

Properties Wizard Setup

Define document properties in 7 steps.

1. Settings (Required).

Assign a title, owner, and template and adjust optional settings as necessary.

The screenshot shows the 'Settings' step of the Properties Wizard. The title is 'Family and Medical Leave'. The document owner is 'Hansen, Tom (Accounting Manager)'. There is a checkbox for 'Create task for owner' and a link to 'Write task instructions here...'. The document template is '-- Blank Word Document --'. The version number is '1'. There is a link for 'Optional Settings'.

2. Departments (Required) & Categories (May be required or optional).

Assign the departments the document applies to and assign categories to and assign categories to group with like documents.

The screenshot shows the 'Categories' step of the Properties Wizard. It has two sections: 'First: Choose which sites can access this document' and 'Next: Choose where this document will be displayed'. Under 'Next', there are 'Required' and 'Optional' categories, with 'OSHA' listed under the optional category.

3. Writers (Optional).

Select writers to help write the document.

4. Reviewers (Optional).

Select reviewers to check content and writing style.

5. Approvers (Required).

Select approvers who determine if the document is ready for publication and take ultimate responsibility for content and correctness.

The screenshot shows the 'Approvers' step of the Properties Wizard. It displays a list of approvers with checkboxes. The list includes: Christenson, Robert (Document, Control Administrator); Gatos, Will (Chief Information Officer); Howard, Susan (Document, Control Administrator); Johnson, Douglas (Chief Executive Officer); Jones, Anne (Chief Finance Officer); and Monson, Teresa (Chief Operations Officer). The 'Approvers' checkbox is checked.

6. Readers (Optional).

Assign those who must attest to reading and understanding the document.

7. Security (Optional).

If necessary assign a restricted security level to limit document access.

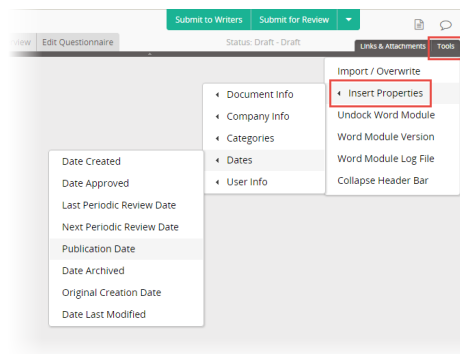

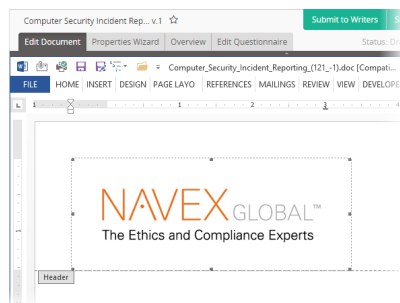

The screenshot shows the 'Security Level' step of the Properties Wizard. It displays a list of security levels with checkboxes. The list includes: 'All Users' (Users can view this document), 'Restricted - High' (Users can view this document), and 'Restricted - Severe' (Users can view this document). The 'Restricted - High' checkbox is checked.

Note: To support using PolicyTech on multiple devices, the user interface is responsive to screen and window size. In smaller spaces, labeled options become icons or are moved to remain accessible.

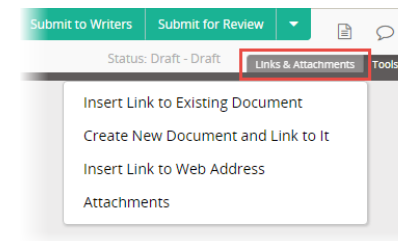

The screenshot shows the summary step of the Properties Wizard. It displays the title 'Family and Medical Leave', the document owner 'Hansen, Tom (Accounting Manager)', the document template '-- Blank Word Document --', and the version number '1'. There are buttons for 'Reapply' and 'Preview'. The reference number is '297'. There is a link for 'Optional Settings'.

Edit Document Content

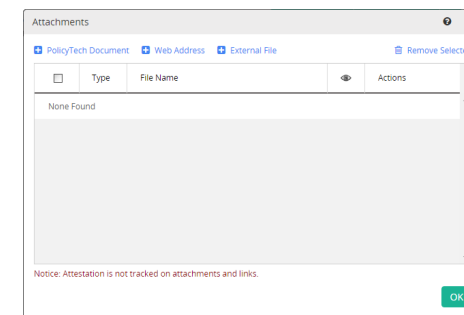

- 1. Use Word or Excel.** Click **Edit Document** to use the full functionality of Word or Excel inside PolicyTech. The template selected in step 1 of the **Properties Wizard** controls the initial content and look of the document and some document properties.
- 2. Upload a File.** If this document's template is an **Upload a File** type, use **Browse** to find and select a file, and then click **Upload File**.
- 3. Import/Overwrite.** Selecting this option completely overwrites the current document content with the imported file's content.
- 4. Insert a Properties Field.** From the **Insert Properties** menu under **Tools**, you can insert automatically populated data fields containing document properties, such as the document owner or approval date.

- 5. Link to a Document or Website.** Place the cursor where you want a link inserted, click **Links & Attachments**, click a link type and follow the prompts.

- 6. Attach a File.** Click **Links & Attachments**, click an attachment type and follow the prompts. An attachment is only accessible from the document containing the link.

- 7. Start a Discussion.** You can create and participate in a discussion about this document to reduce the number of review cycles.

- 8. Finish.** You can save and close the document and finish it later. When you're done with the draft submit it to writing, review, or approval. You may also have the permission to set the document as approved.

Handle "Track Changes" Feedback

You can quickly view feedback from reviewers or approvers.

1. Reviewer or Approver Feedback. If a reviewer or approver chooses to revise the document, it is sent back to you with an explanation.

2. Track Changes. Changes in a revised document are marked up in colored font. Hover the cursor over a change to see who made it.

3. Accept or Reject a Change. Right-click a marked change and click **Accept** or **Reject**.

4. Comments. Reviewers and approvers have the option of inserting comments when revising a document. After reading a comment, right-click it and click **Delete Comment**.

Do a Periodic Review

You may be asked to review a document at specified intervals.

1. Periodic Review Task. At a designated time before a periodic review comes due you receive a task assignment in a notification email and in **My Tasks**.

2. Review the Document. Check the document to see if changes are needed. If so, click **Create New Version** and click **Yes**.

3. Make Changes. The document opens in draft mode where you can make changes to content, **Properties Wizard** settings, attachments, and the questionnaire.

4. Submit. When finished updating, submit the new version for review or approval.

5. No Revision Necessary. If you determine that no changes are needed, instead of creating a new version, click **Options** and click **No Revision Necessary**, which resets the review date for another period.
