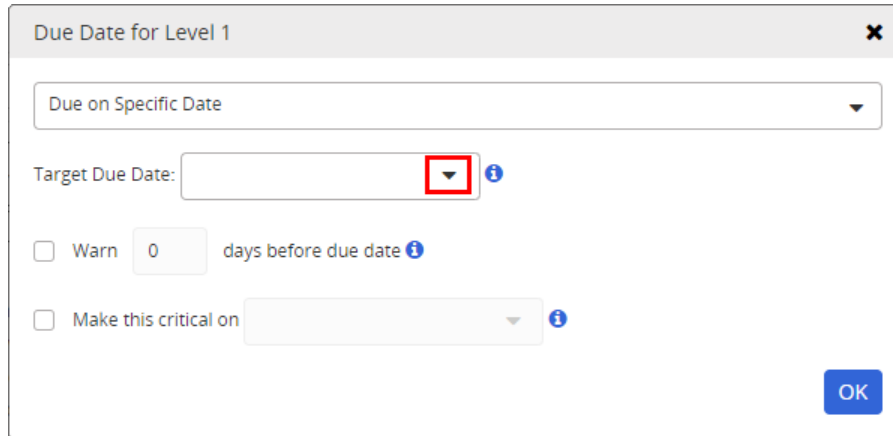

2. Do one of the following:

- Click **Due on Date Interval**, and then type a number in the **Due** box. The user then has that many days to complete the task after receiving it.

- Click **Due on Specific Date**, click ▼ in the **Target Due Date** box, and then find and click the due date.

**Important:** We recommend that you not set a specific due date for an assignee task as that could cause past due notices to go out to new users who were added after the due date and assigned to read the document or complete the questionnaire.

3. (Optional) Select **Warn**, and then type a number of days before the due date that you want all that level's users notified that the due date is approaching. For example, if you set **10** as the **Due on Date Interval** setting, and then you set **Warn** to **2**, any users who haven't finished their tasks for that level by the end of the eighth day will receive a task reminder.
4. (Optional) Select **Make this critical on**, click ▼, and then find and click a date that is on or after the due date. If any users haven't completed their tasks by the critical date, an escalation email is sent to both the assigned users and the document/questionnaire owner.

## Properties Wizard Task Assignments and Site Access

As users are added to PolicyTech, the administrator decides which sites each user should have access to. When you assign a writer, reviewer, approver, or assignee to a content item (document, questionnaire, or campaign) and that user is not assigned or and has not been given access to the site containing the item, PolicyTech lets the user open that content item anyway in order to complete the assigned task. However, the user can only open the content item from the task in **My Tasks** or from the link in the notification email. The content item cannot be found using **Search** or **Browse**, since the user cannot select that site.

Keep this in mind as you assign users from other sites. Be sure that you're not granting a user access to a content item that the user should not have access to.

## Adding Notes for Writers, Reviewers, Approvers, and Assignees

When selecting writers, reviewers, approvers, and assignees in the **Properties Wizard**, you can include a note with instructions or other information concerning the writing, review, approval, or reading/completion of the content item (document, questionnaire, or campaign). Any note you write is included in the task notification email sent to assigned users as soon as the content item moves to the status for which the note was written. For example, if you include a note while working on the **Assignees** step, that note will be sent as soon as the

content item is published or started. A user assigned a content item task can also access a note from within the content item (see [Reviewing Notes](#) for details).

1. In the **Writers, Reviewers, Approvers, or Assignees** step of the **Properties Wizard**, click **Advanced Settings**, and then click **Add Note**.

2. Click **To...**.

3. As you select note recipients, you will only see the users and groups currently assigned to the content item. Click the **Writers, Reviewers,**

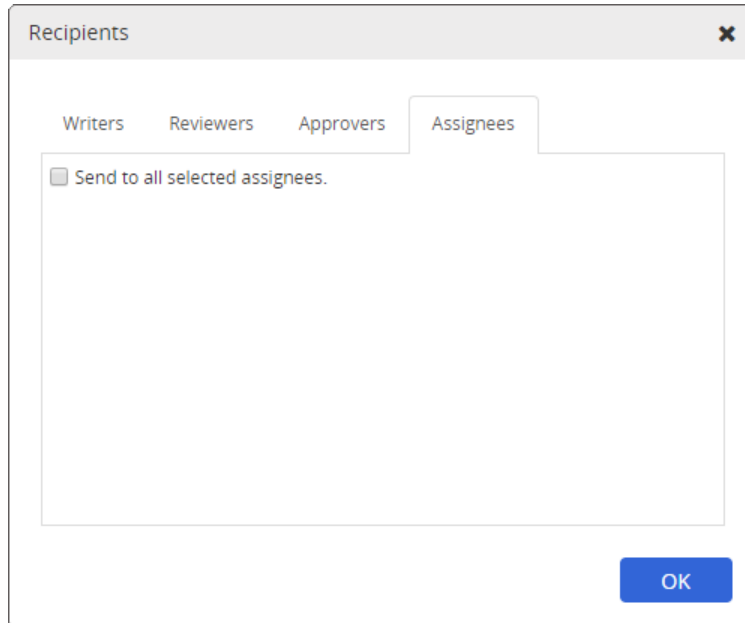

**Approvers**, or **Assignees** tab, and then do any of the following:

- Under the **Writers**, **Reviewers**, or **Approvers** heading, select individual assignees or select a level to include all assignees on that level.

The screenshot shows a window titled "Recipients" with a close button (X) in the top right corner. It features four tabs: "Writers", "Reviewers", "Approvers", and "Assignees". The "Approvers" tab is selected and active. Inside this tab, there is a scrollable list of assignees. The list is organized into levels: "Level 1" and "Level 2". Under "Level 1", there are two entries: "Gatos, Will (Chief Information Officer)" and "Johnson, Douglas (Chief Executive Officer)". Under "Level 2", there is one entry: "Jones, Anne (Chief Finance Officer)". Each entry has a small square checkbox to its left. Below the list of assignees, there are two sections: "Groups" and "Multi-Site (Global) Groups", each with a right-pointing arrow icon. At the bottom right of the dialog, there is a blue "OK" button.

- In the **Writers**, **Reviewers**, or **Approvers** tab, click the **Groups** heading, and then select one or more assigned groups.
- To select assignees as note recipients, click the **Assignees** tab, and then click **Send to all selected assignees**.

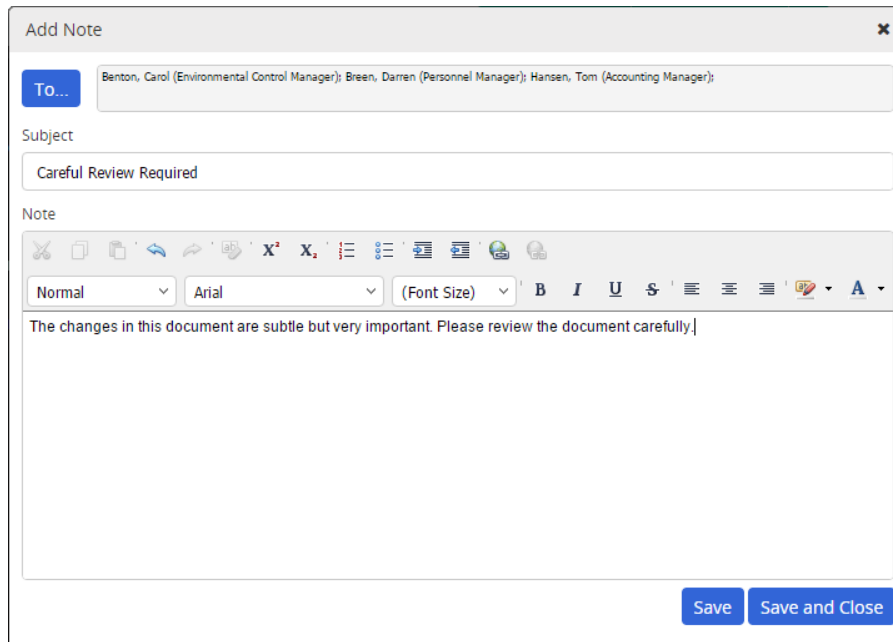

**Note:** If you select **Send to all selected assignees**, both required and "Notify Only" assignees receive the note in their initial email notifications.

4. Type a subject.

**Note:** You must type a subject before you can save the note.

5. Type the instructions or other information, and then click **Save and Close**.

## Adjusting Questionnaire Settings

The available settings depend on whether the **Quiz** or **Survey** questionnaire type is selected. The settings also vary slightly depending on whether you're

creating a stand-alone questionnaire or a questionnaire in a document.

**Note:** When creating a stand-alone questionnaire, **Survey** is selected by default. When adding a questionnaire to a document, **Quiz** is selected by default.

### Quiz Settings

Select the **Quiz** type of questionnaire to create questions whose answers will be scored. Quizzes are generally used to test concept knowledge or reading comprehension. If you create a stand-alone quiz, assignees will be required to complete the quiz with a passing score in order to complete their assigned **Read / Complete** task. If you create a quiz in a document, assignees will be required to complete the quiz with a passing score before they can mark the document as read.

Show all possible answers  
 Show the user's response  
 Show the correct answer

[+ Create a stand-alone Questionnaire.](#)

[< Questions & Answers](#) [Save](#)

Each quiz setting is described below.

**Minimum Score to Pass.** Type the percentage of questions assignees must answer correctly in order to pass the quiz. The default setting is **100**.

**Show Printable Certificate.** Select this option to give assignees the ability to print out a certificate once they pass the quiz.

**Disable Questionnaire (for document questionnaires only).** Select this option if, after creating a quiz in a document, you decide not to require it for marking the document as read.

To restrict access to these reports, select **Restrict results to administrators and the owner**.

**Questionnaire Introduction.** (Optional) In the **Questionnaire Introduction** box, type text that you want to appear at the top of the quiz. The introduction text will be preceded by "Read This First."

**Randomization.** By default, all questions you add under a section are included in the quiz. If you want PolicyTech to randomly select one question from each section and include only that question in the quiz, select **Show one random question per section**.

**Disable Numbering.** If you want the question numbers hidden when users take this quiz, select **Disable numbering on questionnaire**.

**Notes:**

- **Disable Numbering** is automatically selected and unchangeable if, for **Randomization**, you select **Show one random question per section**.
- This option hides numbers in the published quiz only. Numbers are still shown when editing questions and answers.

**Review.** By default, when assigned reviewers and approvers look at a quiz, correct answers are not indicated. To change this, select **Show correct answers to reviewers and approvers**.

**Questionnaire Results: Questions.** To show questions when an assignee fails a quiz, click **Show all questions** or **Show incorrectly answered questions**. **Don't show questions** is selected by default.

**Important:** Selecting an option to show questions also shows question feedback, if any exists. If you are opting to show questions for the first time for this quiz, none of the already added questions will have feedback text as the **Feedback** box in the **Question** window is disabled until you've opted to show questions. If you want to include feedback, you'll need to edit the questions to add it. (See [Changing a Questionnaire](#) for help with editing questions.)

**Questionnaire Results: Answers.** The options under the **Answers** area are selectable only if one of the options for showing questions is selected. To show answers with questions when an assignee fails the quiz, select one or more of the following:

- **Show all possible answers.** Lists all of a question's answers.
- **Show the user's response.** Shows only the answer the assignee selected and marks it with  if the answer is correct or with  if it's incorrect.
- **Show the correct answer.** Displays only the correct answer preceded by .

**Create a stand-alone Questionnaire (for document questionnaires only).** While in a quiz created for a document, click **Create a stand-alone Questionnaire** to open a new stand-alone quiz containing the same questions, answers, and settings as the document quiz.

**Note:** This does not affect the original document quiz in any way. It only creates a copy of the document quiz and creates a new stand-alone quiz from that copy.

### Survey Settings

Select the **Survey** type of questionnaire to create questions whose answers will not be scored. Surveys are generally used to gather information. If you create a stand-alone survey, assignees will be required to complete the survey in order to complete their assigned **Read / Complete** task. If you create a survey in a document, assignees will be required to complete the survey before they can mark the document as read.

**Show Printable Certificate.** Select this option to give assignees the ability to print out a certificate once they complete the survey.

**Disable Questionnaire (for document questionnaires only).** Select this option if, after creating a survey in a document, you decide not to require it for marking a document as read.

**Confidentiality.** Survey results can be seen by running a questionnaire report (**Questionnaire Results by Content** or **Questionnaire Results by User**). By default, those with the following role or system permission assignments and with access to the document containing the survey or to the stand-alone survey can run these reports and see survey results:

- Document Owner or Questionnaire Owner (**Questionnaire Results by Content** only)
- Manager (**Questionnaire Results by User** only)
- Report Manager
- Administrator

To restrict access to these reports, select **Restrict results to administrators and the owner.**

**Questionnaire Introduction.** (Optional) In the **Questionnaire Introduction** box, type text that you want to appear at the top of the survey. The introduction text will be preceded by "Read This First."

**Disable Numbering.** If you want the question numbers hidden when assignees complete this survey, select **Disable numbering on questionnaire**.

**Note:** This option hides numbers in the published survey only. Numbers are still shown when editing questions and answers.

**Create a stand-alone Questionnaire (for document questionnaires only).** While in a survey created for a document, click **Create a stand-alone Questionnaire** to open a new stand-alone survey containing the same questions, answers, and settings as the document survey.

**Note:** This does not affect the original document survey in any way. It only creates a copy of the document survey and creates a new stand-alone survey from that copy.

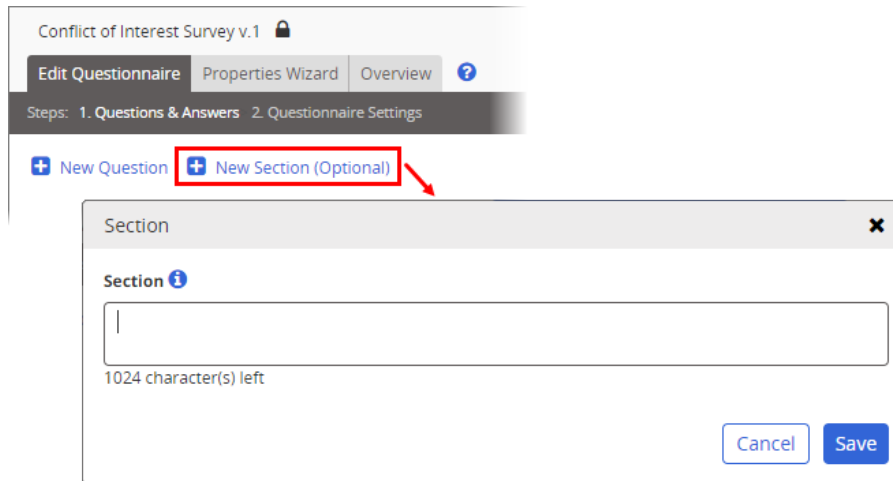

## Adding Questions and Answers to a Questionnaire

1. Do one of the following to start adding questions and answers to a questionnaire:
  - If the **Questions & Answers** page is already displayed, move on to the next step.

- If you're currently on the **Questionnaire Settings** page, click **Questions & Answers**.

- If you haven't started a questionnaire yet, follow the instructions in [Creating a Questionnaire \(Overview\)](#) for a stand-alone questionnaire or [Creating a Document Questionnaire](#) before continuing.
2. (Optional) To include a section for the first group of questions, click **New Section**, type the section heading, and then click **Save**.

3. To add a question, click **New Question** near the upper left corner or click **New Question** in the section header.

**Important:** When you have only one section, clicking either **New Question** option does the same thing. However, if you have multiple sections, clicking **New Question** in the upper left corner adds a question to the first section, while clicking **New Question** in a section header adds the question to that section.

4. Select a **Question Type** option. As shown below, the options in the **Answers** area change based on the question type selected.

**Important:** If you change the question type after typing answers, those answers will be deleted.

**Note:** An open-ended question in a quiz-type questionnaire is not included when calculating a score.

The image displays four overlapping windows for configuring different question types in a questionnaire. Each window has a title bar with a close button (X) and a warning icon with the text "Changing this will delete your answers and any subquestions."

- Multiple Choice:** The "Question Type" dropdown is set to "Multiple Choice". Below it, there are several radio button options for answers, with a "+ Add an" button at the bottom.
- True or False:** The "Question Type" dropdown is set to "True or False". The "Answers" section has "Only one answer is correct" selected. Below, there are two radio button options: "True" and "False", each with an "Options" button.
- Yes or No:** The "Question Type" dropdown is set to "Yes or No". The "Answers" section has "Only one answer is correct" selected. Below, there are two radio button options: "Yes" and "No".
- Open Ended:** The "Question Type" dropdown is set to "Open Ended". The "Answers" section has "Only one answer is correct" selected. Below, there is a text box with the instruction: "The user will be presented with a text box to enter their response. The response will not affect the user's score negatively."

At the bottom of the interface, there are buttons for "Save and Close" and "Add question >".

5. Type the question text.

To include a link, click , select **URL** or **E-mail address**, and then type at least the URL or email address.

**Notes:**

- A URL must include **http://** or **https://**.
- Text you type in the **Text** box will be displayed as the link text instead of the actual URL or email address.
- Text you type in the **ToolTip** box will be displayed when assignees completing the questionnaire hover their cursors over the link text.
- To remove a link, click anywhere in the link text, and then click .

6. If the current **Questionnaire Type** setting in **Questionnaire Settings** is **Quiz** and you selected **Multiple Choice**, **True or False**, or **Yes or No** as the current question type, then, directly below the **Answers** heading, do one of the following:

- If you're creating a quiz-type question, select **Only one answer is correct** (the default setting for new questions when **Questionnaire Type** is **Quiz**).
- If you're creating a survey-type question, select **Any answer is acceptable**.

**Note:** A question with **Any answer is acceptable** selected is included when calculating a score and any answer selection is counted as correct.

7. If this is a **Multiple Choice** question, type the answers you want users to select from.

**Notes:**

- The answers will appear in the questionnaire in the same order that you enter them here.
- To include more than four answers, click **Add answer**.
- To include less than four answers, simply leave unneeded answers empty.
- To delete an answer, click .

8. If you selected **Multiple Choice**, **True or False**, or **Yes or No** as the type for this question and selected **Only one answer is correct**, select the button to the left of the correct answer .

**Answers**

Only one answer is correct  Any answer is acceptable (Useful for surveys)

Place a check next to the correct answer.

<input type="radio"/>	Federal Family and Medical Leave Act	Options	
<input type="radio"/>	State laws	Options

<input checked="" type="radio"/>	All of the above	Options	

[+ Add answer](#)

9. (Optional) At this point, you can set up several actions for PolicyTech to take based on which answer an assignee chooses. Click an item in the list below to go to detailed instructions about an action.

**Important:** Before you can assign an action, you must type a question and, if it's not an open-ended question, type answers and select the correct answer.

- [Present a follow-on question \(subquestion\)](#)
  - [Present a follow-on task](#)
  - [Flag an exception that can be viewed in a report](#)
  - [Create a case](#) (only if Case Management Integration has been enabled)
10. (Optional) If all of the following are true, add whatever text you feel would be useful for the quiz taker, such as an explanation of the concept the question is about.
- You activated feedback in **Questionnaire Settings** (see [Adjusting Questionnaire Settings](#)).
  - The current **Questionnaire Type** setting is **Quiz**.
  - **Only one answer is correct** is selected for the current question.

**Note:** You cannot add feedback to an open-ended question.

11. (Optional) If the current **Questionnaire Type** setting is **Quiz**, do one of the following for **Section**:

- Leave the current section selection.
- To create a new section and assign the current question to it, click , type the section description, and then click **Save**.
- To keep the question in the currently selected section and edit the section description, click , make changes, and then click **Save**.
- If you've already defined two or more sections and want to assign the current question to a different section, click  to the right of the currently selected section and select a different one.

12. Do one of the following:

- To continue creating the questionnaire, click **Add question**, and then repeat the steps above starting with step 4.
- If you're done adding questions, click **Save and Close**.

### Creating a Subquestion

1. To the right of an answer you've added, click **Options**, and then click **Add Sub Question**.

2. Define the subquestion the same as you would a top-level question. You can add any number of question sublevels.
3. (Optional) To add another subquestion under the same answer, click **Add Next Question**, and then repeat step 2.
4. Click **Save and Close**.

## Adding a Questionnaire Task

You can use a follow-on questionnaire task to instruct the user to do something if a certain answer is selected. For example, you could assign someone who chooses a certain answer to watch a training video, fill out a form, or see a manager for further clarification.

**Important:** Selecting an answer with a questionnaire task assigned does not affect the status of a user's assigned **Read / Complete** task for that particular document or questionnaire, nor does it affect the questionnaire results (beyond whether you designated that answer as correct or incorrect); it simply adds an independent, custom task to the user's **My Tasks** list.

1. To the right of an answer you've typed, click **Options**, and then click **Advanced Settings**.

**Note:** This feature is not available for open-ended questions.

The screenshot shows the 'Question' editor interface. At the top, there is a 'Question Type' dropdown menu set to 'Yes or No'. Below this is a text area containing the question: 'I have accepted a gift worth more than \$25 from a vendor.' Underneath the text area, there are two radio buttons for 'Answers': 'Only one answer is correct' and 'Any answer is acceptable (Useful for surveys)'. The 'Any answer is acceptable' option is selected. Below the answer options, there are two input fields: 'Yes' and 'No'. To the right of the 'Yes' field is an 'Options' button. A red box highlights the 'Advanced Settings' button, which is located to the right of the 'No' field. Below the 'Advanced Settings' button is an 'Add Subquestion' button. At the bottom of the form, there is a 'Section' dropdown menu set to 'General Questions', a 'Save and Close' button, and an 'Add question >' button. A 'Feedback' section is also visible, indicating that feedback is not enabled.

2. Select **Create Task**, and then type the task instructions.

The screenshot shows a dialog box titled "Advanced Settings" with a close button (X) in the top right corner. Below the title bar, there is a text label: "The settings below will be applied if the user selects this answer." There are two main sections. The first section has a checkbox labeled "Create Exception" which is unchecked. Below it is a text box containing the text "(If the user selects this answer, an entry will be added to the Exception Report.)". The second section has a checkbox labeled "Create Task" which is checked and highlighted with a red rectangular box. Below this checkbox is a text input field labeled "Task Instructions". Underneath that is another checkbox labeled "Include Hyperlink" which is unchecked, followed by a text input field. Below that is a text input field labeled "Test URL". At the bottom of the dialog box are two buttons: "Cancel" and "Save".

3. (Optional) If completing the task includes accessing a website or web page, select **Include Hyperlink**, type or copy and paste the web address, and then type a link title. To test the link, click **Test URL**.

**Important:** The URL must include the scheme (http:// or https://).

4. Click **Save**.

### Setting an Exception Trigger

By setting an exception for an answer, you can run a report that shows who selects that answer (see "Report: Exceptions by Content" in the [Reports Supplement](#) for details on generating the report).

**Note:** This feature is not available for open-ended questions.

1. To the right of an answer you've typed, click **Options**, and then click **Advanced Settings**.

## Changing a Questionnaire

Your ability to change a questionnaire varies depending on whether it is a stand-alone questionnaire or a questionnaire in a document.

### Changing a Stand-Alone Questionnaire

The content (questions and answers) of a stand-alone questionnaire can only be edited while it is in Draft or Collaboration status (see [Editing Questions, Answers, and Sections](#) below for details). If you need to edit a stand-alone questionnaire's content after it has been submitted for review or approval, you must use the **Send to Draft** option first (see [Sending a Document or Questionnaire Back to Draft](#)). To make changes to a stand-alone questionnaire's content after it has been approved, you must create a new version of it (see [Doing a Periodic Review and Creating a New Version](#)).

You can change any questionnaire settings while a stand-alone questionnaire is in Draft or Collaboration status. You can change only the following questionnaire settings while a stand-alone questionnaire is in Review or Approval status:

- Confidentiality
- Disable Numbering
- Questionnaire Results options

To make changes to other questionnaire settings while a stand-alone questionnaire is in Review or Approval status, you must use the **Send to Draft** option first (see [Sending a Document or Questionnaire Back to Draft](#)). To make changes to a stand-alone questionnaire's settings after it has been approved, you must create a new version of it (see [Doing a Periodic Review and Creating a New Version](#)).

## Changing a Document Questionnaire

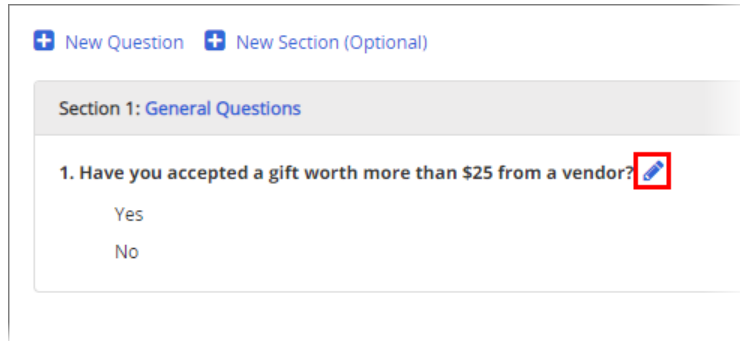

You can edit the content (questions and answers) and settings of a document questionnaire while the document is in Draft, Collaboration, Review, or Approval status (see [Editing Questions, Answers, and Sections](#) below for details). If you need to edit a document questionnaire after the document has been published, you must create a new version of the document (see [Doing a Periodic Review and Creating a New Version](#)) or ask your PolicyTech administrator to edit the document in its current state.

## Editing Questions, Answers, and Sections

1. Do one of the following:
  - To edit the content of a stand-alone questionnaire, find and open it in Draft or Collaboration status.
  - To edit the content of a document questionnaire, open the document in the Draft, Collaboration, Review, or Approval status, and then click the **Edit Questionnaire** tab.

2. Do any of the following:
  - Add a section, question, answer, or subquestion (see [Adding Questions and Answers to a Questionnaire](#) if you need help).
  - To make changes to a question, its answers, or its settings, click  after the question text.

- To edit a subquestion, click  before the parent answer to show the subquestion, and then click  after the subquestion text.
- To change a section heading, click its text.
- To reorder questions, simply drag a question to a new location.
- To move a question to a different section, drag it there.

**Important:** Deleting a section also deletes all questions currently assigned to that section. Deleting a question also deletes its answers and any subquestions attached to those answers.

### Helpful Answer Shortcuts

Add a subquestion to this answer

Open **Advanced** Settings for this answer

Open the **Case Creation** window for this answer (available only when Case Management Integration is set up and enabled, and when the **Create Case** option is currently selected for an answer)

## Submitting a Document or Questionnaire to Writers, Reviewers, or Approvers

Where a newly created draft document or questionnaire should go next depends on the assignments made in the **Properties Wizard**. Because assigning an approver is typically required, the document/questionnaire must at least be submitted for approval, but it could also be submitted to assigned writers or reviewers.

**Note:** You can skip assigned writers by submitting directly to review or approval from the draft status. You can also skip assigned reviewers (unless the assigned template contains required reviewers) by submitting directly to

approval from the draft or collaboration status. However, you cannot skip submitting the document/questionnaire to assigned approvers.

Go to the section below for what you need to do next with the draft document.

[Submitting a Document or Questionnaire to Writers \(for Collaboration\)](#)

[Submitting a Document or Questionnaire for Review](#)

[Submitting a Document or Questionnaire for Approval](#)

## Submitting a Document or Questionnaire to Writers (for Collaboration)

**Important:** These instructions apply only if the currently assigned template includes the **Writers** step.

If you, as a document owner, questionnaire owner, or proxy author, assigned one or more writers to a document or questionnaire and are ready for them to work on it, your next step is to submit it to those writers. While a document/questionnaire is with assigned writers, it is in the Collaboration status.

**Note:** If you did not assign writers, move on to [Submitting a Document or Questionnaire for Review](#) or [Submitting a Document or Questionnaire for Approval](#).

As each assigned writer indicates that he or she has finished writing, you receive a notification email (if your email subscription settings include these types of notifications). When all assigned writers have indicated that they are finished writing the document/questionnaire, PolicyTech returns it to Draft status and notifies you that it is ready to submit to review.

You can also check writer status from the **Overview** page (see [Working with the Overview](#) for details). To access the document/questionnaire while it is in Collaboration status, see [Searching for a Content Item](#) or [Browsing for a Content Item](#).

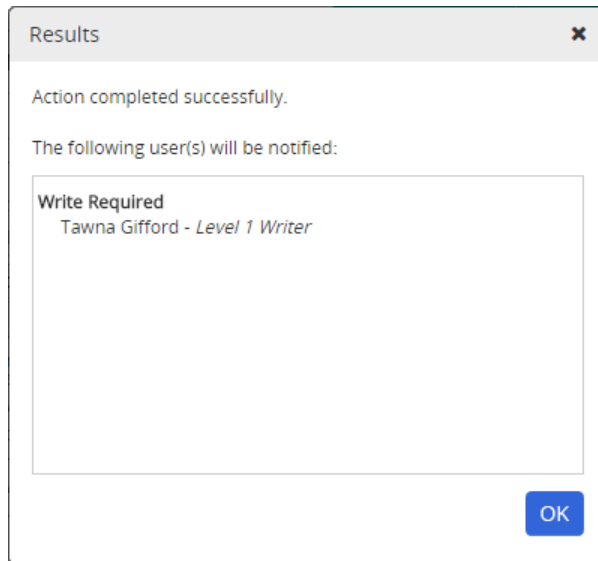

**Note:** Because assigning writers is not a required **Properties Wizard** step, if the assigned template contains no required writers or does not include the **Writers** step, you can submit the document/questionnaire directly to review or approval.

1. Find and open the document or questionnaire (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click **Submit to Writers**.

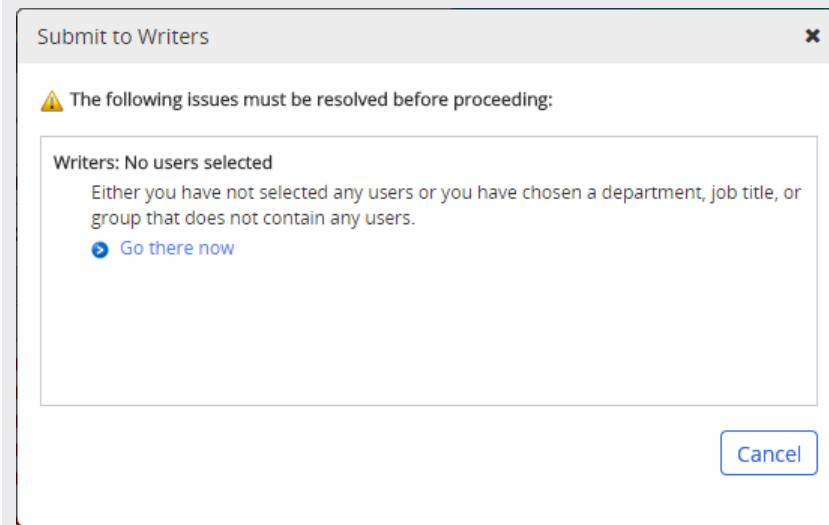

**Note:** If the currently assigned template does not include the **Writers** step, the **Submit to Writers** step is not available.

3. In the **Results** window, click **OK**.

**Note:** If no writers have been assigned yet, you will see a window like the one below. Click **Go there now**, assign one or more writers, and then click **Submit to Writers** again.

## Submitting a Document or Questionnaire for Review

**Important:** These instructions apply only if the currently assigned template includes the **Reviewers** step.

It is time to submit a document or questionnaire for review when both of the following are true:

- The document/questionnaire owner, the assigned proxy author (if any), and all assigned writers (if any) have finished writing the document/questionnaire.
- The document/questionnaire has been assigned to one or more reviewers in the **Properties Wizard**.

**Important:** Only the document owner, questionnaire owner, or an administrator can submit a document/questionnaire for review. If you wrote the document as a proxy author and are finished, see [Requesting a Review \(as a Proxy Author\)](#).

Once you submit a document/questionnaire for review, each assigned reviewer has the option to accept, revise, or decline the document or to accept or decline the questionnaire. As each reviewer acts on the document/questionnaire, you receive a notification email (if your email subscription settings include these types of notifications). When all reviewers have finished, you receive another email notification, and the document/questionnaire is sent to one of two places. If one or more reviewers revise or decline the document/questionnaire, it is sent back to Draft status. If all reviewers accept the document/questionnaire, it is automatically submitted for approval.

You can also check reviewer status from the **Overview** page (see [Working with the Overview](#) for details). To access the document/questionnaire while it is in Review status, see [Searching for a Content Item](#) or [Browsing for a Content Item](#).

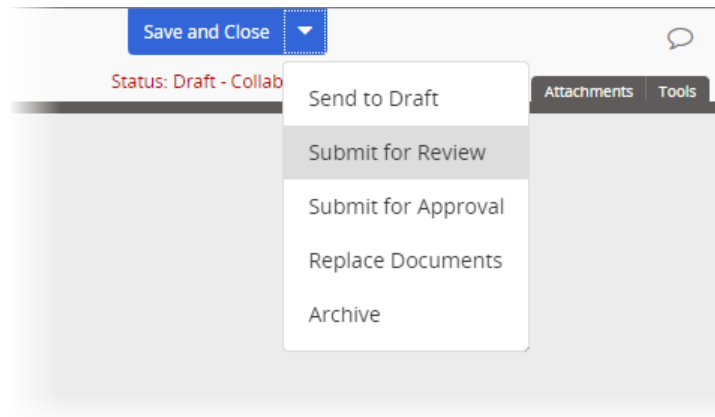

**Note:** Depending on your organization's policies and the type of document/questionnaire, you may not need to assign and submit the document/questionnaire to reviewers. If this is the case, move on to [Submitting a Document for Approval](#). Also, because assigning reviewers is not a required **Properties Wizard** step, if the assigned template contains no required reviewers or does not include the **Reviewers** step, you can submit the document/questionnaire directly to approval.

1. Find and open the document or questionnaire in the Draft or Collaboration status (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Do one of the following:

If the document/questionnaire is currently in Draft status, click **Submit for Review**.

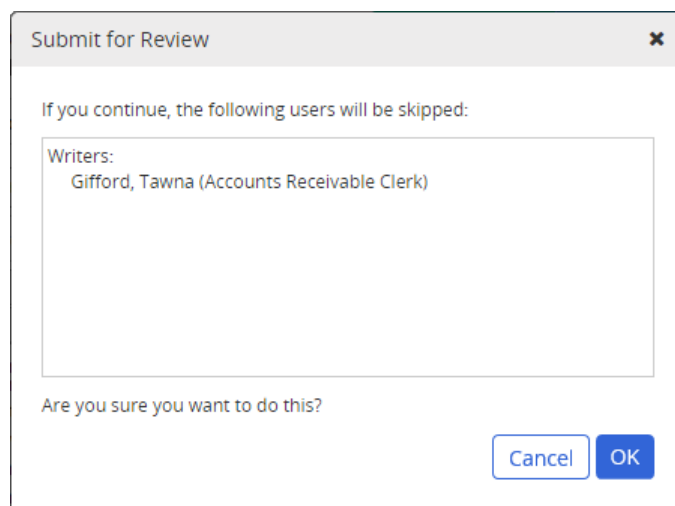

If the document/questionnaire is currently in Collaboration status, click , and then click **Submit for Review**.

**Notes:**

- If the currently assigned template does not include the **Reviewers** step, the **Submit to Reviewers** step is not available.
- As the document owner, you can make changes to the document content even after submitting it for review. See [Editing Document Content](#) for details. (Questionnaire content cannot be modified in Review status.)

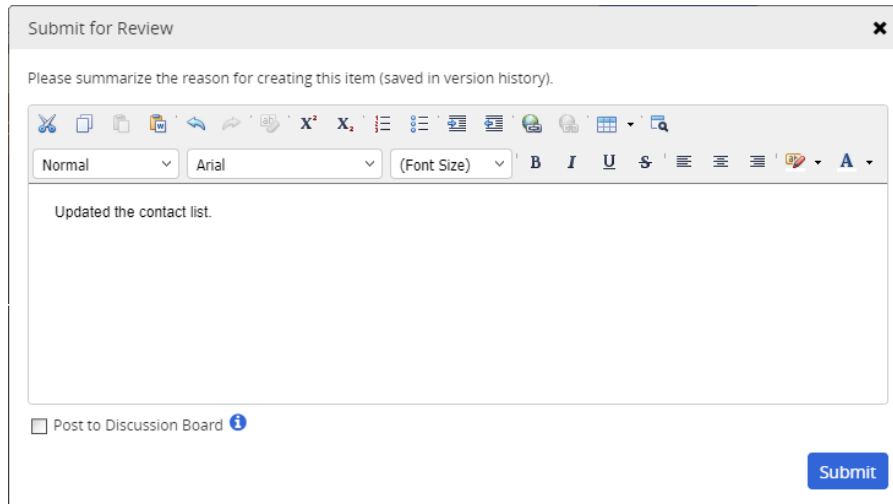

3. (Conditional) If the document/questionnaire has any assigned writers who have not finished yet, a window similar to the following is displayed. To skip any unfinished writers and submit the document/questionnaire for review, click **OK**.

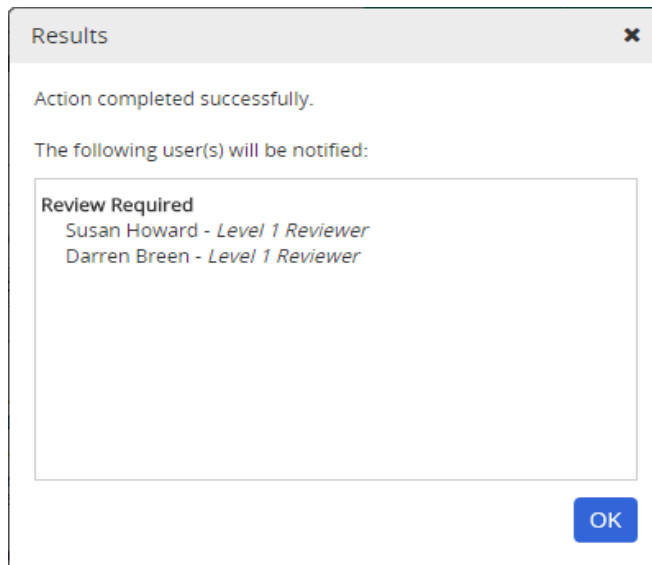

4. (Optional) In the **Submit for Review** window, delete the default text—"New Document" or "New Version"—and then type the purpose of the new document/questionnaire or a summary of changes for the

document's/questionnaire's new version. Any assigned reviewers, approvers, and assignees will be able to see your comments.

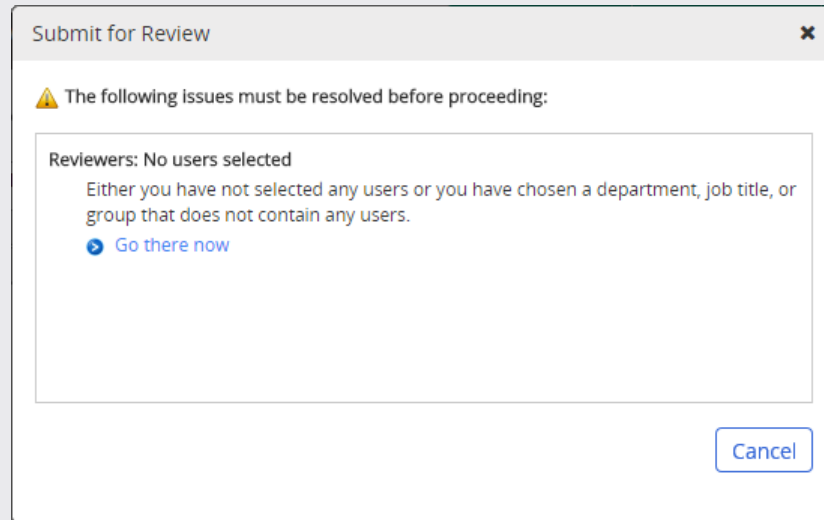

**Note:** If necessary, you, as the document owner, or an administrator can make changes to this change summary. See "Editing a Change Summary" in the [Administrator's Guide](#) for details.

5. (Optional) To add what you wrote to this document's/questionnaire's discussion board, click **Post to Discussion Board** (see [Working with Discussions](#) for details).
6. Click **Submit**.
7. In the **Results** window, click **OK**.

**Note:** If no reviewers have been assigned yet, you will see a window like the one below. Click **Go there now**, assign one or more reviewers, and then click **Submit for Review** again.

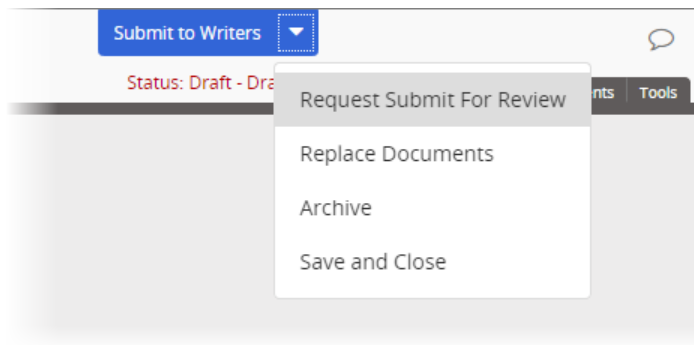

### Requesting a Review (as a Proxy Author)

If you are a proxy author and have finished writing a document or questionnaire (already clicked **Finished Writing**), you can send a request to the owner to submit the document/questionnaire for review.

**Note:** Requesting submission for review sends an email notification to the document owner or questionnaire owner, but it does not add a task to the owner's **My Tasks** list. You can add an owner task in the **Settings** step of the **Properties Wizard** (see [Adjusting Basic Settings](#)).

1. Find and open the document (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click , and then click **Request Submit for Review**.

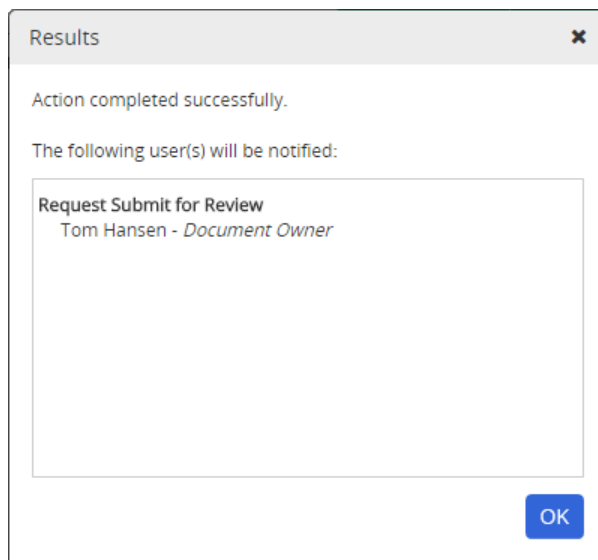

3. (Optional) In the **Comments** box, type any comments you want to include.

4. (Optional) To add what you wrote to this document's/questionnaire's discussion board, click **Post to Discussion Board** (see [Working with Discussions](#) for details).
5. Click **Save**.
6. In the **Results** window, click **OK**.

## Submitting a Document or Questionnaire for Approval

**Important:** If you submitted a document or questionnaire for review, you don't need to submit it to approval. The document/questionnaire will automatically be submitted to approval once all reviewers accept it.

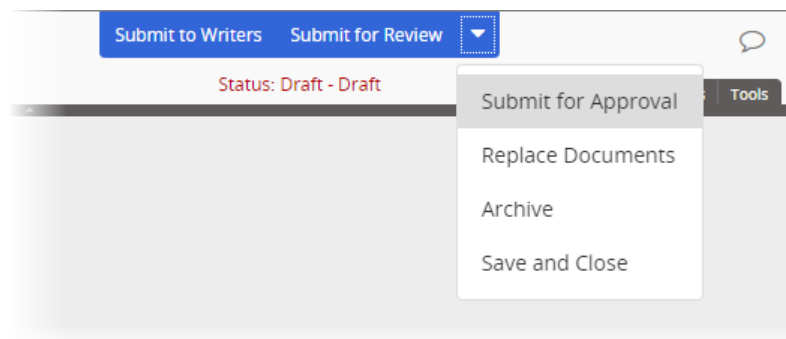

If a content item's (document's or questionnaire's) template contains no required reviewers or if it does not include the **Reviewers** step, you can submit the draft item directly to approval, skipping the review step. You must assign at least one approver before submitting a content item for approval.

**Note:** Only the document owner or an administrator can submit a draft document or questionnaire for approval.

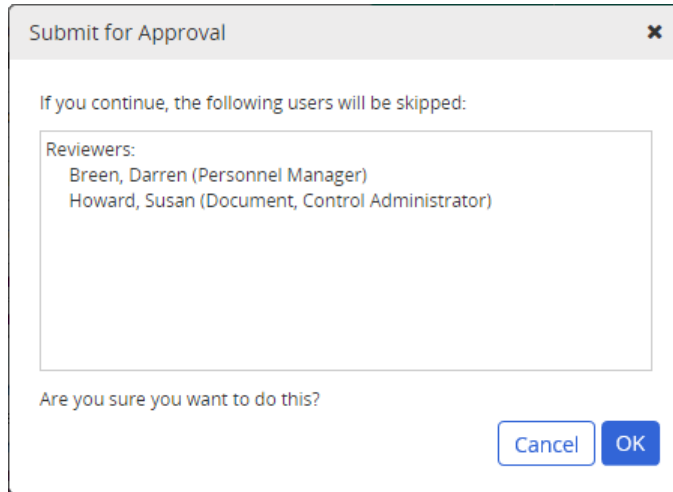

After submitting a content item for approval, each assigned approver has the option to accept, revise, or decline the document or to accept or decline the questionnaire. As each approver acts on the content item, you receive a notification email (if your email subscription settings include these types of notifications). When all approvers have finished, you receive another email notification, and the item is sent to one of two places. If one or more approvers revise or decline the item, it is sent back to Draft status. If all approvers accept the item, it is automatically published or started (unless it has been assigned a publication date sometime in the future, in which case it is moved to Pending status until that date).

You can also check approver status from the **Overview** page (see [Working with the Overview](#) for details). To access the content item while it is in approval status, see [Searching for a Content Item](#) or [Browsing for a Content Item](#).

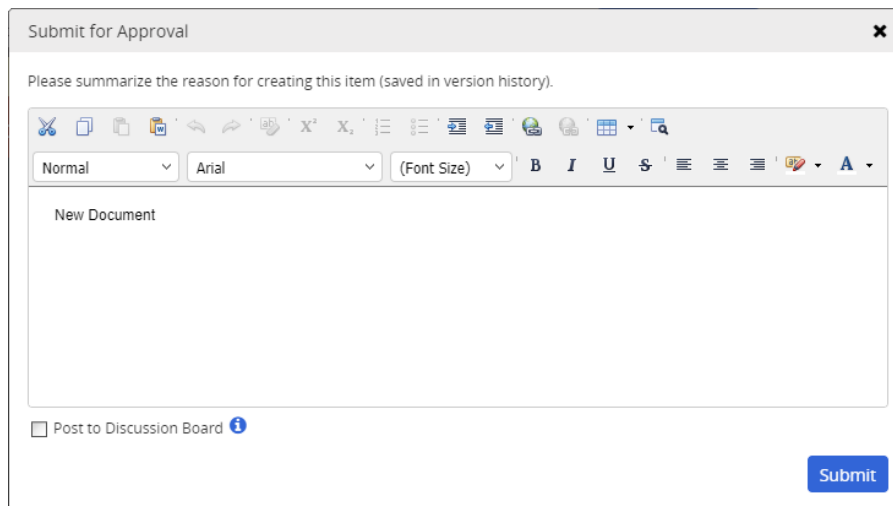

1. Find and open the document or questionnaire in the Draft, Collaboration, or Review status (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click , and then click **Submit for Approval**.

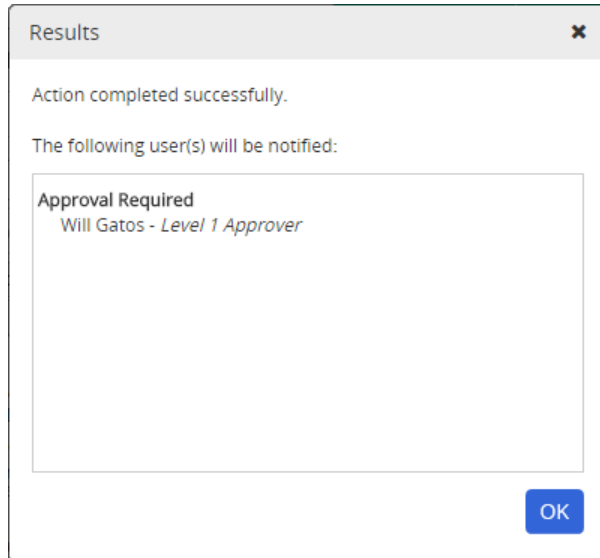

3. (Conditional) If the document/questionnaire has any assigned reviewers who have not finished yet, a window similar to the following is displayed. To skip any unfinished reviewers and submit the document/questionnaire for approval, click **OK**.

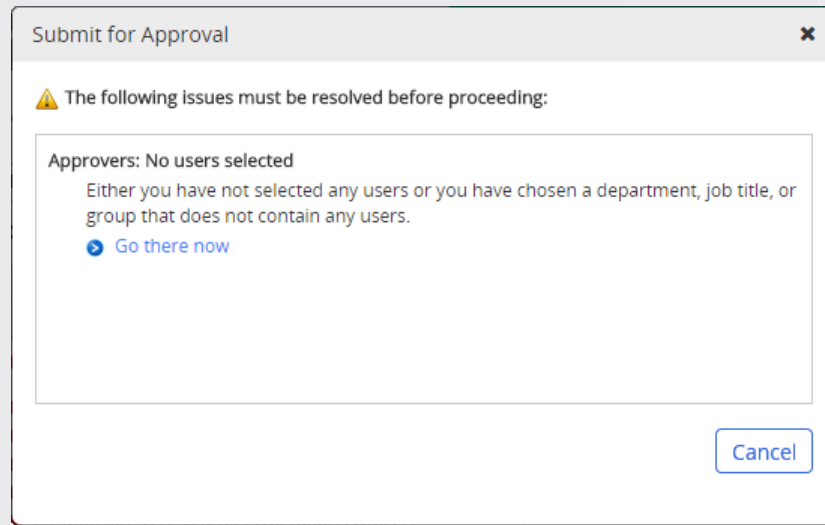

4. (Optional) In the **Submit for Approval** window, delete the default text—**New Document**, **New Questionnaire**, or **New Version**—and then type the purpose of the new content item or a summary of changes for its new version. Any of the content item's reviewers, approvers, and assignees will be able to see your comments.

5. (Optional) To add what you wrote to this content item's discussion board, click **Post to Discussion Board** (see [Working with Discussions](#) for details).
6. Click **Submit**.
7. In the **Results** window, click **OK**.

**Note:** If no approvers have been assigned yet, you will see a window like the one below. Click **Go there now**, assign one or more approvers, and then click **Submit for Approval** again.

---

## Creating and Working with Campaigns (for Campaign Owners)

A campaign is a bundle of content items (documents and/or questionnaires). Users designated as campaign assignees must read or complete each bundled document or questionnaire in the order listed to complete a campaign task.

Users assigned the Campaign Owner role can perform the following tasks:

- Create campaigns (define properties, adjust settings, and assign users to complete the campaign)
- Start a campaign (set it as approved)
- Maintain started campaigns

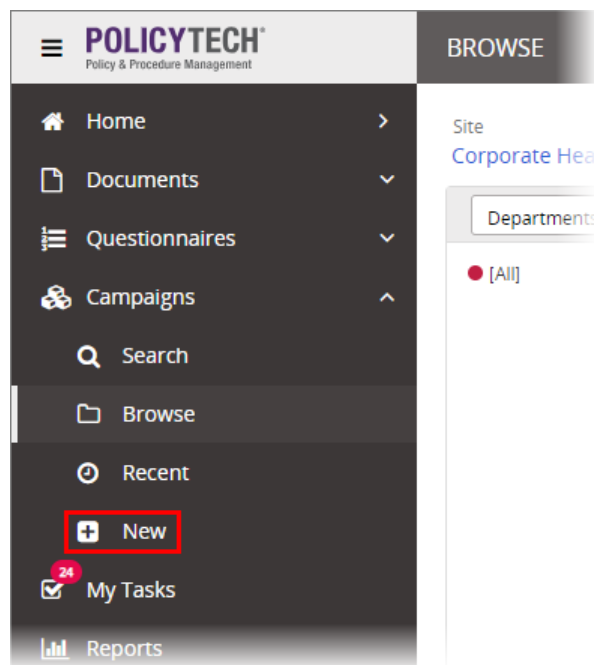

---

### Creating a Campaign (Overview)

The following steps provide an overview of the creation process for campaigns, along with references to more detailed instructions.

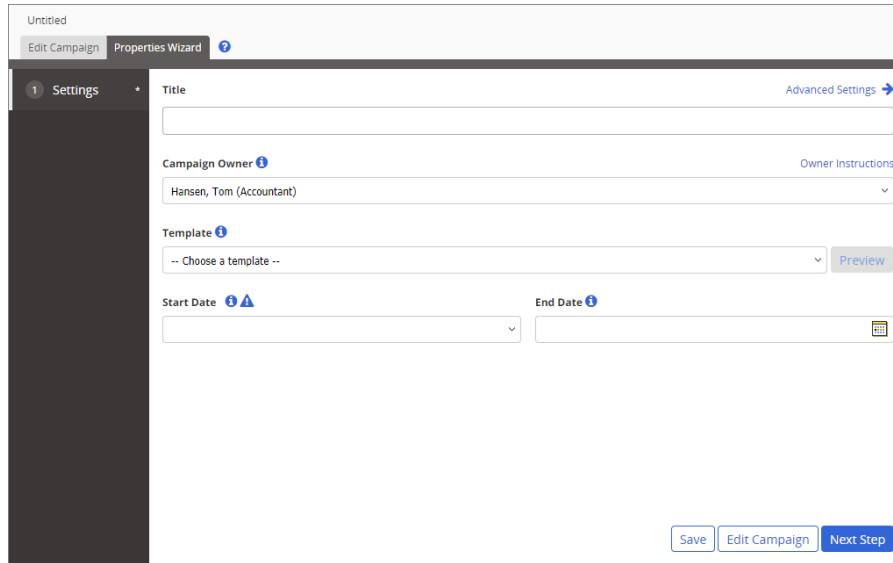

**Note:** The ability to create campaigns is an optional feature that may or may not be enabled. If you don't see **Campaigns** in the sidebar menu and you need to create a campaign, talk to your PolicyTech administrator.

1. Click **Campaigns**. If you've been assigned the Campaign Owner role, you'll see the **New** option, as shown below.

2. Click **New**.

Your screen should now look similar to the one below. These settings constitute the first step of the **Properties Wizard**, which guides you through all of the available properties settings.

The screenshot shows a web interface titled "Untitled" with a "Properties Wizard" tab. The "Settings" section is active, showing the following fields:

- Title:** An empty text input field with a link to "Advanced Settings" (→).
- Campaign Owner:** A dropdown menu showing "Hansen, Tom (Accountant)" with a link to "Owner Instructions".
- Template:** A dropdown menu showing "-- Choose a template --" with a "Preview" button.
- Start Date:** A date picker field with a warning icon (⚠).
- End Date:** A date picker field with an information icon (i).

At the bottom right, there are three buttons: "Save", "Edit Campaign", and "Next Step".

3. To work your way through the **Properties Wizard** steps, see [Assigning Campaign Properties](#).

**Important:** You must at least type a title, choose a template, and then click **Save** or **Next Step** before you can see the remaining **Properties Wizard** steps and edit the campaign.

4. Click **Edit Campaign**, and then add content items (see [Adding Content to a Campaign](#)).
5. Click **Approve (Ready to Start)** to start the campaign or, if the start date is set in the future, to move the campaign from Draft to Pending status.

## Assigning Campaign Properties

The **Properties Wizard** breaks up property assignment for a campaign into the following steps:

- **Settings:** Set the campaign's critical properties (**Title**, **Campaign Owner**, **Template**) and optional properties. See [Adjusting Basic Campaign Settings](#).
- **Categories:** Assign sites, departments, and categories. See [Assigning Sites, Departments, and Categories to a Campaign](#).

- **Assignees:** Assign those required to complete the campaign when it is started. See [Designating Assignees](#).

## Adjusting Basic Campaign Settings

When you create a new campaign, you see a screen similar to the one below with only the first step—**Settings**—of the **Properties Wizard** displayed.

**Note:** If the **Settings** step of the new campaign is not currently displayed, open the campaign, and then click the **Properties Wizard** tab.

The screenshot shows the 'Settings' step of the 'Properties Wizard'. The interface includes a sidebar with 'Settings' selected. The main area contains the following fields and controls:

- Title:** A text input field with an 'Advanced Settings' link and arrow to its right.
- Campaign Owner:** A dropdown menu showing 'Hansen, Tom (Accountant)' with an 'Owner Instructions' link to its right.
- Template:** A dropdown menu showing '-- Choose a template --' with a 'Preview' button to its right.
- Start Date:** A date picker field with an information icon and a warning icon.
- End Date:** A date picker field with an information icon and a calendar icon.

At the bottom right, there are three buttons: 'Save', 'Edit Campaign', and 'Next Step'.

1. Type a title.
2. Do one of the following:
  - If you have been assigned the Campaign Owner role, your user name is automatically selected as the campaign owner. Move on to step 3.
  - If you are an administrator, select a document owner.
3. (Optional) To create a task and add it to the owner's **My Tasks** list, click **Owner Instructions**, select **Create task for owner**, write the task instructions, and then click **Close**.

This option can be especially useful if you are creating or editing the campaign as an administrator and need the owner to do something regarding this campaign.

4. Your administrator can create any number of templates with specific settings and assignments in the **Properties Wizard**.

Do one of the following:

- If **Template** options are available, select one.
- If you see a template name but no option for selecting a different template, there is only one template available, so it has been selected automatically.

The screenshot shows the 'Properties Wizard' interface. On the left is a 'Settings' sidebar. The main area contains the following fields:

- Title:** An empty text input field with an 'Advanced Settings' link to its right.
- Campaign Owner:** A dropdown menu showing 'Hansen, Tom (Accountant)' with an 'Owner Instructions' link to its right.
- Template:** A dropdown menu with 'Campaign' selected. This field is highlighted with a red rectangular box.
- Start Date:** A dropdown menu with 'Start as soon as approved.' selected.
- End Date:** An empty date input field with a calendar icon to its right.

At the bottom right, there are three buttons: 'Save', 'Edit Campaign', and 'Next Step'.

**Notes:**

- Click **Preview** to open the selected template's **Overview** tab in a separate browser tab or window.
- The template list includes all templates from all sites you have access to.
- If you have questions about which template to use, contact your administrator.

5. (Optional) By default, a new campaign is started as soon as it is approved. For **Start Date**, select **Wait to start until the following date**, click , and then select a date.

This close-up shows the 'Start Date' selection options:

- Start as soon as approved.
- Wait to start until the following date:  

6. (Optional) For **End Date**, specify the date you want all assignee tasks for this campaign to expire. On that date, all incomplete tasks will be canceled, removing them from assignees' **My Tasks** lists. Also, if any assignee groups, departments, or job titles are selected, new users added to one of these entities after the task end date will not receive tasks.
7. Click **Save**.

**Important:** You must save the campaign at this point before you can access **Advanced Settings** and the other **Properties Wizard** steps.

You should now see all **Properties Wizard** steps included in the template, as shown below.

The screenshot shows the 'Protecting Company Assets v.1' campaign configuration interface. The top navigation bar includes 'Edit Campaign', 'Properties Wizard', and 'Overview'. The status is 'Draft - Draft'. The left sidebar shows 'Settings', 'Categories', and 'Assignees'. The main content area is titled 'Properties Wizard' and includes the following fields and controls:

- Title:** 'Protecting Company Assets' (with an 'Advanced Settings' link).
- Campaign Owner:** 'Hansen, Tom (Accountant)' (with an 'Owner Instructions' link).
- Template:** 'Campaign' (with 'Reapply' and 'Preview' buttons).
- Start Date:** (with a calendar icon).
- End Date:** (with a calendar icon).

At the bottom right, there are three buttons: 'Save', 'Edit Campaign', and 'Next Step'.

- (Optional) Click **Advanced Settings**, and then make adjustments as needed. See [Advanced Settings: Settings Step for a Campaign](#) below for details.

The screenshot shows the 'Protecting Company Assets v.1' campaign configuration interface, specifically the 'Advanced Settings' step. The top navigation bar includes 'Edit Campaign', 'Properties Wizard', and 'Overview'. The status is 'Draft - Draft'. The left sidebar shows 'Settings', 'Categories', and 'Assignees'. The main content area is titled 'Advanced Settings' and includes the following fields and controls:

- Archive Date:** (with a calendar icon).
- Review Interval:** 'Every 12 months from approve/last reviewed date' (with a dropdown arrow).
- Warning Period:** 'Warn 1 month(s) before Review Interval.' (with a dropdown arrow).
- Keywords:** (with a note: '(Separate words with a comma) Expand Textbox').
- Language:** 'English (English)' (with a dropdown arrow).

At the bottom right, there are three buttons: 'Save', 'Edit Campaign', and 'Next Step'.

- Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Assigning Sites, Departments, and Categories to a Campaign](#).

- Click **Edit Campaign**, and then go to [Adding Content to a Campaign](#).
- Click  to the right of **Approve (Ready to Start)**, and then click **Save and Close**.

## Advanced Settings: Settings Step for a Campaign

[Archive Date](#)

[Review Interval](#)

[Warning Period](#)

[Keywords](#)

[Language](#)

### Archive Date

If you know there will be no new versions of this content item created and that it will no longer be relevant at some point in the future, you can specify the date when you want the approved item automatically moved to the **Archive**.

#### Notes:

- Only administrators and users assigned the **Archived Content** role can access archived content.
- If the archive date passes before a content item is approved, it will be archived immediately upon approval.

### Review Interval

When a review interval is set, the content item will come due for review after the specified interval has passed. The owner receives an email and a PolicyTech task as the review date approaches (see the next setting section—"Warning Period"—for details). The default review interval setting is whatever the template creator selected.

1. To change the default setting, do one of the following:

- Click **Every [number] months from [selected event or specified date]**, and then type a number of months. For **from**, select one of the following:
  - **approve/last reviewed date**: Sets the review date the number of specified months after version 1 of the content item is approved and after the previous review date for all subsequent versions.
  - **specified date**: Sets the review date the number of specified months after the specified date. After clicking **specified date**, click , and then select a date.

At this point, the **Force next review on [date]** option appears. By default, PolicyTech uses **Smart Scheduling** to determine the next review date when a content item is approved. If it is approved within the warning period for the currently selected review interval, **Smart Scheduling** equates the approval to a completed review and postpones the next review for another review interval. Select **Force next review on [date]** to override this behavior and retain the original next review due date.

- Click **No Review Date** only if you do not want a reminder and a task sent to the owner, who will then need to use some other means to track when the content item needs reviewing.

2. Click anywhere outside the **Review Interval** menu to close it.

### Warning Period

Use this setting to change when the owner receives notification that the next review due date is approaching.

**Note:** This setting is available only when a review interval has been set.

1. For **Warning Period**, do one of the following:
  - Click **Warn [n] months before Review Interval**, and then type a number in the box.

Use Default Warning of 1 month(s) before Review Interval  
 Warn  month(s) before Review Interval.

- Click **Use Default Warning of [n] month(s) before Review Interval**.

**Note:** The default warning period is set by the administrator.

2. Click anywhere outside the **Warning Period** menu to close it.

### Keywords

Type any words you think users might use to search for this content item. Keywords are especially useful for including relevant words that are not contained in the item's title or a Word document's contents.

### Language

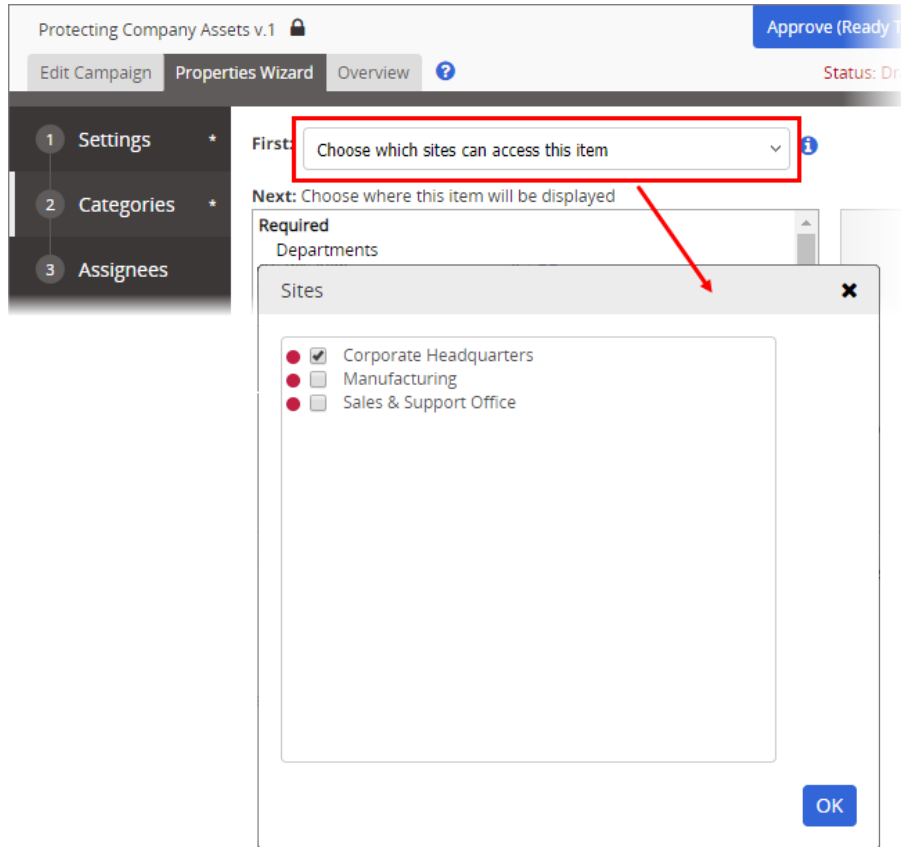

This setting works in conjunction with the **Filter by Language** setting in **My Profile** (see [Changing Your Profile Settings](#)). Selecting a language for this content item enables users to filter (hide or display) the item based on its language setting.

## Assigning Sites, Departments, and Categories to a Campaign

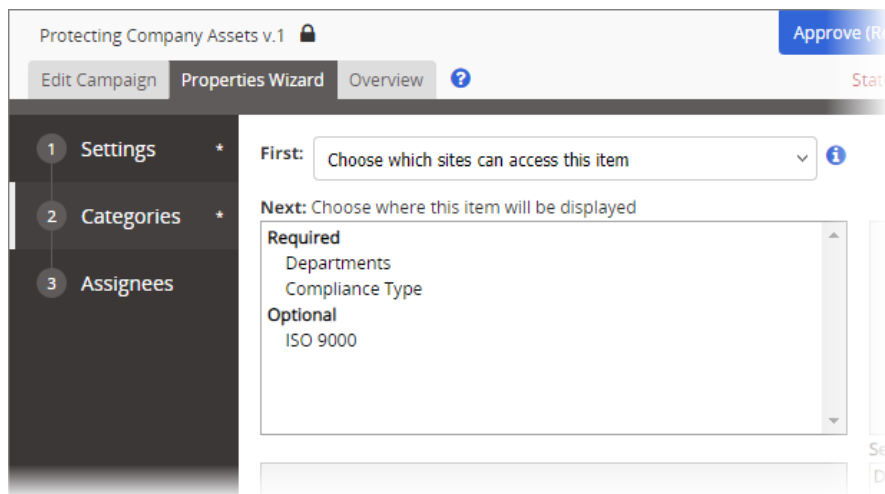

By assigning sites, departments, and categories to a campaign, you determine where it is visible in **Browse** for administrators and other campaign owners.

**Note:** Users without the administrator or campaign owner role cannot browse for campaigns.

1. Click **Categories**.
2. If you have access to multiple sites, select the sites where this campaign will be visible, and then click **OK**.

What you see in the **Choose where this item will be displayed** box depends on the template you assigned in the **Settings** step. You will always see **Departments** under the **Required** heading, but the template creator decides which categories, if any, should be required and optional. If your **Choose where this item will be displayed** box looked like the one in the example below, you would be required to choose a department and a **Compliance Type** category. You could also assign the document to an **ISO 9000** category if applicable, but wouldn't have to.

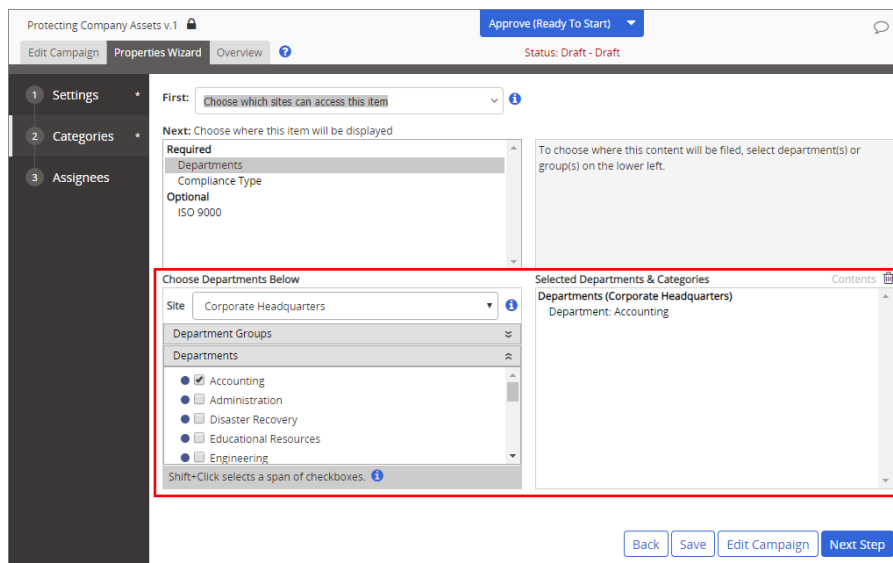

3. In the **Choose where this item will be displayed** box, click **Departments**.
4. Do one of the following:
  - If there is no option for selecting a site in the **Choose Departments Below** box, simply select the departments where this campaign will be visible.
  - If you have access to more than one site and chose to make this campaign available to more than one of those sites in step 1 above, then, in the **Choose Departments Below** box, select a site, and then select the departments where this campaign will be visible. Repeat this step as necessary for other sites.

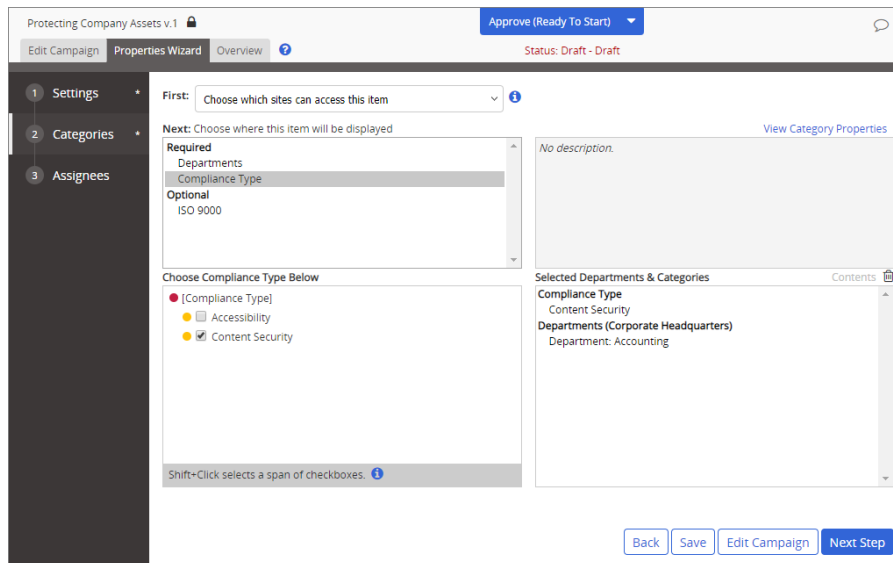

**Important:** You must select at least one department within at least one site. If you select multiple sites and do not select a department within one or more of those sites, this campaign will still be visible on those sites but will be listed under **Unfiled** when arranging by department in **Browse**.

**Notes:**

- The assigned owner's site and department are selected by default when a new campaign is created.
- You can click a department name to see the users in the department.
- A department group is a combination of two or more departments from one or more sites. If desired, click **Department Groups**, and then select a department group or click the group name and select departments from within the group.

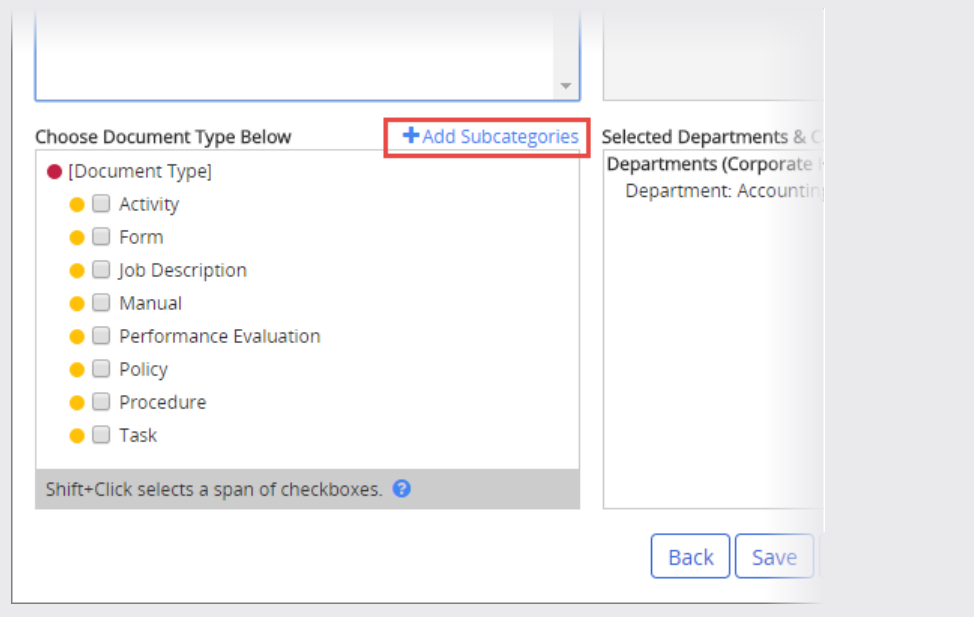

- If a category is listed under **Required**, click it, and then select one or more subcategories.

**Notes:**

- Some categories allow only one subcategory selection, while others allow multiple selections.
- If the current category allows the creation of new subcategories, **Add Subcategories** appears above the category list box, as shown below. See [Adding a Subcategory](#) below for details.

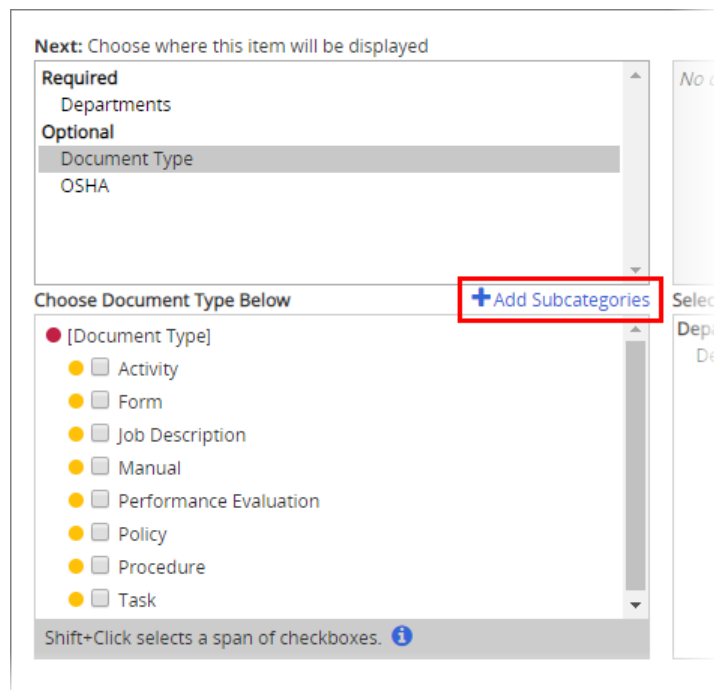

5. (Optional) If one or more categories are listed under **Optional**, click each category, and then select one or more subcategories for each.
6. Click **Save**.
7. Do one of the following:
  - To continue with assigning properties, click **Next Step**, and then go to [Designating Assignees for a Campaign](#).
  - Click **Edit Campaign**, and then go to [Adding Content to a Campaign](#).
  - To stop assigning properties and finish later, click  to the right of **Approve (Ready to Start)**, and then click **Save and Close**.

## Adding a Subcategory

1. In the category list, click a top-level category (**Document Type** in the example below) or subcategory, and then click **Add Subcategories**.

2. Type a subcategory name.

**Note:** The **Reference ID** is automatically filled in with the subcategory name as you type it. You can change the **Reference ID** if needed.

3. (Optional) Type a description to let other users know when they should assign this subcategory.
4. Click **Add** to add the new subcategory to the **Categories** box.

**Important:** Only subcategories that have been added to the **Categories** box will be saved.

The screenshot shows a dialog box titled "Add Subcategory to 'Document Type'". It has a close button in the top right corner. The dialog is divided into several sections:

- Name:** A text input field containing "Minutes" and an "Add" button to its right, which is highlighted with a red rectangular box.
- Reference ID:** A text input field containing "Minutes".
- Description:** A rich text editor with a toolbar (including icons for bold, italic, underline, font size, and color) and a text area containing the text "For meeting minutes and agendas."
- Categories:** A list box that is currently empty, with a trash icon in the top right corner.

At the bottom of the dialog are two buttons: "Cancel" and "Save".

5. (Optional) Repeat steps 2 through 4 to continue adding subcategories under the currently selected category.
6. With one or more subcategories listed in the **Categories** box, click **Save**.

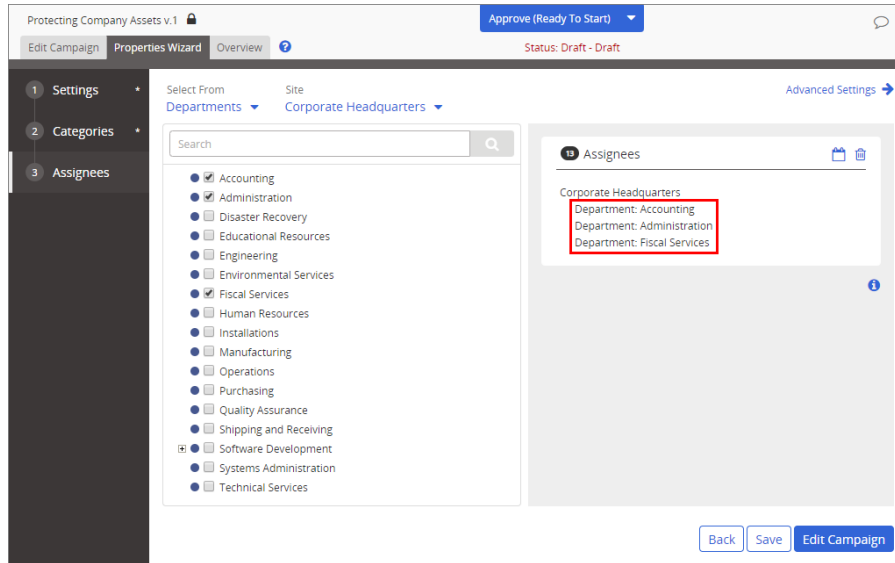

The screenshot shows a dialog box titled "Add Subcategory to 'Document Type'". It features a "Name" input field with an "Add" button, a "Reference ID" input field, and a "Description" field with a rich text editor toolbar. Below the description is a "Categories" list with a trash icon. The "Categories" list contains one item, "Minutes", which is highlighted with a red box. At the bottom of the dialog are "Cancel" and "Save" buttons.

## Designating Assignees for a Campaign

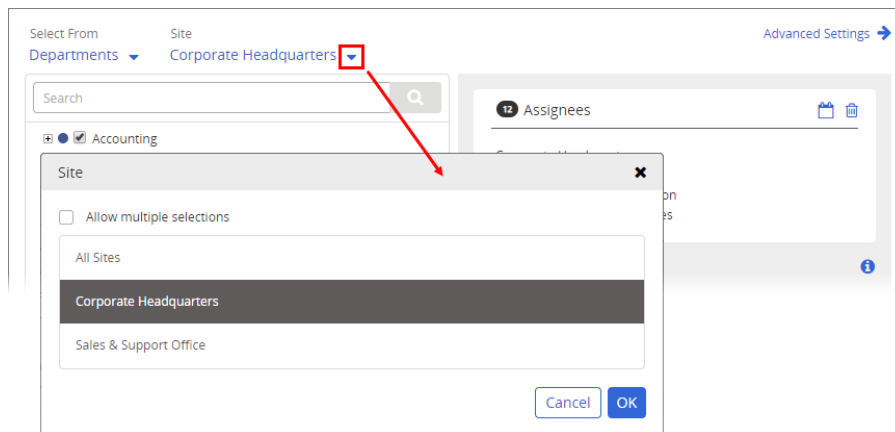

Assignees are those users you require to complete a campaign.

**Important:** We recommend that you select assignees by department or job title so you don't have to worry about adding or removing assignees from the campaign as they are added or removed from PolicyTech. Departments and job titles are automatically updated as user changes are made.

1. In the **Assignees** step, first check to see if the template included assignees. In the example below, the template automatically added three departments. Any assignees added by the template are optional and can be treated as suggestions. To remove an optional assignee, department, or job title, click it, and then click .

2. If your PolicyTech system has multiple sites, do one of the following.
  - Leave the default site selection to select approvers from the current site.
  - Under **Site**, click ▼, select a different site, and then click **OK**.

- Under **Site**, click ▼, select **Allow multiple selections**, select two or more sites, and then click **OK**.

**Important:** If you will be designating assignees from other sites, see [Assignees and Site Access](#) before doing so.

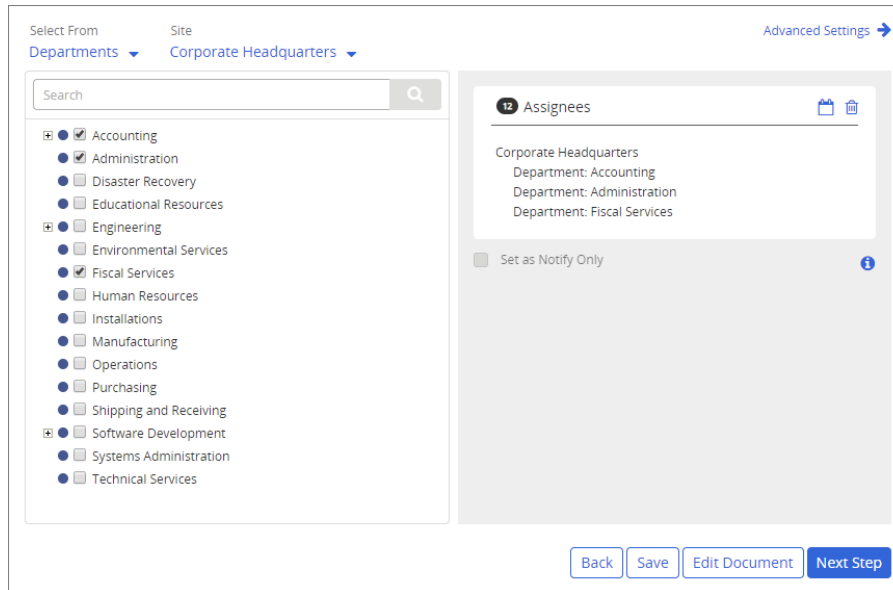

3. Select one or more departments.

**Notes:**

- A list of departments within the selected site or sites is displayed by default. (If multiple sites are listed, expand a site to see and select departments.) To use another selection method, see [Other Ways to](#)

[Select Assignees.](#)

- To assign individual users from a department, click the department name, and then select users.

4. (Optional) Set a due date for when assignees should be finished. See [Setting Due Dates for Writing, Review, Approval, and Assignee Tasks](#) for details.
5. (Optional) Click **Advanced Settings**, and then click **Add Note** to include instructions or other information for the assignees. See [Adding Notes for Writers, Reviewers, Approvers, and Assignees](#) for details.
6. Do one of the following:
  - Click **Edit Campaign**, and then go to [Adding Content to a Campaign](#).
  - Click  to the right of **Submit for Review**, and then click **Save and Close**.

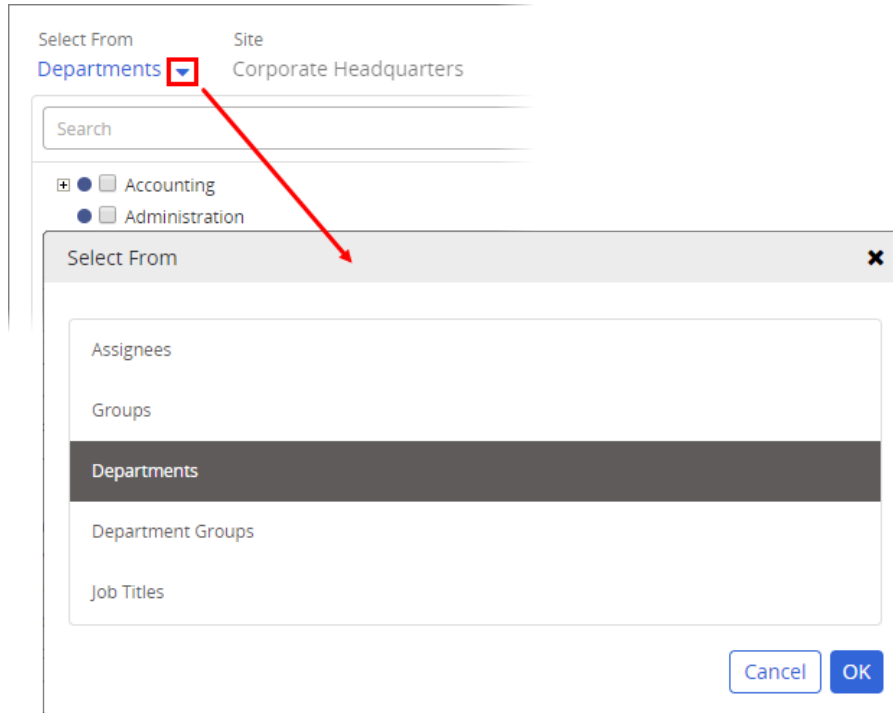

**Other Ways to Select Assignees**

The default assignee selection method is by department. You can also select individual assignees, by assignee group, by department group, or by job title. You select all of these in essentially the same way.

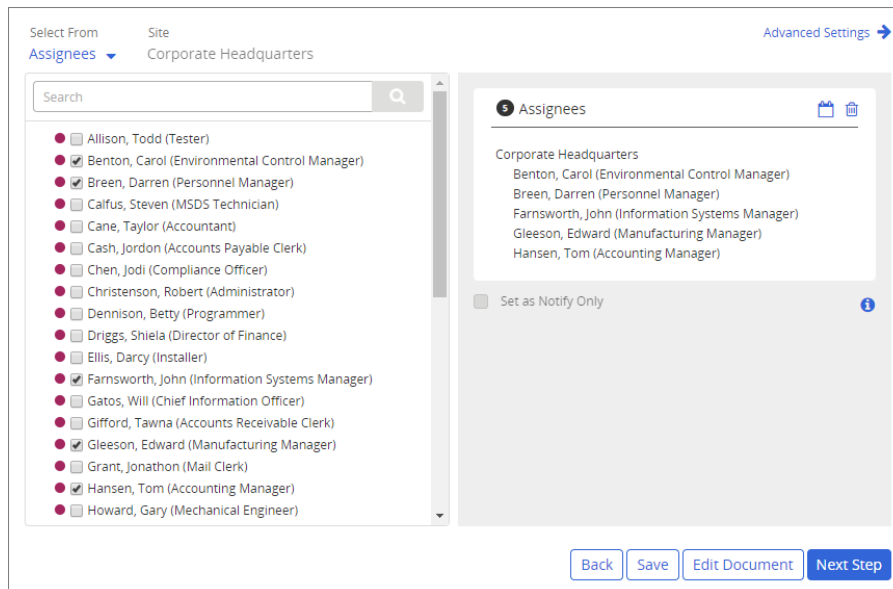

**Note:** A group is a combination of departments, job titles, or assignees from a single site or from multiple sites.

1. Under **Select From**, click ▼, click **Assignees**, and then click **OK**.

2. Select one or more assignees, groups, or job titles.

**Note:** Use **Search** to find an item in a long list.

## Setting Due Dates for Writing, Review, Approval, and Assignee Tasks

You can set a task due date that is a specific number of days after the user receives the task, or you can select a specific calendar date as the due date. A writer, reviewer, approver, or assignee who fails to complete a task on or before the set due date receives a one-time notification email when the task becomes overdue. If task summary emails are enabled, users can also see their tasks' overdue statuses each time they receive a task summary email.

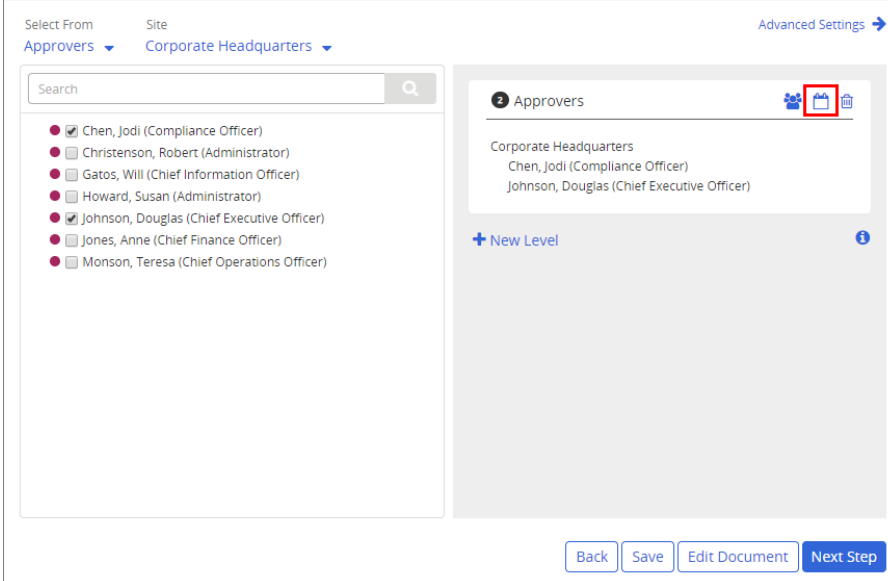

The way you set a due date for a writing, reviewing, or approving task is the same, while [setting a due date for a reading task](#) is slightly different.

### Setting a Due Date for a Writing, Review, or Approval Task

**Important:** The instructions in this section assume that you are working in one of the following **Properties Wizard** steps: **Writers, Reviewers, Approvers**.

1. Do one of the following:

- In the right pane where approver selections are listed, click .

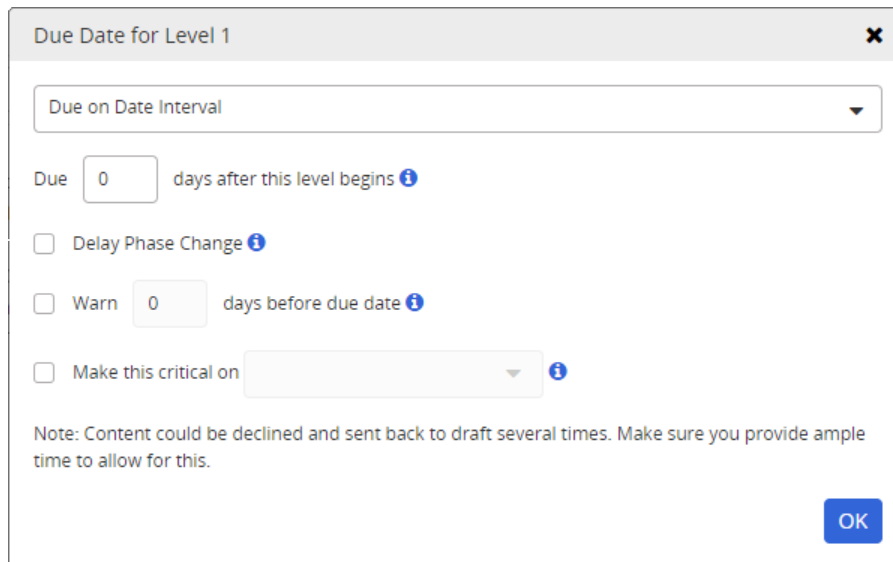

The screenshot shows a web interface for selecting approvers. At the top, there are dropdowns for 'Select From' (set to 'Approvers') and 'Site' (set to 'Corporate Headquarters'). Below these is a search bar and a list of approvers with checkboxes. The approver 'Chen, Jodi (Compliance Officer)' is selected. To the right, a preview pane shows the selected approver and a calendar icon in the top right corner, which is highlighted with a red box. At the bottom of the interface are buttons for 'Back', 'Save', 'Edit Document', and 'Next Step'.

- If there are multiple levels, click  in one of the level headers.

2. Do one of the following:

- Click **Due on Date Interval**, and then type a number in the **Due** box. The user then has that many days to complete the task after receiving it.

- Click **Due on Specific Date**, click ▼ in the **Target Due Date** box, and then find and click the due date.

3. (Optional) The **Delay Phase Change** option applies only if you selected a number less than **All** in this level's **Minimum Requires Users** setting. Select **Delay Phase Change** if you want as many users as possible to complete their tasks up until the due date, but then want the document/questionnaire moved on to the next level if at least the number of required users have completed their tasks. The document/questionnaire will move to the next level earlier than the due date only if all users on the current level complete their tasks.
4. (Optional) Select **Warn**, and then type a number of days before the due date that you want all that level's users notified that the due date is approaching. For example, if you set **10** as the **Due on Date Interval** setting, and then you set **Warn** to **2**, any users who haven't finished their tasks for that level by the end of the eighth day will receive a task reminder.
5. (Optional) Select **Make this critical on**, click **▼**, and then find and click a date that is on or after the due date. If any users haven't completed their tasks by the critical date, an escalation email is sent to both the assigned users and the document/questionnaire owner.

### Setting a Due Date for an Assignee Task

**Important:** The instructions in this section assume that you are working on the **Assignees** step of the **Properties Wizard**.

**Note:** Due dates do not apply to "Notify Only" assignees.

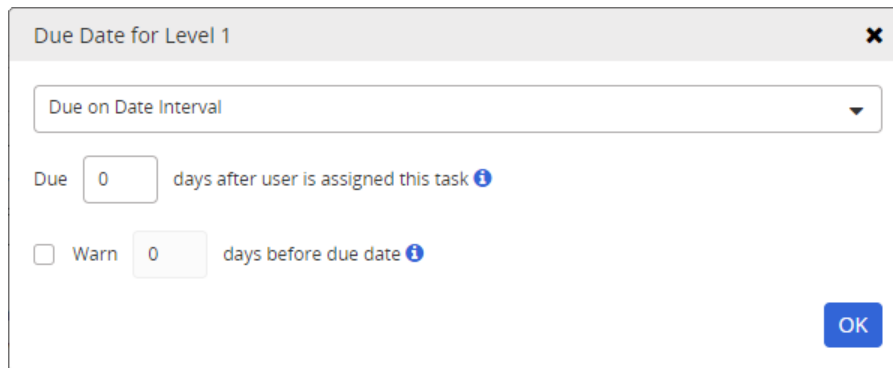

1. In the right pane where assignee selections are listed, click .

2. Do one of the following:

- Click **Due on Date Interval**, and then type a number in the **Due** box. The user then has that many days to complete the task after receiving it.

- Click **Due on Specific Date**, click ▼ in the **Target Due Date** box, and then find and click the due date.

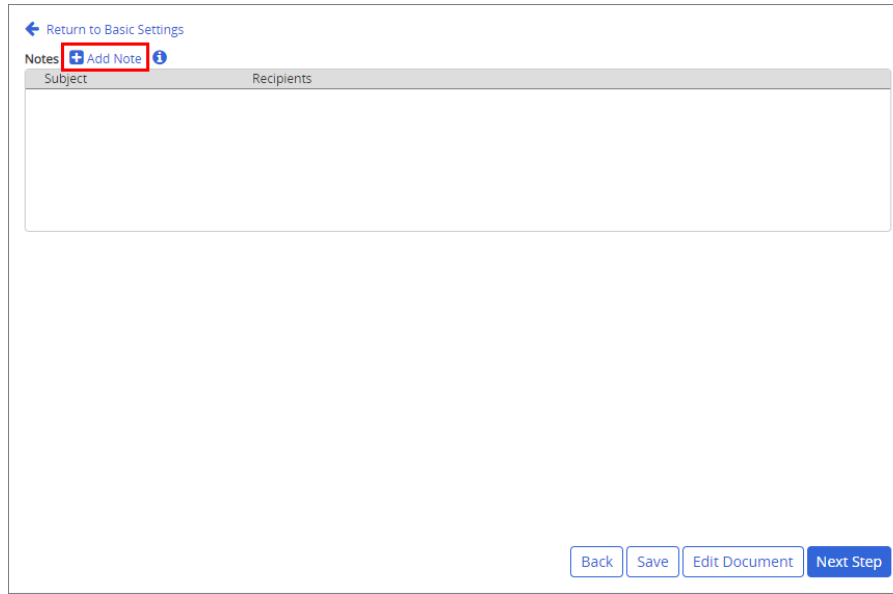

**Important:** We recommend that you not set a specific due date for an assignee task as that could cause past due notices to go out to new users who were added after the due date and assigned to read the document or complete the questionnaire.

3. (Optional) Select **Warn**, and then type a number of days before the due date that you want all that level's users notified that the due date is approaching. For example, if you set **10** as the **Due on Date Interval** setting, and then you set **Warn** to **2**, any users who haven't finished their tasks for that level by the end of the eighth day will receive a task reminder.
4. (Optional) Select **Make this critical on**, click ▼, and then find and click a date that is on or after the due date. If any users haven't completed their tasks by the critical date, an escalation email is sent to both the assigned users and the document/questionnaire owner.

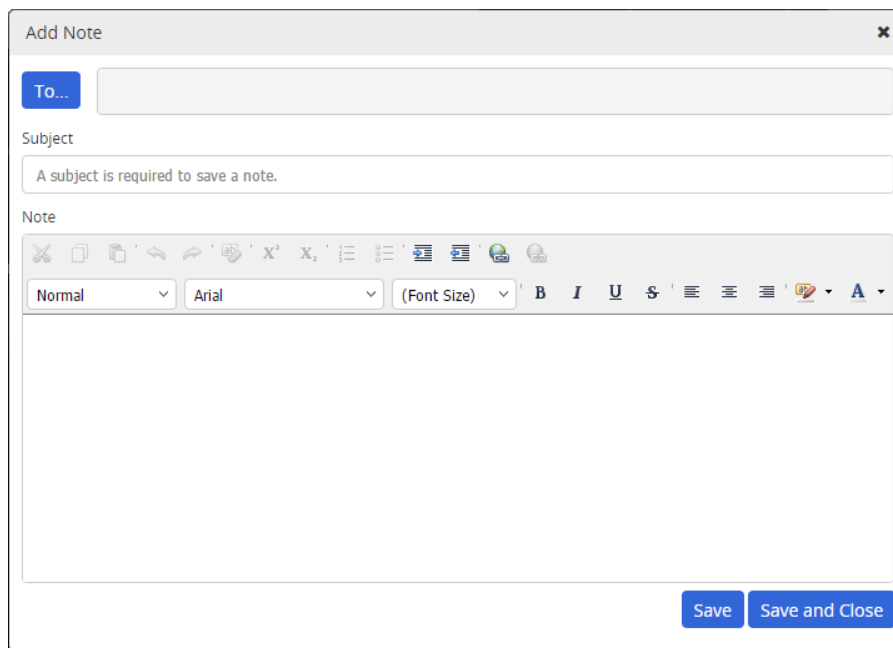

## Adding Notes for Writers, Reviewers, Approvers, and Assignees

When selecting writers, reviewers, approvers, and assignees in the **Properties Wizard**, you can include a note with instructions or other information concerning the writing, review, approval, or reading/completion of the content item (document, questionnaire, or campaign). Any note you write is included in the task notification email sent to assigned users as soon as the content item moves to the status for which the note was written. For example, if you include a note while working on the **Assignees** step, that note will be sent as soon as the content item is published or started. A user assigned a content item task can also access a note from within the content item (see [Reviewing Notes](#) for details).

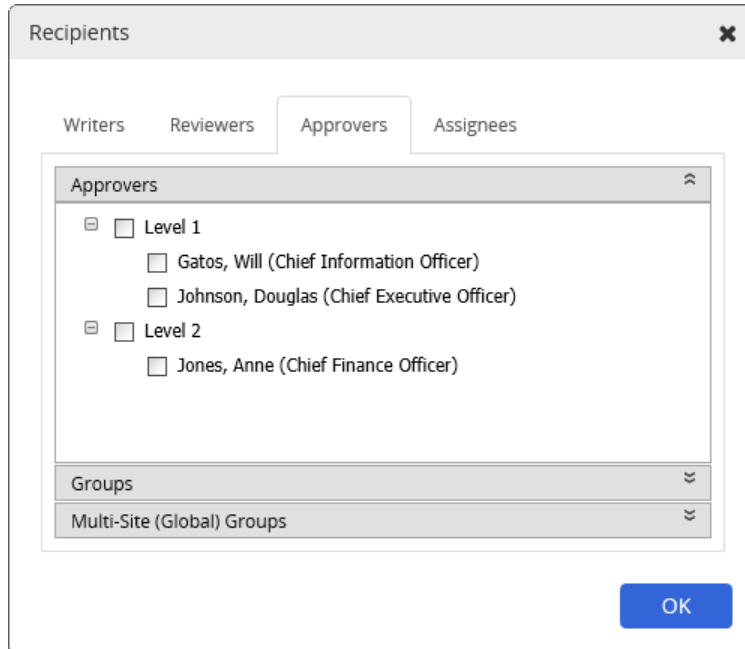

1. In the **Writers, Reviewers, Approvers, or Assignees** step of the **Properties Wizard**, click **Advanced Settings**, and then click **Add Note**.

2. Click **To**.

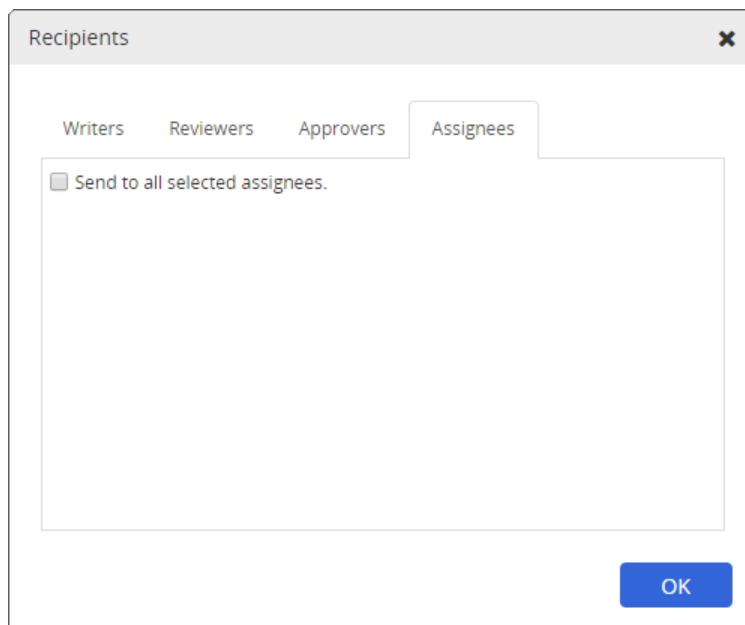

3. As you select note recipients, you will only see the users and groups currently assigned to the content item. Click the **Writers**, **Reviewers**, **Approvers**, or **Assignees** tab, and then do any of the following:
- Under the **Writers**, **Reviewers**, or **Approvers** heading, select individual assignees or select a level to include all assignees on that level.

- In the **Writers**, **Reviewers**, or **Approvers** tab, click the **Groups** heading, and then select one or more assigned groups.
- To select assignees as note recipients, click the **Assignees** tab, and then click **Send to all selected assignees**.

**Note:** If you select **Send to all selected assignees**, both required and "Notify Only" assignees receive the note in their initial email notifications.

4. Type a subject.

**Note:** You must type a subject before you can save the note.

5. Type the instructions or other information, and then click **Save and Close**.

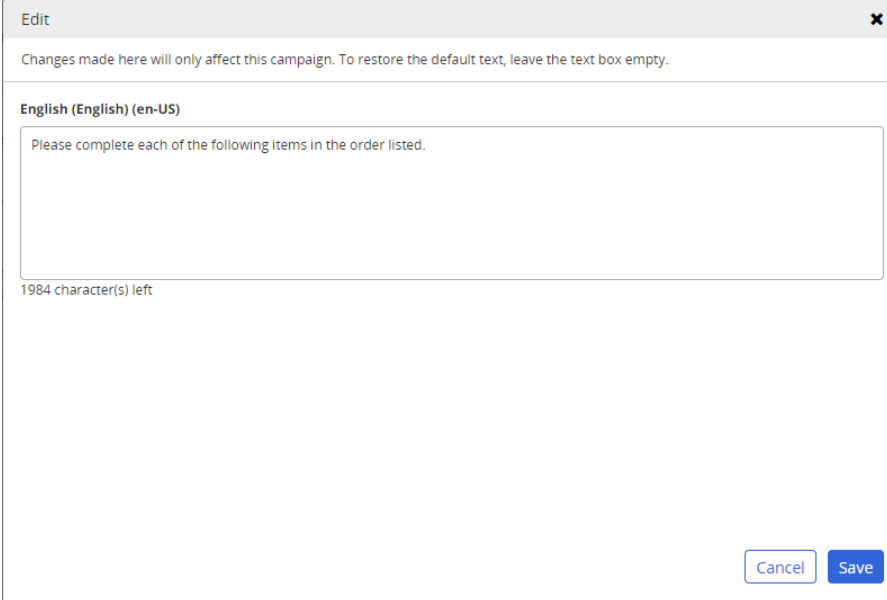

The screenshot shows a dialog box titled "Add Note". At the top right is a close button (X). Below the title bar is a "To..." field with a blue button to its left, containing the text "Benton, Carol (Environmental Control Manager); Breen, Darren (Personnel Manager); Hansen, Tom (Accounting Manager)". Below that is a "Subject" field containing "Careful Review Required". Underneath is a "Note" section with a rich text editor toolbar (including icons for copy, paste, undo, redo, bold, italic, underline, strikethrough, bulleted list, numbered list, link, unlink, and insert image) and a text area containing the text "The changes in this document are subtle but very important. Please review the document carefully.". At the bottom right of the dialog are two buttons: "Save" and "Save and Close".

## Adding Content to a Campaign

1. If the campaign is not already opened, find and open it.
2. Click **Edit Campaign**.

The screenshot shows a web interface for a campaign titled "Protecting Company Assets v.1". At the top right, there is a status dropdown menu set to "Approve (Ready To Start)". Below the title bar are three tabs: "Edit Campaign" (highlighted with a red box), "Properties Wizard", and "Overview". To the right of the tabs, it says "Status: Draft - Draft". The main content area has an "Introduction" section with a pencil icon and the text "Please complete each of the following items in the order listed." Below this is a "Campaign Contents" section with a table that has a header row "Title" and a body row "Nothing Added". To the right of the table is an "Add Content" button with a plus icon. At the bottom right of the page are "Cancel" and "Save" buttons.

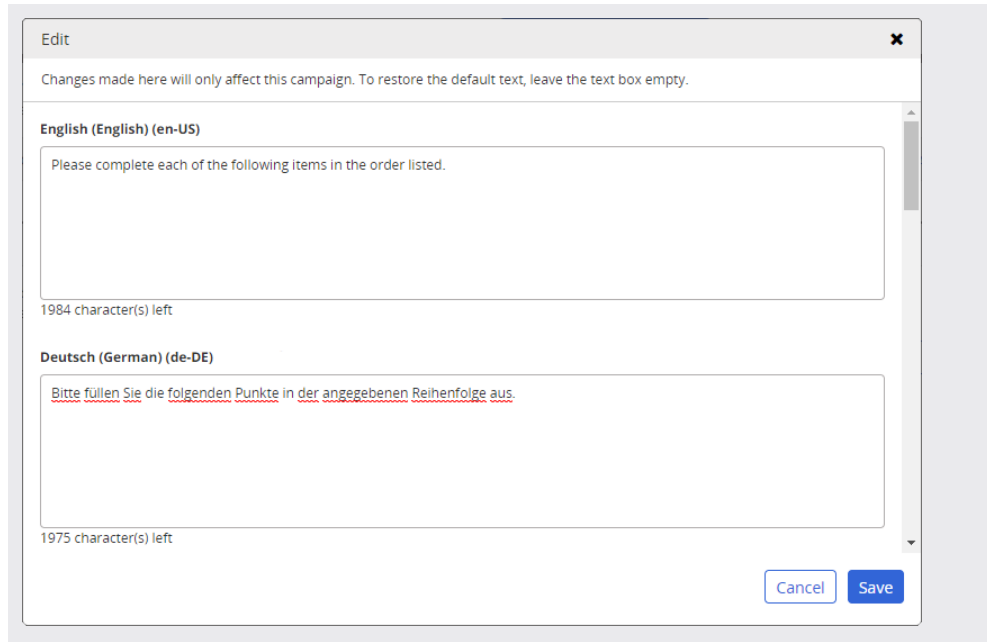

3. (Optional) By default, users you assign to complete the campaign will see the following introductory text: "Please complete each of the following items in the order listed." To edit the text, click  after **Introduction**, make your changes, and then click **Save**.

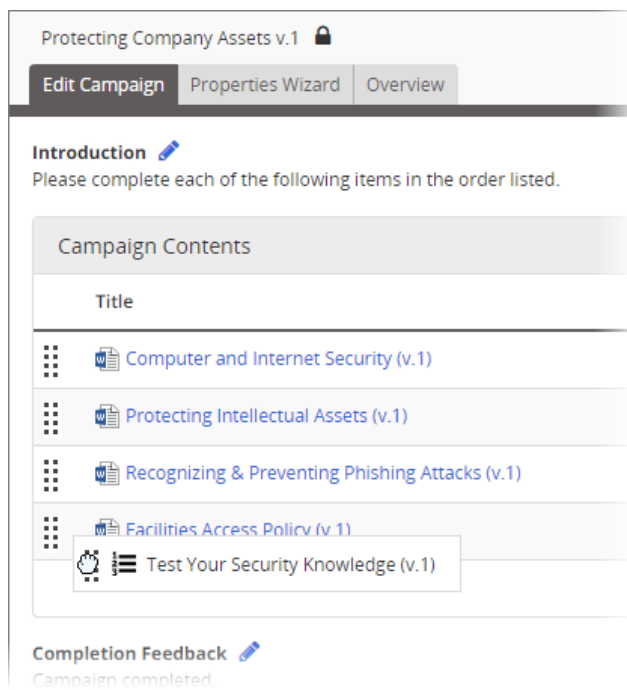

1984 character(s) left

**Notes:**

- To restore the default text, completely delete the text box's contents before saving.
- If multiple languages are enabled, you can modify the introduction text for each language. Your modifications will apply to the current campaign only.

4. (Optional) Make changes to the **Completion Feedback** text (what assignees see after they complete the campaign's last content item.)
5. Select the content items to include in the campaign. See [Selecting Campaign Content Items](#) below for details.
6. Assignees will be required to read or complete each the campaign's content items in the order they are listed. To rearrange selected content items, click  to an item's left and drag it to the new location.

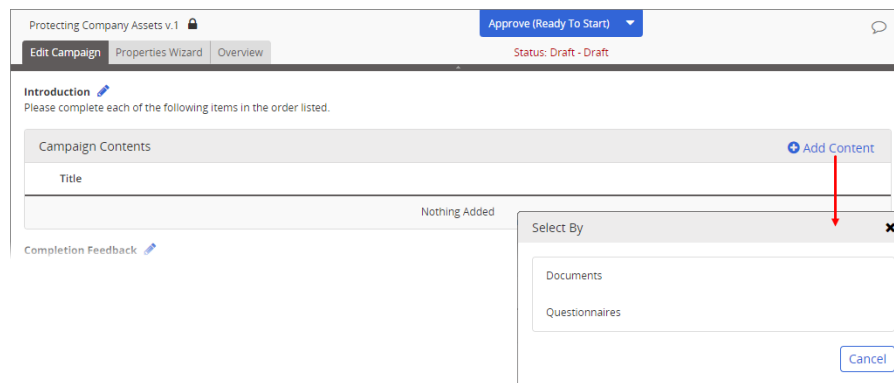

7. Do one of the following:

- If you're done setting up the campaign for now, click **Save**, and then close the campaign window.
- If you're completely finished with the campaign's contents and **Properties Wizard** settings, follow the instructions under [Approving a Campaign](#).

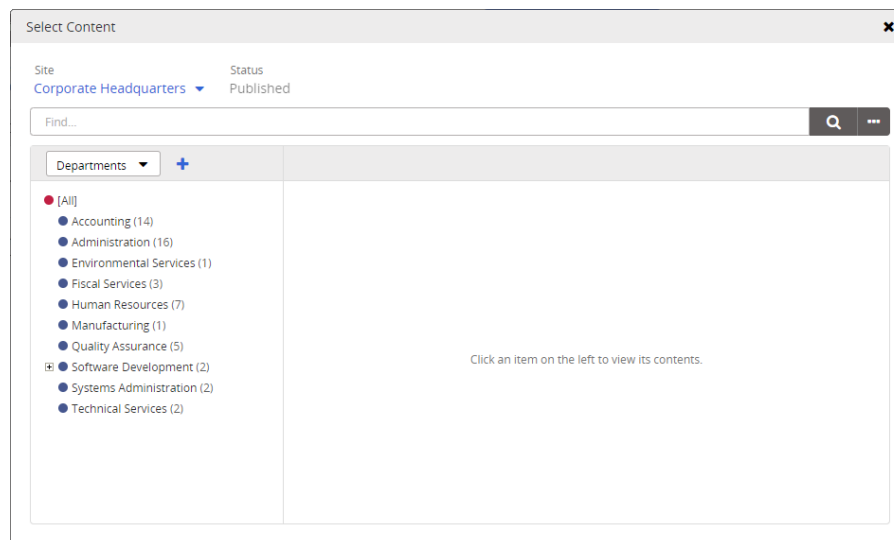

## Selecting Campaign Content Items

1. In a draft campaign's **Edit Campaign** tab, click **Add Content**, and then click **Documents** or **Questionnaires**.

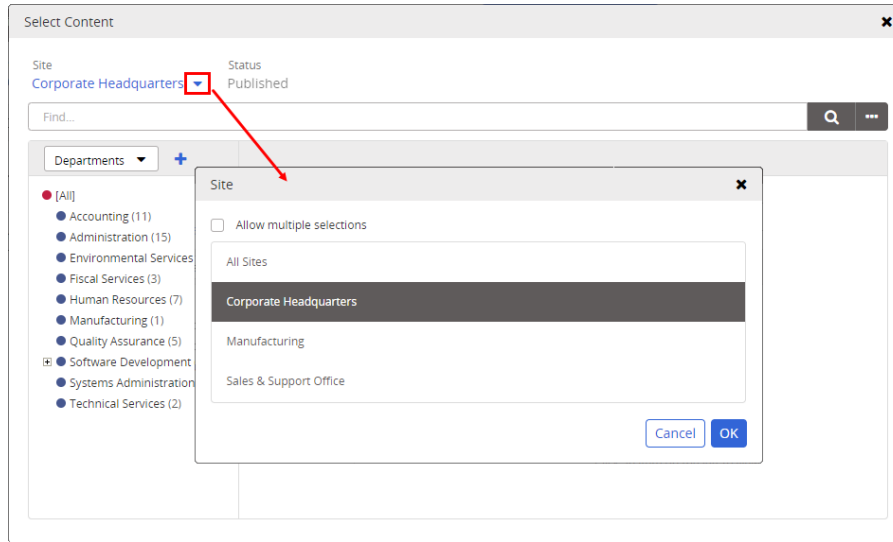

**Important:** You can add any accessible published document or started questionnaire assigned the **All Users** security level.

The **Select Content** tool is displayed.

2. If you have access to multiple sites, click ▼ to the right of the currently selected site, and then do one of the following:

**Important:** If you don't have access to multiple sites (the **Site** menu is inactive), move on to step 3.

- Click a different site and click **OK**.
  - Click **All Sites** to search all sites you have access to and click **OK**.
  - Select **Allow multiple selections**, select two or more sites and click **OK**.
3. Select all the content items of the current type (documents or questionnaires) by following the instructions under [Browse to Select Content Items](#) or [Find and Select Content Items](#) below.

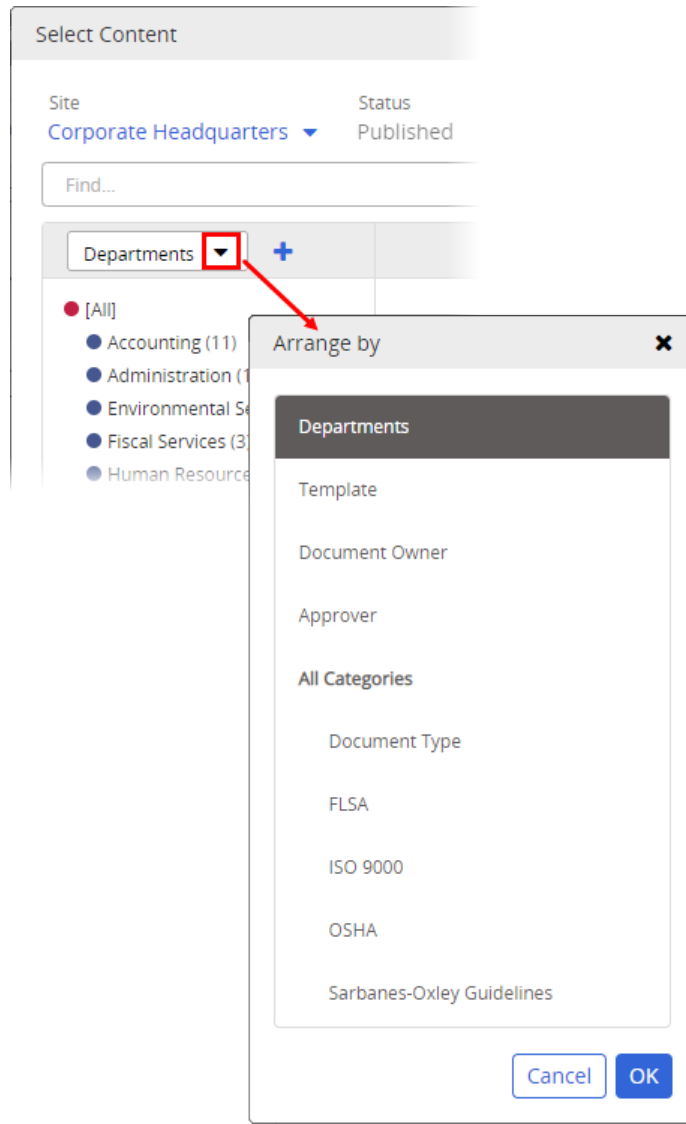

**Note:** It doesn't matter in what order you select the content items. You can easily rearrange your selections later.

4. (Optional) To add content of a different type, repeat the steps above.

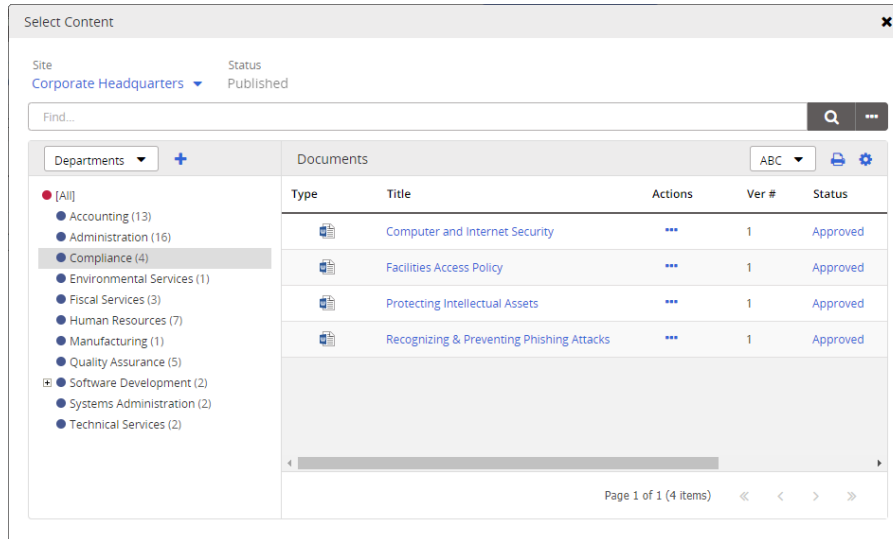

### Browse to Select Content Items

Use this method to list content items matching certain common criteria, such as their assigned department, category, or owner. **Departments** is the default browse criterion.

1. In the **Select Content** tool, click ▼ to the right of **Departments**, select an option, and then click **OK**.

2. In the resulting browse list on the left, click an item to display its contents.

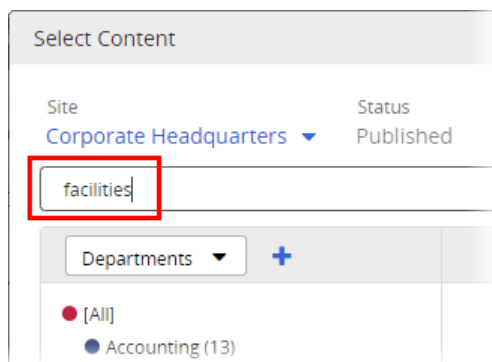

3. Click a content item's title to add it to the campaign, and then do one of the following:
  - To add more content items of the current type (documents or questionnaires), click **Add Another**, and then list and select another item.
  - Click **Done** to return to the **Edit Campaign** tab with the added content listed.

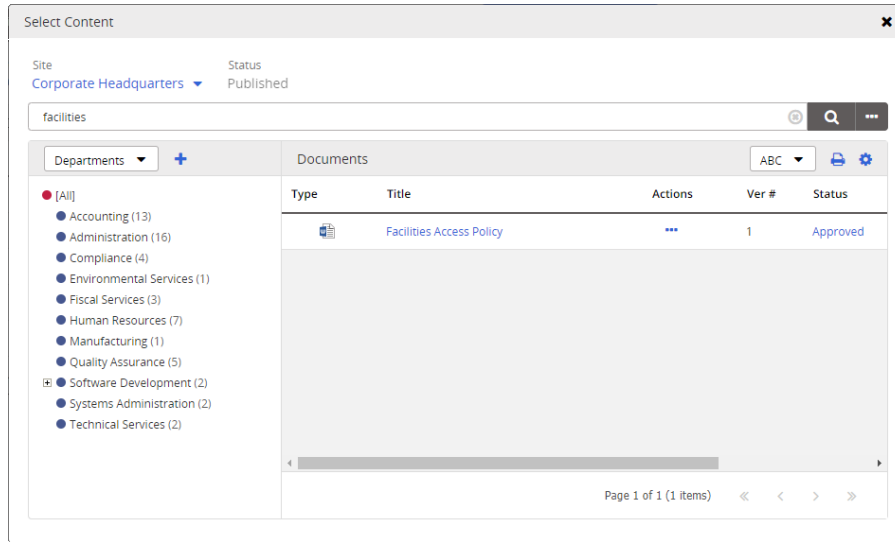

### Find and Select Content Items

Use this method to list content items matching text found in each item's title, reference number, full text (Word, Excel, and PowerPoint documents only), or keywords.

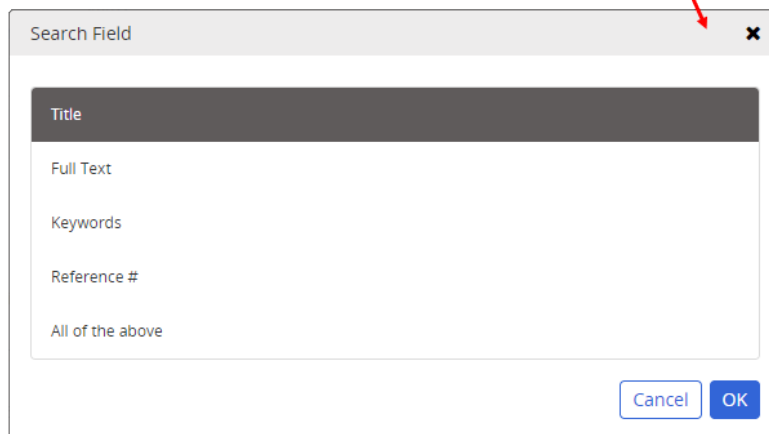

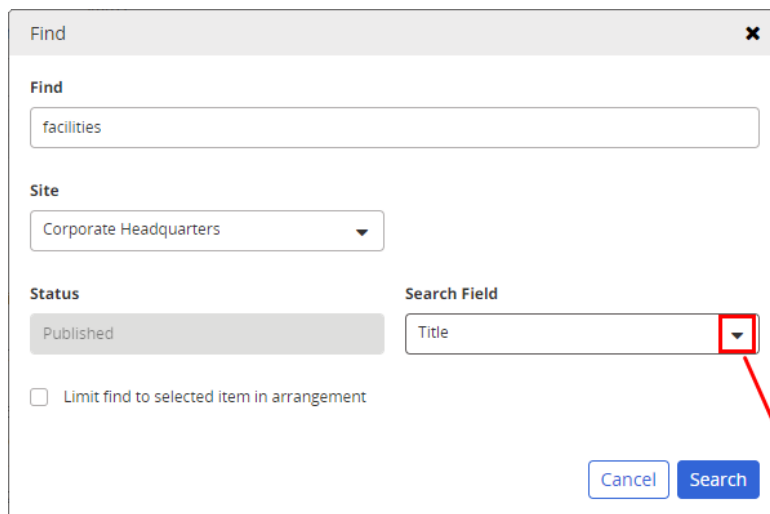

1. In the **Select Content** tool, type some text in the **Find** box, and then do one of the following:

- Click  to list all matching content items using default **Find** settings.

- To change what content item attribute to search, click , select a **Search Field** option, and then click **Search**.

**Notes:**

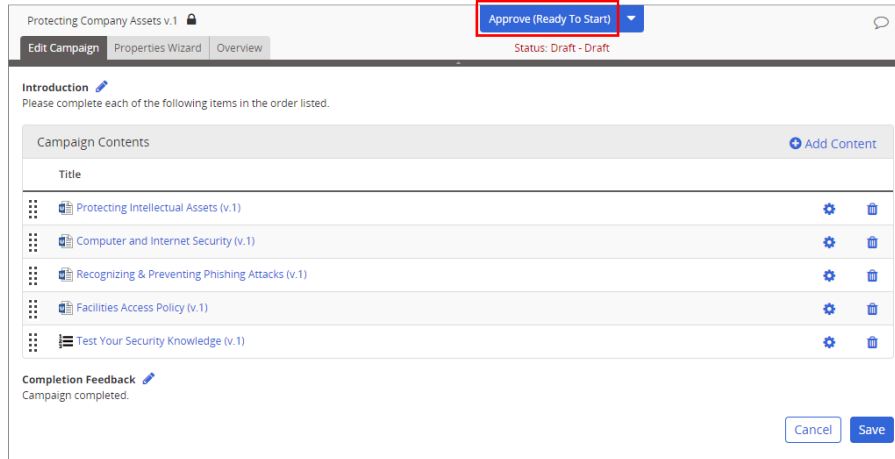

- If the **Search Field** setting is **All Search Fields**, an administrator has selected a system setting that forces the searching of all fields, in which case you cannot choose a different setting.
  - The **Full Text** option available when selecting documents applies only to Word, Excel, and PowerPoint documents.
  - A content item owner can add keywords when creating a document or questionnaire, but is not required to. Keywords are words or phrases the owner thinks users might search for when trying to find a particular content item.
  - The default **Search Field** setting is initially set by an administrator, but you can change it in **My Profile** (see [Changing Your Profile Settings](#)).
2. Click a content item's title to add it to the campaign, and then do one of the following:
    - To add more content items of the current type (documents or questionnaires), click **Add Another**, and then find and select another item.
    - Click **Done** to return to the **Edit Campaign** tab with the added content listed.

---

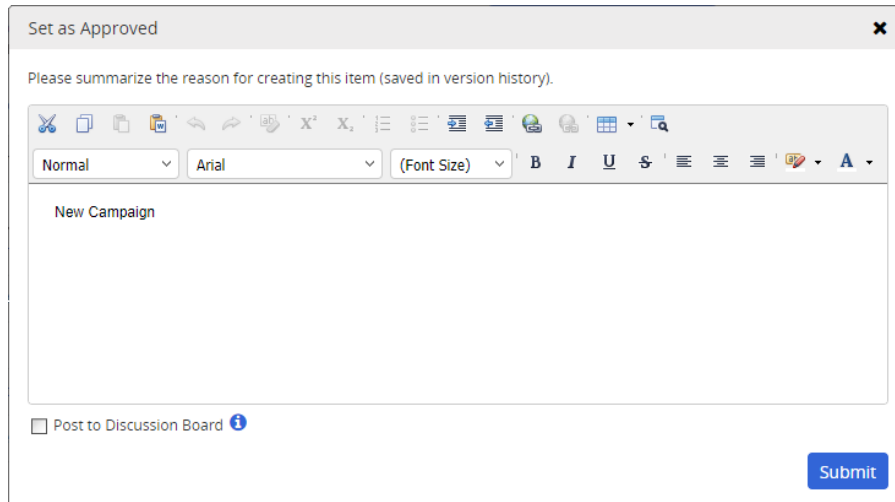

## Approving a Campaign

When you're finished setting up a campaign, you need to approve it, which does one of the following:

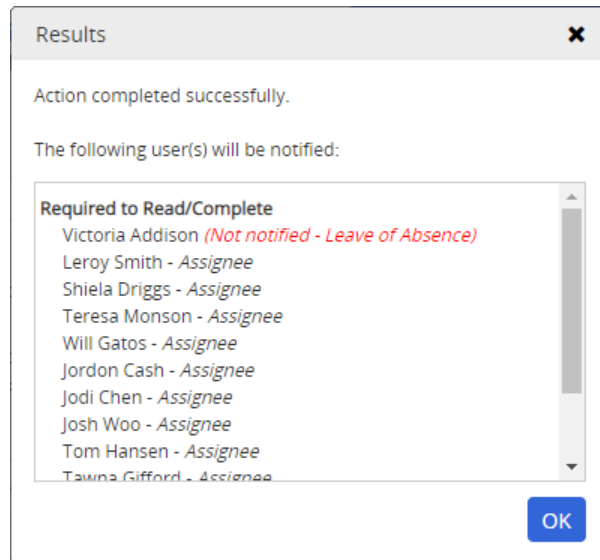

- If you did not specify a start date, or the specified start date has already passed, the campaign is started immediately and tasks are sent to assignees.
  - If the specified start date is in the future, the campaign is set as ready to start and moved into Pending status, where it will remain until the start date.
1. With the campaign open, click **Approve (Ready to Start)**.

2. (Optional) In the **Set as Approved** prompt, replace the default "New Campaign" text with a description of this campaign's purpose.

3. (Optional) To add what you wrote to this campaign's discussion board, select **Post to Discussion Board** (see [Working with Discussions](#) for details).
4. Click **Submit**. If you see a results prompt (only when the campaign is starting immediately), click **OK**.

---

## Working with Documents or Questionnaires in Review and Approval

As a document owner or questionnaire owner, you can do any of the following with your content while it is in the Review or Approval status:

- Find and open a document/questionnaire (see [Searching for a Content Item](#) or [Browsing for a Content Item](#))
- Check the status of assigned writers, reviewers, or approvers (see [Checking Writer, Reviewer, and Approver Status](#))
- Make changes to properties (see [Making Changes to Properties](#))
- (Documents only) Edit document content (see [Editing Document Content](#))
- Send the document/questionnaire back to draft (see [Sending a Document or Questionnaire Back to Draft](#))
- Check the document's/questionnaire's discussion board (see [Working with Discussions](#))
- Force a document/questionnaire from Review to Approval (see [Forcing a Document or Questionnaire from Review to Approval](#))

---

### Checking Writer, Reviewer, and Approver Status

As a document owner or questionnaire owner, once you have submitted a document or questionnaire for writing, review, or approval, you can check that item's status in the **Overview**.

**Important:** You can also check writer, reviewer, and approver status by generating various **Tasks by Content** reports.

1. Find and open the document or questionnaire (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click **Overview**.

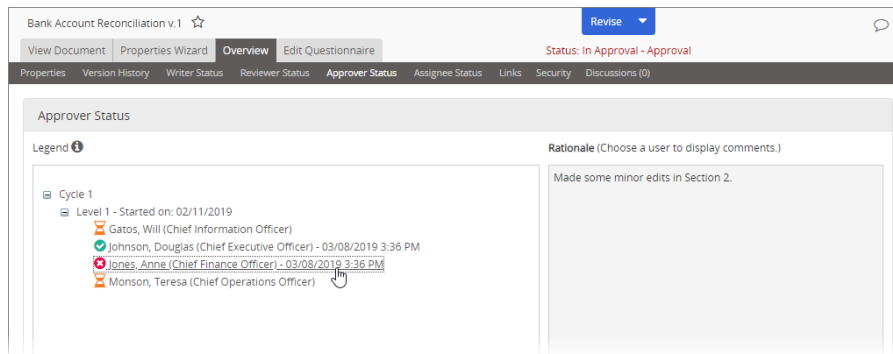

3. In the **Overview** page, click **Writer Status**, **Reviewer Status**, or **Approver Status**.

4. In the **Writer Status**, **Reviewer Status**, or **Approval Status** window, each user's name is preceded by a status icon, each of which is described under "Status Descriptions" below.

5. To view any comments a user may have included when completing a task, click that user's name. The comments, if any, appear in the **Rationale** box.
6. Close the document/questionnaire.

## Status Descriptions

-  The assigned writer has finished writing the document/questionnaire, or the assigned reviewer or approver has accepted the document/questionnaire as it is.
-  The assigned reviewer or approver has either revised or declined the document/questionnaire.
-  The assigned writer, reviewer, or approver has been notified of the task that needs to be completed, but has not completed it yet. For example, you would see this icon for an approver in the **Approver Status** page if the document/questionnaire is currently in the Approval workflow status and the user has not finished reviewing it.
-  The assigned writer, reviewer, or approver did not complete the assigned task before the document/questionnaire was moved to another workflow status. For example, while a document/questionnaire is in Collaboration status, the document owner clicks **Submit for Review** before one of the writers clicks **Finished Writing**. The document/questionnaire is moved to Review status, and the **Skipped**

icon appears before the writer's name in the **Writer Status** page.

 The assigned writer, reviewer, or approver has not yet received the task assignment. For example, you are looking at an approver in the **Approver Status** page while the document/questionnaire is still in Review.

 The assigned writer, reviewer, or approver received a task assignment but was subsequently unassigned before completing the task. For example, while a document is in Approval and all approvers have received their task notifications, the document owner edits the document's/questionnaire's **Properties Wizard** and removes one of the assigned approvers. That user is now marked as unassigned.

 Because the assigned writer, reviewer, or approver is on leave of absence, this user's task status is excluded.

---

## Making Changes to Properties

A document owner, a questionnaire owner, a campaign owner, an administrator, and a proxy author can all make changes in the **Properties Wizard** of an assigned content item after it leaves the Draft workflow status. What you can change depends on the type of content, your assigned role, and the content item's status.

## Allowed Changes to Document and Questionnaire Properties

A document/questionnaire owner or administrator can make changes to properties in the following statuses:

- Draft
- Collaboration
- Review
- Approval
- Pending
- Published

An assigned proxy author can make property changes in the following statuses:

- Draft
- Collaboration
- Review
- Approval

However, the following properties cannot be changed for documents and questionnaires in certain statuses. If you need to change one of these properties, you will have to return the document/questionnaire to Draft status (see [Sending a Document or Questionnaire Back to Draft](#)) or create a new version (see [Doing a Periodic Review and Creating a New Version](#)).

- **Template:** can only be changed in the Draft and Collaboration statuses
- **Approvers:** cannot be changed after a document/questionnaire is approved and moved to Pending or Published/Started status
- **Review Interval:** Cannot be changed from **No Review Date** to setting a review date, and vice versa, once a document/questionnaire is approved and moved to Pending or Published/Started status. However, if a review interval is currently set, you can change the **from** setting—switching between the **approve/last reviewed date** and **specified date** options.
- **Publication/Start Date:** Cannot be changed once a document/questionnaire is moved to Published/Started status

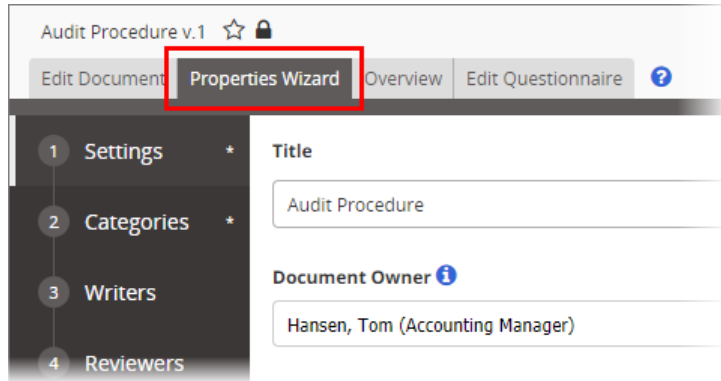

### Allowed Changes to Campaign Properties

Except for the following, all settings and task assignments in the **Settings**, **Categories**, and **Assignees** steps can be changed after a campaign is approved and moved to Pending or Started status.

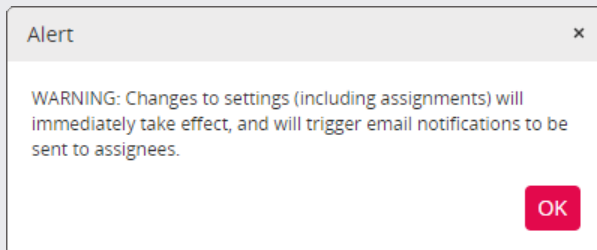

- **Template**
- **Approvers**
- **Review Interval** (Cannot be changed from **No Review Date** to setting a review date, and vice versa. However, if a review interval is currently set, you can change the **from** setting—switching between the **approve/last reviewed date** and **specified date** options.)
- **Start Date**

### Changing Properties after Draft Status

1. Find and open the document, questionnaire, or campaign (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click **Properties Wizard**.

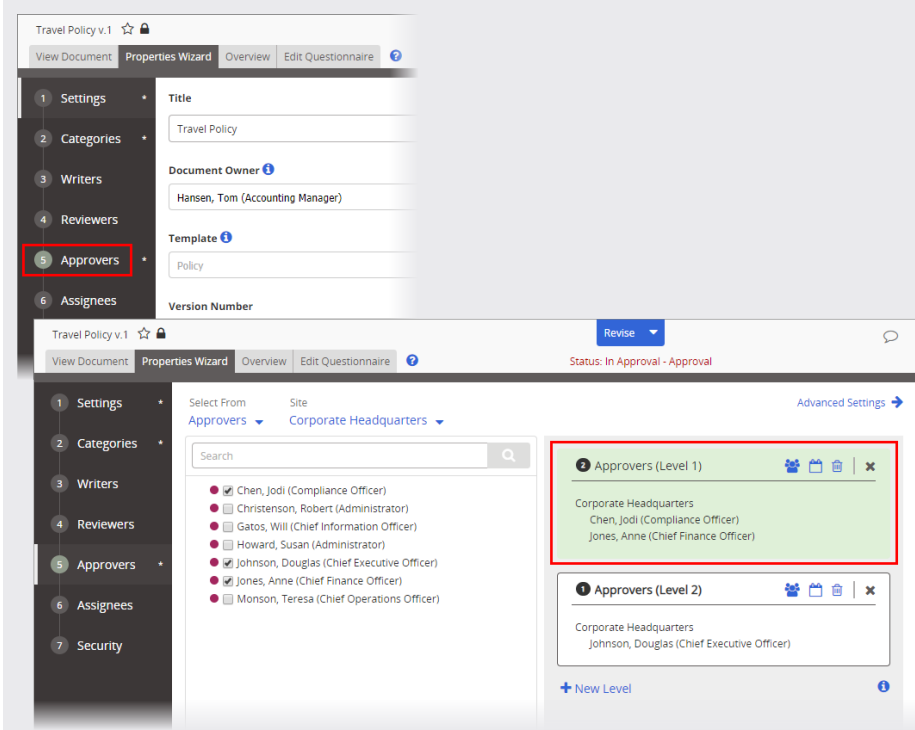

**Note:** If you're working on a content item in the Pending or Published status, you'll see the following alert. Be aware that making changes to certain settings could cause additional email notifications to be sent to assignees. Click **OK** to continue.

3. Click a **Properties Wizard** step, and then make the desired changes.

**Notes:**

- The step matching the status the document/questionnaire is currently in is highlighted. If a document or questionnaire is currently in the Collaboration (Writers), Review, or Approval status and multiple assignment levels exist, the currently active level is also highlighted.

■ For instructions on how to change a note, see [Editing or Deleting a Note](#).

4. Click **Save**.

**Important:** If you close the content item without clicking **Save** first, your changes will be lost.

5. Close the content item.

## Editing or Deleting a Note

If you're a document owner, a questionnaire owner, a proxy author to a document or questionnaire owner, or an administrator, you can edit or delete an existing note to writers, reviewers, approvers, or assignees in a document or questionnaire.

If you're a campaign owner, a proxy author to a campaign owner, or an administrator, you can edit or delete an existing note to a campaign's assignees.

1. Find and open the document or questionnaire containing the note you need to change (see [Searching for a Document or Questionnaire](#) or [Browsing for a Document or Questionnaire](#)).
2. Click the **Properties Wizard** tab, and then click the step (**Writers**, **Reviewers**, **Approvers**, or **Assignees**) containing the note.

3. Click **Advanced Settings**, and then, under **Notes**, click the note you want to change.

Cash Receipts v.1

View Document Properties Wizard Overview Edit Questionnaire

Status: In Approval - Approval

← Return to Basic Settings

Recurrence

Interval: Once Next Task: On Publication

Notes Add Note

Subject	Recipients
<input checked="" type="checkbox"/> Important Updates	Selected Assignees

Back Save View Document Next Step

4. Do either of the following:
  - Make edits (change recipients, edit the note subject and body), and then click **Save and Close**.
  - Click **Delete**, and then click **Yes** to confirm.

**Note:** Changing a note for a workflow step that has already been completed (for example, changing a note for approvers when the content item is already in Pending or Published status) will not resend notification emails. In this case, you would probably want to notify users yourself and have them access the edited note from within the content item itself (see [Reviewing Notes](#)).

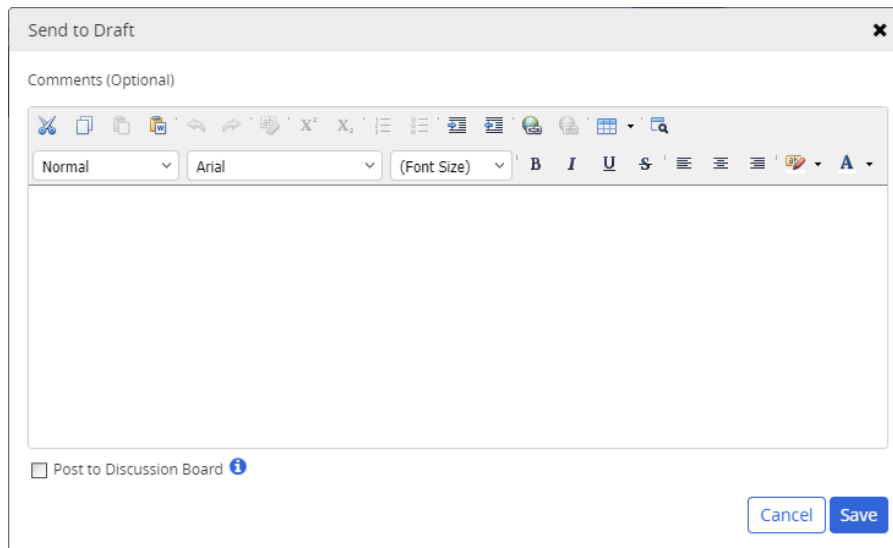

## Sending a Document or Questionnaire Back to Draft

A document owner, questionnaire owner, or administrator can send a document or questionnaire in the Collaboration, Review, or Approval status back to Draft status.

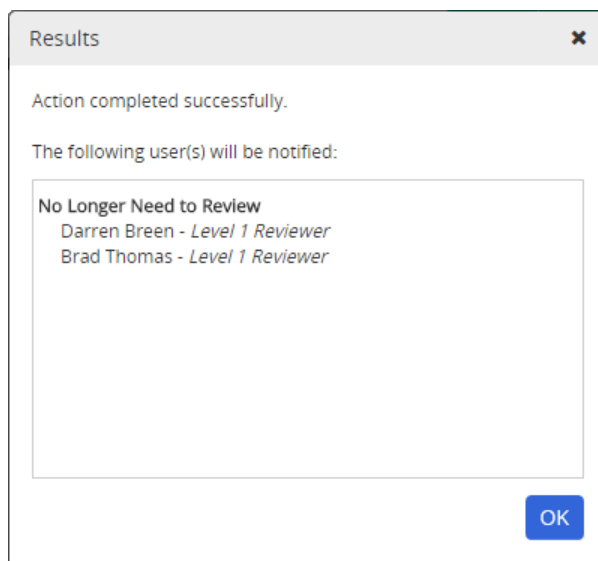

1. Find and open the document or questionnaire (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click , and then click **Send to Draft**.

3. (Optional) Type a reason for sending the document/questionnaire back to Draft.

3. Click **Save**.
4. In the **Results** window, click **OK**.

The document/questionnaire is moved to Draft status and remains open. Any writers (Collaboration status), reviewers, or approvers in the current

status who had not completed their assigned tasks are notified that their tasks no longer need to be completed.

## Editing the Content of a Document in Review or Approval

If you are the owner of a document, you can make changes to that document while it is in the Review or Approval status.

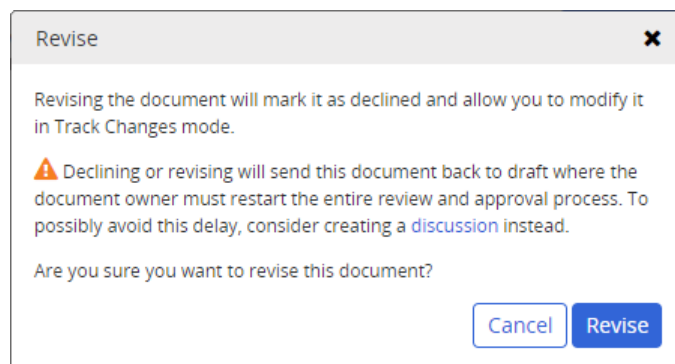

**Important:** A stand-alone questionnaire's content cannot be edited while it is in Review or Approval. You must send the questionnaire back to Draft in order to edit its contents (see [Sending a Document or Questionnaire Back to Draft](#)).

1. Find and open the document (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. At the top of the document window, click **Revise**.

3. An alert is displayed informing you that the revised document will be declined and sent back draft, just as if a reviewer or approver had revised the document. Also, any changes you make will be tracked.

Click **Revise** to continue.

4. Make your changes, and then click **Done Revising**.

- (Optional) In the **Done Revising** window, type a brief description of what you changed.

- (Optional) To start a discussion that includes your revision explanation, click **Post to Discussion Board**, and then see [Working with Discussions](#) for details on selecting recipients and making the discussion private.
- Click **Save**, and then click **OK**.

**Important:** When the last assigned reviewer or approver is done with the document, it will be returned to Draft status. There you can accept your marked changes and any reviewers' changes (see [Working with a Revised or Declined Document or Questionnaire](#)) and then resubmit the document for review or submit it directly to approval.

## Forcing a Document or Questionnaire from Review to Approval

When necessary, as a document owner, questionnaire owner, or administrator you can move a document or questionnaire currently in the Review status on to the Approval status, skipping any reviewers who have not yet completed their review tasks.

**Important:** If you are not an administrator, you cannot force a document/questionnaire from Review to Approval if the assigned template contains required reviewers.

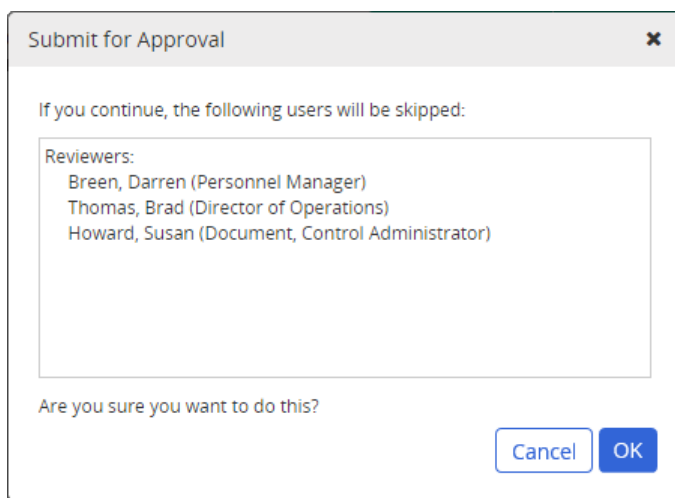

- Find and open the document or questionnaire currently in review that you need to move on to approval (see [Searching for a Content Item](#) or

[Browsing for a Content Item](#)).

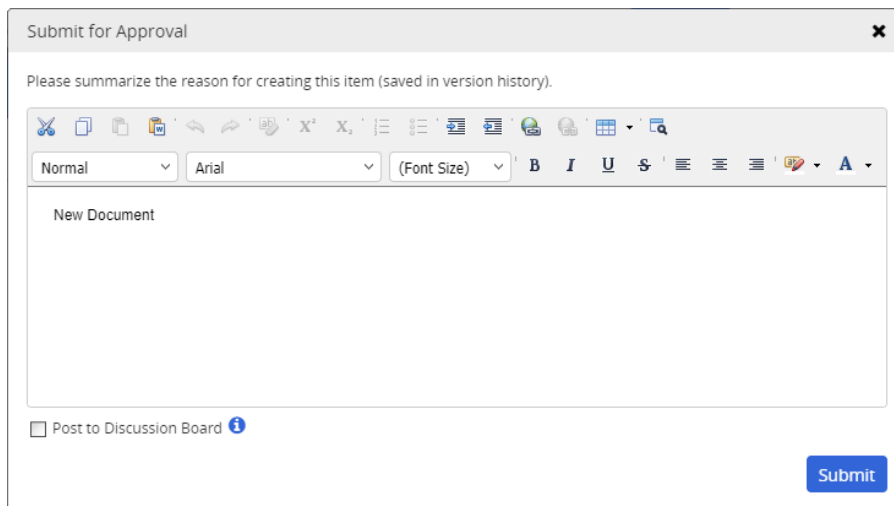

- Click , and then click **Submit for Approval**.

- You will see a message like the one below listing the reviewers that will be skipped if you continue. Click **OK**.

- (Optional) The comments provided when the document/questionnaire was submitted for review are displayed. You can replace or edit those comments.

5. Click **Submit**, and then click **OK**. Skipped reviewers are notified that they no longer need to complete their review tasks for this document/questionnaire, and assigned approvers receive new tasks.

---

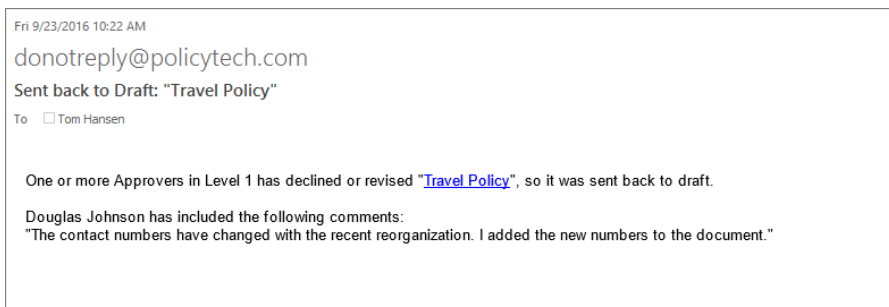

## Working with a Revised or Declined Document or Questionnaire

Once all reviewers or approvers have reviewed a document or questionnaire, there are two possible outcomes:

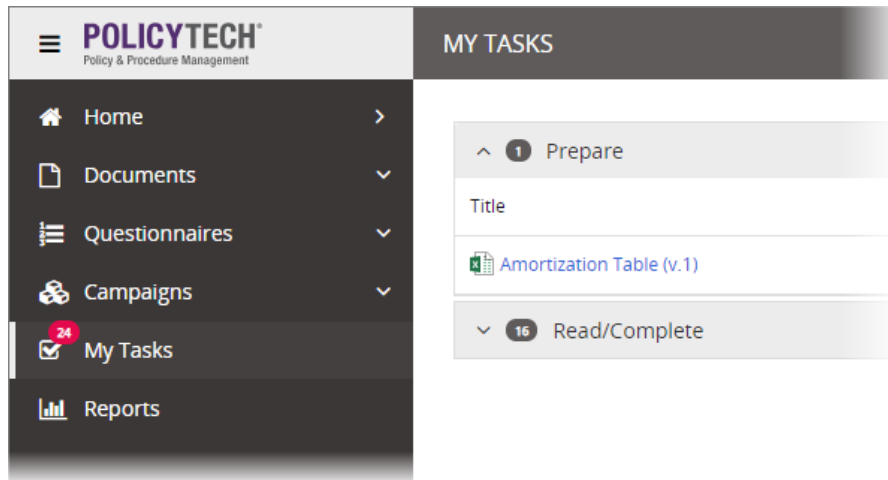

- If the document/questionnaire was accepted by all of the assigned reviewers or approvers, it is automatically moved to the next status (Approval, Pending, or Published) and the appropriate assignees are notified. In this case, you, as the document/questionnaire owner, do not need to do anything. Depending on the document's/questionnaire's email settings and your email subscription settings, you may receive e-mail notification that the document/questionnaire has been moved on in the workflow.
- If the document/questionnaire was revised or declined by at least one of the reviewers or approvers, it is automatically sent back to Draft status. You, as the document/questionnaire owner, are notified via email so you can make needed changes and resubmit the document/questionnaire for review or approval.

**Note:** As individual reviewers or approvers revise or decline the document/questionnaire, you receive email messages with any comments from the reviewers or approvers (if your email subscriptions include this type of notification). Only after the last reviewer or approver has taken action is the document/questionnaire automatically moved back to Draft.

1. To edit the document or questionnaire and resubmit it for review or approval, do one of the following:
  - Open the notification email, read the comments made by the reviewer or approver, and then click the document/questionnaire link.

- Click **My Tasks**, click **Prepare** to see those tasks, and then click the document/questionnaire title.

2. What you do next depends on whether the document/questionnaire was revised or declined and what type of content item it is.
  - If the revised or declined item is a Word document and one or more of the reviewers or approvers revised the document, their changes will be highlighted with the Word **Track Changes** feature. You need to accept or reject the changes (see [Working with Tracked Changes in a Word Document](#) for details).
  - If the revised or declined item is an Excel or PowerPoint document and one or more reviewers or approvers revised the document, you will need to compare document snapshots (draft versions) to see what was changed (see [Comparing Draft Versions in an Excel or PowerPoint Document](#) below for details.)
  - If the revised or declined item is a document containing an uploaded file and one or more approvers revised it, open the document, review the revisions, and make any needed edits.
  - If the revised or declined item is a document or questionnaire that was declined, and none of the reviewers or approvers revised it, refer to the comments entered when the document/questionnaire was declined and make changes accordingly. (No text will be marked up.) These comments are included in the notification email and in the **Reviewer Status** or **Approver Status** page of the **Overview** (see [Working with the Overview](#) for details).
3. When you've finished making the necessary changes, resubmit the document/questionnaire to review or approval.

---

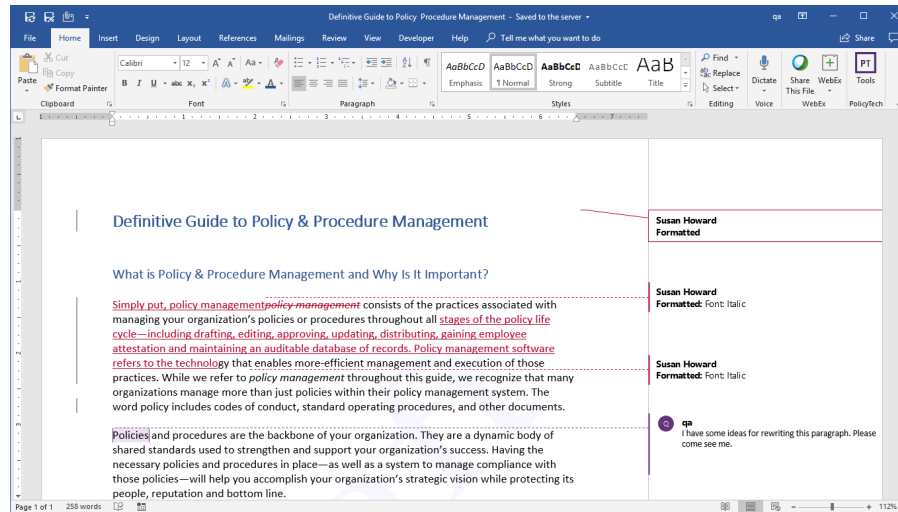

## Working with Tracked Changes in a Word Document

PolicyTech turns on **Track Changes** whenever a reviewer or approver chooses to revise a Word document. **Track Changes** marks all text changes,

including insertions, deletions, moved text, and formatting changes. Reviewers and approvers can also insert comments to explain marked up text or to identify other changes that need to be made.

**Note:** Reviewers and approvers cannot turn off **Track Changes** while revising a document.

The screenshot below shows what marked-up text might look like. If multiple reviewers or approvers revised the document, each reviser's changes appear in a different color.

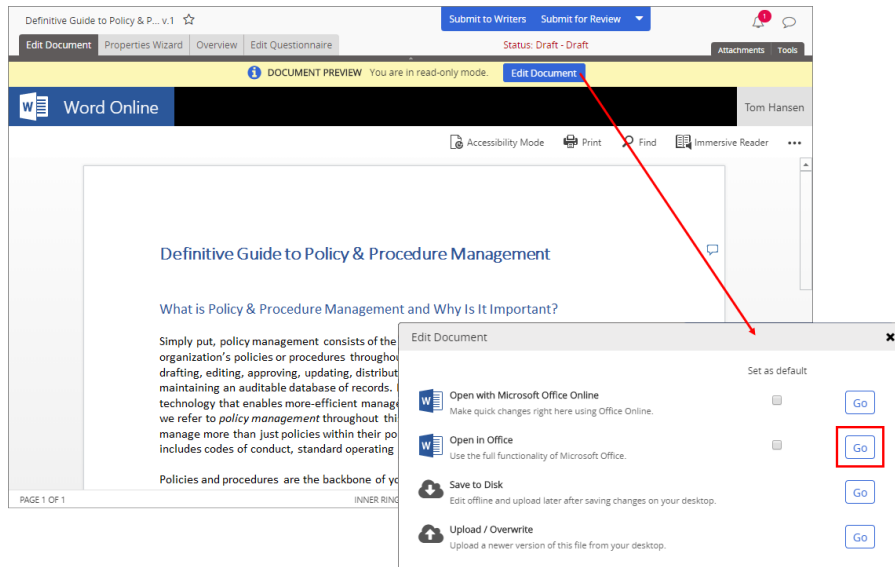

**Important:** You'll want to take action on each change by accepting or rejecting it so that no marked-up text remains when you resubmit the document for review or approval and when the document is finally approved published.

## Viewing Tracked Changes

How you view tracked changes depends on the type of Word integration your PolicyTech system is using.

- If, when you open the revised document, it looks similar to the one below, then, in the **DOCUMENT PREVIEW** header, click **Edit Document**, and then click **Open in Office** to open the document in desktop Word.

**Important:** Viewing of tracked changes is not currently supported in Word Online. If you don't have access to desktop Word (clicking **Open in Office** doesn't work), you can use the **Compare** feature in the **Version History** page of the document's **Overview** tab to see most changes. See [About the Version History Page of the Overview](#) for details.

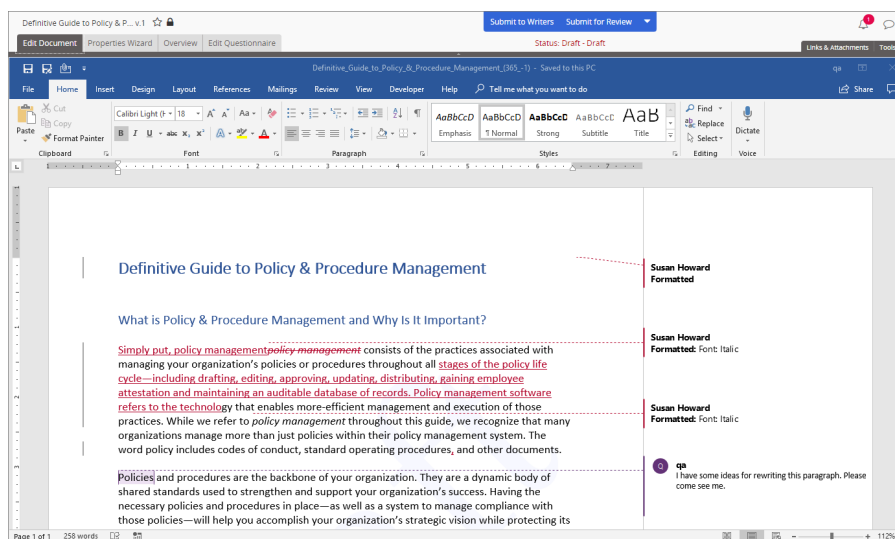

Scan through the document and, if you don't see any tracked changes or comments, check your **Display for Review** setting. In the ribbon, click **Review**. Then, in the **Tracking** group, find  or , and make sure it is set to **All Markup**.

Now, move on to [Working with Marked-up Text and Comments](#) below.

- If, when you open the document, it looks similar to the one below, scan through the document.

If you don't see any tracked changes or comments, check your **Display for Review** setting. In the ribbon, click **Review**. Then, in the **Tracking** group, find  or , and make sure it is set to **All Markup**

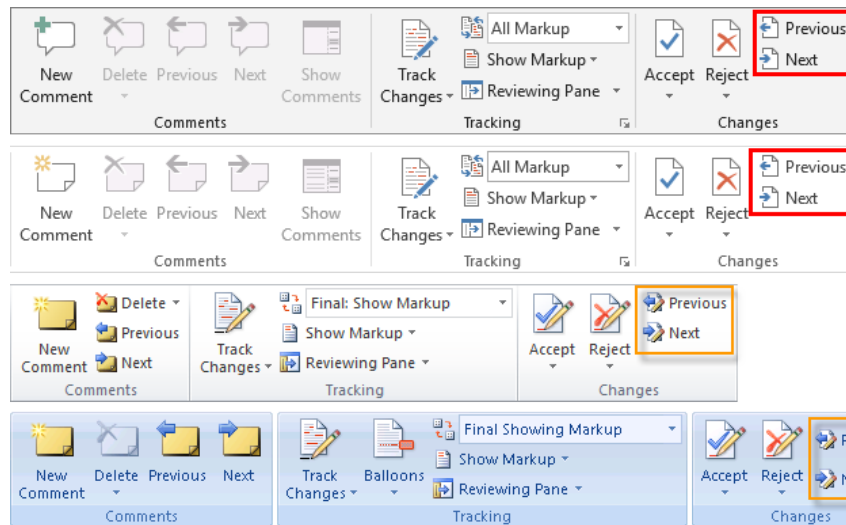

## Working with Marked-up Text and Comments

Using the **Track Changes** and **Comments** options in Word, you can do any of the following:

**Note:** We recommend using the **Track Changes** tools to find marked-up text in the document as some very small changes (such as adding a period) might be missed otherwise.

### Find Markup in the Text

On the **Review** tab, in the **Changes** group, click **Next** or **Previous**.

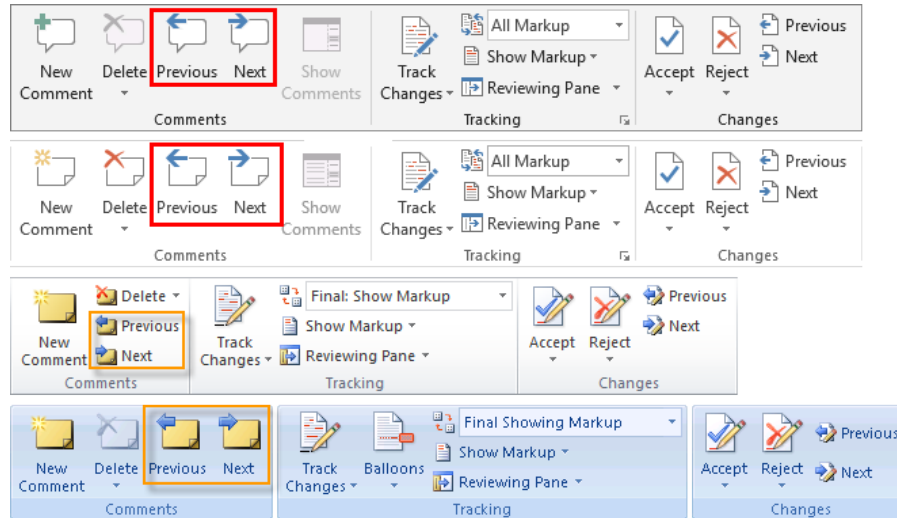

After finding marked-up text, hover the cursor over the change to see who made it.

### Find Comments in the Text

On the **Review** tab, in the **Comments** group, click **Next** or **Previous**.

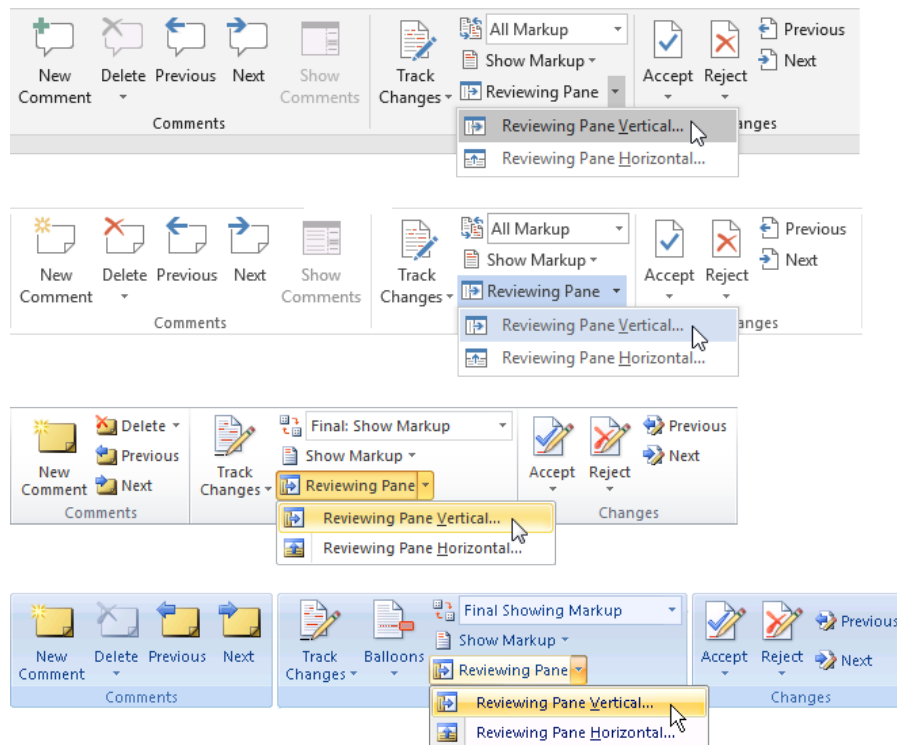

## View Markup in the Reviewing Pane

In the **Reviewing Pane**, you can see each markup in a categorized list and then click a markup to go to it in the document. You can also see who made each change.

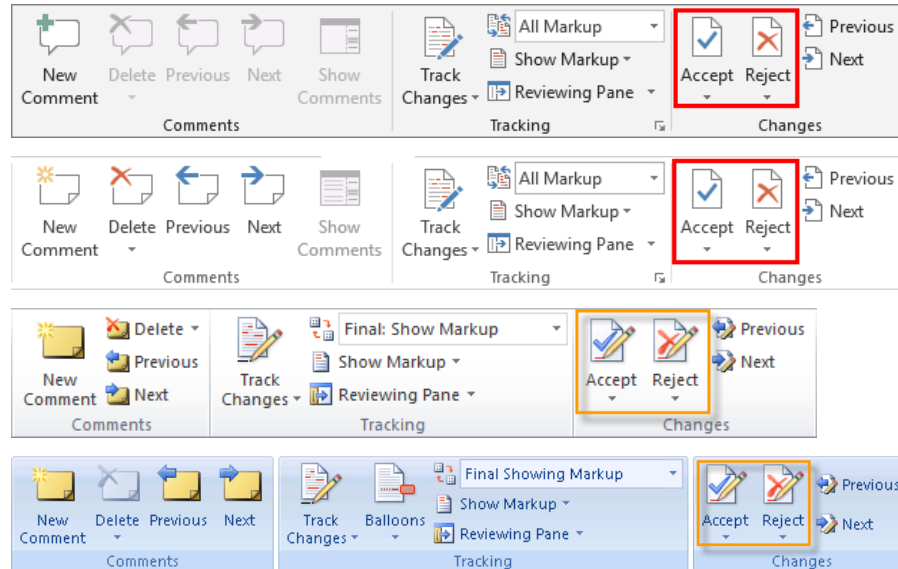

On the **Review** tab, in the **Tracking** group, click the arrow next to **Reviewing Pane**, and then click **Reviewing Pane Vertical** or **Reviewing Pane Horizontal**.

## Accept or Reject a Change

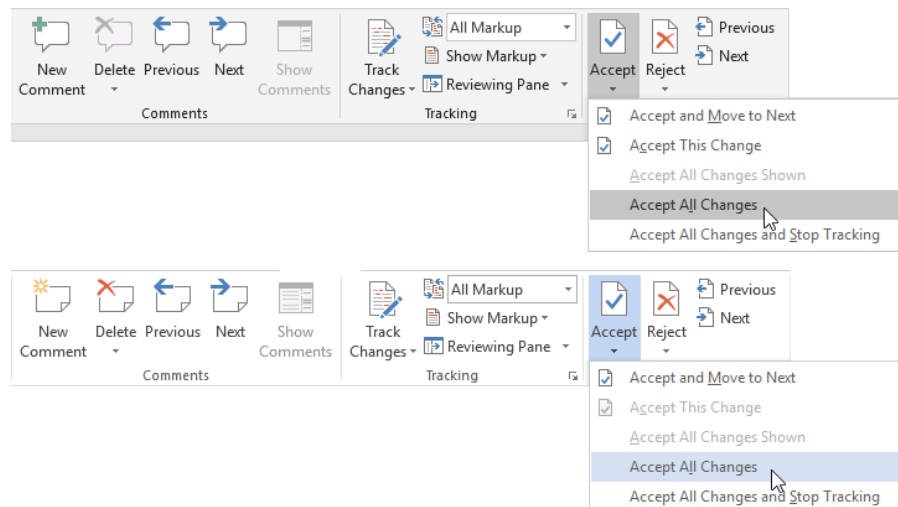

Accepting a change removes the markup and leaves the normal text. Rejecting a change deletes the marked-up text.

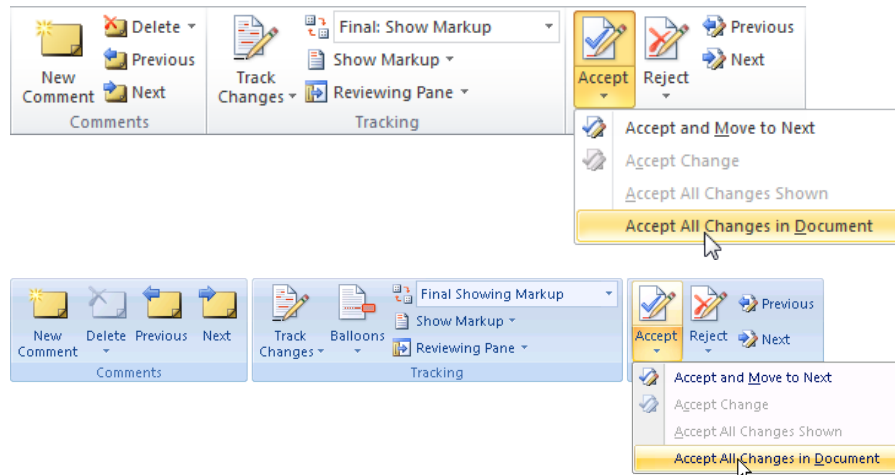

Either select the changed text or place the cursor anywhere within or immediately before it. Then, on the **Review** tab, in the **Changes** group, click **Accept** or **Reject**.

## Accept or Reject All Changes at Once

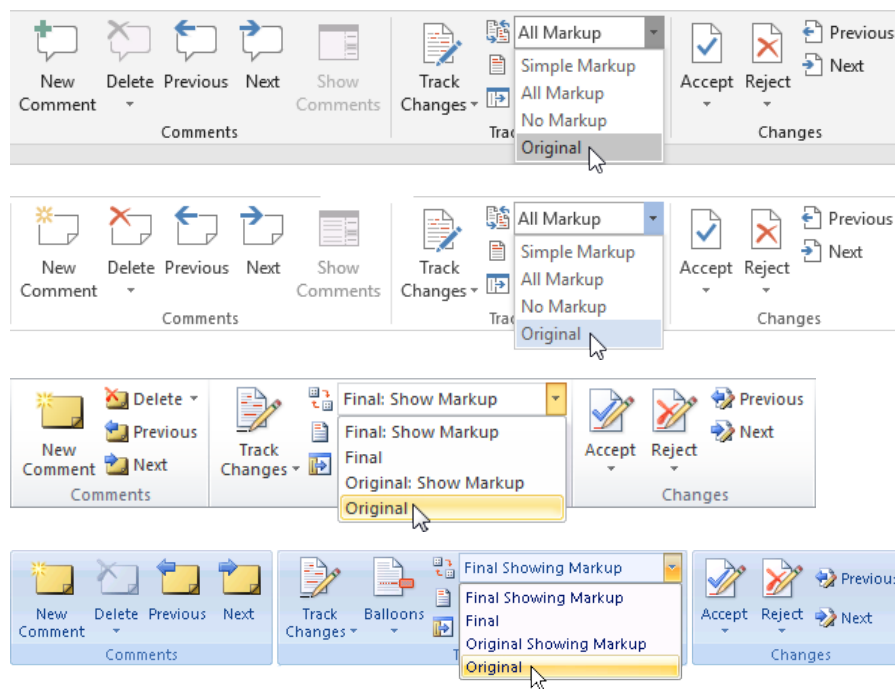

On the **Review** tab, in the **Changes** group, click the arrow below **Accept** or **Reject**, and then click **Accept All Changes in Document** or **Reject All Changes in Document**.

### View the Original Document before Changes

On the **Review** tab, in the **Tracking** group, click the arrow next to **Final: Show Markup**, and then click **Original**.

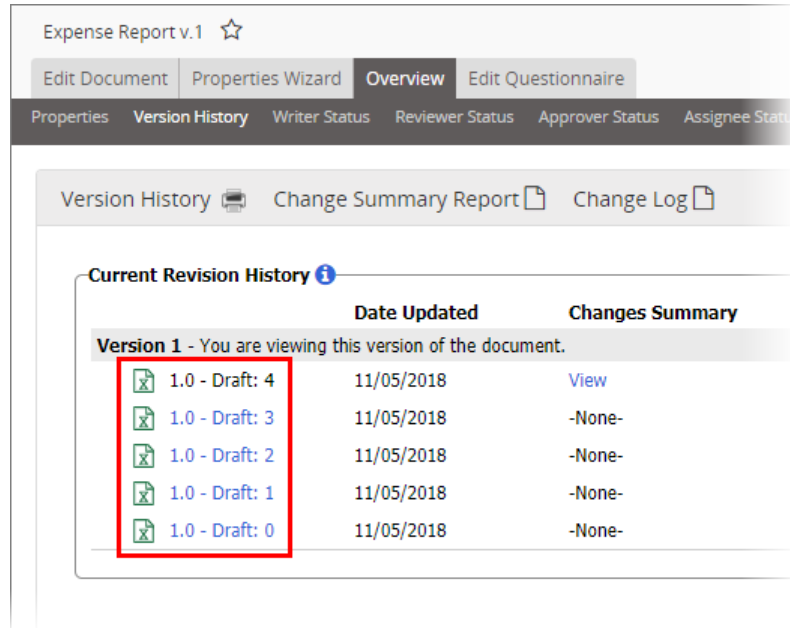

### Comparing Draft Versions in an Excel or PowerPoint Document

Because the **Track Changes** feature in Excel® and PowerPoint® is not activated (it doesn't work in the same way as **Track Changes** in Word), you will need to compare draft versions in order to find changes made by a reviewer or approver.

To find and compare the different versions of a revised or declined Excel document,

1. Open the document, click the **Overview** tab, and then click **Version History**.

The draft versions of the document, such as the original draft you submitted to review or approval, are listed in the **Current Revision History** area. The version listed on top is the one you'd see if you clicked **Edit Document**. The others are previous draft versions.

Expense Report v.1 ☆

Edit Document Properties Wizard **Overview** Edit Questionnaire

Version History Change Summary Report Change Log

**Current Revision History** ⓘ

	Date Updated	Changes Summary
<b>Version 1</b> - You are viewing this version of the document.		
1.0 - Draft: 4	11/05/2018	<a href="#">View</a>
1.0 - Draft: 3	11/05/2018	-None-
1.0 - Draft: 2	11/05/2018	-None-
1.0 - Draft: 1	11/05/2018	-None-
1.0 - Draft: 0	11/05/2018	-None-

2. To compare the current draft version with another one, click the other draft version link. This either opens that version in a separate browser window or prompts you to download and open it.
3. In the current draft version (the one you opened in step 1 above), click the **Edit Document** tab.
4. Compare the two drafts.

## Changing or Reapplying a Template

If you are a document owner, questionnaire owner, campaign owner, proxy author to an owner, or administrator, you can change or reapply a content item's template assignment while the document/questionnaire is in Draft status. For documents, you select which of the following template parts you want changed or reapplied:

- Properties
- Document contents (body)
- Headers
- Footers

For questionnaires and campaigns, only the properties are replaced. (Questionnaire and campaign templates cannot include predefined content.)

**Note:** An administrator can change or reapply a template's properties to content items in pending or published status or to multiple content items at once using **Bulk Editor**.

1. Open a document, questionnaire, or campaign (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click the **Properties Wizard** tab.
3. Do one of the following:
  - Select a different template.

- To reapply the currently selected template (such as after that template has been modified), click **Reapply**.

The screenshot shows the 'Properties Wizard' for a document titled 'Travel Policy v.1'. The 'Template' dropdown is set to 'Policy', and the 'Reapply' button is highlighted with a red box. Other fields include 'Document Owner' (Hansen, Tom), 'Version Number' (1), and 'Reference # 335'.

#### 4. Do one of the following:

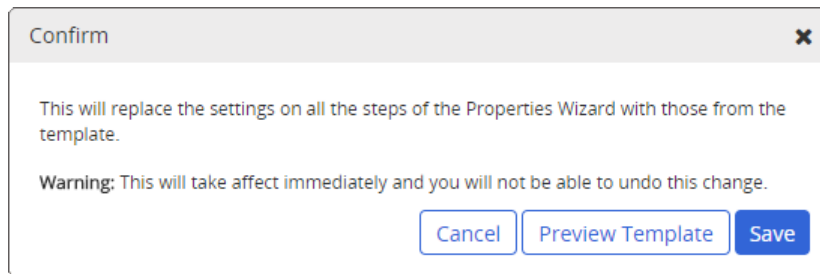

- If this is a document, select the part or parts of the document you want updated.

#### Important:

- Selecting **Document** will replace all of the current document contents with the document contents from the template. Be sure this is what you really want to do before clicking **Save** as this procedure cannot be undone.
- If you selected a different template in step 3 above and then select only the **Document** option in this step, the **Document Template** setting is not changed to the new selection. Only the document's contents are replaced, and the **Document Template** setting is reverted to the original.

The screenshot shows a 'Confirm' dialog box with the title 'Please specify what you would like to copy from the template.' It contains four options: Document, Properties, Headers, and Footers, each with a checkbox and a description. A warning message is displayed at the bottom, and there are 'Cancel', 'Preview Template', and 'Save' buttons.

- If this is a questionnaire, you can only replace the questionnaire's properties. Move on to the next step.

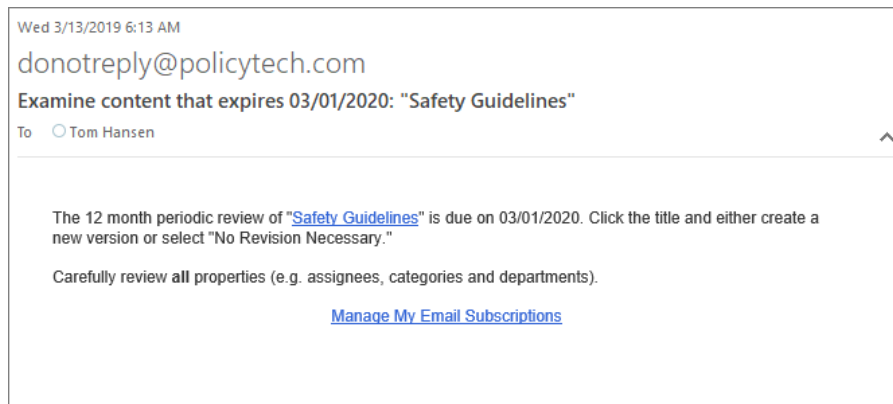

5. (Optional) To see a document template's contents or the properties of any type of template, click **Preview Template** to open the previewer in a separate window. In the previewer, if this is a document template, click **View Document** to see contents; click **Properties Wizard** to see settings and task assignments. When you're finished, close the preview window.
6. In the **Confirm** window, click **Save**, and then close the content item.

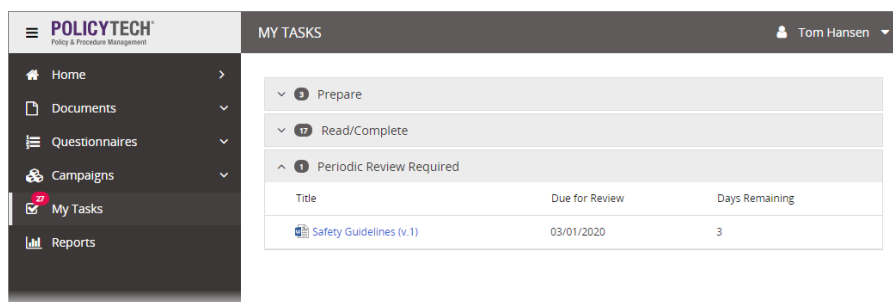

## Doing a Periodic Review and Creating a New Version

When you, as a document, questionnaire, or campaign owner, create a content item, you have the opportunity to indicate how often you want to be reminded to review that item to see if it needs updating (see [Review Date](#)). If you set a periodic review date, either relative to the approval date or from a specific date, you'll receive a task notification email and a task in **My Tasks** as the review due date approaches.

- To start a periodic review, do one of the following:
  - Open the task notification email, and then click the content item link.

- Click **My Tasks**, click **Periodic Review Required** to show those tasks, and then click the document/questionnaire title.

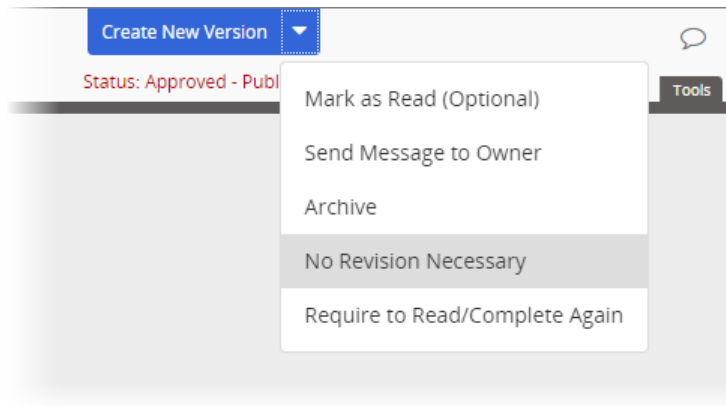

- Find and open the content item using the **Documents I Own** option for **My Relationship** when using **Search** or **Browse** (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
- Review the content item, and then take one of the following actions:
    - If the content item needs revision, click **Create New Version** to make a copy of the approved content item and place it in Draft status. Make

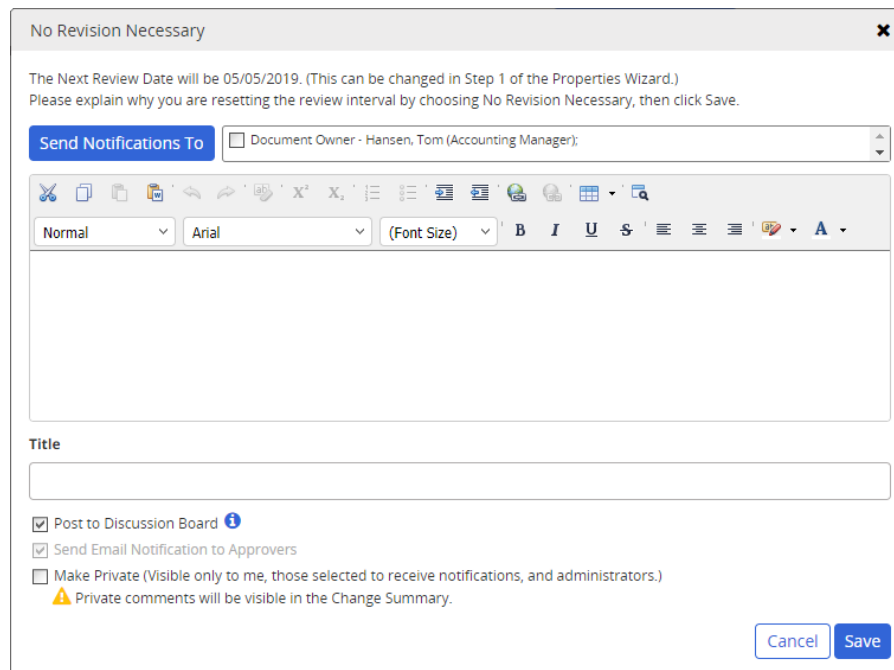

updates, and then move the new version through the review and approval process as you normally would. When the new version is approved, the previously approved version is automatically archived.

- If the document/questionnaire does not need to be revised, click , and then click **No Revision Necessary**.

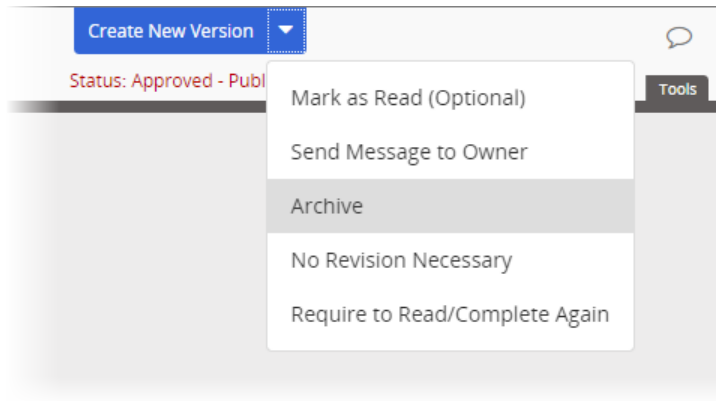

A discussion window appears for you to explain why you are resetting the review interval without making changes. Complete the discussion form (see [Working with Discussions](#) for details), click **Save**, and then click **OK**.

A screenshot of a dialog box titled "No Revision Necessary". The dialog box contains the following elements:

- A close button (X) in the top right corner.
- Text: "The Next Review Date will be 05/05/2019. (This can be changed in Step 1 of the Properties Wizard.) Please explain why you are resetting the review interval by choosing No Revision Necessary, then click Save."
- A "Send Notifications To" field with a dropdown menu showing "Document Owner - Hansen, Tom (Accounting Manager)".
- A rich text editor toolbar with various icons for text formatting (bold, italic, underline, strikethrough, list, link, unlink, insert, table, image, video, audio, font color, background color) and a search icon.
- A large empty text area for entering a message.
- A "Title" field with a text input box.
- Three checkboxes:
  - Post to Discussion Board 
  - Send Email Notification to Approvers
  - Make Private (Visible only to me, those selected to receive notifications, and administrators.)
- A warning icon and text: "Private comments will be visible in the Change Summary."
- "Cancel" and "Save" buttons at the bottom right.

- If the document/questionnaire is obsolete (needs no revision and will no longer be used), click , and then click **Archive**.

A discussion window appears for you to explain why you are archiving the document/questionnaire. Complete the discussion form (see [Working with Discussions](#) for details), click **Save**, and then click **OK**.

The screenshot shows a window titled 'Archive' with a close button (X) in the top right corner. The main text says 'Please explain why you are archiving this item.' Below this is a 'Send Notifications To' button and a dropdown menu showing 'Owner - Hansen, Tom (Accountant)'. There is a rich text editor with a toolbar containing icons for undo, redo, bold, italic, underline, strikethrough, bulleted list, numbered list, link, unlink, and insert image. Below the editor is a 'Title' field. At the bottom, there are two checkboxes: 'Post to Discussion Board' (checked) and 'Make Private (Visible only to me, those selected to receive notifications, and administrators.)' (unchecked). A warning icon and text state 'Private comments will be visible in the Change Summary.' At the bottom right, there are 'Cancel' and 'Save' buttons.

## Updating Document Links

When a document in PolicyTech is changed in any of the following ways and that document is linked from one or more other documents, the owners of those other documents containing the links are notified that the links need to be updated.

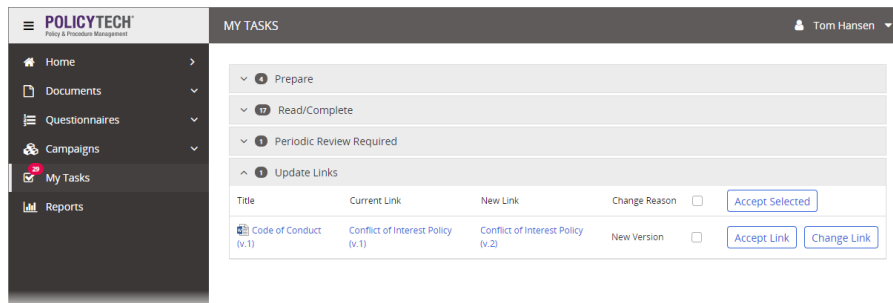

**Note:** Questionnaires and campaigns cannot contain tracked links to other PolicyTech content items in the way that documents can.

- A new version of the linked document is published.
- The linked document is automatically replaced by another document.
- The linked document is archived.

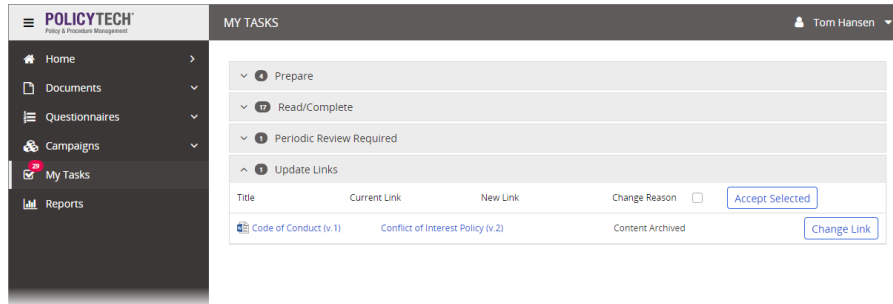

If you're a document owner with links that need updating, a notification is posted to **My Tasks** (see [Working with My Tasks](#)). It is also sent via your organization's email system (see [Working with Notification Emails](#)). If you haven't already used one of these notifications to update the links, you'll see a message informing you that you need to update links as soon as you open the document containing those links. The instructions below are for updating links from any of these notifications.

## Updating Links from My Tasks

1. Click **My Tasks**, and then click the **Links** heading to show those tasks. What you see in the **Links** section depends on what action was taken to cause the link to become outdated. If the linked document was replaced by a new version of that document or by a different document, you will see a task similar to the following with the **Accept Link** and **Change Link** options.

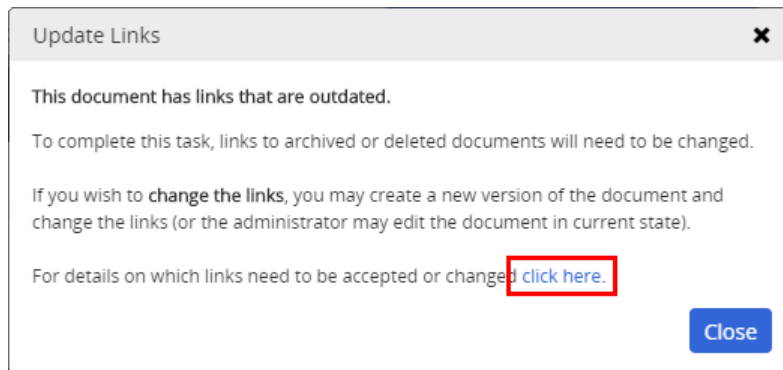

If the linked document was archived without being replaced, the task will look similar to the following.

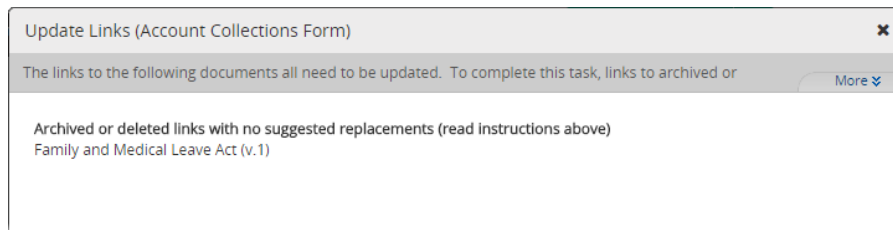

- PolicyTech automatically updates links to documents that were replaced by a new version or by a different document, but you are given the option of accepting the updated link (**Accept Link**) or manually changing the updated link to a different document (**Change Link**). If the linked document was archived without being replaced, your only option for completing the task is to manually take care of the now invalid link (**Change Link**).

In the **Action** column, take one of the following actions:

- Click **Accept Link**, and then click **Yes** to confirm.
- Click **Change Link** to open the document, and then, in the **Update Links** pop-up (which may take a few seconds to appear), click **click here**.

The title of the linked document that was archived is displayed.

Because the link could not be automatically updated, you must take care of the invalid link manually. The link could be in **Attachments** (see [Reviewing Attachments and Links](#)), included in the document content, or be in both of these locations.

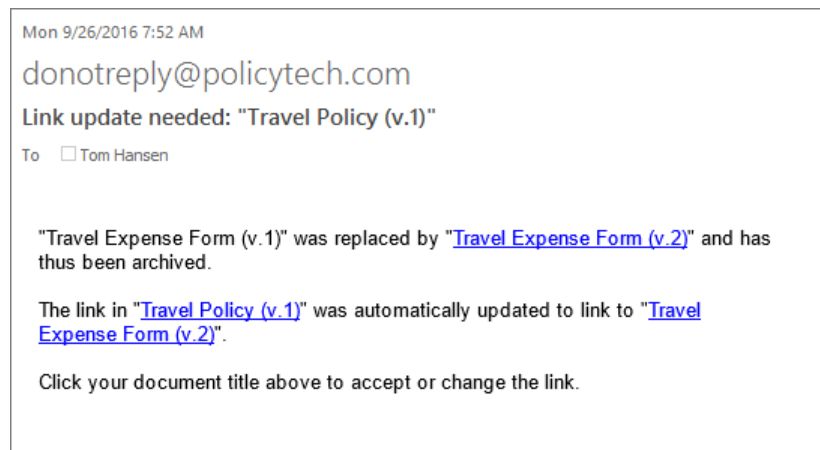

Close the **Update Links** window, and then do one of the following:

- If the document is currently in Draft or Collaboration status, find the link and either delete it or replace it with a different one (see [Inserting a Link to an Existing Document](#)).
- If the document is currently in Review or Approval status, to delete or replace the link you will need to revise the document (see [Editing Document Content](#)), send it back to draft (see [Sending a Document or Questionnaire Back to Draft](#)), or ask your administrator to edit the document in its current state.
- If the document is currently in Pending or Published status, to delete or replace the link you will need to either create a new version of the document (see [Doing a Periodic Review and Creating a New Version](#)) or ask your administrator to edit the document in its current state.

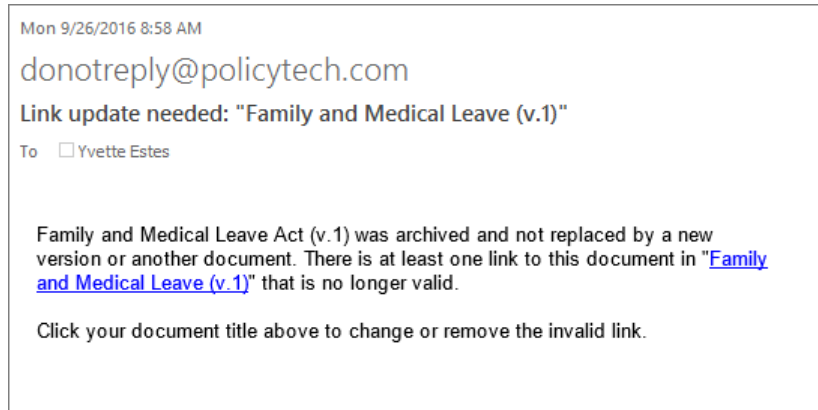

---

## Updating Links from a Notification Email

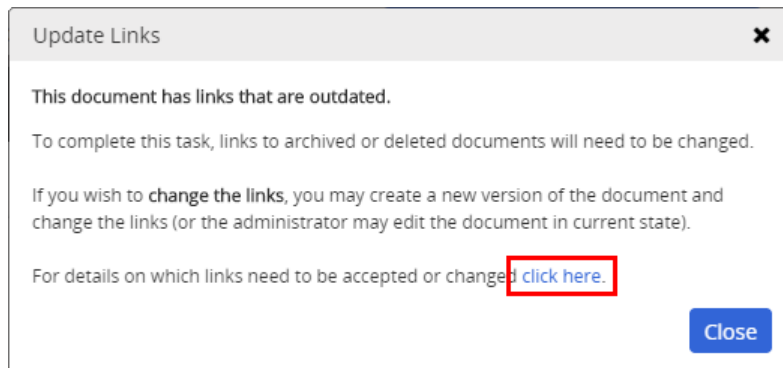

1. Open the notification email. What you see in the body of the email depends on what action was taken to cause the link to become outdated. If the linked document was replaced by a new version of that document or by a different document, you will see a notification similar to the following.

If the linked document was archived without being replaced, you will see a notification similar to the following.

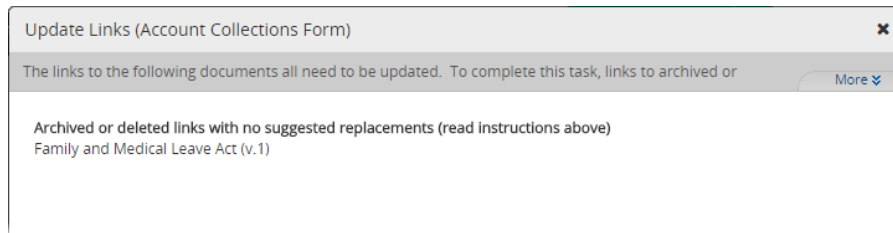

2. Click the title of the document containing the automatically updated or invalid link and log in to PolicyTech to open the document.
3. In the **Update Links** pop-up (which may take a few seconds to appear), click **click here**.

4. Do one of the following, depending on whether the linked document was replaced or not.
  - If the linked document was replaced by a new version or by a different document, you'll see a window similar to the one below. Click **Update Links** to accept the automatic link update, and then close the document.

- If the linked document was archived without being replaced, you'll see a window like the one below. Because the link could not automatically be updated, you must take care of the invalid link manually.

Because the link could not be automatically updated, you must take care of the invalid link manually. The link could be in **Attachments** (see [Reviewing Attachments and Links](#)), included in the document content, or be in both of these locations.

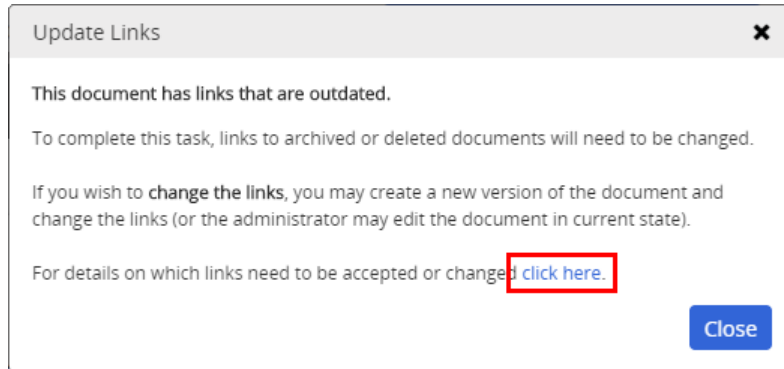

Close the **Update Links** window, and then do one of the following:

- If the document is currently in Draft or Collaboration status, find the link and either delete it or replace it with a different one (see [Inserting a Link to an Existing Document](#)).
- If the document is currently in Review or Approval status, to delete or replace the link you will need to revise the document (see [Editing Document Content](#)), send it back to draft (see [Sending a Document or Questionnaire Back to Draft](#)), or ask your administrator to edit the document in its current state.
- If the document is currently in Pending or Published status, to delete or replace the link you will need to either create a new version of the document (see [Doing a Periodic Review and Creating a New](#)

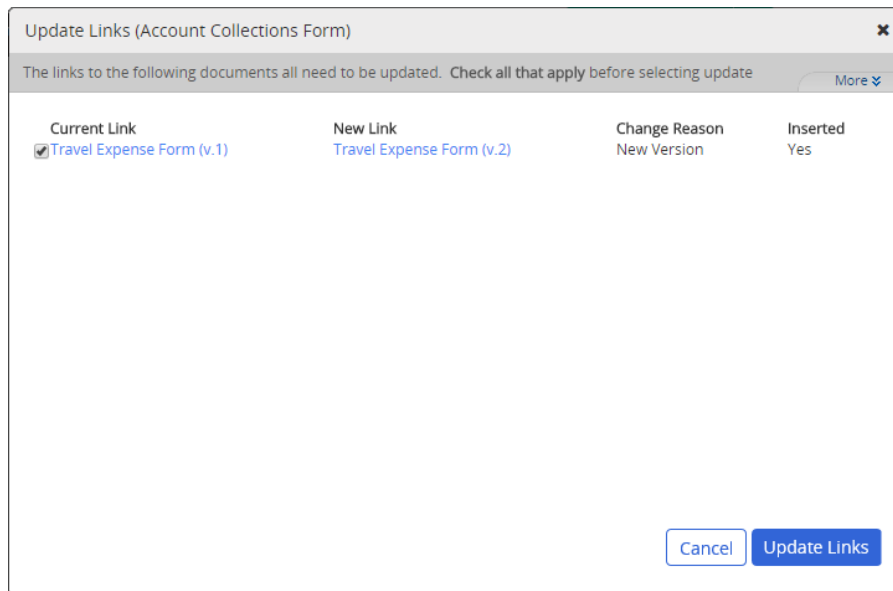

[Version](#)) or ask your administrator to edit the document in its current state.

## Updating Links Upon Opening a Document

1. If you open a document with a link that needs to be updated, the **Update Links** pop-up is displayed (it may take a few seconds to appear). Click **click here**.

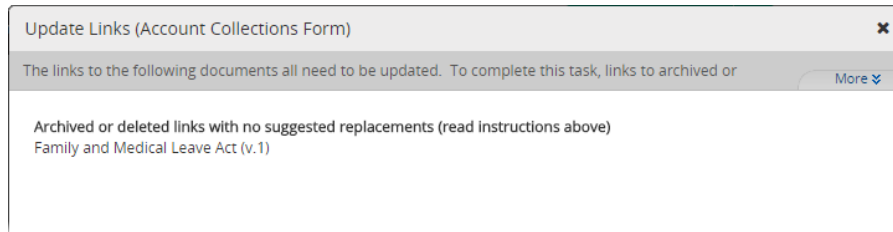

2. Do one of the following, depending on whether the linked document was replaced or not.
  - If the linked document was replaced by a new version or by a different document, you'll see a window similar to the one below. Click **Update Links** to accept the automatic link update, and then close the document.

- If the linked document was archived without being replaced, you'll see a window like the one below. Because the link could not automatically be updated, you must take care of the invalid link manually.

Because the link could not be automatically updated, you must take care of the invalid link manually. The link could be in **Attachments** (see [Reviewing Attachments and Links](#)), included in the document content, or be in both of these locations.

Close the **Update Links** window, and then do one of the following:

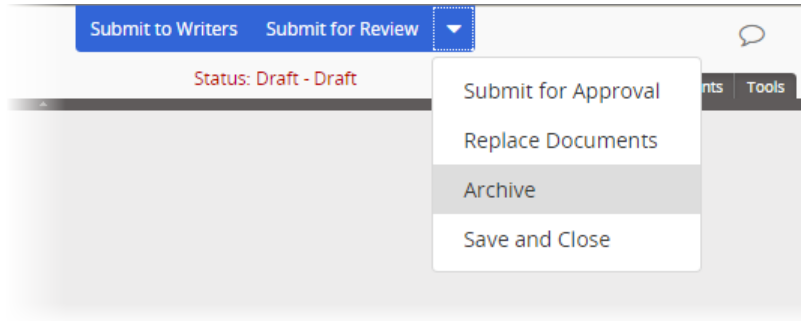

- If the document is currently in Draft or Collaboration status, find the link and either delete it or replace it with a different one (see [Inserting a Link to an Existing Document](#)).
- If the document is currently in Review or Approval status, to delete or replace the link you will need to revise the document (see [Editing Document Content](#)), send it back to draft (see [Sending a Document or Questionnaire Back to Draft](#)), or ask your administrator to edit the document in its current state.
- If the document is currently in Pending or Published status, to delete or replace the link you will need to either create a new version of the document (see [Doing a Periodic Review and Creating a New Version](#)) or ask your administrator to edit the document in its current state.

---

## Archiving a Content Item

**Important:** You can only archive a content item (document, questionnaire, or campaign) while it is in Draft, Collaboration, Pending, or Published/Started status. To archive a content item currently in Review or Approval, send it back to draft (see [Sending a Document or Questionnaire Back to Draft](#)), and then follow the instructions below to archive it.

1. Find and open the content item in one of the following statuses: Draft, Collaboration, Pending, Published/Started (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
2. Click , click **Archive**, and then click **Yes** to confirm.

**Note:** If you ever need to restore an archived content item, contact your administrator.

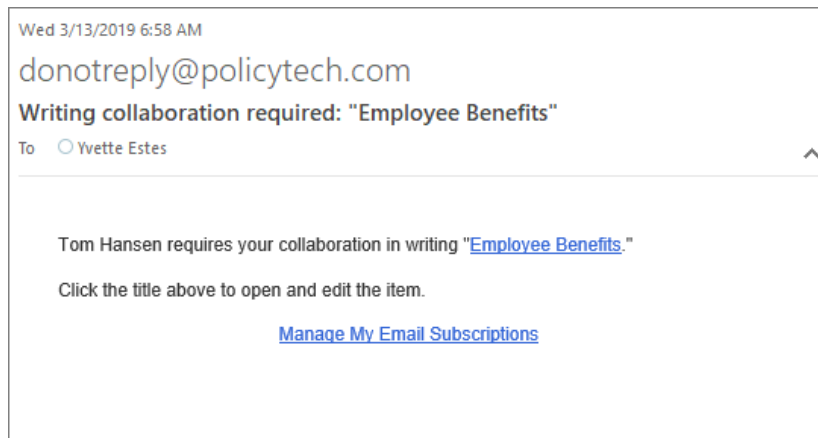

---

## Collaborating on (Helping to Write) Content (for assigned writers)

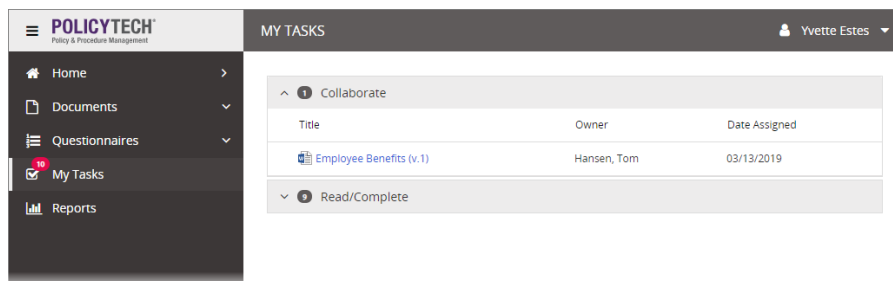

If you've been assigned the writer role, a document or questionnaire owner can assign you to help write a document or questionnaire. The owner may assign you to write all of the document/questionnaire or only parts of it. Or, the owner may just want you to edit the document/questionnaire to check for subject matter accuracy or grammatical correctness.

When an owner assigns you as a document's/questionnaire's writer and then submits it to you, you receive an email notification with the subject, "Writing collaboration required: "[document/questionnaire title]."" The task is also added to **My Tasks**.

1. Do one of the following to open a document or questionnaire you've been assigned to write:
  - Open the task notification email, and then click the link.

- Click **My Tasks**, click the **Collaborate** heading to show those tasks, and then click the title.

2. Write the document/questionnaire, or your portion of it. See the following topics for detailed instructions:

[Writing a Document](#)

[Adjusting Questionnaire Settings](#)

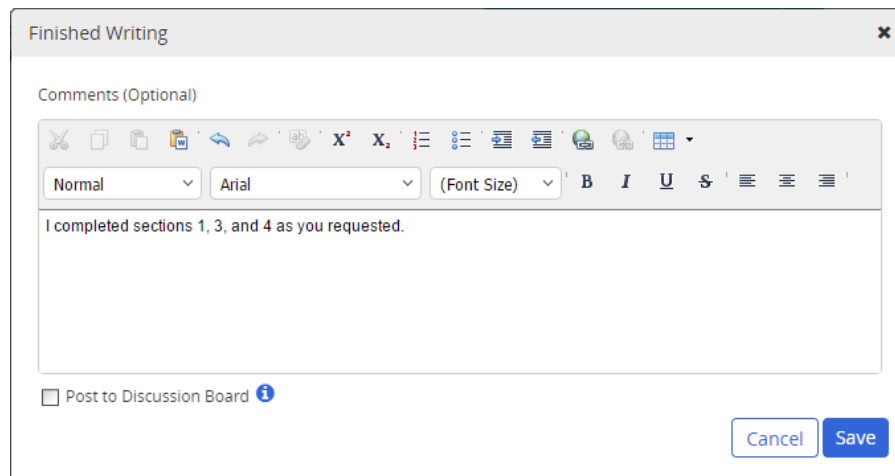

[Adding Questions and Answers to a Questionnaire](#)

3. When you're finished working on an assigned document/questionnaire, do one of the following:
  - If you're not finished writing and plan to come back to the document/questionnaire later, click **Save and Close**.
  - If you're finished with your writing assignment, click **Finished Writing**

(Optional) In the **Finished Writing** window, type comments for the document owner.

**Note:** To add what you wrote to this document's/questionnaire's discussion board where all assignees can see it, click **Post to Discussion Board** (see [Working with Discussions](#) for details).

Click **Save**, and then click **OK**.

---

## Reviewing and Approving a Document or Questionnaire

The instructions in the topics below apply only if you have been assigned as a reviewer or approver. If an owner assigns you as a reviewer or approver when creating a new document or questionnaire, you will be notified by e-mail and in **My Tasks** (see [Working with My Tasks](#)) when that document/questionnaire is submitted for review or approval.

[Reviewing a Document or Questionnaire](#)

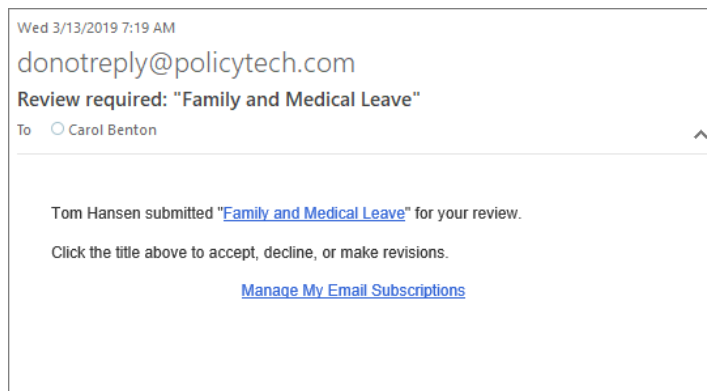

[Approving a Document or Questionnaire](#)

---

### Reviewing a Document or Questionnaire

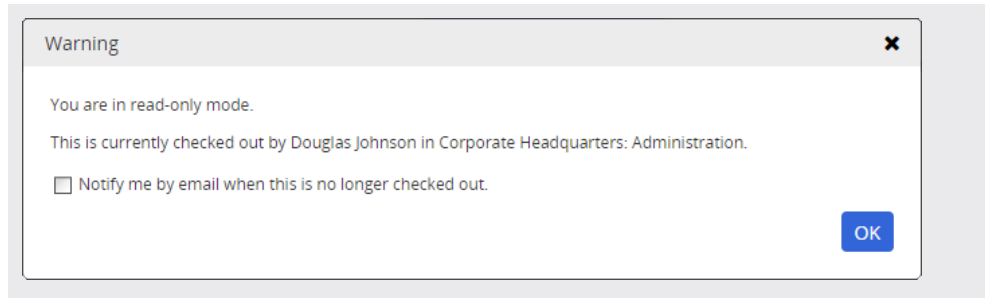

If you've been assigned the reviewer role, an owner can assign you to review a document or questionnaire. Then, when that document/questionnaire is submitted for review, you receive a task assignment notification in the form of an email (if you are set up to receive emails from PolicyTech), and a task is added to your **My Tasks** list.

1. To open a document or questionnaire you've been assigned to review, do one of the following:
  - Open the task notification email, and then click the link.

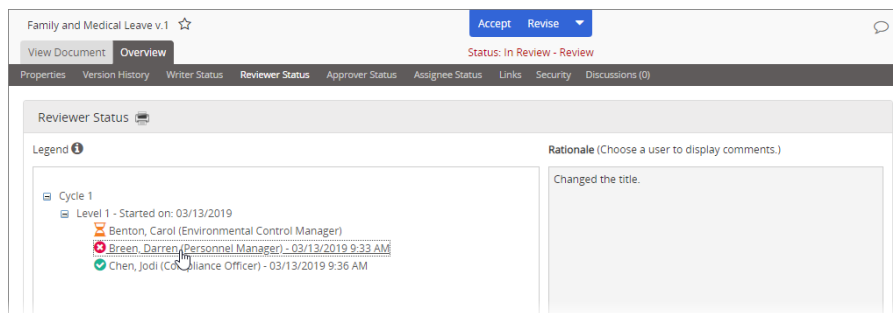

- Click **My Tasks**, click the **Review** heading to show those tasks, and then click the title.

3. Check for and review all supplementary materials (see [Reviewing Supplementary Materials](#) for details) and the attached questionnaire (for documents only), if there is one (see [Reviewing a Document Questionnaire](#) for details).
4. Read the document/questionnaire carefully and completely.
5. (Optional) To see if other assigned reviewers have revised or declined the document/questionnaire and their reasons for doing so, click the **Overview** tab, and then click **Reviewer Status** (see [Working with the Overview](#)). Click a reviewer's name to see any comments.

6. Accept, revise, or decline the document, or accept or decline the questionnaire. Go to a section listed below for further instructions.
  - [Accepting a Document or Questionnaire](#)
  - [Revising a Word, Excel, or PowerPoint Document](#)
  - [Revising an HTML Document](#)
  - [Revising an Uploaded Document](#)
  - [Declining a Document or Questionnaire](#)

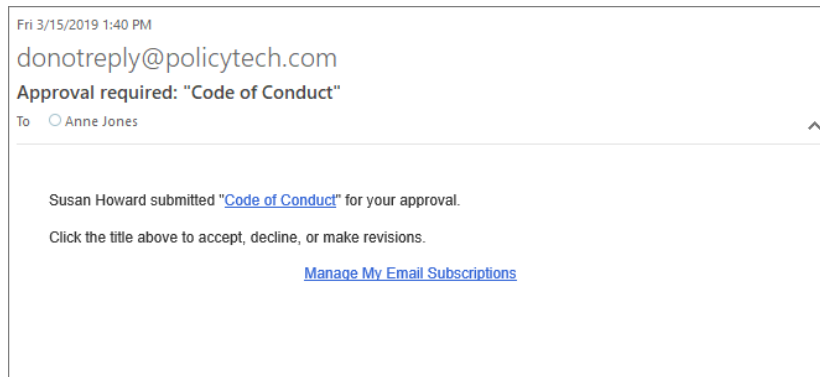

## Approving a Document or Questionnaire

If you have been assigned the approver role, an owner can assign you to approve a document or questionnaire. Then, when that document/questionnaire is submitted or approval, you receive a task

assignment notification in the form of an email (if you are set up to receive emails from PolicyTech), and a task is added to your **My Tasks** list.

**Note:** If, in addition to being assigned the approver role, you've been assigned the **Completes Approval Assignments in Bulk** role, you have the ability to complete multiple document approval tasks at once. See [Approving Multiple Documents at Once](#) for details.

- To open a document or questionnaire you've been assigned to approve, do one of the following:
  - Open the task notification email, and then click the link.

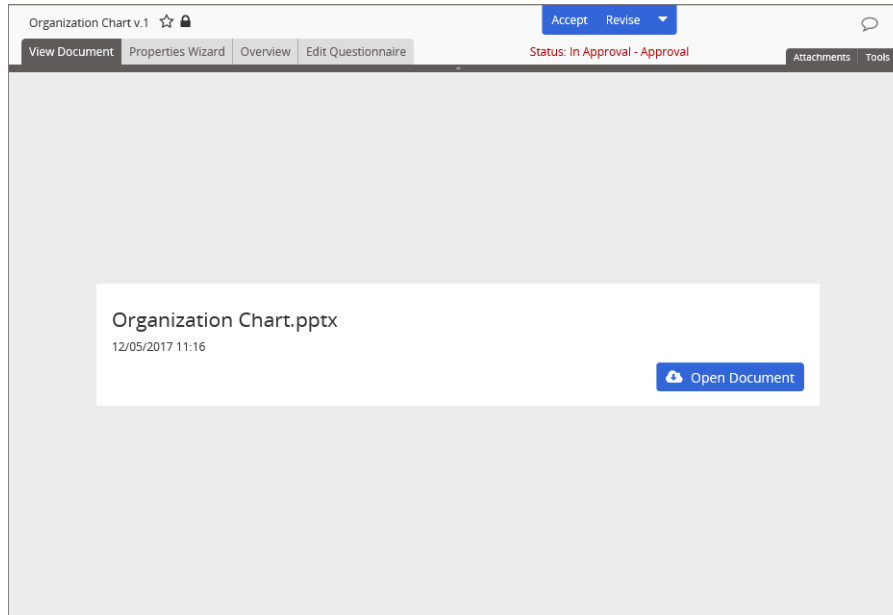

- Click **My Tasks**, click the **Approve** heading to show those tasks, and then click the title.

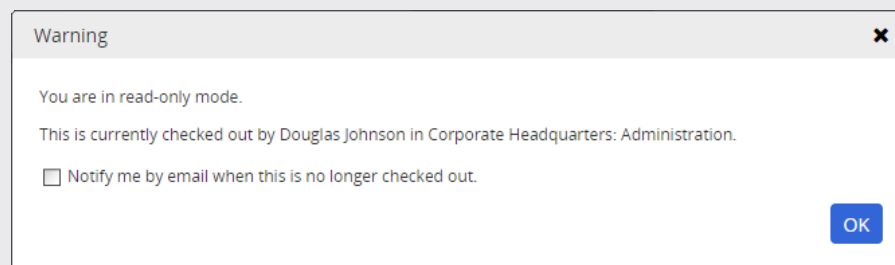

- Find and open the document/questionnaire using the **Content | Approve** option for **My Relationship** when using **Search** or **Browse** (see [Searching for a Content Item](#) or [Browsing for a Content Item](#)).
- (Conditional) If the assigned item is a document and, when you open it, you see a window like the one below, follow the instructions in [Downloading a Document to Open It](#), and then resume with the next step in these instructions.

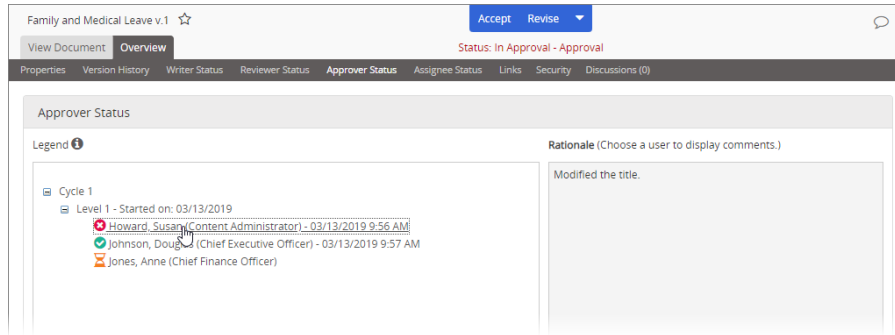

**Note:** If you see an alert like the one below, it means that another user (another approver or an administrator) is working on the document in edit mode. If, after reviewing the document, you need to revise it, you will not be able to do so until the other user finishes and closes the document. If you want to be notified when the document is available, select **Notify me by email when the document is no longer checked out**, and then click **OK** to clear the warning.

3. Check for and review all supplementary materials (see [Reviewing Supplementary Materials](#) for details) and the attached questionnaire (for documents only), if there is one (see [Reviewing a Document Questionnaire](#) for details).
4. Read the document/questionnaire carefully and completely.
5. (Optional) To see if other assigned approvers have revised or declined the document/questionnaire and their reasons for doing so, click the **Overview** tab, and then click **Approver Status** (see [Working with the Overview](#) for details). Click an approver's name to see any comments.

6. Accept, revise, or decline the document, or accept or decline the questionnaire. Go to a section listed below for further instructions.
  - [Accepting a Document or Questionnaire](#)
  - [Revising a Word, Excel, or PowerPoint Document](#)
  - [Revising an HTML Document](#)
  - [Revising an Uploaded Document](#)
  - [Declining a Document or Questionnaire](#)

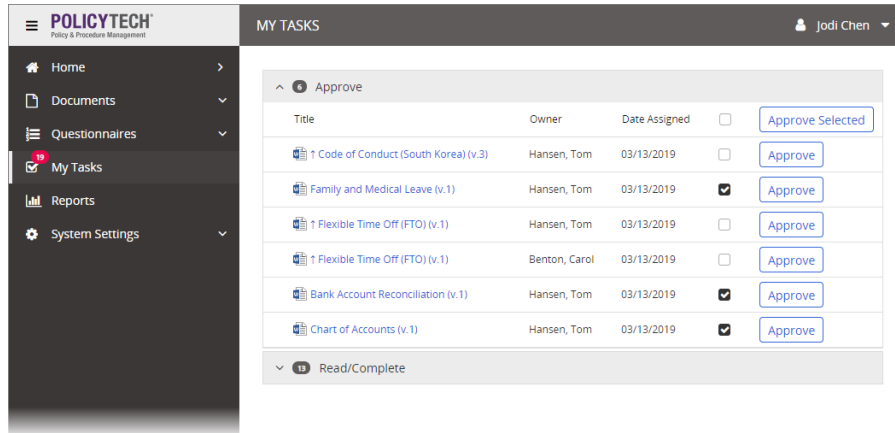

## Approving Multiple Documents at Once

The ability to approve multiple documents at once is available only to those assigned the **Completes Approval Assignments in Bulk** role.

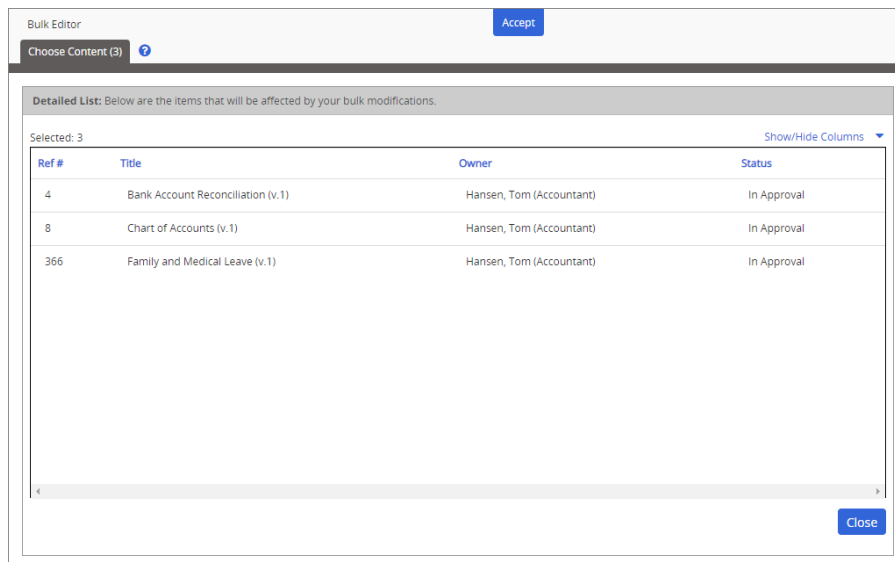

**Important:** This feature does not apply to stand-alone questionnaires, which must be approved individually.

1. Click **My Tasks**.
2. In the **Approve** area, select the documents you want to approve.

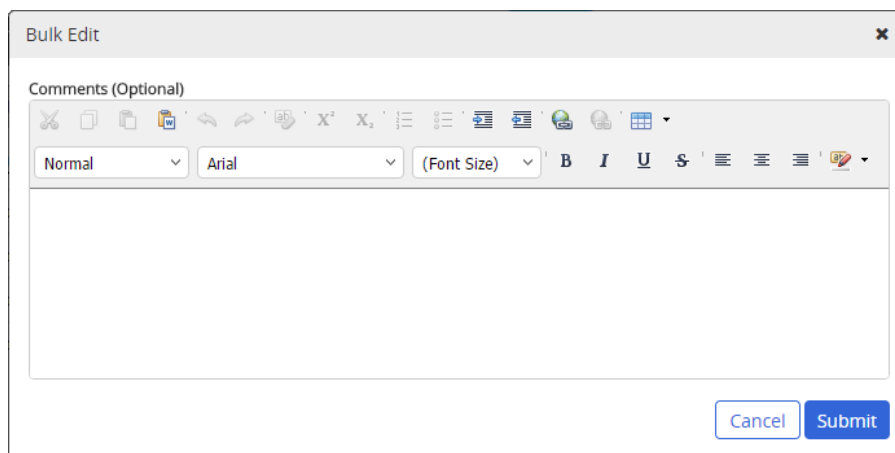

**Note:** If you don't see check boxes before document titles in the **Approve** area, then you haven't been assigned the **Completes Approval Assignments in Bulk** role.

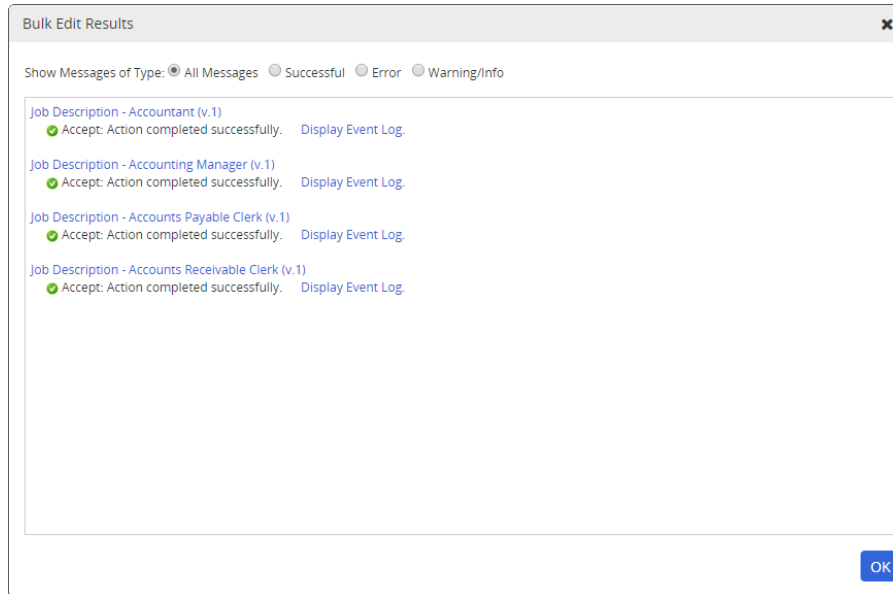

3. Click **Approve Selected**, and then click **Accept**.

4. (Optional) Type comments about your approval of the documents.

5. Click **Submit**, and then, in the **Bulk Edit Results** window, click **OK**.

## Reviewing a Document Questionnaire

A reviewer or approver can review a questionnaire that is attached to an assigned document.

### Important:

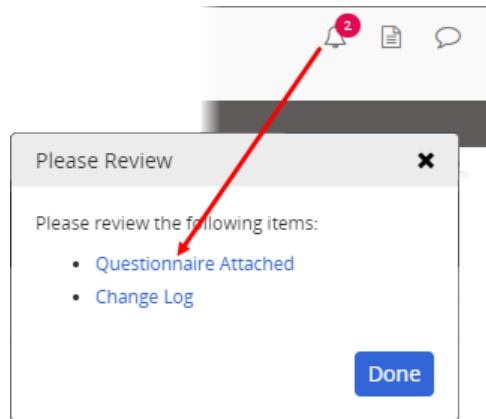

- These instructions apply to a questionnaire attached to a document. If you're working on a stand-alone questionnaire you've been assigned to approve, simply click **View Questionnaire** to view the stand-alone questionnaire's contents.
- The steps that follow assume that you have already reviewed the document contents.

1. Open a document that you are required to review or approve.
2. If a document includes a questionnaire, you'll see a **View Questionnaire** tab and the **Please Review** icon.

3. Do either of the following to display the questionnaire:

- Click the **View Questionnaire** tab.
- Click the **Please Review** icon, and then click **Questionnaire Attached**.

4. Review the sections, questions, and answers.
5. Click the **Questionnaire Settings** button at the bottom of the page and review the questionnaire settings.
6. If you find issues with the questionnaire that need to be corrected, do one of the following:
  - If you found no issues with the document content, decline the document (see [Declining a Document or Stand-Alone Questionnaire](#)) and itemize the issues you found with the questionnaire.
  - If you found issues with the document content, also itemize the questionnaire issues when you're done revising the document or when you decline it.

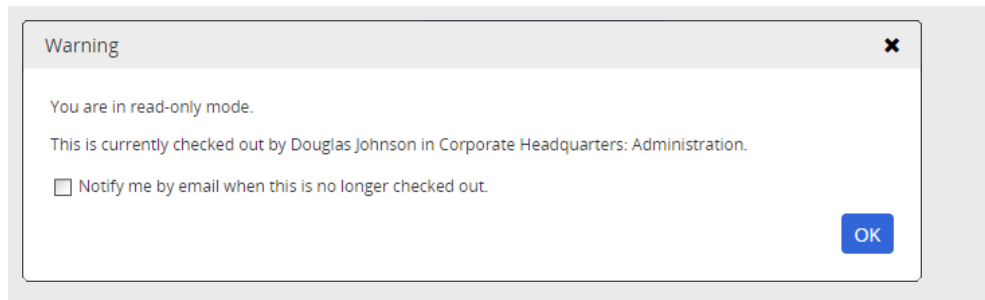

---

## Accepting a Document or Questionnaire

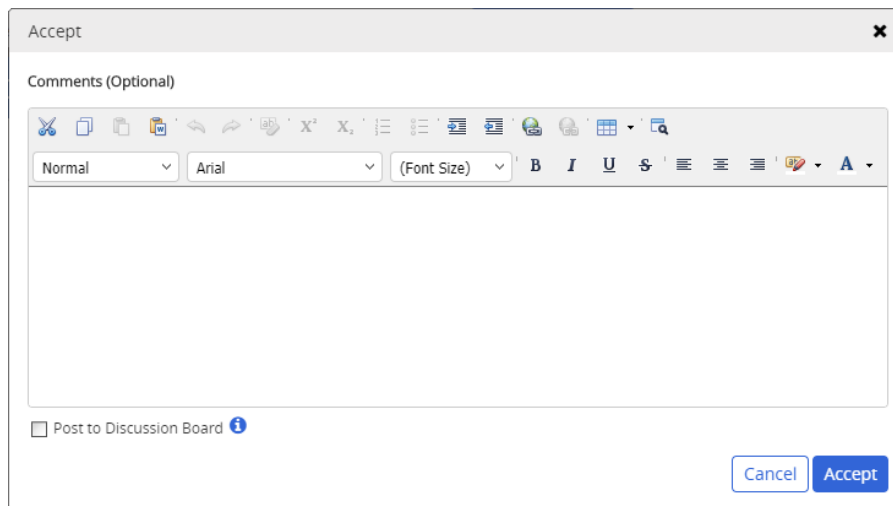

1. With a document or questionnaire open that you've been assigned to review or approve, click **Accept**.

**Note:** If you see an alert like the one below, it means that another user (another approver or an administrator) is working on the document. You will not be able to accept the document until the other user closes it. If you want to be notified when the document is available, select **Notify me by email when the document is no longer checked out**, and then click **OK** to clear the warning.

2. (Optional) Type comments about your review of the document/questionnaire.

3. (Optional) To add what you wrote to this document's/questionnaire's discussion board, click **Post to Discussion Board** (see [Working with Discussions](#) for details).
4. Do one of the following depending on what your **Accept** window looks like:
  - If your window looks like the screenshot under step 2 above, the click **Accept**, and then click **OK** twice.
  - If your window looks like the following, type your user name and password, click **Accept**, and then click **OK** twice.

## Revising a Word, Excel, or PowerPoint Document

**Important:** Revising a document sends it back to Draft status where the document owner must restart the review and approval process. You may want to consider starting a discussion thread first (see [Starting a Discussion](#)) to avoid unnecessary process delays.

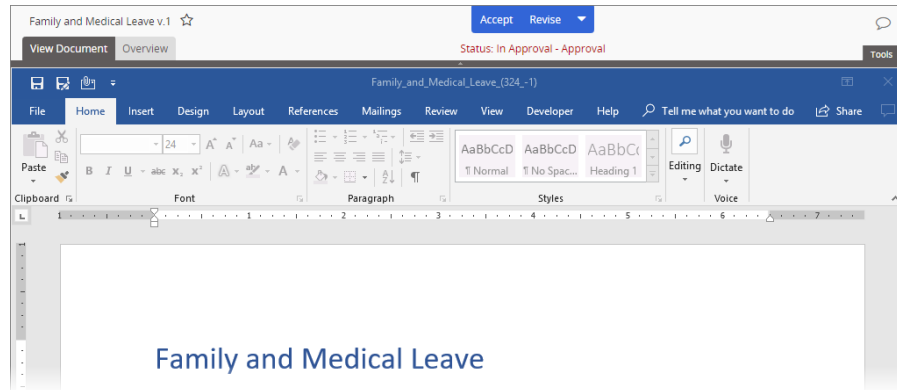

With a Word, Excel, or PowerPoint document open that you've been assigned to review or approve, do one of the following:

- If the document looks similar to the one below, continue with the instructions under [Revising a Word, Excel, or PowerPoint Document using Office Online Module](#) below.

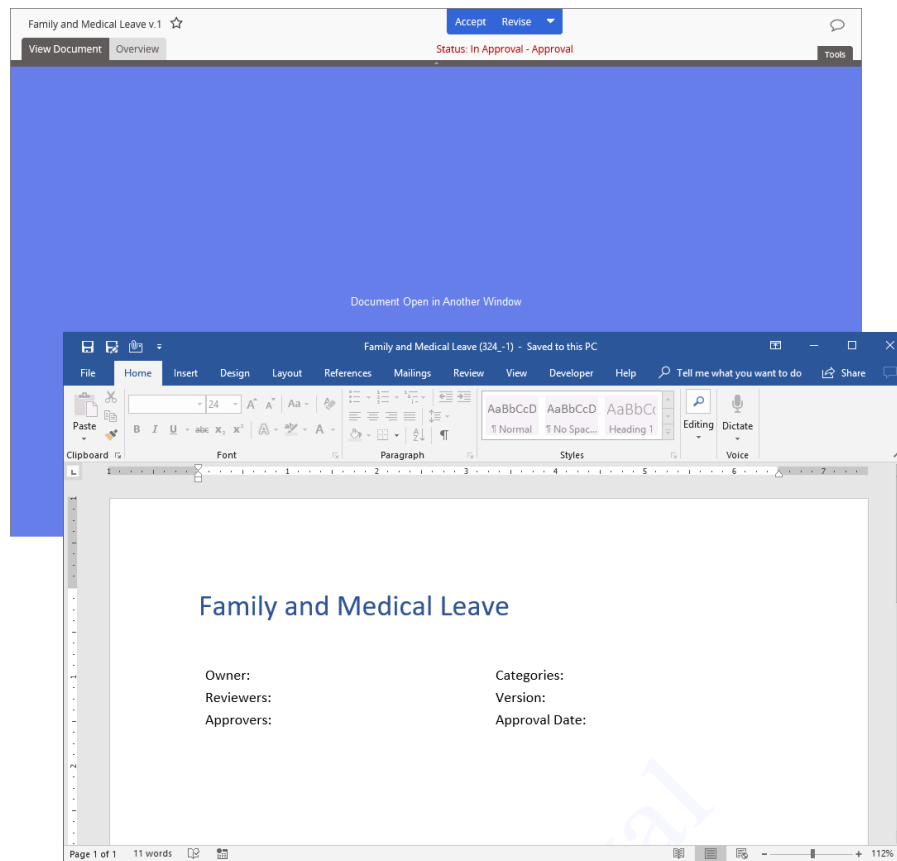

- If you opened a Word or Excel document and see something similar to one of the screenshots below, continue with the instructions under [Revising a Word, Excel, or PowerPoint Document using WordModulePlus](#) below.

**Document opens directly in View Document Tab**

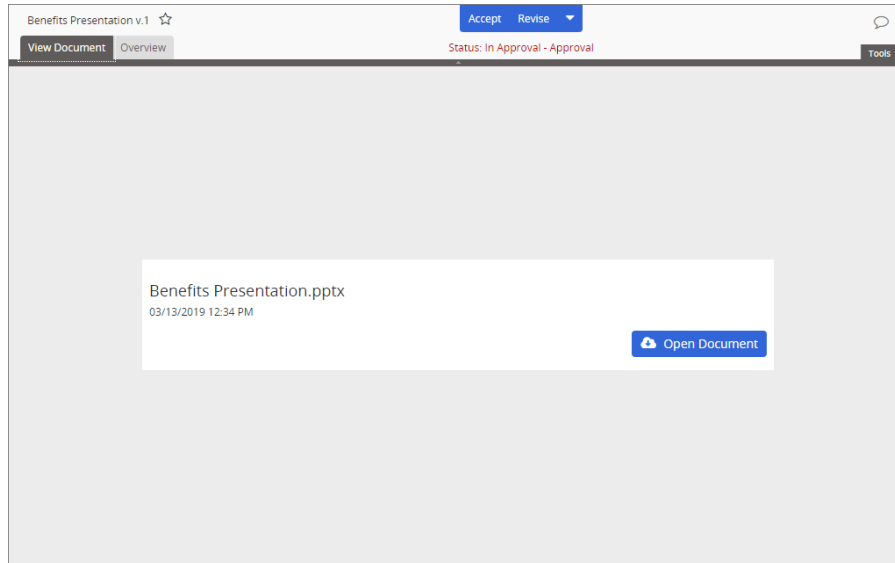

**Document opens in separate Office application window**

- If you opened a PowerPoint document and it looks similar to the one below, continue with the instructions under [Revising a Word, Excel, or PowerPoint Document using WordModulePlus](#) below.

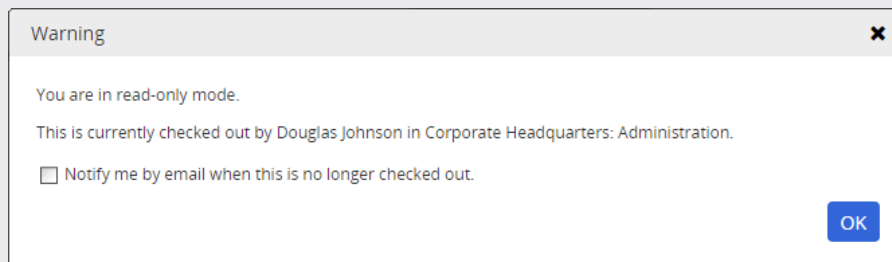

## Revising a Word, Excel, or PowerPoint Document using Office Online Module

1. With a Word, Excel, or PowerPoint document open that you've been assigned to review or approve, click **Revise**, and then click **Revise** again to confirm.

- **Note:** If you see an alert like the one below, it means that another user (another approver or an administrator) is working on the document. You will not be able to revise the document until the other user closes it. If you want to be notified when the document is available, select **Notify me by email when the document is no longer checked out**, and then click **OK** to clear the warning.

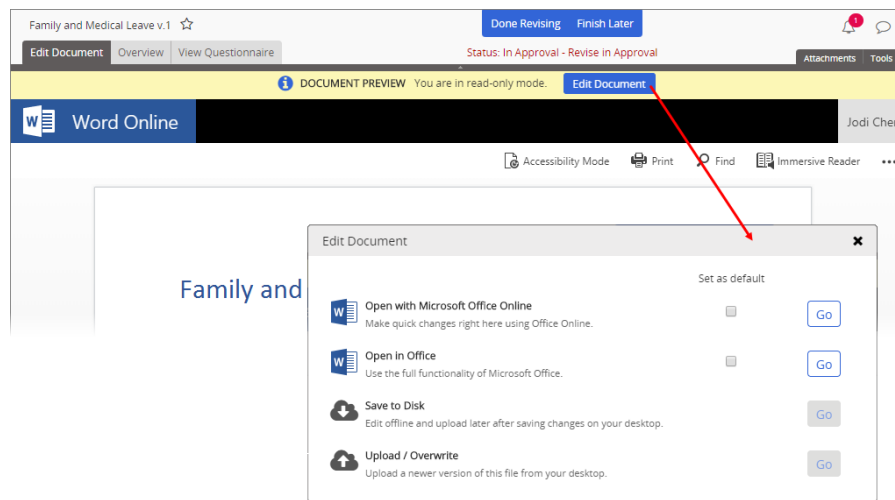

2. Click the **Edit Document** button in the **DOCUMENT PREVIEW** header, and then click **Go** for **Open with Microsoft Office Online** or **Open in**

## Office.

### Notes:

- If this is a Word document, we recommend clicking **Open in Office**, which opens the document in the desktop version (if available) of Word so you can see how Word marks up your revisions with the Track Changes feature. Plus, you will be able to see the marked up revisions other reviewers or approvers may have already made.
- If you previously set a default for how to open a document, you won't have to select a **Go** option. If your default option opened the document in Word Online and you want to switch to the desktop version so you can see tracked changes, click **Back to PolicyTech**, click  after **Edit Document (Default Mode)**, click **All Edit Options**, and then click **Go** for **Open in Office**.

### 3. Make your revisions.

**Important:** If you're revising a Word document, your changes are captured by Word's **Track Changes** feature, whether you can actually see the markup or not.

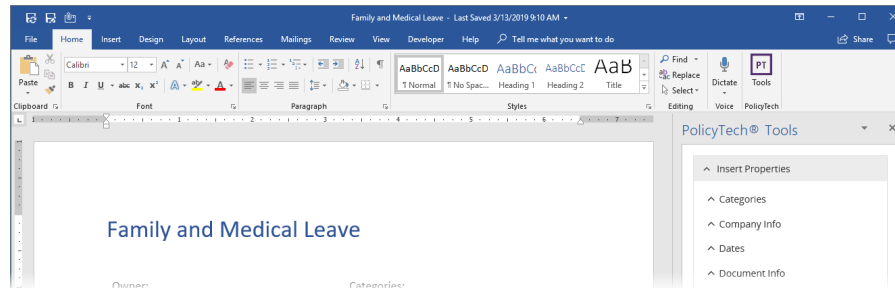

**Note:** If you're revising an Excel or PowerPoint document, consider adding comments to your changes so the document owner can quickly see your revisions without having to compare draft versions.

### 4. When you've completed your revisions, do one of the following:

- If you chose **Go** for **Open in Office** in step 2 above, you currently have both the PolicyTech document window (with **Connected to Microsoft Word**, **Connected to Microsoft Excel**, or **Connected to Microsoft PowerPoint** in the header) and the Word, Excel, or PowerPoint

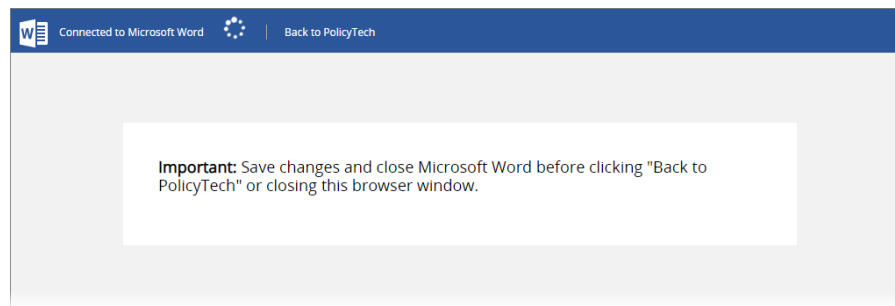

application window open. First, save the document and close the Word, Excel, or PowerPoint application.

**Save and close this window first**

Then, in the PolicyTech document window, click **Back to PolicyTech**, click **Continue**, and then click **OK** to clear the alert.

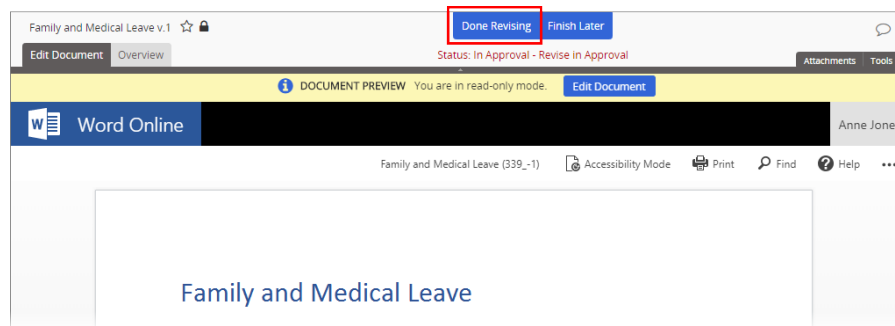

**Then click "Back to PolicyTech" in this window**

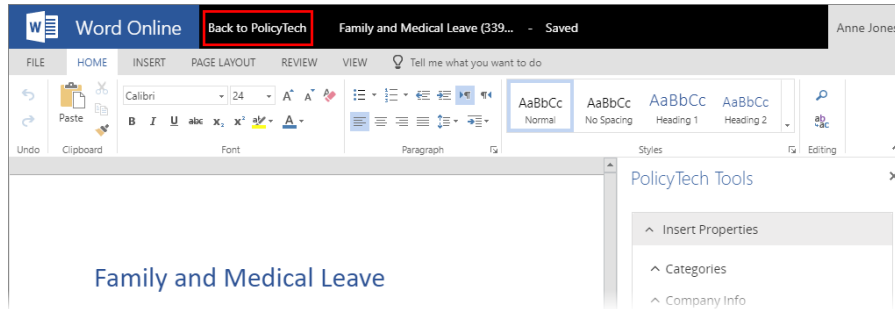

Finally, click **Done Revising** and move on to step 5.

**Note:** If you're not finished with revisions but need to close the document for now, click **Finish Later**.

**Finally, click "Done Revising"**

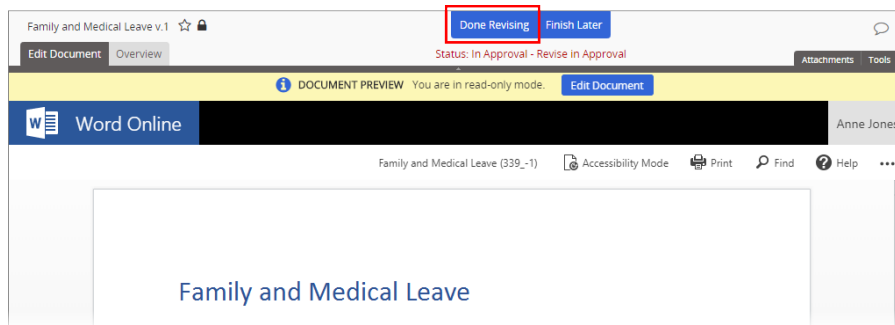

- If you chose **Go** for **Open with Microsoft Office Online** in step 2 above, click **Back to PolicyTech**.

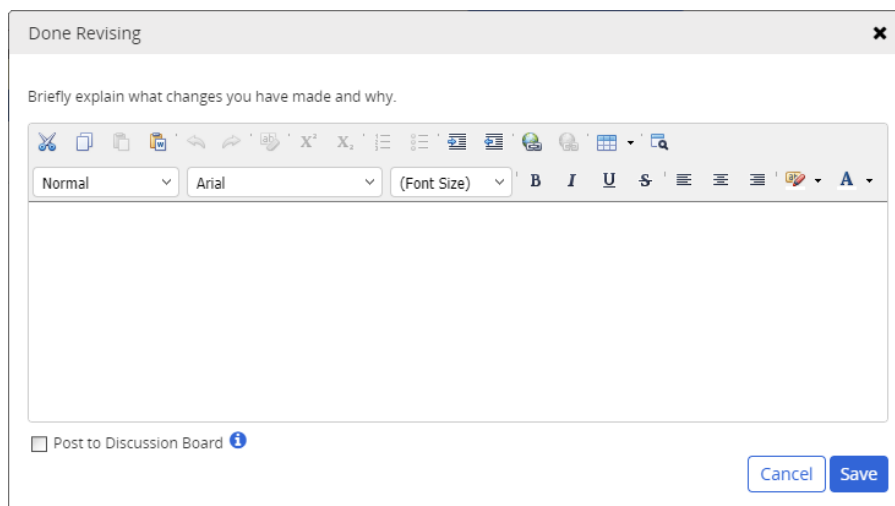

Then, click **Done Revising**.

**Note:** If you're not finished with revisions but need to close the document for now, click **Finish Later**.

5. Type a brief explanation or description of your revisions.

**Important:** You can't move on until you type an explanation.

6. (Optional) To add what you wrote to this document's discussion board, select **Post to Discussion Board** (see [Working with Discussions](#) for

details).

7. Click **Save**, and then click **OK**.

---

## Revising a Word, Excel, or PowerPoint Document using WordModulePlus

How you revise a Word or Excel document differs from how you revise a PowerPoint document. Go the instructions for the type of document you're working with:

[Word or Excel Document](#)

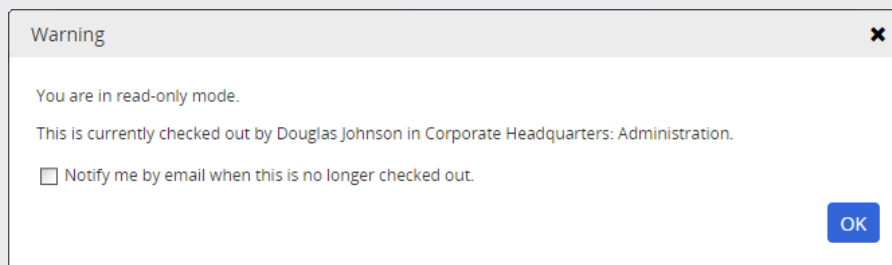

[PowerPoint Document](#)

### Word or Excel Document

1. With a Word or Excel document open that you've been assigned to review or approve, click **Revise**, and then click **Revise** again to confirm.

- **Note:** If you see an alert like the one below, it means that another user (another approver or an administrator) is working on the document. You will not be able to revise the document until the other user closes it. If you want to be notified when the document is available, select **Notify me by email when the document is no longer checked out**, and then click **OK** to clear the warning.

2. Make your revisions.

**Important:** If you're revising a Word document, your changes are captured by Word's **Track Changes** feature.

**Note:** If you're revising an Excel document, consider adding comments to your changes so the owner can quickly see your revisions without having to compare draft versions.

- When you've completed your revisions, click **Done Revising** and provide a brief explanation of your revisions.

**Important:** You can't move on until you type an explanation.

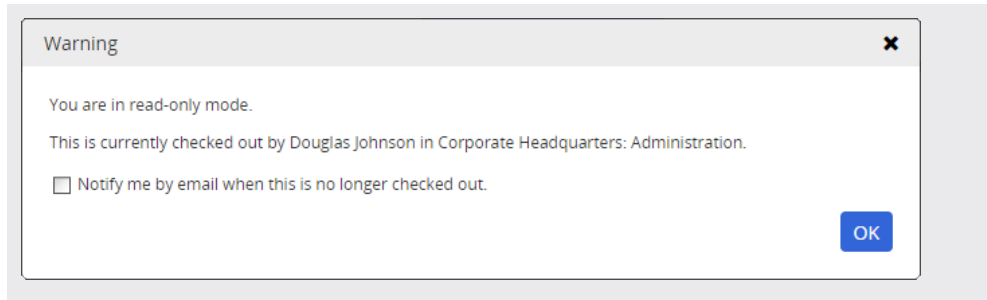

- (Optional) To add what you wrote to this document's discussion board, select **Post to Discussion Board** (see [Working with Discussions](#) for details).
- Click **Save**, and then click **OK**.

## PowerPoint Document

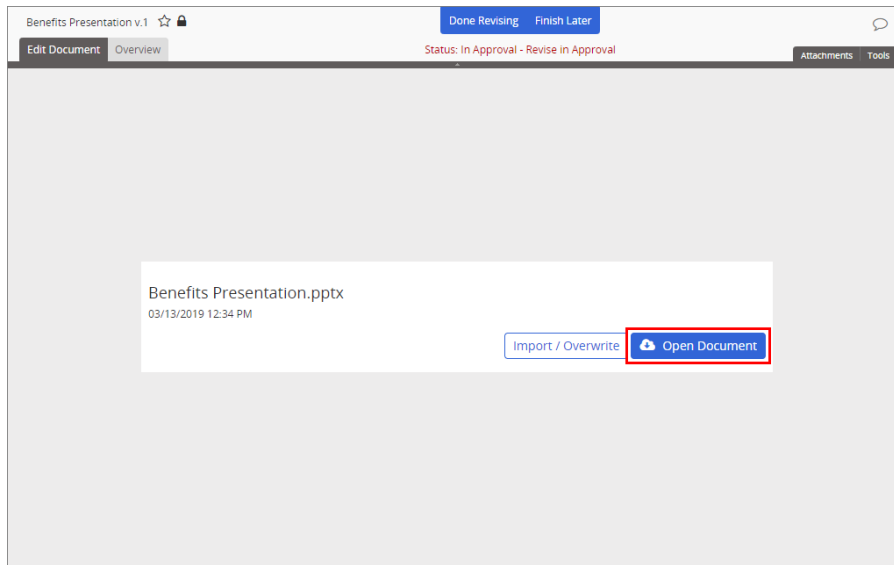

- With a PowerPoint document open that you've been assigned to review or approve, click **Revise**, and then click **Revise** again to confirm.

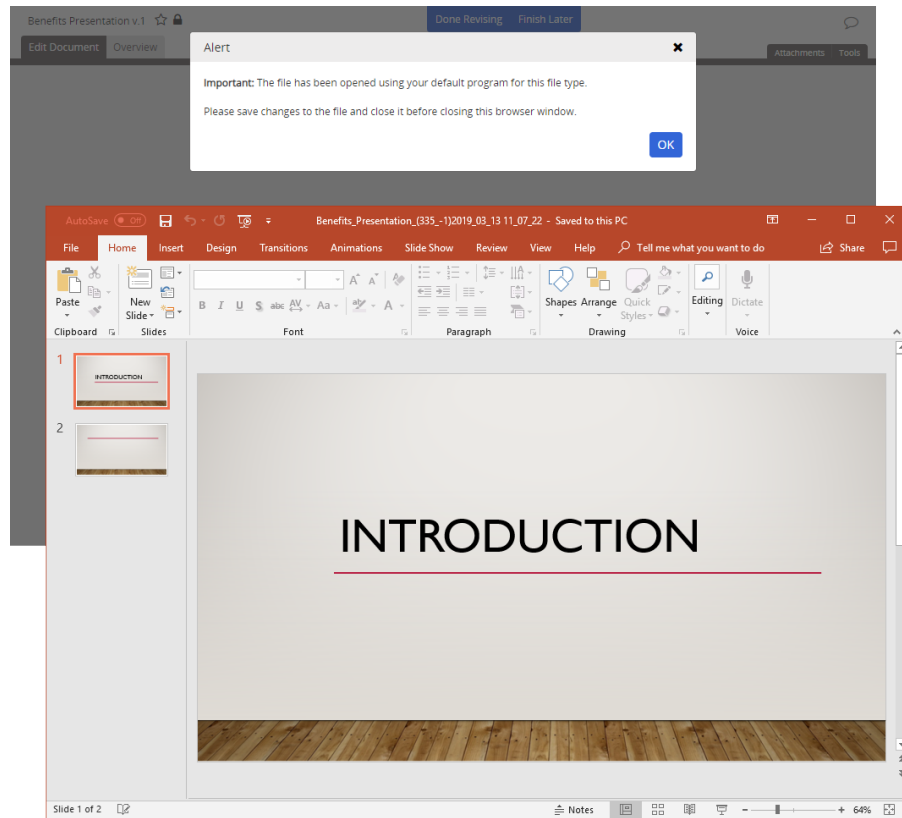

- Note:** If you see an alert like the one below, it means that another user (another approver or an administrator) is working on the document. You will not be able to revise the document until the other user closes it. If you want to be notified when the document is available, select **Notify me by email when the document is no longer checked out**, and then click **OK** to clear the warning.

**2. Click Open Document.**

The document opens in the PowerPoint application in a separate window.

3. Make your revisions.

**Note:** Consider adding comments to your changes so the owner can quickly see your revisions without having to compare draft versions.

4. When you've completed your revisions, save and close the PowerPoint application window.
5. Back in the PolicyTech document window, click **OK** to clear the alert (if you haven't already cleared it), click **Done Revising**, and then provide a brief explanation of your revisions.

**Important:** You can't move on until you type an explanation.

6. (Optional) To add what you wrote to this document's discussion board, select **Post to Discussion Board** (see [Working with Discussions](#) for details).
7. Click **Save**, and then click **OK**.

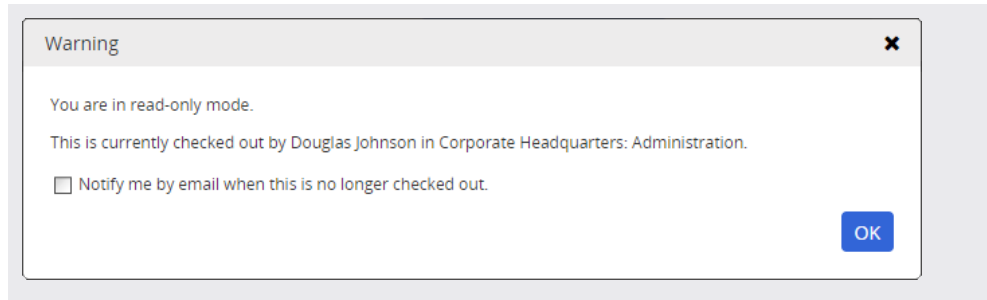

## Revising an Uploaded Document

**Important:** Revising a document sends it back to Draft status where the document owner must restart the review and approval process. You may want to consider starting a discussion thread first (see [Starting a Discussion](#)) to avoid unnecessary process delays.

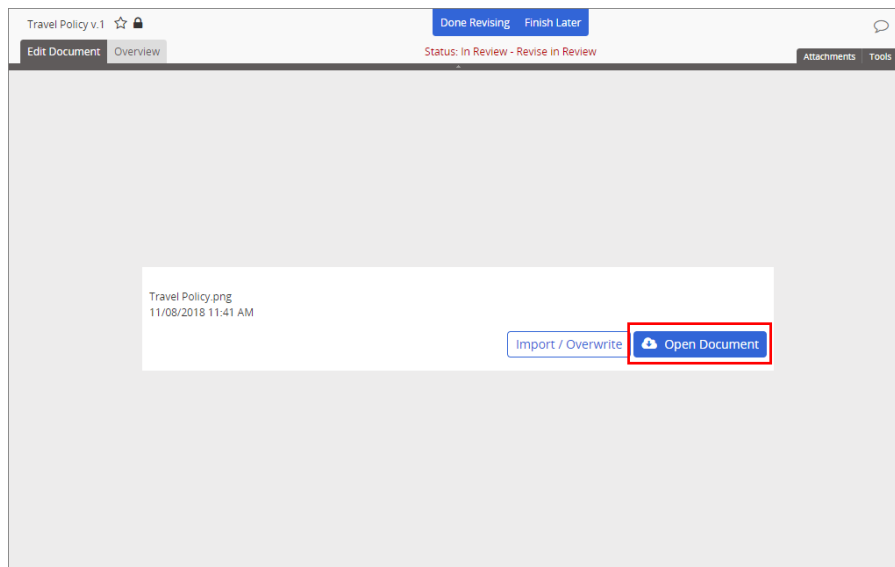

1. With the document open that you've been assigned to review or approve, click **Revise**, and then click **Revise** again to confirm.

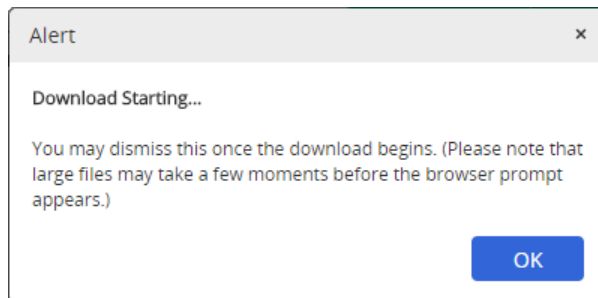

**Note:** If you see an alert like the one below, it means that another user (another approver or an administrator) is working on the document. You will not be able to revise the document until the other user closes it. If you want to be notified when the document is available, select **Notify me by email when the document is no longer checked out**, and then click **OK** to clear the warning.

2. Click **Open Document**.

3. An alert appears to let you know the document is being downloaded. Click **OK**.

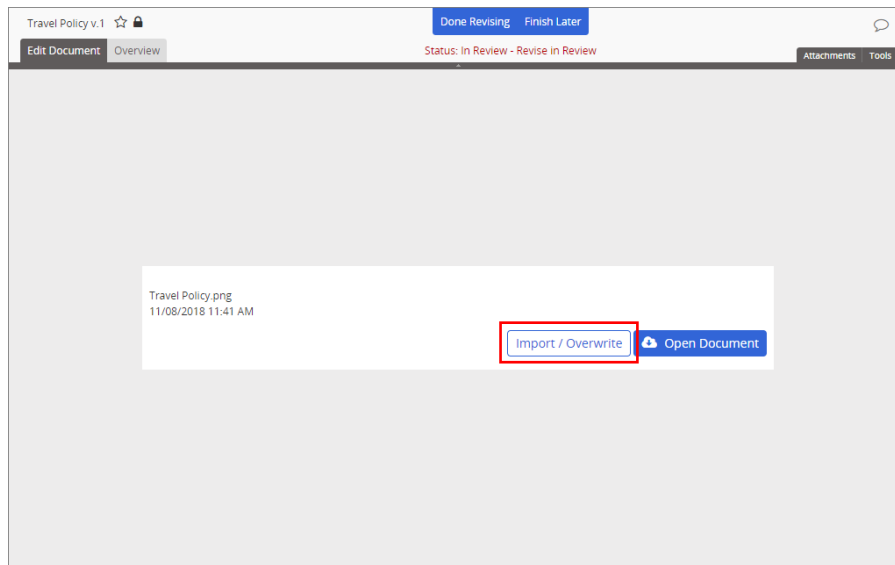

3. What you see next depends on the browser you're using.
- **Internet Explorer:** You are prompted to open or save the downloaded file. Click **Open**.

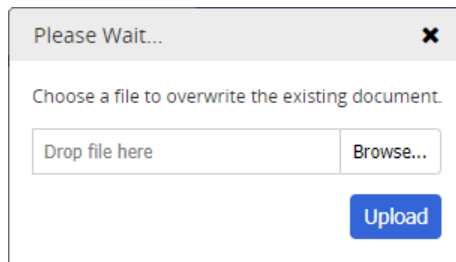

- **Chrome:** The file is automatically downloaded and shown in a footer. Click the file to open it.

4. The file opens in whichever program is associated with that file type in your Windows settings. Make your revisions, and then save the file to disk.
5. Back in the PolicyTech document window, click **Import / Overwrite**.

6. Click **Browse**, find and click the file you want to upload, click **Open**, and then click **Upload**. (Alternatively, you can open Windows Explorer, find the file you want to import, click and drag the file onto the **Drop file here** box, and then click **Upload**.)

8. Click **Done Revising**.

- (Optional) Type an explanation of the changes you made.

- (Optional) To add what you wrote to this document's discussion board, select **Post to Discussion Board** (see [Working with Discussions](#) for details).
- Click **Save**, and then click **OK**.

## Revising an HTML Document

**Important:** Revising a document sends it back to Draft status where the document owner must restart the review and approval process. You may want to consider starting a discussion thread first (see [Starting a Discussion](#)) to avoid unnecessary process delays.

- With an HTML document open that you've been assigned to review or approve, click **Revise**, and then click **Revise** again to confirm.

- The document is reloaded in edit mode with **Track Changes** turned on. Use any available PolicyTech and HTML editor features to revise the document.

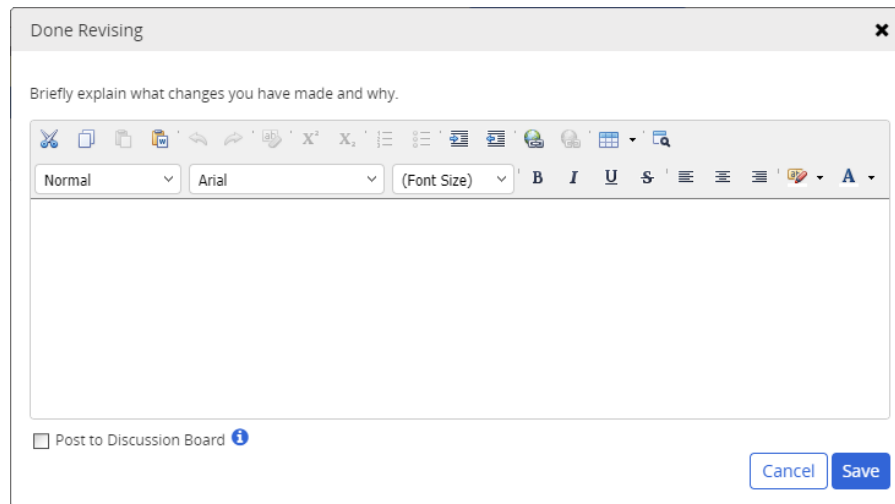

### Notes:

- To add a comment, you must select some text first.
- You cannot turn off **Track Changes** while revising an HTML document in review or approval.

3. When you're done working on the document, do one of the following:
  - If you're finished with your revisions,
    - a. Click **Done Revising**.

- b. (Optional) Type a brief explanation or description of your revisions.

- c. (Optional) To add what you wrote to this document's discussion board, select **Post to Discussion Board** (see [Working with Discussions](#) for details).
  - d. Click **Save**, and then click **OK**.
- If you're not finished with revisions but need to close the document for now, click **Finish Later**.

---

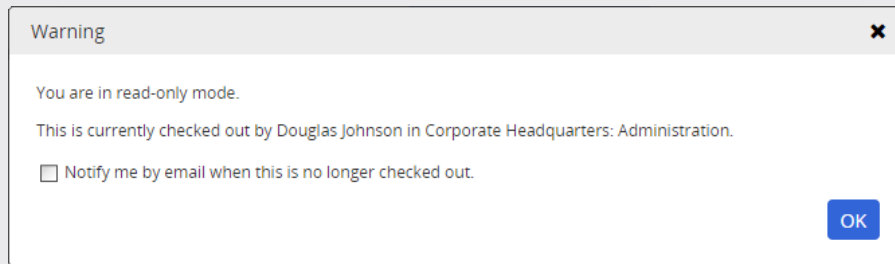

## Declining a Document or Questionnaire

**Important:** Declining a document or questionnaire sends it back to Draft status where the owner must restart the review and approval process. You may want to consider starting a discussion thread first (see [Starting a Discussion](#)) to avoid unnecessary process delays.

1. With the document or questionnaire open that you've been assigned to review or approve, click , and then click **Decline**.

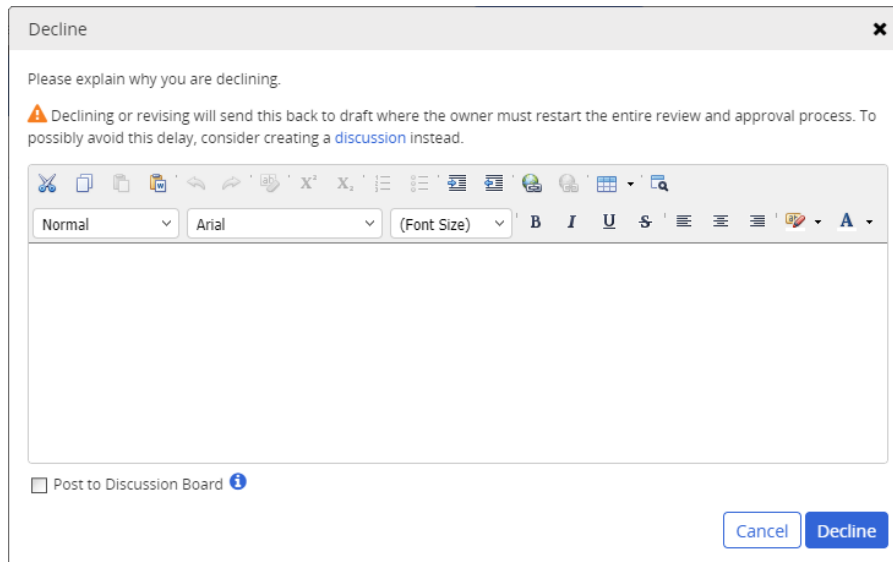

**Note:** If you see an alert like the one below, it means that another user (another approver or an administrator) is working on the document. You will not be able to decline the document until the other user closes it. If you want to be notified when the document is available, select **Notify me by email when the document is no longer checked out**, and then click **OK** to clear the warning.

2. Type an explanation of why you're declining the document/questionnaire.

**Important:** You can't move on until you type an explanation.

3. (Optional) To add what you wrote to this document's/questionnaire's discussion board, click **Post to Discussion Board** (see [Working with Discussions](#) for details).

4. Click **Decline**, and then click **OK**.

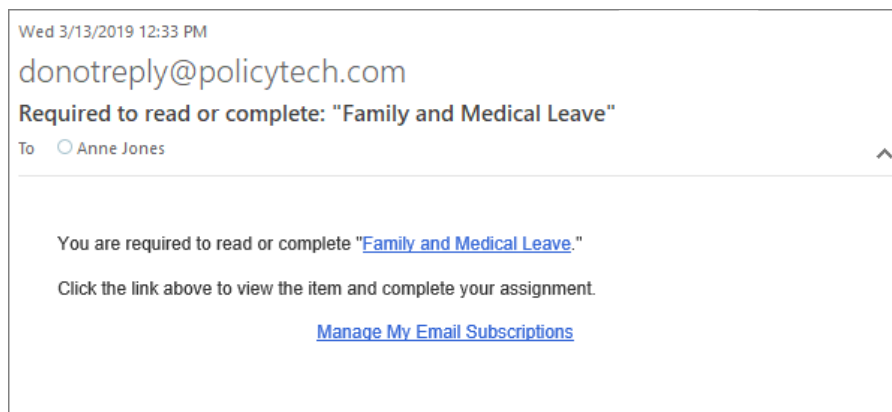

## Working with Notification Emails

If you are assigned any task for a content item (document, questionnaire, or campaign), you will receive a notification email when it is time to perform that task. You will also receive notifications if one of your tasks includes a due date and the task becomes overdue. See [Notification Lists](#) below for descriptions of the notifications you could receive.

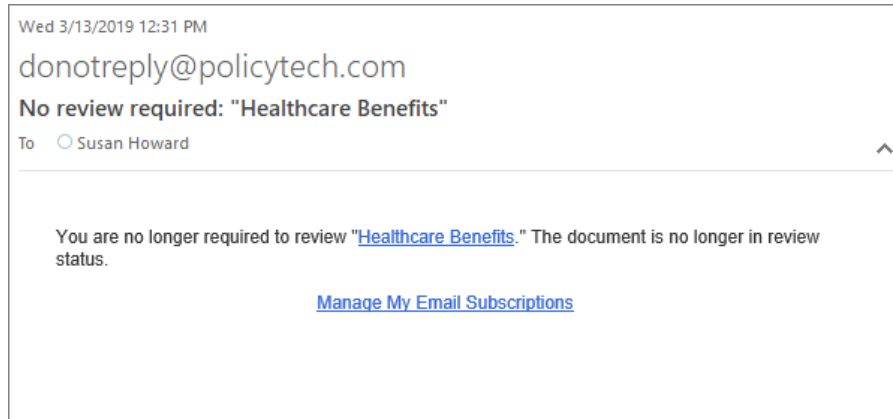

**Important:** You will receive notification emails only if the administrator has both set up PolicyTech to send out emails through your organization's email system and has included your email address in your user profile. If this is not the case, the task notifications are posted to the PolicyTech Inbox. See [Using the Messages Inbox](#) for details.

If you receive a notification email, do the following:

1. Find and open the email in your organization's email system. The notification serves one of the following purposes:
  - Tells you what task you've been assigned and the content item (document, questionnaire, or campaign) you need to perform the task on, as shown in the sample email below.

- Provides you with information about a task assignment or content item you own.

2. To open a referenced content item, click its title.
3. If applicable, perform your task, and then take the appropriate action to indicate that the task is done. The lists below refer you to topics with instructions about performing assigned tasks.

## Notification Lists

The tables below show what notifications users with each role might receive and links to topics that explain how to act on those notifications.

### Notes:

- Several factors determine which of all possible email notifications applicable to your role you will receive. These factors include your own email subscription settings (see [My Profile: Email Subscriptions Tab](#)), system-wide email settings controlled by the administrator, and content item-specific notification settings (see [Notification Settings for Owners and Proxies](#)).
- The following tables show the default text for email subjects. The subjects of emails you receive may be different, because that text can be modified by an administrator.

### For All Roles

Email Name & Default Subject	Description	Help Topic Links
<b>Name:</b> Summary of Incomplete Tasks <b>Subject:</b> PolicyTech tasks summary	Sent to task assignees on the configured interval with a list of all incomplete tasks.	<a href="#">Working with My Tasks</a>
<b>Name:</b> New Discussion <b>Subject:</b> New	Sent to designated recipients when a discussion is started.	<a href="#">Working with Discussions</a>

Email Name & Default Subject	Description	Help Topic Links
discussion: "[Discussion Title]" for "[Content Item Title]"		
<b>Name:</b> Discussion Reply Posted <b>Subject:</b> Discussion reply: "[Discussion Title]" for "[Content Item Title]"	Sent to designated recipients when a discussion reply is posted.	<a href="#">Working with Discussions</a>

### For Assignees

---

## Working with Discussions

The **Discussion Board** provides an area in each content item (document, questionnaire, or campaign) where all those who work on it or have permission to access it can make comments and carry on a discussion without rejecting the content item or sending it back to Draft. This can streamline the publishing process by reducing the number of review cycles.

See the following topics for help with using discussions:

[Starting a Discussion](#)

[Viewing and Replying to a Document Discussion](#)

[Who Sees Document Discussions?](#)

---

### Starting a Discussion

1. In an open document, questionnaire, or campaign click .

**Note:** If you don't see the  icon, then discussion creation has been restricted to the content item's owner, assigned proxy authors, and administrators.

2. Click **Create New Discussion**.

The appearance of the **Create New Discussion** window depends on your assigned role and the document's/questionnaire's workflow status. If you are the document owner, an assigned proxy author, or an administrator, you will always see the following window. You will also see the following window if you are an assigned writer, reviewer, or approver, and the document/questionnaire is in the Draft, Collaboration, Review, or Approval status. If you see this window, continue with step 3.

Create New Discussion

Send Notifications To:  Owner - Hansen, Tom (Accounting Manager)

Normal Arial (Font Size) B I U A

Title

Make Private (Visible only to me, those selected to receive notifications, and administrators.)

Cancel Save

If you are not the owner, an assigned proxy author, or an administrator, and the content item is in the Pending, Published, or Archived status, you may see the following window, which does not include the option to select notification recipients. In this case, the discussion is automatically marked private and will be viewable only by the document owner, assigned proxy authors (if any), and administrators. If you see this window, you can skip to step 6.

Create New Discussion

Normal Arial (Font Size) B I U A

Title

This will only be visible to you, those selected to receive notifications, and administrators.

Cancel Save

- (Optional) If you want to send notifications to make certain users aware of the new conversation, click **Send Notifications To**, and then click **Writers, Reviewers, Approvers, or Other Users**.

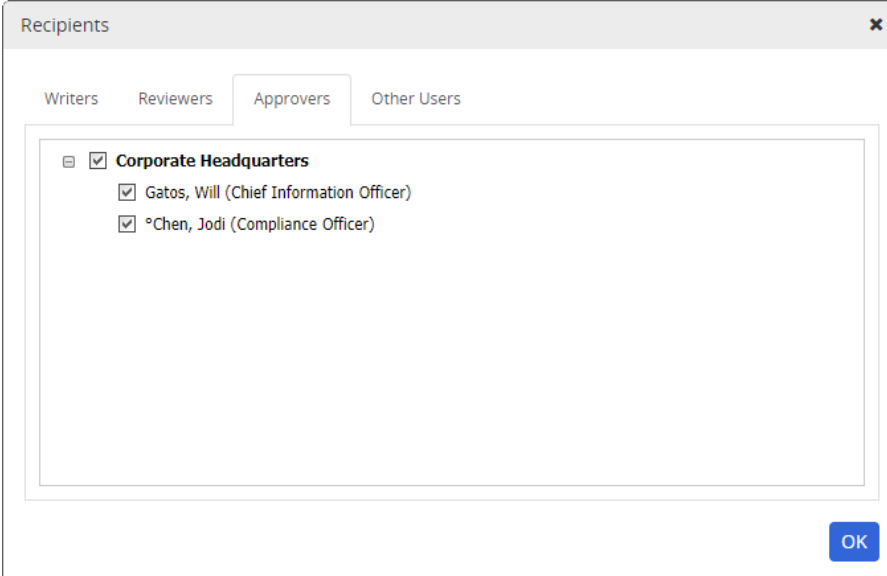

**Note:** Selecting a user does not change that user's permission to access the content item in any way. If the added participant can already access the content item by virtue of an assigned role or permission, that user will be able to open the item and see the new discussion. If the user cannot currently

access the content item, the user still receives an email notification with the discussion's original text and a link to the content item, but clicking the link goes to an "access to resource denied" message.

4. Do one of the following:

- If you selected **Writers**, **Reviewers**, or **Approvers**, select the users you want to notify, and then click **OK**.

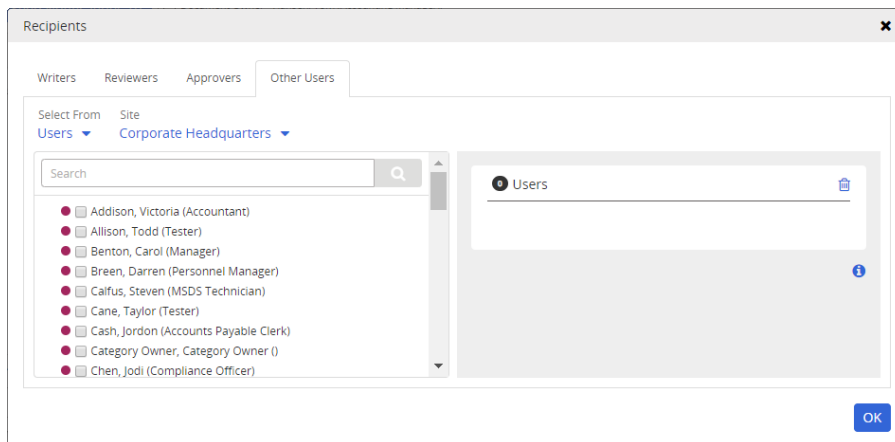

**Note:** If no users appear in the **Writers** or **Reviewers** tab, then no one has been assigned that role for this content item.

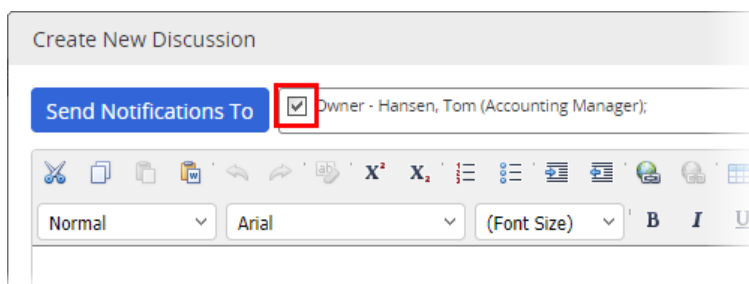

The screenshot shows a dialog box titled "Recipients" with a close button (X) in the top right corner. Below the title bar are four tabs: "Writers", "Reviewers", "Approvers", and "Other Users". The "Approvers" tab is currently selected. The main area of the dialog contains a list of users with checkboxes. The first item is "Corporate Headquarters" with a checked checkbox and a minus sign icon to its left. Underneath it are two sub-items: "Gatos, Will (Chief Information Officer)" and "Chen, Jodi (Compliance Officer)", both with checked checkboxes. At the bottom right of the dialog is a blue "OK" button.

- If you selected **Other Users**, find and select the you want to notify, and then click **OK**.

**Note:** A list of users appears by default. To select users by department or job title, under **Select From**, click ▼, select **Departments** or **Job Titles**, and then click **OK**. Click a department or job title to show its associated users, and then select users to notify.

- (Optional) Notice that the owner's name (and the proxy author's name, if one is assigned) appears in the recipient list preceded by a check box. The owner and proxy author will not be notified by default. To include the document owner, select each's check box.

- Type a message.
- (Optional) Notice that the first 70 characters of the message are copied into the **Title** box. You can change the title text.
- (Optional) By default, the new discussion will be accessible to anyone who can access the content item. To restrict who can see the message to only those you select as recipients, the owner, assigned proxy authors, and administrators, select **Make Private**. (See [Who Sees Document Discussions](#) below for details.)
- Click **Save**.

---

## Viewing and Replying to a Discussion

You can view a discussion in an email notification or from within a content item (document, questionnaire, or campaign).

### Viewing a Discussion in an Email Notification

If you are set up to receive email notifications within PolicyTech, you will receive an email whenever someone includes you as a recipient when creating or

replying to a discussion. The email includes the discussion text and a link to the content item containing the discussion.

To reply to the discussion, click the title link, and then follow the steps under "Viewing a Discussion in a Content Item" below, starting with step 2.

## Viewing a Discussion in a Content Item

1. Open the content item containing the discussion.
2. Do one of the following:
  - Click .

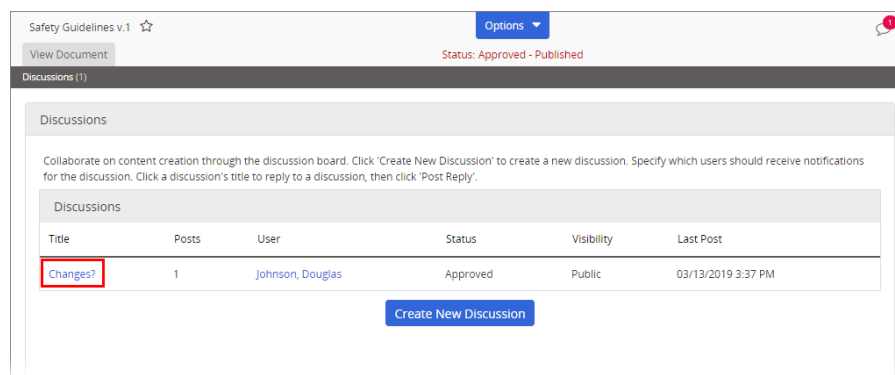

**Note:** If one or more discussions exist the  icon will have a number superimposed on it.

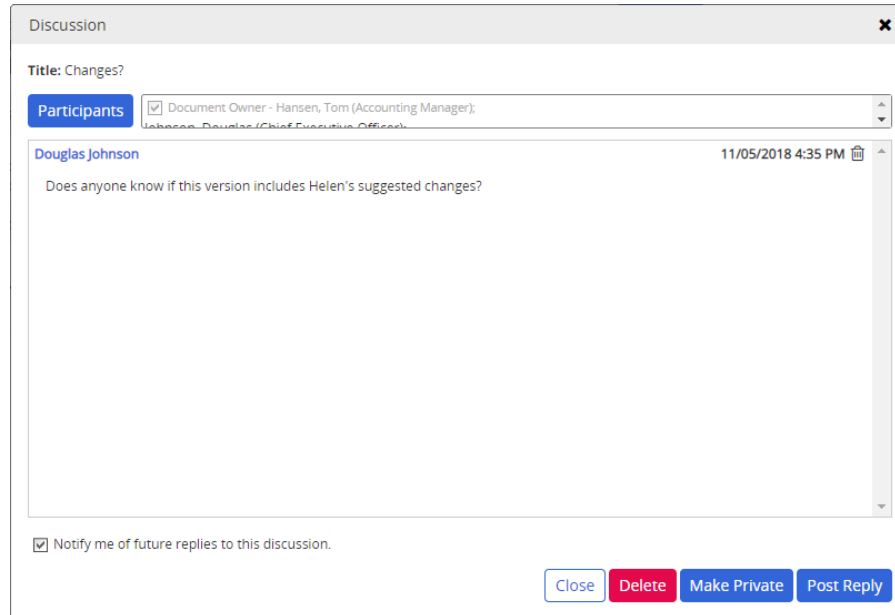

- Click **Overview**, and then click **Discussions**.

3. Click the discussion title.

4. If you want to respond to the discussion, click **Post Reply**.

5. (Optional) If you are the discussion creator or an administrator, you will see the **Participants** button and list. To add or remove a participant, click **Participants**, click a tab, select from the available participants, and then click **Save**.
6. (Optional) To limit this discussion's visibility to only those included in the **Participants** list, the owner, assigned proxy authors, and administrators, click **Make Private**, and then click **Yes**.
7. Type a reply, click **Save**, and then click **Close**.

**Note:** Anyone included as a notification recipient in the original discussion will also be notified of the reply.

## Who Sees Discussions?

A discussion can be created within any particular content item (document, questionnaire, or campaign). Which users are allowed to view and participate in a discussion depends on several factors, including the content item's current status, users' ability to access the content item by virtue of their assigned roles and permissions, and the current **Content Setup** settings, which are controlled by your PolicyTech administrator.

## All Discussions

For any particular content item, those with the following roles have access to and complete control over all of that content item's discussions:

- Any administrator assigned to the site containing the content item
- The content item's owner
- A proxy author assigned to the content item

This control includes the ability to do the following:

- Create new discussions
- Select any other user as a discussion participant

**Note:** Selecting a user does not change that user's permission to access the content item in any way. If the added participant can already access the content item by virtue of an assigned role or permission, that user will be able to open the item and see the new discussion. If the user cannot currently access the content item, the user still receives an email notification with the discussion's original text and a link to the item, but clicking the link goes to an "access to resource denied" message.

- View and participate in (reply to) all discussions, including those marked private, in any workflow status
- Change a discussion's security level from private to public and from public to private
- Delete any discussion

### Public Discussions for Content Items in the Draft, Collaboration, Review, and Approval Statuses

Discussions function differently in the statuses before a content item is approved (Draft, Collaboration, Review, and Approval) than they do in the post-approval statuses (Pending and Published/Started). What users can do with a content item's discussions in the earlier statuses also depends on whether or not they are assigned a task to write, review, or approve the content item.

**Note:** For details on what assigned owners and proxy authors can do with discussions, see [All Discussions](#) above.

A content item's assigned writers, reviewers, and approvers can do the following with that item's discussions:

- Create new discussions
- Select any other accessible user as a discussion participant

**Note:** Selecting a user does not change that user's permission to access the content item in any way. If the added participant can already access the content item by virtue of an assigned role or permission, that user will be able to open the item and see the new discussion. If the user cannot currently

access the content item, the user still receives an email notification with the discussion's original text and a link to the item, but clicking the link goes to an "access to resource denied" message.

- View and participate in all public discussions created in the assigned content item while it is in any accessible workflow status
- Change a discussion's security level from private to public and from public to private
- Delete a discussion that the user initially created

Owners, writers, reviewers, and approvers can also do the following with any unrestricted content item that they are not assigned to while the item is in any accessible status:

- Create new discussions that only an administrator and the assigned owner and proxy authors can see.
- View and participate in a discussion that the user initially created. In other words, unassigned owners, writers, reviewers, and approvers cannot view any discussions created by anyone else and cannot remove default participants or select additional participants.

For example, a user assigned the approver role can see all unrestricted content items (those assigned the **All Users** security level) while they are in the Approval status. This includes unrestricted content items the user is not assigned to approve. In an accessible, unrestricted content item, an unassigned approver can create a new discussion that automatically includes only the assigned owner, any assigned proxy author's, and any administrator with access to that content item.

## Public Discussions for Content Items in the Pending and Published/Started Statuses

After a content item is approved, writers, reviewers, and approvers assigned to that content item can see all public discussions, including those previously created in the Draft, Collaboration, Review, and Approval statuses.

**Note:** For details on what assigned owners and proxy authors can do with discussions within pending and published content items, see [All Discussions](#) above.

The following users can see a content item's discussions created in the Pending and Published statuses but cannot see those previously created in the Draft, Collaboration, Review, and Approval statuses, unless they were added as a participant in one or more of those discussions:

- Owners, proxy authors, writers, reviewers, and approvers who are NOT assigned to the content item

- All users with the Assignee role, including those designated as assignees for the content item

## Private Discussions

When a content item discussion is marked private, only those explicitly selected as recipients, administrators, the owner, and any assigned proxy authors can view the discussion.

**Note:** If selected recipients are removed from the recipient list for a private discussion, they will no longer be able to see that discussion, even if they previously contributed to it.

## Discussion Notifications

If an administrator has set up PolicyTech to send out email notifications using your organization's email system, emails will be sent to selected or default participants each time a discussion is created or replied to.

**Note:** When a user doesn't have the option to select participants, the default recipients who receive email notifications are the owner, any assigned proxy authors, and any administrators with administrative permission for the content item's site.

It is important to understand that email notification for a discussion has nothing to do with whether the recipient has access to the content item containing the discussion. If a user without the role or permission necessary to access a content item is included as a discussion recipient and receives an email notification, that user can open the email and see the text from the discussion, but clicking the content item link will result in a message saying that access to the requested content item is denied.

---

## Managing Department Assignees

If you have been assigned the manager role for one or more departments, you can view and change reading/completion assignments for the content items (documents, questionnaires, and campaigns) and assignees within those departments. You can also view the task status of managed assignees.

---

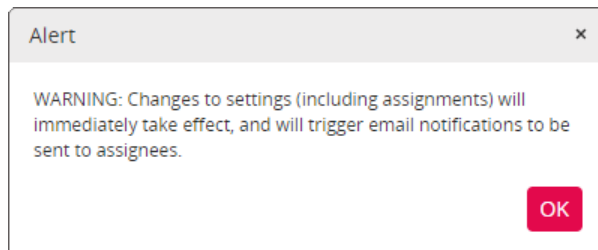

### Adding Assignees

Use the **Properties Wizard** to add assignees to a content item. If you assign a user who was not previously assigned, a reading/completion task will be sent to that user.

1. Open a published content item assigned to a department or users you manage.
2. Click **Properties Wizard**.

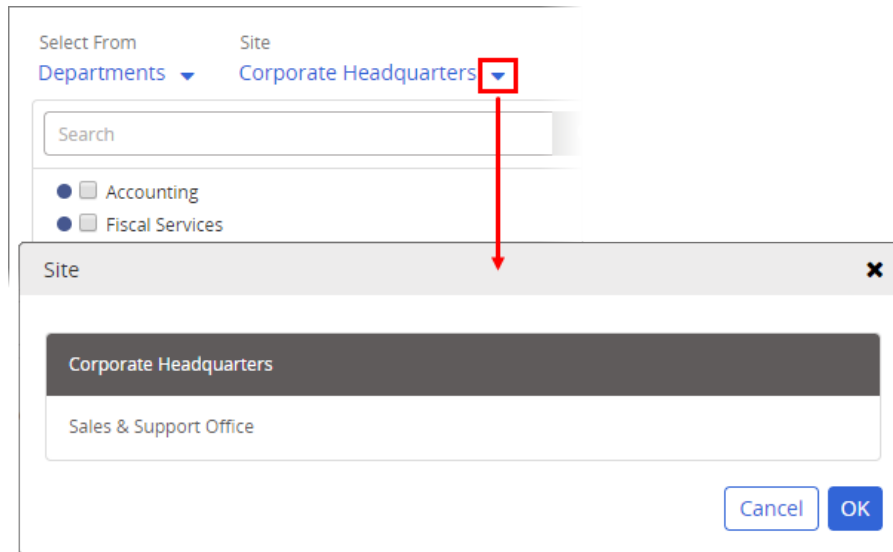

3. An alert appears warning you that the changes you make will take immediate effect. Click **OK**.

The currently selected assignees for this content item are listed in the pane to the right.

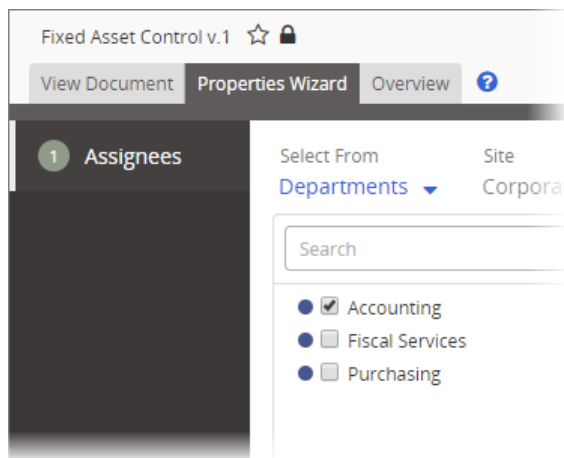

4. If you are a manager of departments at different sites, do one of the following:
  - Leave the default site selection to add assignees from the current site.
  - Under **Site**, click ▼, select a different site, and then click **OK**.

5. Do any of the following to add assignees:

- Select one or more of the departments you manage (displayed by default) to add all assignees from those departments.

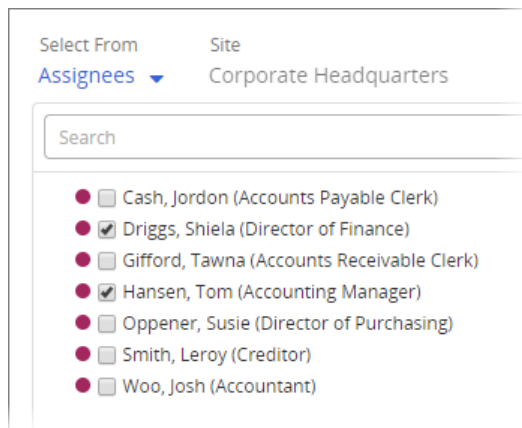

**Note:** To select individual users from a department, click the department name, select users (use **Search** to find a user in a long list), and then click **OK**.

- Under **Select From**, click ▼, click **Assignees**, and then click **OK**.

Then, select one or more assignees.

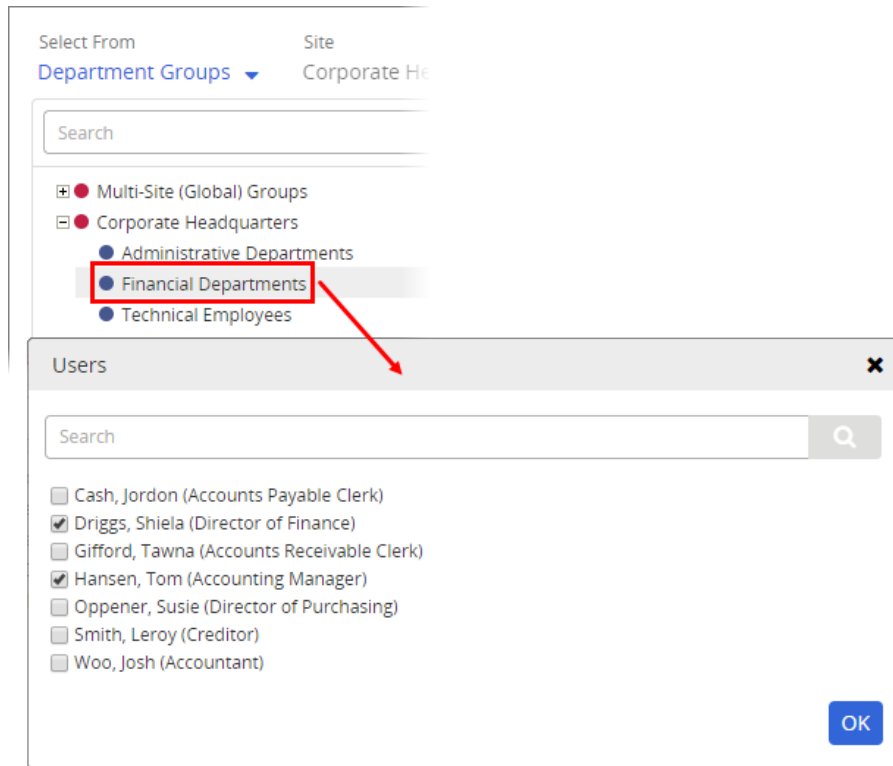

**Note:** Use **Search** to find an assignee in a long list.

- Under **Select From**, click ▼, click **Groups**, **Department Groups**, or **Job Titles**, and then click **OK**.

Then, click a group name or job title to display a list of assignees from that entity, select one or more assignees, and then click **OK**.

**Note:** Not all assignees will be selectable—only those whom you manage who are within the selected group or job title.

6. Click **Save**, and then close the content item.

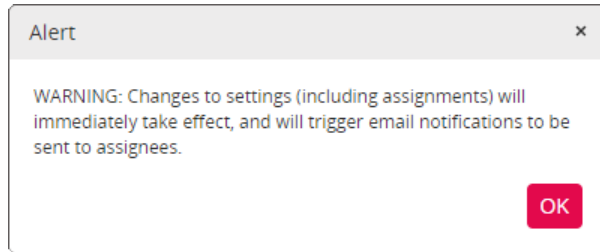

## Removing Assignees

Use the **Properties Wizard** to remove assignees from a content item. If you remove a currently assigned, that user's reading/completion task will be suspended.

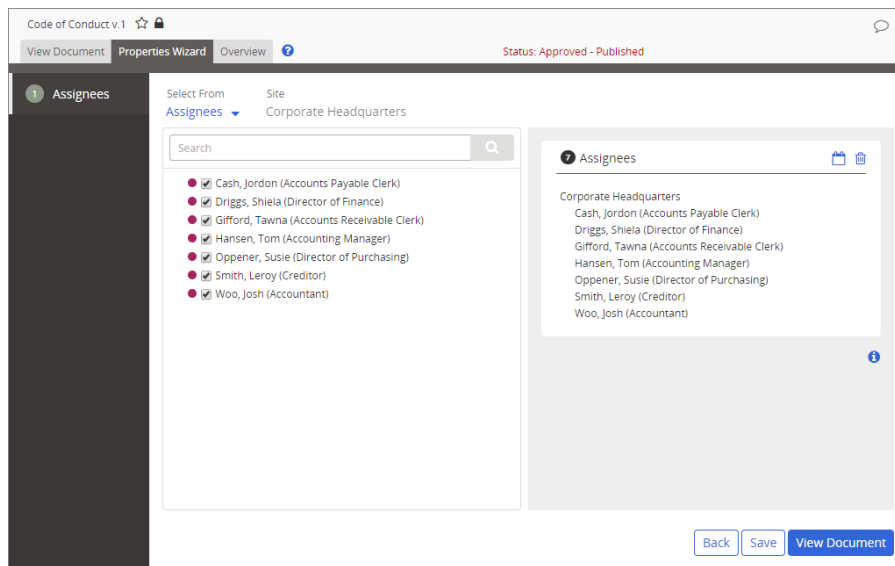

1. Open a published content item assigned to a department or users you manage.
2. Click **Properties Wizard**.

3. An alert appears warning you that the changes you make will take immediate effect. Click **OK**.

The currently selected assignees (if any) are listed in pane to the right.

4. Select one or more users, groups, departments, or job titles, and then click .

**Note:** To select multiple items, hold down the Ctrl key while clicking each item. To select a range of items, click the first one, and then hold down the Shift key as you click the last one.

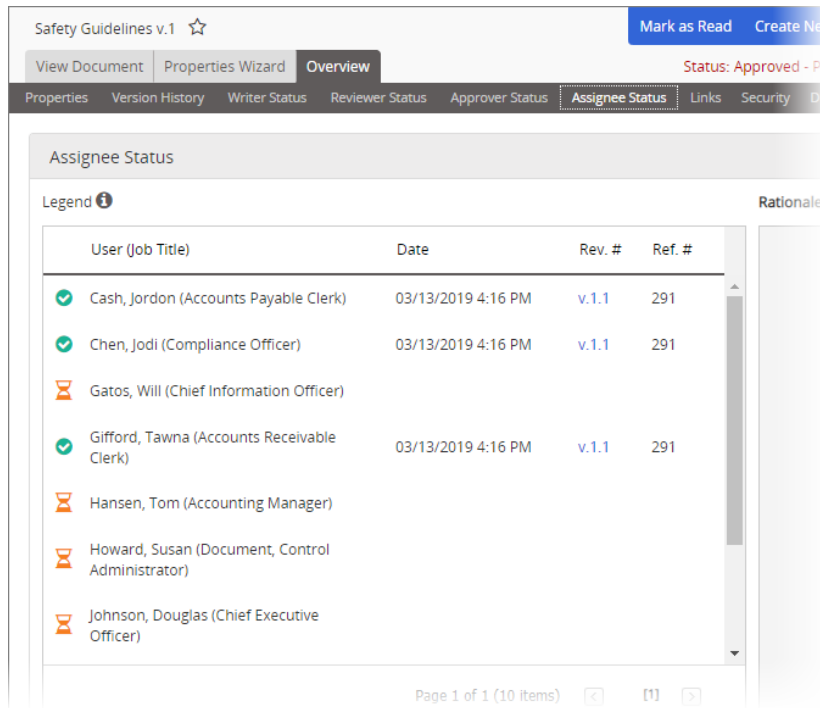

## Viewing the Status of Assignee Tasks

To see which users have and have not completed their required reading/completion tasks,

1. Open a published content item assigned to a department or users you manage.
2. Click **Overview**, and then click **Assignee Status**.

The **Assignee Status** window will look similar to the one below, with a list of selected assignees with icons before their names indicating whether or not they have read the document or completed the questionnaire or campaign.

3. When finished, close the content item.

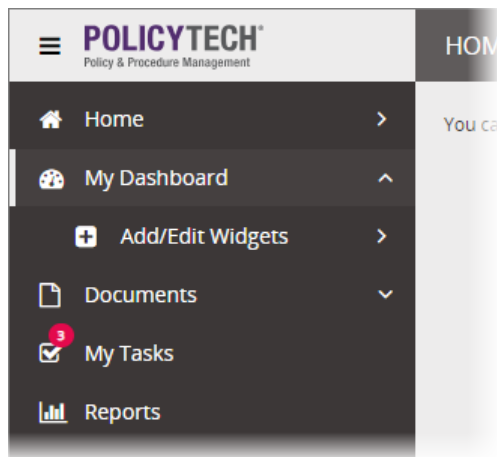

---

## Setting Up a Personal Dashboard

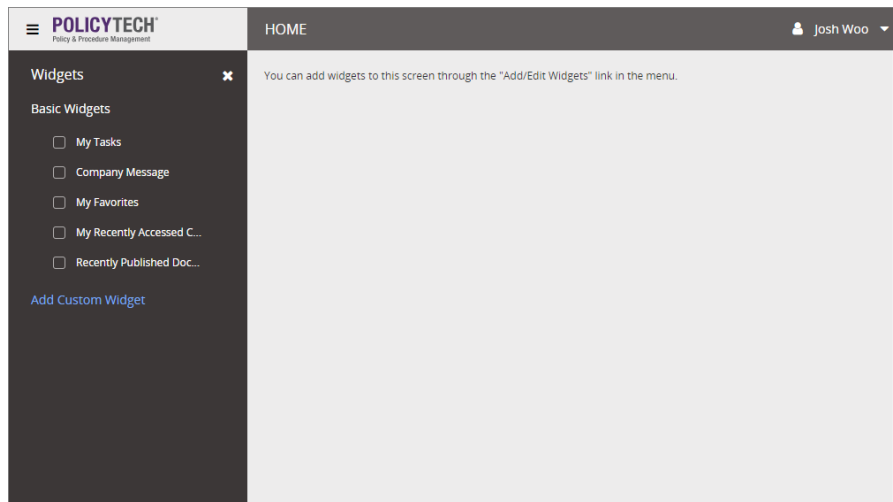

1. Click **My Dashboard**, and then click **Add/Edit Widgets**.

### Notes:

- A widget is a compact view you can add to and arrange in a dashboard.
- **My Dashboard** is an optional feature that may or may not be currently enabled.

2. Under **Basic Widgets**, select the widgets you want to add (see [Basic Widget Descriptions](#) below).

3. (Optional) You'll see a **My Saved Reports** section below **Basic Widgets** if you have access to and have saved any of the following reports types.

- Tasks by Document - Current
- Tasks by Document - All Tasks
- Tasks by User - Current
- Tasks by User - All Tasks

If desired, add saved report widgets.

A custom widget lets you can enter a title and body text, plus a list of the documents assigned to a specific category.

5. (Optional) Add a custom widget.
  - a. **Click Add Custom Widget**, and then type the title and body text.

Custom Widget

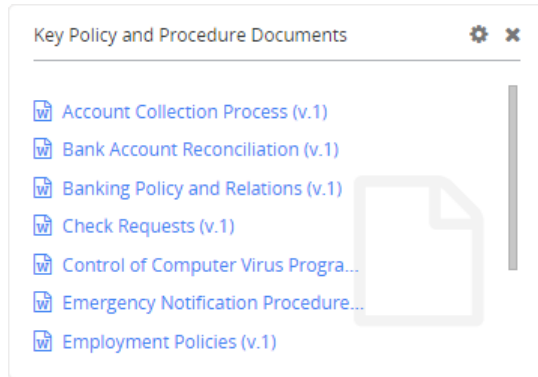

Widget Title

Body

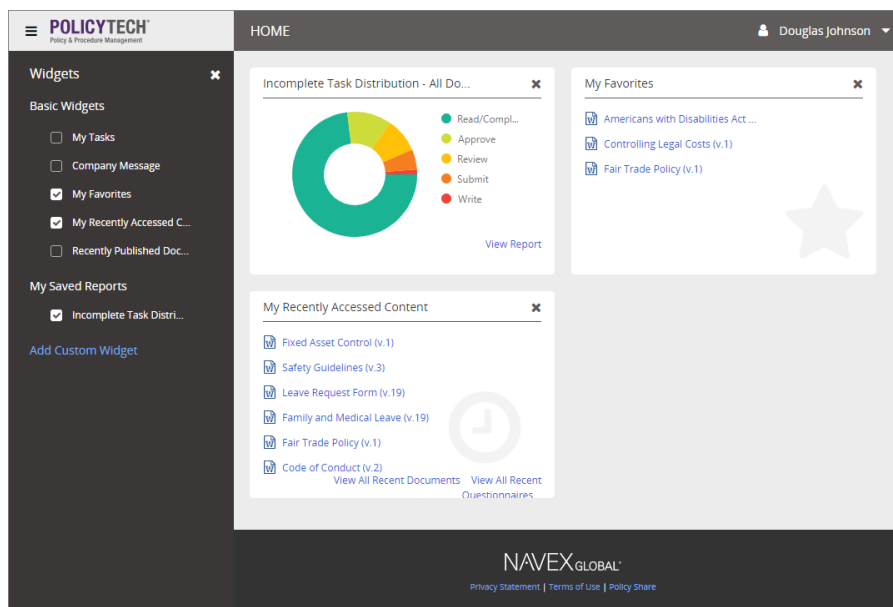

Include a list of published documents from a certain category (limited to the first 100 ordered alphabetically by title)

[Cancel](#) [Save](#)

- b. If desired, select **Include a list of published documents from a certain category**, and then select a category.
- c. Click **Save**.

6. When you're done adding widgets, arrange them by clicking on a widget header and dragging it to a new position.

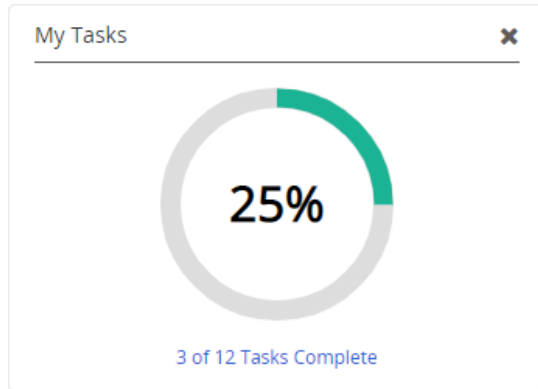

7. When finished, at the top of the **Widgets** menu, click

## Basic Widget Descriptions

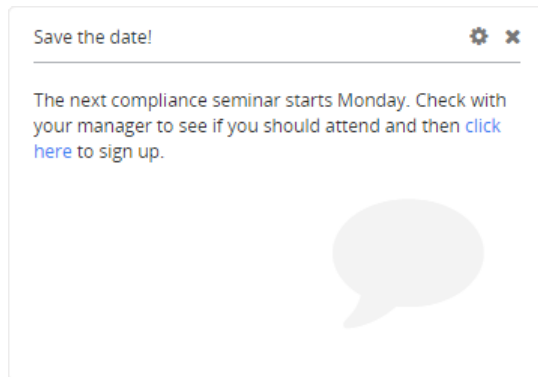

Some basic widgets will have essentially the same contents for all users (**Company Message** and **Recently Published Documents**), while others will show information specific to the currently logged in user (**My Tasks**, **My Favorites**, and **My Recently Accessed Content**). The structure and content of all basic widgets for a personal dashboard are preset and cannot be modified.

**My Tasks:** Shows the percentage of your assigned tasks for the past year that have been completed.

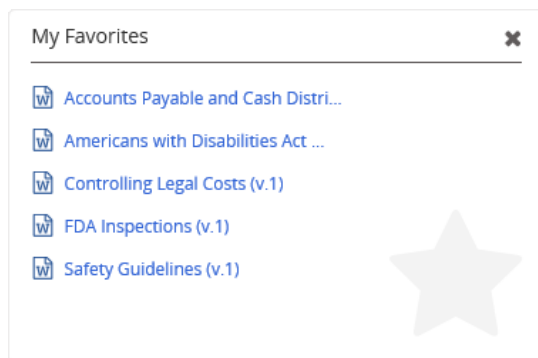

**Company Message:** Contains a message created by the administrator.

**Important:** The **Company Message** widget option in the **Basic Widgets** menu will be called whatever the administrator entered as the widget's title, such as **Save the date!** in the widget shown below.

**My Favorites:** Lists the first six documents alphabetically that you have marked as favorites. You can click a title to open a document. If you have more than six favorites, a **View All Favorites** link is available.

**My Recently Accessed Content:** Lists the last six content items (documents, questionnaires, and campaigns) you've opened. You can click a title to open a content item again.

My Recently Accessed Content

## Generating Reports

PolicyTech includes many reports that let you check the status of and statistics about content and users. You can find report descriptions and instructions on how to use each report in the [Reports Supplement](#).

---

## Using Optional Advanced Features

The following features are available only if they've been enabled. If in doubt, contact your administrator.

[Working with the Public Viewer](#)

[Using Case Management Integration Features](#)

[Changing Assignee Task Status as Proxy](#)

[Using Third-Party Contact Features](#)

[Using Localization Workflow Features](#)

---

## Working with the Public Viewer

**Important:** The features described in the sections that follow are available only if your organization has purchased and enabled the **Public Viewer** module.

[Making a Document Accessible in the Public Viewer](#)

[Reading a Document in the Public Viewer](#)

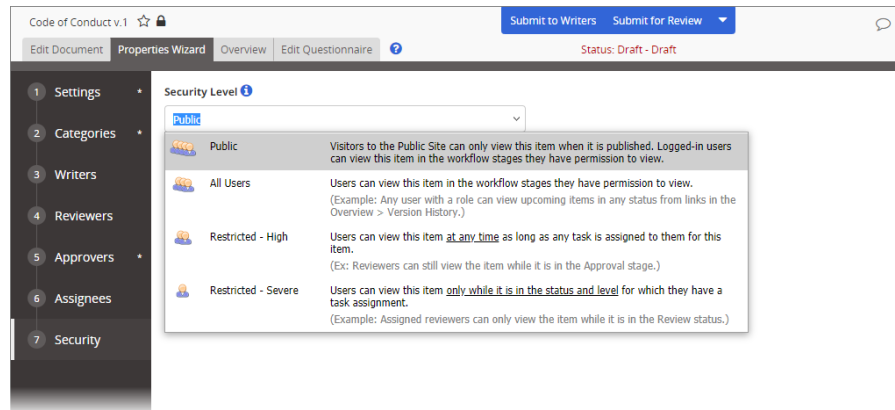

### Making a Document Accessible in the Public Viewer

**Important:**

- The **Public Viewer** is available only if it has been purchased and enabled. Contact your administrator if you have questions.
- Questionnaires and campaigns cannot be set to the **Public** security level and cannot be made available using the **Public Viewer**.

When the **Public Viewer** is enabled, the **Public** option is added to the **Security Level** menu in the **Security** step of the **Properties Wizard** for documents only. The public security level must be assigned to all documents you want accessible in the **Public Viewer**. The document will be publicly accessible once it has been approved and published.

1. While creating or editing a document, click the **Properties Wizard** tab, and then click **Security**.
2. In the **Security Level** list, click **Public**.

3. Finish creating or editing the document, and then save it as you normally would.

### Reading a Document in the Public Viewer

The following sections will help you find and open documents in the PolicyTech **Public Viewer**:

[Searching for a Content Item](#)

[Browsing for a Content Item](#)

## Using Case Management Integration Features

**Important:** The features described in the sections that follow are available only if your organization has integrated PolicyTech with EthicsPoint Incident Management or IntegriLink.

[As a Case Manager](#)

[As an Assignee \(a user assigned to read a document\)](#)

[As a Questionnaire Creator](#)

### Using Case Management Integration as a Case Manager

**Important:** This feature is available only if your organization has integrated PolicyTech with EthicsPoint Case Management or IntegriLink.

If the PolicyTech administrator has assigned you the case manager permission, you have the ability to request that any published content item you have access to be updated.

1. Open the published document, questionnaire, or campaign.
2. Do one of the following: Click **Request Update**.
  - Click the **Request Update** button.

- Click , and then click **Request Update**.

- Fill out the **Request Update** form just as you would when creating a discussion (see [Starting a Discussion](#)).

Request Update ✕

Please include a clear description of what needs to be modified. This request will be posted to the Discussion Board, and the Owner will be assigned the task to review the proposed update.

Owner - Benton, Carol (Environmental Control Manager);

Rich text editor toolbar with options for Bold, Italic, Underline, Link, and other formatting tools.

Title

Make Private (Visible only to me, those selected to receive notifications, and administrators.)

- Click **Save**.

## Using Case Management Integration as an Assignee

**Important:** This feature is available only if your organization has integrated PolicyTech with EthicsPoint Case Management or IntegriLink.

When case management integration is enabled, you have the option of reporting an issue or allegation from a published document. For example, if you're reading a document about the harassment policy and you know of an incident that violated the harassment policy, you could report the incident before closing the document.

In an open published document, click **Report Incident**. An incident reporting form opens in a separate browser window for you to fill out and submit.

## Using Case Management Integration as a Questionnaire Creator

**Important:** This feature is available only if your organization has integrated PolicyTech with EthicsPoint Case Management or IntegriLink.

When you, as a questionnaire owner, add a questionnaire to a document or create a stand-alone questionnaire, you have the option of having PolicyTech create a case in EthicsPoint Case Management or IntegriLink each time an assignee selects a specific answer or types an answer to an open-ended question. You can tie a single answer or multiple answers to a single case.

1. In a questionnaire, start to add or edit a question (see [Adding Questions and Answers to a Questionnaire](#) or [Changing a Questionnaire](#) for detailed instructions).

**Important:** You must have provided at least the minimum amount of information (question text, answer text, and answer type, for example) for the type of question you've selected before you can enable case creation.

2. In a multiple choice, true/false, or yes/no question, to the right of an answer click **Options**, and then click **Case Creation**.

Question ✕

**Question Type** ⚠ Changing this will delete your answers and any subquestions.

Multiple Choice

**Question**

Feedback (Displays after taking questionnaire.)

### 3. Select **Create Case**.

**Note:** If the **Create Case** option is not activated, contact your administrator.

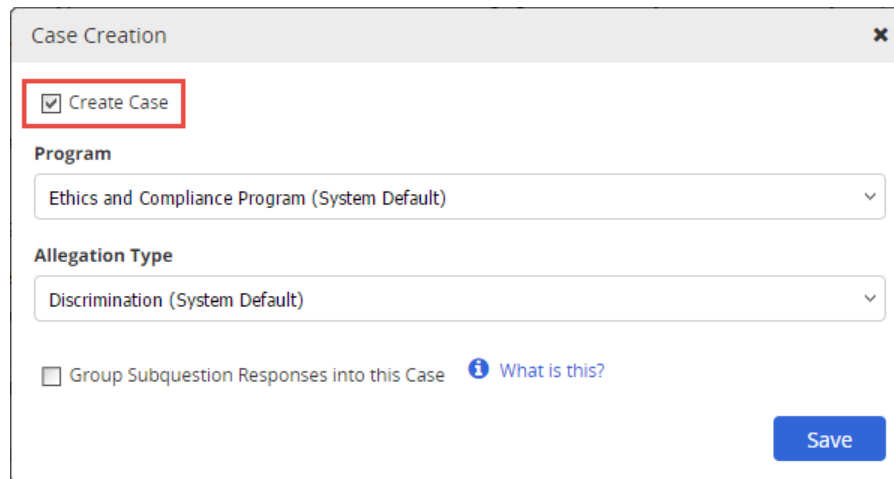

### ***EthicsPoint Case Management***

The screenshot shows a 'Case Creation' dialog box with the following fields and options:

- Create Case
- Tier**: RETAIL (System Default)
- Issue Type**: Accounting and Auditing Matters (System Default)
- Intake Method**: Website (System Default)
- Status**: Not yet reviewed (System Default)
- Case Type**: Internal investigation (System Default)
- Group Subquestion Responses into this Case [What is this?](#)
- Save** button

### **IntegrILink**

The screenshot shows a 'Case Creation' dialog box for IntegrILink with the following fields and options:

- Create Case
- Program**: Ethics and Compliance Program (System Default)
- Allegation Type**: Discrimination (System Default)
- Group Subquestion Responses into this Case [What is this?](#)
- Save** button

4. Check the system default settings for the case properties and make changes as necessary.
5. (Optional and available for multiple choice, true/false, and yes/no questions only) To include the answers to any subquestions you add below the current answer, select **Group Sub Question Responses into this Case**, and then click **Yes** (see [Grouping Subquestion Responses](#) below for details on how this option works).
6. Click **Save**.

**Note:** When you save a question,  appears to the right of each answer with case creation enabled. You can click the icon to reopen the **Case Creation** form.

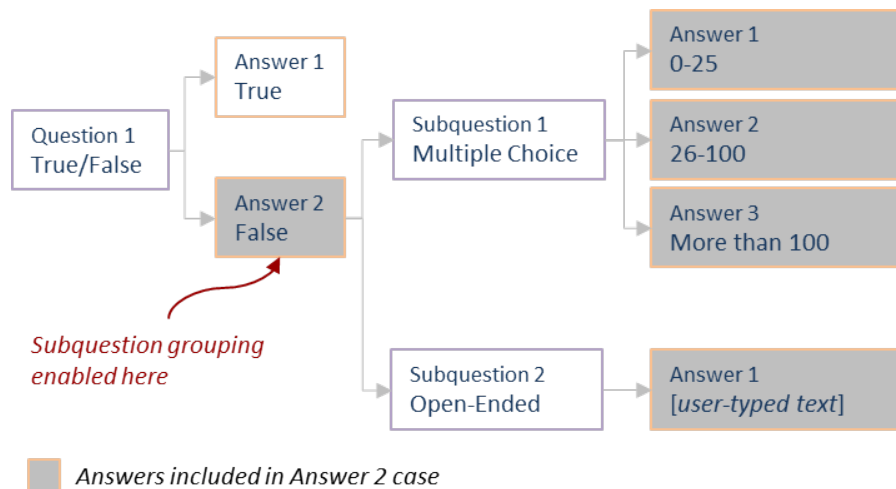

- (Optional) Add a note to the question text indicating that answering this question will create a case.

## Grouping Subquestion Responses

If you enable case creation for a specific answer, you can opt to have all responses (answers) from all of that answer's subquestions included in the same case. Consider the following scenarios to learn how this feature works.

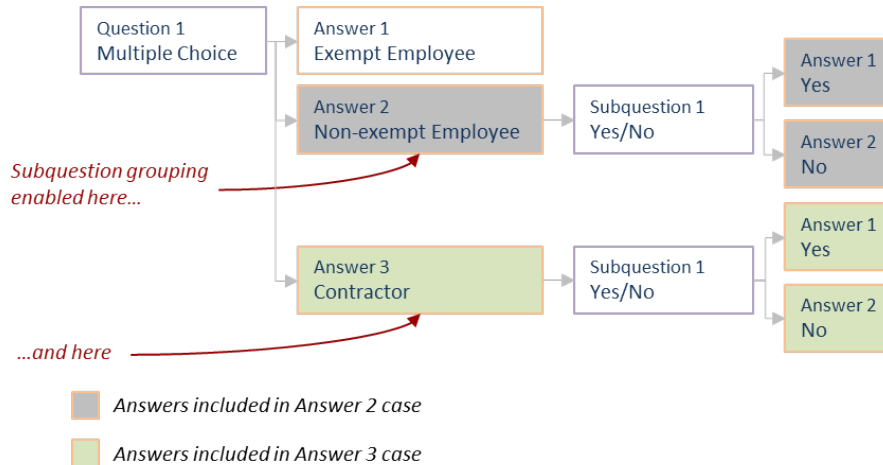

### Scenario 1

In this scenario, the questionnaire creator, Lisa, wants a case created if a user chooses the "false" answer to question 1. In the **Case Creation** window for the **False** answer, she would select **Group Subquestion Responses into this Case**.

### Scenario 2

In this scenario, Zach wants to create one case if the user selects the second answer and a different case if the user selects the third answer. He also wants the answers for the subquestion included in the case. In the answer 2 definition, Zach would enable case creation and select **Group Subquestion Responses into this Case**. He would then do the same for answer 3.

### Important:

- Opting to group subquestion answers into a parent answer's case automatically includes all subquestion answers. For example, in scenario 1 Lisa could not choose to include the answer to subquestion 1 and exclude the answer to subquestion 2.
- Because you cannot create subquestions for an open-ended answer, the option to group subquestions is not available when adding an open-ended answer to a question.
- Nesting of subquestion grouping is not supported. When you enable subquestion grouping for an answer, the grouping option is not available in any answer below that parent answer.

## Changing Assignee Task Status as Proxy

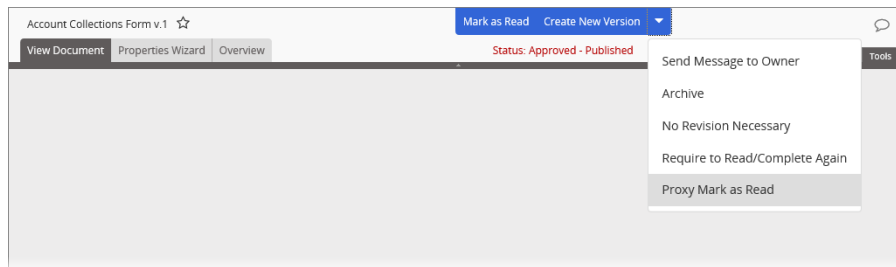

A document owner, questionnaire owner, manager, or administrator can do either of the following:

- Require assignees who have already completed their tasks to read the document or complete the questionnaire again
- (Documents only) Acting as an assignee's proxy, mark that assignee's task complete (as if the assignee had clicked **Mark as Read** in a document)

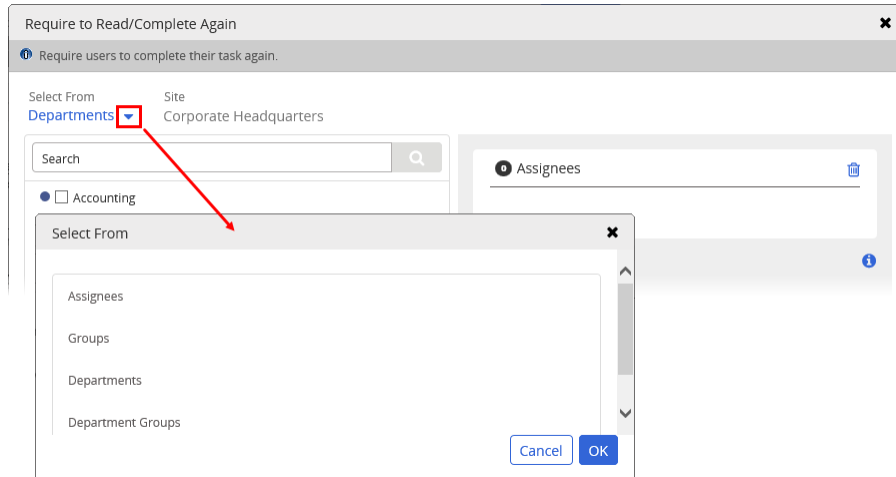

### Notes:

- The ability to mark a document as read by proxy is controlled by a **Content Setup** preference that can be turned on or off by an administrator, so this option may not be currently available in your PolicyTech system.
- You cannot set a stand-alone questionnaire as complete by proxy.

1. Open a published document or questionnaire assigned to your department.
2. At the top of the document window, click , and then do either of the following:
  - Click **Require to Read/Complete Again**.
  - (Document only) Click **Proxy Mark as Read**.

3. If multiple sites exist, select a site or sites containing one or more assignees whose assignments you want to modify.
4. Use **Select From** to choose a method for selecting assignees (individually, by department, by group, or by job title). For details on the rules that determine which items are shown in a Select From list, see ["Select From" List Content Rules](#) below.

5. Select the assignees whose task status you want to change. Refer to the following sections for detailed instructions:

[Selecting from an Assignees List](#)

[Selecting from a Groups List](#)

[Selecting from a Departments List](#)

[Selecting from a Department Groups List](#)

[Selecting from a Job Titles List](#)

6. (Optional) For **Task Change Rationale**, type the reason why you're changing the assignee tasks for the selected users.
7. Do one of the following:
  - If you selected **Require to Read/Complete Again** in step 2 above, click **Require Task(s) Again**.
  - If you selected **Proxy Mark as Read** in step 2 above, click **Mark Task(s) Complete as Proxy**.
8. Click **Continue** to confirm.
9. Close the document/questionnaire.

### "Select From" List Content Rules

If you've been assigned the Manager role, either for departments or for individual users, your ability to require assignees to read or complete a document or questionnaire again or to mark a document as read by proxy is strictly limited to those who meet the following criteria:

- The assignee is someone you're assigned to manage, either individually or as a member of a department you manage.
- The assignee is already assigned to the current document.
- The assignee's current "mark as read" status makes the action you've selected (**Require to Read/Complete Again** or **Proxy Mark as Read**) applicable. Specifically, the **Require to Read/Complete Again** action is only applicable for those assignees who have already marked the document as read or completed the questionnaire, while the **Proxy Mark**

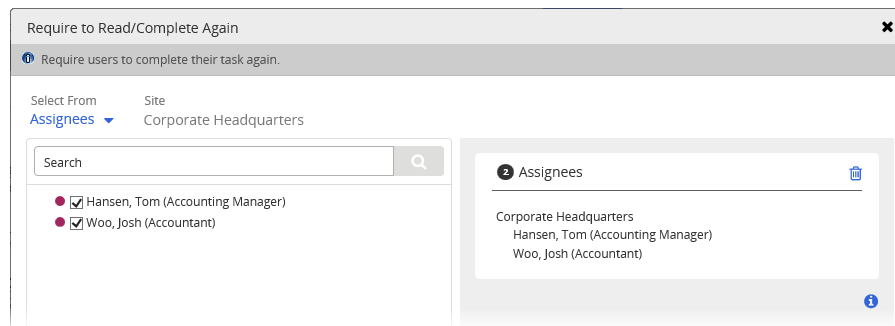

as **Read** action is only applicable for those assignees who have not yet marked the document as read.

If you're an administrator, you can apply either action (**Require to Read/Complete Again** for a document or questionnaire or **Proxy Mark as Read** for a document only) for any assignee already assigned to the current document or questionnaire and for whom the action is applicable.

The above criteria affect how items are listed for each **Select From** option, as described below.

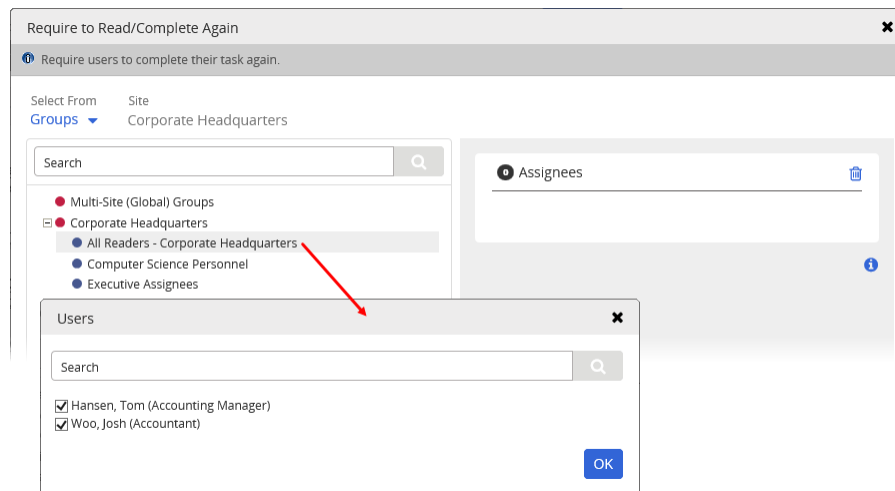

## Selecting from an Assignees List

Only those assignees are listed who meet the criteria listed under ["Select From" List Content Rules](#) above. Select one or more of the assignees listed.

## Selecting from a Groups List

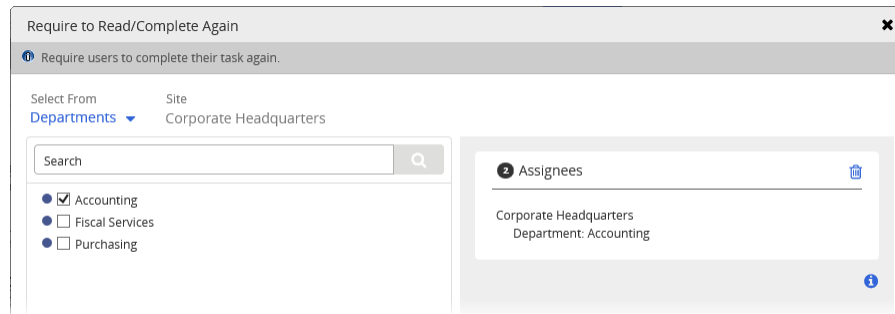

All assignee groups are listed. To select users from a group, click a group name to show those assignees (if any) within the group who meet the criteria under ["Select From" List Content Rules](#) above. Then, select one or more of the assignees listed.

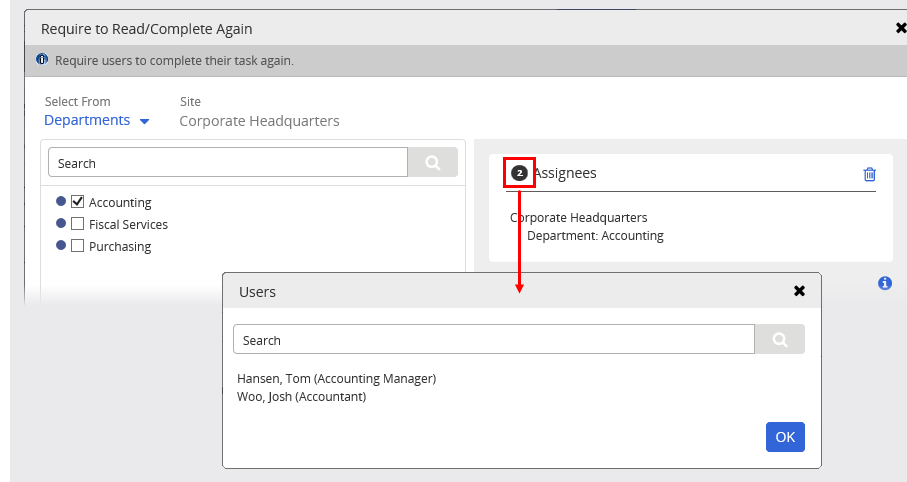

## Selecting from a Departments List

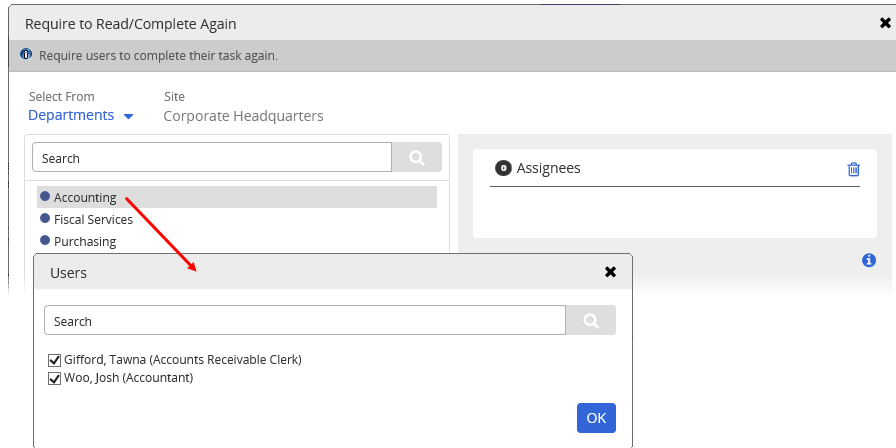

If you've been assigned to manage one or more departments, each assigned department is listed for you to select. Selecting a department selects those assignees (if any) within that department who meet the criteria under ["Select From" List Content Rules](#) above.

**Note:** The icon preceding **Assignees** in the selected list header shows how many of the selected departments' assignees have been selected. To see a list of those assignees, click the icon.

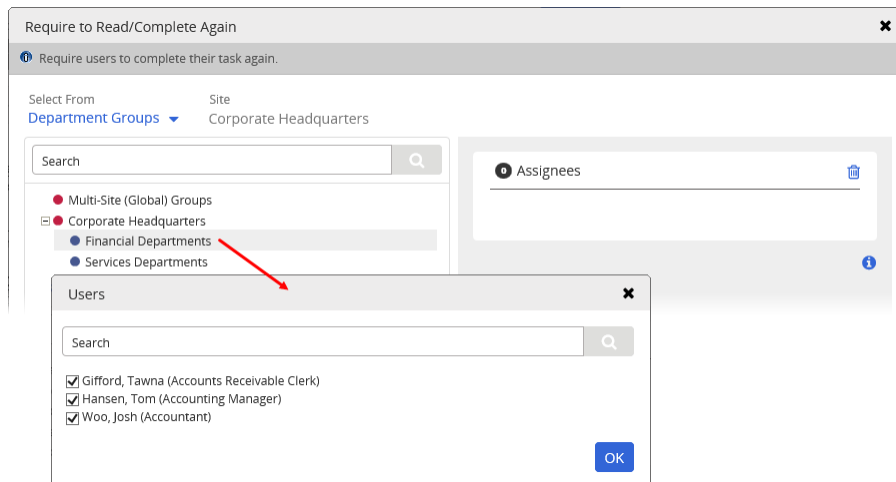

If you've been assigned to manage individual users, each department containing one or more of those users is listed. Click the department name to show those assignees (if any) within the department who meet the criteria under ["Select From" List Content Rules](#) above. Then, select one or more of the assignees listed.

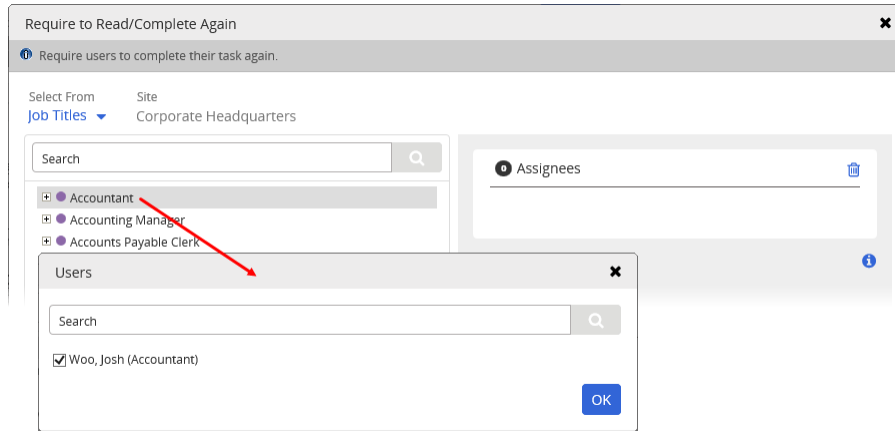

## Selecting from a Department Groups List

All department groups are listed. To select users from a group, click a group name to show those assignees (if any) within the group who meet the criteria under ["Select From" List Content Rules](#) above. Then, select one or more of the assignees listed.

## Selecting from a Job Titles List

All job titles assigned to users who meet the criteria under ["Select From" List Content Rules](#) above are listed. To select users with a specific job title, click the job title name to show those assignees (if any) who meet the criteria under ["Select From" List Content Rules](#) above. Then, select one or more of the assignees listed.

Status	Draft

Source: When creating a document, the document owner selects which departments will have access to the document. (**Properties Wizard > Departments & Categories > Departments**)

The screenshot shows the 'Properties Wizard' interface for a document titled 'Quality Assurance Process v.1'. The 'Departments & Categories' step is active, showing a list of departments to be selected. The 'Required' section lists 'Departments' and 'Document Type' (ISO 9000). The 'Optional' section lists 'ISO 9000'. The 'Selected Departments & Categories' section lists 'Departments (Corporate Headquarters)', 'Department: Engineering', 'Department: Software Development', and 'Department: Technical Services'. The 'Document Type' section lists 'Procedure', 'ISO 9000', and 'Level 2 - Procedures/Processes'. The interface includes a sidebar with navigation options (Settings, Categories, Writers, Reviewers, Approvers, Assignees, Security) and buttons for 'Back', 'Save', 'Edit Document', and 'Next Step'.

When it changes: The document owner or administrator can change the department selections anytime in any active (unarchived) document.

Where to view: The list of affected departments you insert will be the same as the one displayed in the Overview. (**Overview > Properties**)

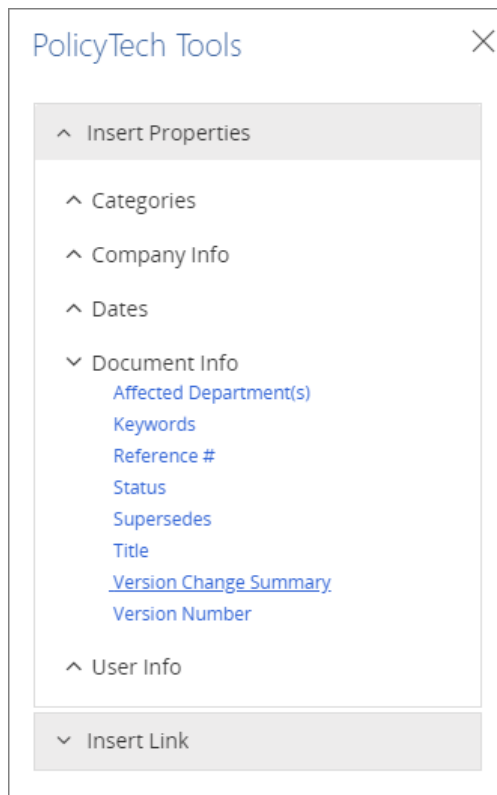

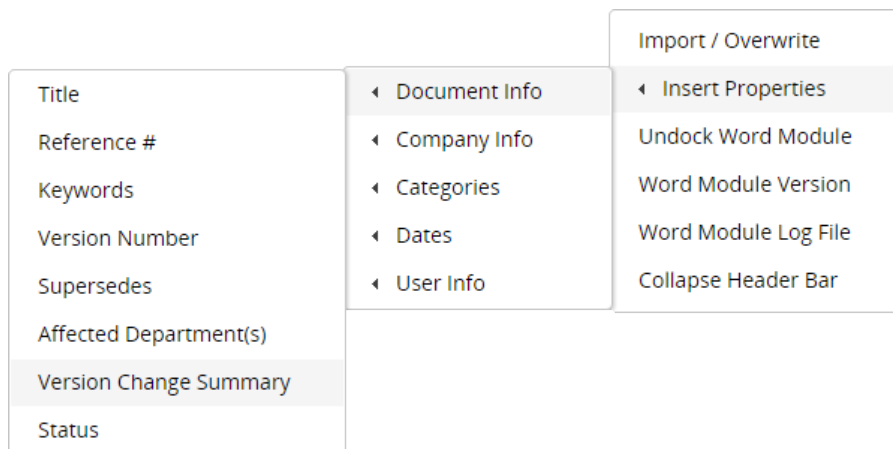

[TABLE OF CONTENTS FOR DOCUMENT PROPERTY DETAILS](#)

## Version Change Summary

Location on **Insert Properties** menu:

*When using Office Online Module*

**When using WordModulePlus**

Example of an inserted version change summary:

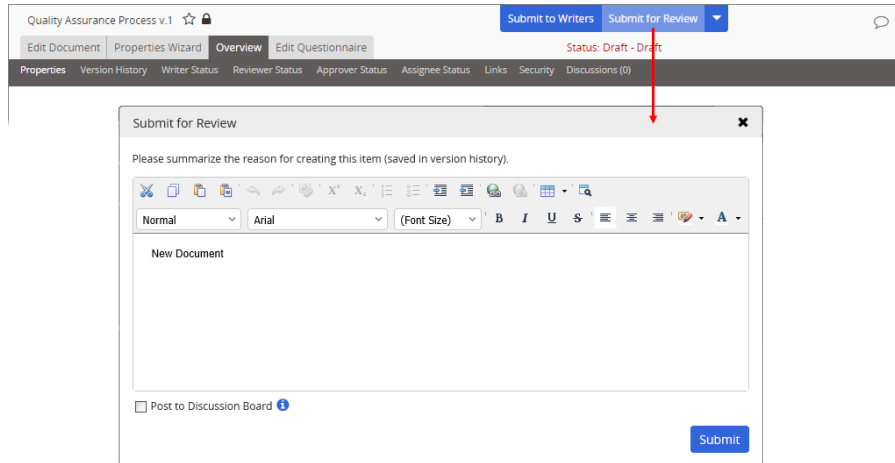

**Note:** The document owner can, optionally, enter a version change summary when taking any action that moves the document out of Draft status, such as when sending the document to Review or Approval. If you are creating the first version of a document and it is still in Draft status, the inserted field will contain "Not Set."

NAVEX Global

Travel Policy

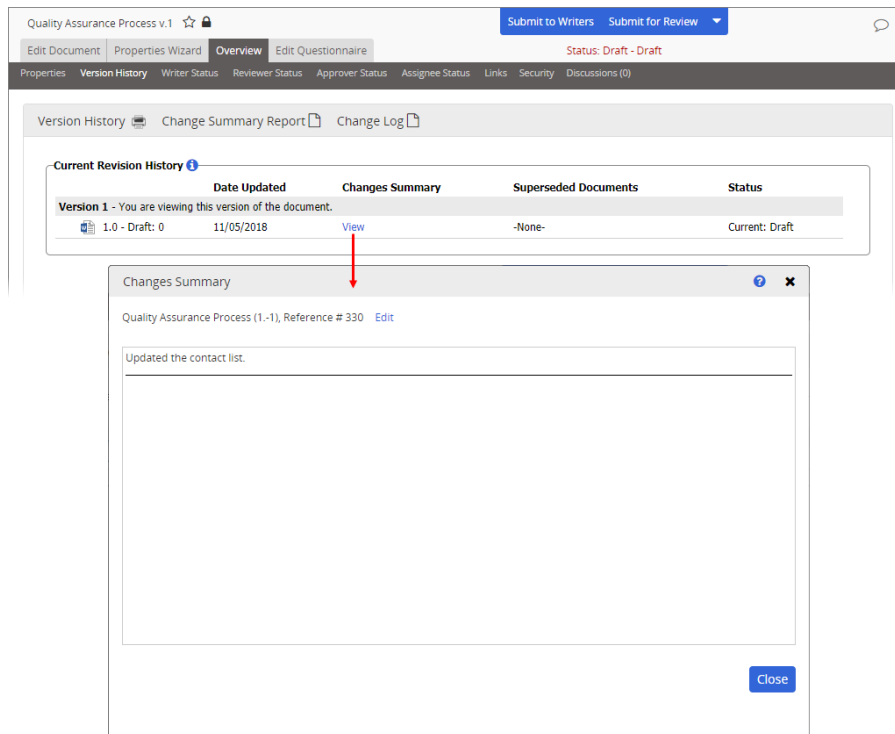

Document Details	
Version	1
Reference #	302
Keywords	expense, entertainment, mileage
Supersedes	v.1 Travel and Entertainment Guidelines
Affected Departments	Administration, Human Resources
Version Change Summary	Updated the contact list.
Status	In Review

Source: When a document owner creates a new version of a document and then submits it to Review or Approval, he or she has a chance to specify the changes made in the new version. If the document owner does not specify changes, the text "New Document" or "New Version" appears by default. **(Properties Wizard > Departments & Categories > Departments)**

When it changes: The document owner or administrator can change the version change summary only if the document is sent back to Draft and then resubmitted to Review or Approval. An administrator can edit the change summary in any active (unarchived) document.

Where to view: The version change summary you insert will be the same as the one displayed in the Overview. (**Overview > Version History > View** (in **Changes Summary** column))

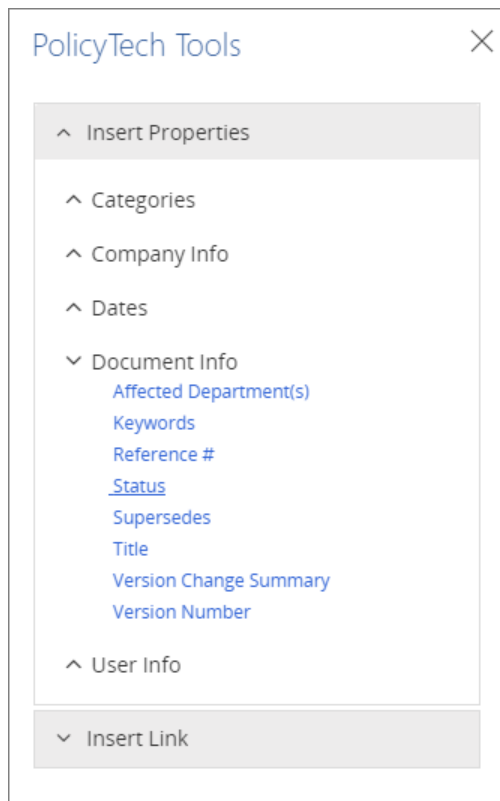

[TABLE OF CONTENTS FOR DOCUMENT PROPERTY DETAILS](#)

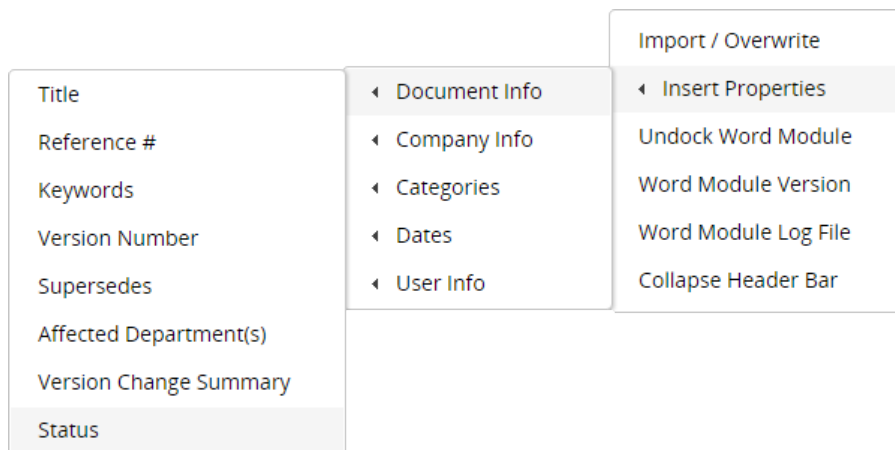

**Status**

Location on **Insert Properties** menu:

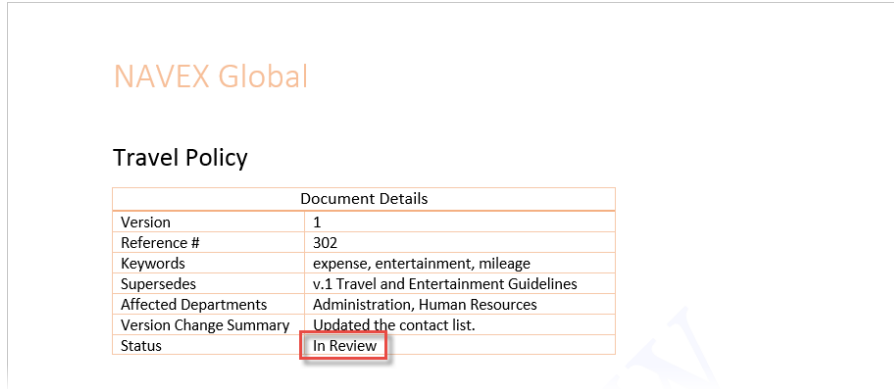

*When using Office Online Module*

*When using WordModulePlus*

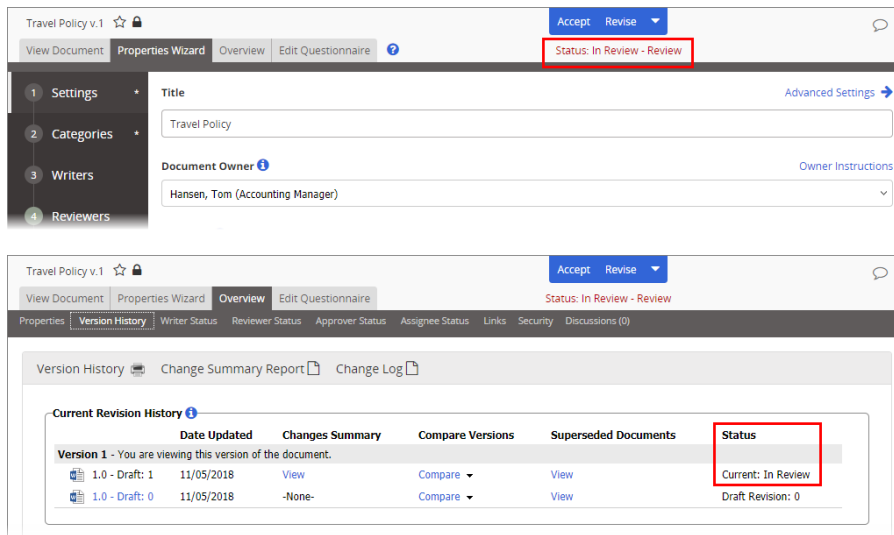

Example of an inserted status:

Source: The status is determined by the workflow step the document is currently in. Possible statuses include Draft, Collaboration, Review, Approval, Pending, Published, and Archived.

When it changes: A document's status changes whenever it is moved from one workflow step to another. This can be done manually, such as when a document owner submits a document to Review, or automatically, such as when a document is moved to Approval once all assigned reviewers accept the document.

Where to view: The status you insert will be the same as the one displayed at the top of the document window and in the **Version History** page. (**Overview > Version History**)

### Descriptions and Value Description

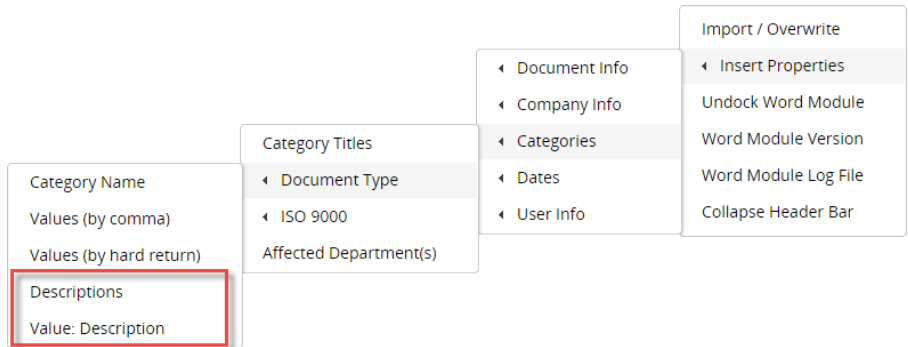

A value is an assigned subcategory under a top-level category. When setting up PolicyTech, an administrator can include subcategory descriptions. The **Descriptions** option inserts only the subcategory description, while the **Value: Description** inserts both the subcategory's name and its description.

Location on **Insert Properties** menu:

*When using Office Online Module*

**When using WordModulePlus**

Example of inserted subcategory description (**Descriptions** option):

NAVEX Global

Audit Procedures

Document Details	
Version	1
Site	Corporate Headquarters
Affected Departments	Accounting
Category	Sarbanes-Oxley Guidelines
Subcategory	Rule 303
Subcategory Description	Improper Influence on Conduct of Audits

Example of inserted descriptions, including subcategory descriptions (**Value: Description** option):

NAVEX Global

Audit Procedures

Document Details	
Version	1
Site	Corporate Headquarters
Affected Departments	Accounting
Category	Sarbanes-Oxley Guidelines
Subcategory: Description	Rule 303: Improper Influence on Conduct of Audits

Source: An control administrator can enter descriptions while creating categories. (**System Settings > Content Setup > Categories > New Subcategory** or **Edit Subcategory > Description**)

Edit Subcategory

Name: Rule 303

Constraints:  Do not allow content to be assigned to this category

Reference ID: Rule 303

Description: Improper Influence on Conduct of Audits

Save

When it changes: The administrator can change the category descriptions anytime.

Where to view: The category descriptions you insert will be the same as those displayed when assigning a category in the **Properties Wizard**. (**Properties Wizard > Categories > [category name] > [subcategory name]**)

## Publication Date

Location on **Insert Properties** menu:

*When using Office Online Module*

**When using WordModulePlus**

Example of an inserted publication date:

**Note:** Until a document is published, the inserted field contains "Not Approved Yet."

NAVEX Global

Travel Policy

Document History	
Version	1
Date Created	09/27/2016
Date Approved	09/28/2016
Date Published	09/28/2016
Date Archived	Not Archived Yet
Last Periodic Review Date	09/28/2016
Next Periodic Review Date	09/28/2017
Original Creation Date	No Date Set
Date Last Modified	09/28/2016

Source: The publication date is typically the same as the approval date, because, by default, a document is published at the same time it is approved. However, the document owner can set a specific publication date. If the publication date is later than the approval date, the document remains in Pending status until the publication date.

When it changes: Each version of a document has its own publication date, which does not change.

Where to view: The publication date you insert will be the same as the one displayed in the Overview. (**Overview > Properties**)

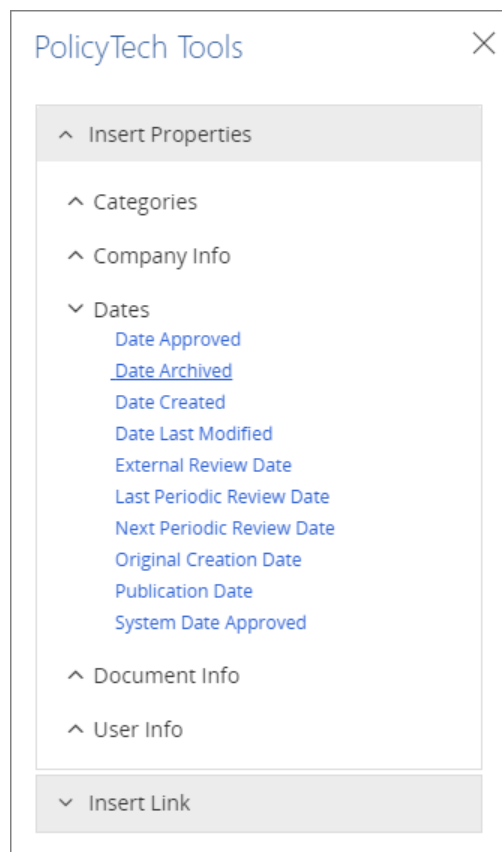

The screenshot shows the 'Overview' tab of a document titled 'Travel Policy v.1'. The status is 'Approved - Published'. The 'Properties' section is expanded, showing various fields. The 'Date Approved' field is '06/24/2016', and the 'Publication Date' field is also '06/24/2016', which is highlighted with a red box. Other fields include 'Business Title' (NAVEX Global), 'Title' (Travel Policy), 'Version' (1), 'Reference #' (291), 'Date Created' (06/24/2016), 'Date Submitted' (06/24/2016), 'Next Review Date' (03/01/2020), 'Review Interval' (12 month(s)), 'Reviewed with no changes' (Corporate Headquarters: Hansen, Tom (Accountant)), 'Date' (03/01/2019), 'Owner' (Corporate Headquarters: Hansen, Tom (Accountant)), and 'Content Creator' (Corporate Headquarters: Hansen, Tom (Accountant)).

[TABLE OF CONTENTS FOR DOCUMENT PROPERTY DETAILS](#)

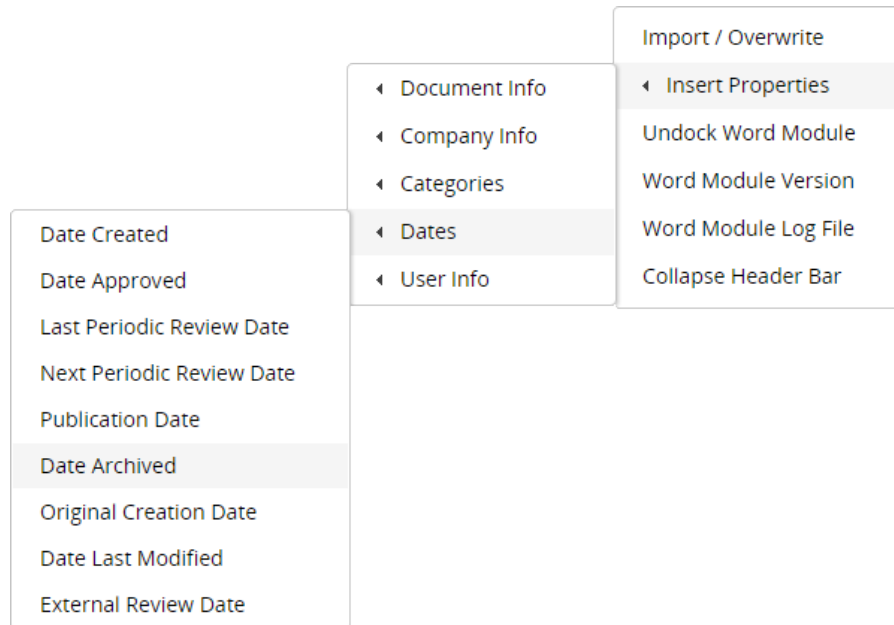

## Date Archived

Location on **Insert Properties** menu:

*When using Office Online Module*

*When using WordModulePlus*

Example of an inserted archive date:

NAVEX Global

Travel Policy

Document History	
Version	1
Date Created	09/27/2016
Date Approved	09/28/2016
Date Published	09/28/2016

### User Info Fields

[Common User Info Properties](#)

[Document Creator and Document Owner](#)

[Writers, Reviewers, Approvers, and Assignees](#)

[Actual Approvers](#)

[Security](#)

### Common User Info Properties

With almost all **User Info** options you can insert one of the following document properties:

Property	Example
Full Name (F L)	Susan Howard
Full Name (L, F)	Howard, Susan
Job Title	Administrator
Name & Title	Howard, Susan (Administrator)
Department	Administration

**Note:** When there are multiple values for any of the properties in the table above, they are always listed alphabetically. This means that the order of values listed for **Full Name (F L)** most likely won't correspond to the order of **Job Title** or **Department** lists.

When inserting writer, reviewer, approver, assignee, and security properties, you also have the option to include information about groups, as shown below.

**Note:** When including specified or all users with group names, you have the same user information options as shown in the table above. For "Group Names and Specified Users" and "Group Names and All Users" in the table below, the examples are for when **Name & Title** are selected.

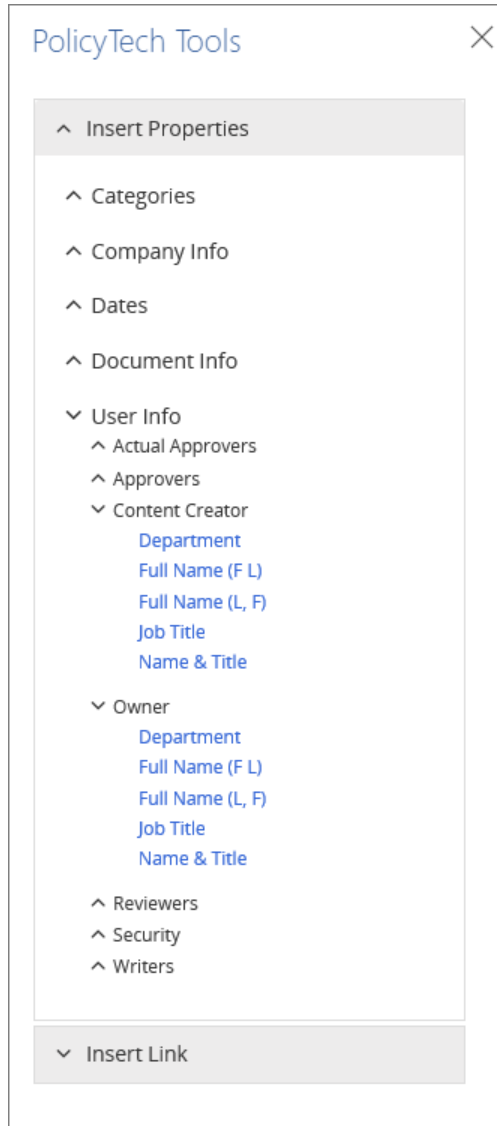

Property	Example
Group Names Only	Managers, Officers
Group Names and Specified Users	Managers, Officers, Brad Thomas (Director of Operations), Darren Breen (Personnel Manager), Teresa Monson (Chief Operations Officer), Tom Hansen (Accounting Manager)
Group Names and All Users	Managers, Officers, Alice Lavin (Manager), Anne Jones (Chief Finance Officer), Brad Thomas (Director of Operations), Carol Benton (Environmental Control Manager), Darren Breen (Personnel Manager), Douglas Johnson (Chief Executive Officer), Edward Gleeson (Manufacturing Manager), Fred Wright (Software Development Manager), John Farnsworth (Information Systems Manager), Teresa Monson (Chief Operations Officer), Tom Hansen (Accounting Manager)

## Writers, Reviewers, and Approvers

Locations on **Insert Properties** menu:

*When using Office Online Module*

**When using WordModulePlus**

Example of inserted writer, reviewer, and approver properties:

**Note:** Only approvers are required for a document. If a document has no writers or reviewers assigned, an inserted field for one of these roles contains "Not Assigned."

NAVEX Global

Travel Policy

Document Details	
<b>Assignments</b>	<b>Name (Job Title)</b>
Document Creator	Howard, Susan (Document Control Administrator)
Document Owner	Darren Breen (HR Director)
Writers	Kathy Saunders (Payroll Clerk)
Reviewers	Brad Thomas (Director of Operations), Carol Benton (Environmental Control Manager), Susan Howard (Document Control Administrator)
Approvers	Anne Jones (Chief Finance Officer), Douglas Johnson (Chief Executive Officer)

Source: The document creator or owner assigns writers, reviewers, approvers, and assignees while creating a document.

The screenshot shows the 'Travel Policy v.1' document in the 'Properties Wizard' section. The 'Writers' tab is selected in the left-hand navigation menu. The main area displays a list of potential assignees for the 'Writers' role, with a search bar and a 'Select From' dropdown set to 'Corporate Headquarters'. The list includes names and job titles such as 'Chen, Jodi (Compliance Officer)', 'Christenson, Robert (Administrator)', 'Gatos, Will (Chief Information Officer)', 'Howard, Susan (Administrator)', 'Johnson, Douglas (Chief Executive Officer)', 'Jones, Anne (Chief Finance Officer)', and 'Monson, Teresa (Chief Operations Officer)'. A 'New Level' button is visible below the list. At the bottom of the interface, there are buttons for 'Back', 'Save', 'Edit Document', and 'Next Step'.

When it changes: The document owner or administrator can change the writer, reviewer, and approver assignments anytime in any active (unarchived) document.

Where to view: The document writer, reviewer, and approver names you insert will be the same as those displayed in the Overview. (**Overview > Properties**)

Role	Name (Corporate Headquarters)	Status
Owner	Hansen, Tom (Accountant)	
Content Creator	Hansen, Tom (Accountant)	
Assigned Proxy Author		
Writers	Howard, Susan (Content Administrator)	Upcoming Task
Reviewers	Breen, Darren (Personnel Manager)	Upcoming Task
	Chen, Jodi (Compliance Officer)	Upcoming Task
Approvers	Johnson, Douglas (Chief Executive Officer)	Upcoming Task
	Jones, Anne (Chief Finance Officer)	Upcoming Task
	Monson, Teresa (Chief Operations Officer)	Upcoming Task

## [TABLE OF CONTENTS FOR DOCUMENT PROPERTY DETAILS](#)

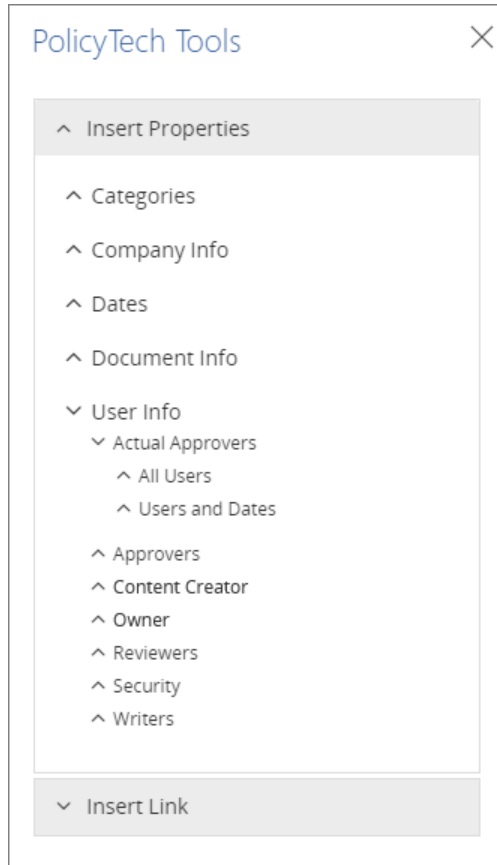

### Actual Approvers

The actual approvers of a document may be different than the assigned approvers. For example, if an administrator sets a document as approved before any approvers complete their approval tasks, only the administrator's name will be inserted as the actual approver. For another example, if a document owner assigns three approvers to a document but only requires one approver, the actual approver will be the first of the three assigned approvers to accept the document.

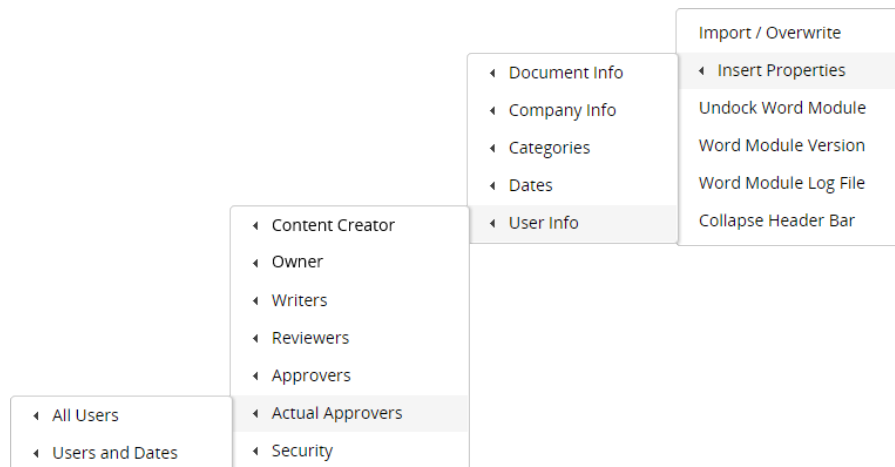

When inserting information about actual approvers, if you choose a **Users** and **Dates** option, the approval date is included in parentheses after the inserted information (for example: Susan Howard (09/29/2016)).

Location on **Insert Properties** menu:

*When using Office Online Module*

**When using WordModulePlus**

Example of inserted actual approvers properties:

**Note:** An inserted Actual Approvers field will contain the text "No User" until after the document is approved.

Document Details	
<b>Assignments</b>	<b>Name (Job Title)</b>
Document Creator	Howard, Susan (Document Control Administrator)
Document Owner	Darren Breen (HR Director)
Writers	Kathy Saunders (Payroll Clerk)
Reviewers	Brad Thomas (Director of Operations), Carol Benton (Environmental Control Manager), Susan Howard (Document Control Administrator)
Approvers	Anne Jones (Chief Finance Officer), Douglas Johnson (Chief Executive Officer)
Actual Approvers	Susan Howard (Document Control Administrator)

Source: Actual approvers are either approvers assigned to the document, an administrator, or a document owner who has been assigned the **Approves Own Documents** role.

When it changes: Once a document has been approved, inserted actual approvers properties cannot be changed.

Where to view: Actual approvers are only designated for documents in the post-approval statuses (Pending, Approved, and Archived).

If the document was approved by one or more assigned approvers, the actual approvers will be the same as or a subset of (in the case where less than the total assigned approvers are required) those listed in the **Properties** page (**Overview > Properties**) and **Approver Status** page (**Overview > Approver Status**). The actual approvers will be those with the word **Accepted** next to their names, along with the acceptance date, in the **Properties** page, and those in the **Approver Status** page with  by their names.

<b>Reviewers</b>	Corporate Headquarters: Breen, Darren (Personnel Manager) Skipped Corporate Headquarters: Chen, Jodi (Compliance Officer) Skipped
<b>Approvers</b>	Corporate Headquarters: Johnson, Douglas (Chief Executive Officer) Accepted (03/14/2019 10:18 AM) Corporate Headquarters: Jones, Anne (Chief Finance Officer) Skipped Corporate Headquarters: Chen, Jodi (Compliance Officer) Accepted (03/14/2019 10:17 AM)
<b>Categories</b>	Document Type

If the document was set as approved by either an administrator or a document owner with the **Approves Own Content** role, the actual approvers will be a combination of assigned approvers who have already accepted the document, if any, and the administrator or document owner who set it as approved. A complete list of actual approvers is shown in the **Approver Status** page. (**Overview > Approver Status**)

**Note:** When a document is set as approved, one or more of the assigned approvers will have the word **Skipped** after their names in the **Properties** page and  by their names in the **Approver Status** page.

You can also see which of the listed approvers set the document as approved in the **Change Log** (**Overview > Version History > Change Log**).

Date	Action	Resulting Step	User	Description

## Security

The **Security** option applies only when a document is set to **Restricted - High** or **Restricted - Severe**. With one of these security options selected for a document, only certain users are able to view the document in its various workflow stages (see [Adjusting Security Settings for a Document](#) for details). When selecting one of the restricted security options, the document creator has the option of selecting additional users who will have the same permissions as those users automatically granted permissions by the selected security level. The names, job titles, departments, or group names (depending on your selection) of these other allowed users will be displayed in an inserted **Security** property field.

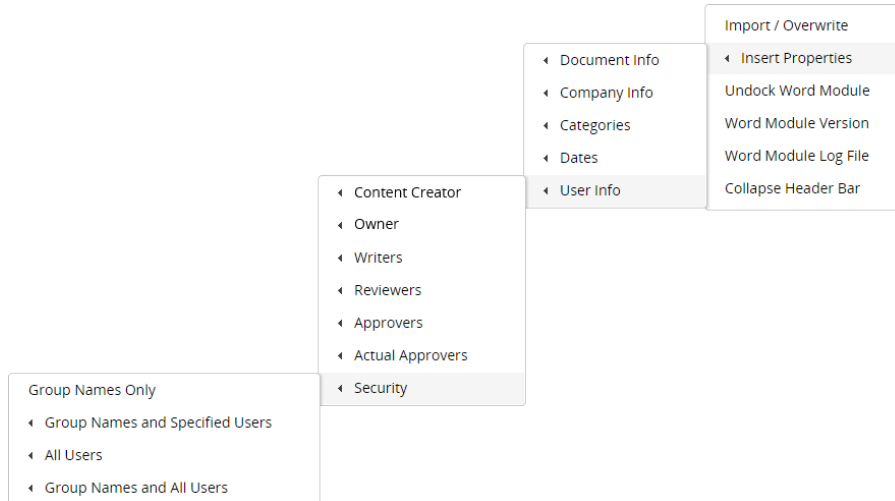

Location on **Insert Properties** menu:

*When using Office Online Module*

*When using WordModulePlus*

Example of inserted security properties:

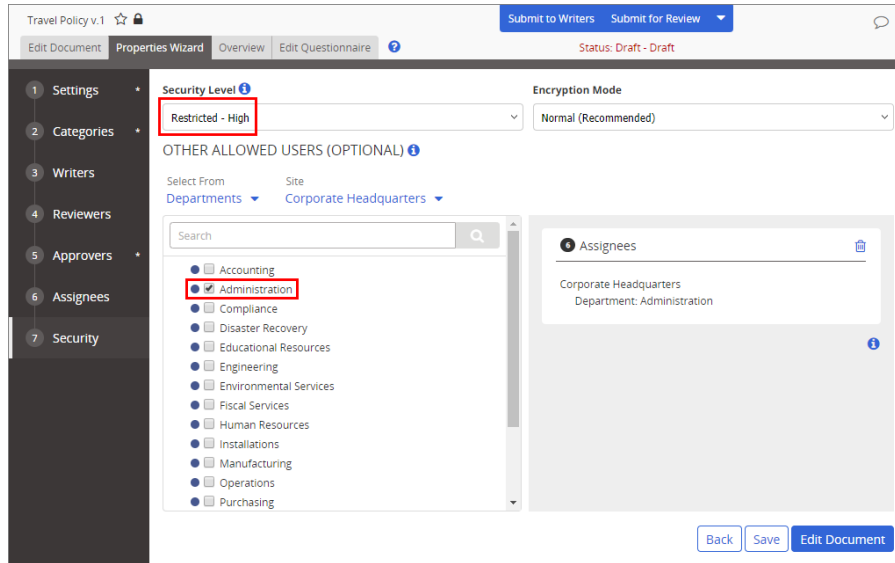

**Note:** Assigning additional users restricted security permissions is optional. If no additional users are assigned, the inserted field contains "Not Assigned."
